

追查迫害法輪功國際組織（追查國際）

World Organization to Investigate the Persecution of Falun Gong (WOIPFG)

To investigate the criminal conduct of all institutions, organizations, and individuals involved in the persecution of Falun Gong; to bring such investigation, no matter how long it takes, no matter how far and deep we have to search, to full closure; to exercise fundamental principles of humanity; and to restore and uphold justice in society.

Investigation Recording 2020-062

Date: May 1, 2020 (+86-574-55836149)

Subject(s): Doctor, Liver Transplant, Ningbo Medical Center Lihuili Hospital

Summary

1. On Wednesdays Director Lu Caide comes to the outpatient clinic.
2. It may take two or three months to get the tissue typing done if it's fast or lucky. But if not lucky, it may take half a year, that's hard to say.
3. You've never stopped, and always been doing it during the epidemic.
4. As for the money, it probably should be about 500,000 yuan, somewhere between 300,000 and 500,000 yuan.
5. Investigator: So, how many cases can Director Lu do in a year?
Doctor: Well, that is hard to say.
Investigator: How many did he do last year?
Doctor: How about this, you go ask Director Lu when he is at the outpatient clinic, okay? Because I really don't know much about the details, it is hard for me to say.

Translation

Investigator: Hello! Hello!

Doctor: Hello!

Investigator: Hello, is this Ningbo Medical Center Lihuili Hospital?

Doctor: Ah, yes.

Investigator: Hello! I'd like to ask about a liver transplant, as we need to get one done. Could you let me know what procedure to follow?

Doctor: Here for a liver transplant, uh, you'd better come on Wednesdays, as Director Lu Caide comes to the outpatient clinic on Wednesdays. (You can bring) the reports, those test reports. And if the patient can still walk around, you'd better bring the patient along. Director Lu Caide is available at the outpatient clinic on Wednesday mornings.

Investigator: Ah, okay. So, I'm wondering if we wait, what's the shortest wait time there, in the fastest case?

Doctor: In the fastest case? It depends entirely on your luck. In faster cases, sometimes it may take two or three months to get the tissue typing done if lucky. If not so lucky, it may take half a year, but that's hard to say.

Investigator: Oh.

Doctor: That depends on, firstly, the patient's blood type, and secondly, his or her medical condition, or how serious it is.

Investigator: Okay.

Doctor: In some, in some faster cases, the wait time may be just two or three months. However, in some slower cases, that could be hard to say, sometimes it's possible for patients to keep waiting and end up with nothing.

Investigator: His blood type is B. Is that fast?

Doctor: Blood Type B?

Investigator: Yeah.

Doctor: In that case, I don't know about blood type B. I will ask about it when the time comes.

Investigator: Okay. I'd like to know how much we need to prepare.

Doctor: About the money, it could be, it should be about 500,000 yuan, somewhere between 300,000 and 500,000 yuan.

Investigator: Oh, oh, in the range of 300,000 to 500,000 yuan.

Doctor: Yes, that's right.

Investigator: So, you're a designated COVID-19 hospital, are you?

Doctor: Oh, no. We, that is, at our hospital, we've basically cleared out all COVID-19 patients. Normally we don't accept any patients with COVID-19 at our hospital. If there

are such patients identified, we have a separate place for quarantine. For some patients, we just send them to other hospitals directly.

Investigator: Ah, okay, that means this hospital still accepts patients during the epidemic?

Doctor: Yes.

Investigator: You've been always doing it, right?

Doctor: Ah, yes, that's right.

Investigator: Oh, how many cases can Director Lu do in a year?

Doctor: Director Lu In a year?

Investigator: Yes.

Doctor: Well, that is hard to say.

Investigator: How many did he do (organ transplants) last year?

Doctor: Well, how about this, you go ask Director Lu when he is at the outpatient clinic, okay? Because I really don't know much about the details, it is hard for me to say.

Investigator: Well, alright, what about your beds? If we decide to get hospitalized, are there any beds available in the inpatient service? Are you near capacity? Any beds available for liver transplants?

Doctor: Oh, as for beds for liver transplants, we basically have them available.

Investigator: Oh, you do? That's good, good.

Doctor: Yeah, generally we do.

Investigator: Oh, well, thank you!

Doctor: Okay. You are welcome.

Investigator: Ah. Thanks! Bye!

Doctor: Bye!

Investigator: Bye!
