Hospitals and Organ Transplant Centers Alleged Providing Organs from Living Falun Gong Practitioners

Reports Hospitals and Organ Transplant Centers Alleged Providing Organs from Living Falun Gong Practitioners has been updated.

August 21, 2008

WOIPFG Report: List of Hospitals and Transplant Centers in China Confirmed by WOIPFG to Harvest Organs for Transplant Operations from Living Falun Gong Practitioners

The World Organization to Investigate the Persecution of Falun Gong (WOIPFG) tracks and investigates reports of transplant operations in China where the organ donors are believed to be Falun Gong practitioners, custom-killed for their organs. Many cases have been investigated since news of these organ harvesting atrocities first came to light in 2006, with the grim results confirming that the allegations of illicit and illegal organ harvesting are true.

Many of those killed were Falun Gong practitioners who refused to reveal their identities to police when arrested. Hospital records report such donor identities anonymously, with numbers used in place of names. The evidence suggests that such illicit transplants occurred at the highest rate sometime around 2003. Information about such killings is much harder to come by today, as the cloak of secrecy has been tightened. Nevertheless, the organ harvesting atrocities continue to this day.

Renowned Canadian human rights lawyer David Matas and Canada's former Secretary of State for Asia-Pacific David Kilgour conducted an in-depth independent examination of the evidence. (Complete report <http://organharvestinvestigation.net>) Their conclusion after exhaustive analysis:

"We believe that there has been and continues today to be large scale organ seizures from unwilling Falun Gong practitioners. We have concluded that the government of China and its agencies in numerous parts of the country, in particular hospitals but also detention centres and 'people's courts', since 1999 have put to death a large but unknown number of Falun Gong prisoners of conscience. Their vital organs, including kidneys, livers, corneas and hearts, were seized involuntarily for sale at high prices, sometimes to foreigners, who normally face long waits for voluntary donations of such organs in their home countries."

Please do what you can to help stop these atrocities. Encourage the media to report the situation. Ask your elected officials to demand that Chinese authorities put an immediate end to organ harvesting atrocities, and to allow independent investigators to enter China to document what is and has been happening. Write to the United Nations, NGOs and others who you believe can help. When enough of us stand up and cry for justice, we will be heard and the atrocities will end. WOIPFG has compiled a complete record of evidence gathered. Please contact WOIPFG directly for more information.
List of Hospitals and Transplant Centers

This report presents a list of hospitals and organ transplant centers confirmed by WOIPFG to be involved in organ harvesting from living Falun Gong practitioners. Many more hospitals and transplant centers are believed to participate, and investigations are underway to confirm.

For each hospital listed here, the report below gives the address, driving directions, a brief description of what is known about the facility, and a transcript of the telephone call (translated from Chinese) between WOIPFG investigators and hospital officials. These telephone calls provide a great deal of evidence. Surprising as it seems, hospital officials were quite open about the source of the organs when these calls were made. The investigators making the calls posed as parties interested in arranging organ transplants.

The hospitals included in this report are:

Telephone Message 1

A: WOIPFG Investigator

B: Organ broker representative

A: Hello, Are you Xiao Chen?

B: Yes,

A: Are you Chen Qiang?

B: Yes, Speak

...

A: Hi, how are you? Last time I talked to you about contacting the kidney supply sources. How is it going?

B: You meant that, contacting the prison, or "that something"?

A: Yes, the source of Falun Gong practitioners, I meant.

...

A: Alright, besides it, how could you be so sure he (the source) was a Falun Gong practitioner, did you find out for sure?

B: How to positively identify as a Falun Gong practitioner, well, when the time comes --- when the time comes our side, our Boss will have people showing you information, you know, he will show you the information and data, you can be sure.

Fax: 001-347-402-1444

A: Oh, that's fine.

B: They have all the information and data, even including individual resumes.

A: Oh, so there were more cases around 2003?

B: Of course. There were tons of Falun Gong's on file around 2003.

A: That is what I mean; it was much easier for you to get the organs for the operation at that time, right?

