

追查迫害法輪功國際組織（追查國際）

World Organization to Investigate the Persecution of Falun Gong (WOIPFG)

To investigate the criminal conduct of all institutions, organizations, and individuals involved in the persecution of Falun Gong; to bring such investigation, no matter how long it takes, no matter how far and deep we have to search, to full closure; to exercise fundamental principles of humanity; and to restore and uphold justice in society.

Investigation Recording 2019-021

Date: March 13, 2019 (+ 86-371-66231417)

Subject(s): Doctor, Kidney Transplant, the First Affiliated Hospital, Henan University of Chinese Medicine

Summary

1. We've been doing kidney transplants, and do dozens of cases a year.
2. If it is fast, it will be a few weeks, or a month; if it is slow, it will be more than a year or two years. These are all possible.
3. Investigator: Where do your organs come from?
Doctor: They are from that ICU, from the monitoring rooms. They are from the brain-dead patients.
4. The brain-dead patients are from our hospital or other places.
5. As for the price, please ask the patient to come and discuss in detail!
6. Still Director Wang, Wang Guangce has been doing it.

Translation

Doctor: Hello!

Investigator: Hi, hello, is this the First Affiliated Hospital of Henan University of Chinese Medicine?

Doctor: Yes, who is this?

Investigator: Hello. I'm a doctor in Handan hospital. I want to send a patient for a kidney transplant. So I want to ask, do you still do a lot of kidney transplants?

Doctor: Yes, we do. You mean this patient hasn't had the surgery and wants to come for the tissue typing?

Investigator: Yes, yes, this is the situation, he suggested that I come to you, so I want to ask, does your hospital do a lot of kidney transplants?

Doctor: You say like ours? We do dozens of cases a year.

Investigator: Oh, your volume isn't up to 100 cases yet?

Doctor: No, no, it's not there yet.

Investigator: Oh, so if we go there, how long will it take for it to be done?

Doctor: That's hard to say. If it's fast, it can be a few weeks or a month. If it's slow, it can be more than one or two years.

Investigator: Oh, the wait time is not sure?

Doctor: Right, hard to say. It's not for sure, the results of his tissue typing are hard to say. We won't know if the tissue typing works until after the donor comes.

Investigator: Then, where do the donors come from?

Doctor: They come from that ICU, from this monitoring room, and they are from brain-dead patients.

Investigator: Are they usually from your own hospital? Are they your own brain-dead patients?

Doctor: Ah, some of them are.

Investigator: Oh, some are from your own hospital, so there are other places, right?

Doctor: Yes, yes.

Investigator: Oh, I see!

Doctor: Right.

Investigator: How much does it cost now? Approximately. Could you tell me about it, then I'll let the patient know.

Doctor: Please ask the patient to come and discuss that in detail!

Investigator: Oh, is Director Wang still doing it? Director Wang Guance?

Doctor: Yes.

Investigator: Oh, good, good.

Doctor: Okay.

Investigator: That's it, thank you.

Doctor: Well, okay, thank you.

Investigator: Goodbye! Goodbye!
