

追查迫害法輪功國際組織（追查國際）
World Organization to Investigate the Persecution of Falun Gong (WOIPFG)

To investigate the criminal conduct of all institutions, organizations, and individuals involved in the persecution of Falun Gong; to bring such investigation, no matter how long it takes, no matter how far and deep we have to search, to full closure; to exercise fundamental principles of humanity; and to restore and uphold justice in society.

Investigation Recording 2019-036

Date: April 1, 2019 (+86-87167390509)

Subject(s): Nurse, Kidney Transplant Inpatient Service, North Division, the First People's Hospital of Kunming

Summary

1. We do lots of cases here. But as for how long the wait time would be specifically, it's hard to say.
2. Investigator: Are there five or six hundred donors available at this hospital every year? Really so many?
Nurse: Yes.
3. The price varies from patient to patient. Let's talk about it when you come here.

Translation

Nurse: Hello.

Investigator: Hello! Is this Kunming No.1 People's Hospital?

Nurse: Yes. Who are you looking for?

Investigator: Oh, I have a relative who wants to get a kidney transplant done. I am from Ningbo, Zhejiang. In our region, in Zhejiang, at the Second People's Hospital of Jinzhou, they also could do kidney transplants, but...

Nurse: I know what you mean. Just let me know what you want to consult about by making this call.

Investigator: Ah, I'd like to ask how long the wait time for a kidney transplant would be at your hospital if we come.

Nurse: That is not...that is not certain. For some patients, it can be done, if there's a matched organ found, or a donor available. It is not that you can get it done whenever you want to.

Investigator: Ah, because Doctor Song Wenhui at our current hospital said that you do much more cases than their hospital. Your hospital can do five or six hundred cases every year. So he told me to come to your hospital for the surgery because the wait time could be a bit shorter.

Nurse: You can come to get the tissue typing done first, and get on the waiting list. As for the wait time, it's hard to tell you how long it would be.

Investigator: Ah, at your hospital, do you do a lot, like five or six hundred cases a year, as our Doctor Song said?

Nurse: You can come here to consult directly when you decide to pick us for the transplant operation. Then you can come to us directly for the tissue typing, and get admitted into our hospital, and then get your information registered in our system.

Investigator: Let me tell you something, Doctor. It's quite far from Ningbo to Kunming. As our doctor here suggested, I need to inquire about it first. If you really do a lot...or if you do just as many as the hospital here, it won't be necessary for us to travel all the way that far.

Nurse: We do lots of cases indeed. But it's hard to tell how long the wait time would be. It all depends, and you must wait for an organ donor before you can get it done.

Investigator: Ah, as Doctor Song said, you have more kidney sources there, but we have too few here. Why do you have more kidney sources than us?

Nurse: As I just told you, we do perform so many cases every day, every year. But it depends. We must have organ donors. We must have donated organs before the surgeries can be performed. Do you understand what I mean?

Investigator: Ah, that means every year you...

Nurse: So, as for when it can be done or the wait time, I can't provide you with an accurate answer, neither can I tell you anything about these things.

Investigator: That means, that means that there are more donors there at your hospital, right? So, you can do five or six hundred cases every year. Do you have so many donors?

Nurse: No. We must have those donors. As I've already told you, we must have those donors to perform the cases.

Investigator: Ah, I mean, are there five or six hundred donors available at this hospital every year? Really so many?

Nurse: Yes.

Investigator: Oh, alright. Ah, can you tell me about your price? How much does it cost to have a kidney transplant there?

Nurse: It depends on each patient. It varies from patient to patient. Let's talk about it when you come here.

Investigator: But I know the price at your hospital is lower than that of other hospitals, right?

Nurse: It depends. Every patient's condition is different, so it depends on whether you need...