B: Ah, since 2003, I tell you the facts, I handled two cases in 2003, and I started in 2003.

A: I heard from others that, several years ago, they arrested many Falun Gong practitioners who did not give out their names after they were detained, quite a few, they detained them underground, the kind of place that was neither a prison nor a labor camp...

B: You are talking about what's going on around 2003 time frame. I knew exactly what you were talking about. They did not reveal their name starting from 2003.

B: Last time I made some inquiries by calling around, --- Falun Gong --- Later I contacted that site by phone, I asked my boss to call him, and he said they needed to obtain from inside there.

A: Oh.

B: Now they were all transferred to remotely located prisons, they need to get some from there, getting from there means the money, the money must be paid mostly to people over there, you know.

A: But I tell you, on the other hand, right now it is very stringent, and they should not ask too much. You know that several years ago, they secretly detained many Falun Gong practitioners who went to appeal but did not provide their names. There was no records, no registrations.

B: Yes. Over here, like over there it is quite normal, you know. He --- did not --- did not give out his name. Let me tell you, even if he did not give out his name, he would leave a code name, understand?

A: Yes.

B: Such people who did not give out names all had code numbers. I know this better than you. They had code number 8, they had ---. All had codes in the record file.

A: Oh, so it is like this. If they only had the codes, they should also have the real names in the record. These should be in there, right?

B: If they could not find out the real names, they just left code numbers, you know.

...

A: Oh, OK. Just one more question.

B: We... I tell you. To tell you the truth, what we have here all belong to this kind. We have connections with government officials. There are connections to high ranking officials. You know, I will show you such material even if you don't ask me for it. You know.

A: Oh, sure. Oh. You are saying that the policemen, the policemen over there...

B: This... I cannot tell you anything about that.

A: OK.

B: I will not tell you too much about our business. Whatever is going on high up on our side, there are rules for everything, you know.

...

A: OK.

B: I...I...I cannot, dare not say anything, you know.

A: Yes. Can I meet him before the organ transplant?

B: Sure, no problem about that...

A: OK. Ah... There is one more thing that I don't quite understand. That is to say, these people are detained in forced labor camps or prisons. Normally, I know that they are in the police station ...

B: Right now, there are fewer in the forced labor camps.

A: Really, where are they usually detained now?

B: Right now they are somewhere in the prisons. They are in prisons now. Normally, they were sent away from Beijing if they were arrested in Beijing. If they were arrested in other places, they were detained in local prisons. Normally they are sentenced to 10 years, 8 years, or something like that. There are many such cases.

A: Ah, so it's not detention centers, nor labor camps, right?

B: It is in detention centers, it is in detention centers. After some Falun Gong practitioners were sentenced, with some sentenced to more than 10 years. They were transferred to other places for sure, you know.

A: Ah.

B: Right now it's impossible to leave it to you. They cannot give you the material at this time, you know.

...

B: After such a thing is done, I tell you. It is not that I want to tell you something. Oh, some details such as the names of some people, I cannot tell you, you know.

A: Yes.

B: Like our boss, like the connections to the detention centers, I cannot tell you. This, when the time is right... you... Let me tell you in advance... making sure... You know, such as these names I cannot tell you, you know... Such confidential things I cannot tell you. Otherwise, we cannot do business in the future, you know.

A: I understand what you said. I only want to ask you two things. I want to know these things. First I want to see this person. I want to know where he came from. I want to make sure that he is really a Falun Gong practitioner. Another thing, the doctor who is going to get the kidney, I want to know if he really has the skills, not just an ordinary policeman. It is not acceptable if the quality is not guaranteed.

B: That's for sure. What you said I cannot take casually. How can it be casual? We have the contacts. Since we are doing this business, we have people in every department. How can you get it done without connections?

A: Yes. I am just...

B: Such operation is like a supply line, you know.

...

A: Can you tell me how can I find you?

B: Do you know where the No. 307 Hospital of the Chinese People's Liberation Army is?

A: No problem. I can find it. Where specifically within the No. 307 Hospital?

B: You don't need to go to the in-patient Department, just show up at the entrance of the hospital.

A: OK.

B: Do you know where the No. 307 Hospital is located?

A: Yeah. Since we never met before, we should have a contact sign.

B: Don't worry about it. When you arrive at the hospital entrance, call me. I will be upstairs, so I can spot you. I can recognize you when you show up.

Brief introduction of the Organ Transplant Research Center at the General Hospital of the Chinese People's Armed Police Forces:

The Organ Transplant Research Center at the General Hospital of the Chinese People's Armed Police Forces was originally set up in 2001 as the Liver Transplant Center of the hospital. It was jointly established by the General Hospital of the Chinese People's Armed Police Forces and the Oriental Organ Transplant Center. It is the largest liver transplant center in Beijing, specializing in the clinical and research field of liver transplants. The center is led by Professor Shen Zhongyang, a renowned Chinese liver transplant specialist. Under him is a team of professional liver transplant experts, including surgeons, ICU doctors, liver disease doctors, anesthesiologists, pathologists and nurses. About 200-300 liver transplants are performed in the center each year.

The Oriental Organ Transplant Center (OOTC) claimed: Up to 2004, 2,248 accumulated organ transplants had been performed at OOTC. Among them, there were on average 300 kidney transplants and 600 liver transplants per year. Their yearly liver transplant volume broke the world record held for nearly 10 years by the Pittsburg University Organ Transplant Center.

At the OOTC 2005 Year End Review Conference: In the whole year of 2005, 647 home-position liver transplants, and 436 kidney transplants were performed in the center. In the category of multiple organ transplants: 21 combined liver-kidney transplants and 2 pancreas-kidney transplants were completed.

Orient Organ Transplant Center, "2005 Year End Review Conference", January 5, 2006
<http://www.ootc.net/homepage/filedocdetail.aspx?fileno=494>

According to information revealed by the Korean Daily, the Tianjin No. 1 Central Hospital established a record of 44 liver transplants in one week in December 2004. Based on 5 working days per week, the daily average was 8.8 liver transplants.

Boxun News reported on March 26, 2006 "Upsurge of Koreans to China for organ transplants: Where did the organ come from? [Part 1, 2 and 3]
<http://www.peacehall.com/news/gb/china/2006/03/200603262046.shtml>

Center Director Professor Shen Zhongyang: He performed 4 liver transplants in 4 days; he supervised 3 liver transplants and 3 kidney transplants in one day; he successfully performed 4 liver and 6 kidney transplants in two days. He also successfully directed 2 liver and 6 kidney (a total of 8 organs) transplants in one day. By March 17, 2005, leading the world, Professor Shen Zhongyang completed his 1600th liver transplant. He also went to over 40 hospitals in 10 provinces and cities in China to provide consultations on transplants, and help promote liver transplants.
<http://www.ootc.net/excellentteam2.aspx>

Some patients' family members revealed to Fenghuang Weekly that as many as 24 transplants of livers and kidneys had been performed in this center in one day.

B: Greetings. This is the No. 1 Adjunct Hospital of Shanghai Jiaotong University.
A: Hello. May I have your number of the liver transplant center?
B: Please wait while we are connecting you...
.....
C: Let me tell you, it should be OK to have a liver transplant in your case.
A: I just want to know how long we have to wait.
C: We have supplies everyday. Today for example, we are performing transplant surgery.
A: Well, I mean not just a fresh one. We need one from a live human body...
C: Sure, the organs we use are all from live persons.
A: What?
C: They are all live organs! Ours are the best.
A: Then I want to know how long you have been in operation. I want to find out your skill level.
C: We've done this for 5-6 years. We have performed such kind of operation for 5-6 years already.
A: Then how many do you do per month?
C: We have done 400 to 500 cases.
A: What? 400 - 500?
C: Yes, that's right.
A: So you do 400 to 500 transplants every year?
C: No. This year we just started after the Chinese New Year, but so far we've done more than 10 cases, 20 to 30 cases

Brief Introduction of the Liver Transplant Center:

Transplant Center Director Zang Yunjin: Physician Member of the International Liver Transplantation Society (ILTS), Associate Director of the Chinese Medical Society's Shandong Province Organ Transplant Professional Committee. In September 2001, he joined the Tianjin No. 1 Central Hospital Organ Transplant Department and the Oriental Organ Transplant Center after returning from studying abroad. He performed liver transplants under the guidance of Professor Shen Zhongyang. He is now fully capable of independently performing transplant operations. He also successfully supervised over 100 liver transplant cases at many hospitals in Hebei, Henan and Shandong provinces. He joined the Liver Transplant Institute at the General Hospital of the People's Armed Police Forces in January 2005, performing liver transplants. He is the Deputy Director of the institute, as well as Physician-in-charge and a Professor. So far, he has completed more than 300 cases of liver transplants and participated in the once-more liver transplant, as well as the liver-kidney combination transplant.

B: Hello.

A: Hello. Is this the ward of the Shandong Qianfoshan Liver Transplant Center?

B: Yes.

A: I'd like to have a consultation...

B: Please wait. I'll get a doctor for you.

A: OK.

C: Hello.

A: Hi. I'd like to ask a few questions. How long have you performed liver transplants? Do you...

C: We've started since 2002.

A: From 2002 to present?

C: More than four years.

A: As for the liver supplies, usually how long do you keep them?

C: There is a rule of 12 hours. So far we haven't exceeded 12 hours. The ones we have are all pre-checked.

A: I heard that some livers come from Falun Gong practitioners. So I want to know if you have this type or not?

C: Um. You just need to come.

A: So you mean you have this type?

C: Well, let me tell you, you just come over...er... we will surely get more of this type in April and the number of those suppliers is gradually increasing now.

A: Why will there be more in April?

C: I cannot tell you that because it involves... it doesn't mean... Anyway, there is no need to explain this to you. This question can't be answered.

The Tongji Organ Transplant Research Institute at the Huazhong University of Science and Technology was the earliest established large scale multiple discipline research organization, engaging in organ transplant basic studies and clinical trials in China. It is now a major national laboratory belonging to both the Ministry of Education and the Ministry of Health.

At present, it's capable of 16 different types of demanding and difficult organ transplants, including heart, liver, kidneys, spleen, pancreas, as well as combined pancreas/kidney, liver/intestine transplants, and many abdominal area multi-organ transplants. Among them, close to 2500 kidney transplants were performed. Since the start of heart transplant plan in 2002, 12 successful cases have been completed.

Tel No.: 0118627-83662688 ext. Kidney Transplant Department (or Urological Surgery Department)
March 30, 2006

A: Hello. Is it the Wuhan Tongji Hospital?

B: Yes, it is.

A: Are you the Urological Surgery Department? We need to have a kidney transplant.

B: Yes, this is the Kidney Transplant Department.

A: When did you start the large volume of kidney transplantations?

B: We are the earliest place. We started a long time ago.

A: How many operations do you do each year?

B: Our hospital is the place where the largest amount of transplants have been done. In the whole Hubei Province area, our department is the most productive one. We've done a lot because we have ample organ supplies.

A: From a patient's perspective, a live kidney source is preferred. So we are looking for live organ transplantation from prisoners, for example, from those who practice Falun Gong. Is it possible?

B: Sure, it's not a problem.

A: So do you get enough supplies of live organs from prisoners such as those who practice Falun Gong?

B: Yes, sure, no problem. When you are ready, you can come over directly and we will discuss it in detail.

The Surgical Clinic of the Department of Urology has its own Kidney Transplant Center. Currently, it performs on an average 100 transplants annually. According to the introduction to the Center, its Chief Surgeon Dr. Rao Zuoxiang is an experienced and seasoned professional in the field of kidney transplants. Dr. Xie Sen, Associate Chief Surgeon and MD had been involved in surgical urology and transplant work for over 10 years, and he is very talented in the kidney transplant procedures. During the past few years his kidney and liver transplants between family members obtained a high degree of survival rate. <http://www.whzyy.net/show.aspx?id=655&cid=97>
