

Investigation Recording 2020-065

追查迫害法輪功國際組織（追查國際）

World Organization to Investigate the Persecution of Falun Gong (WOIPFG)

To investigate the criminal conduct of all institutions, organizations, and individuals involved in the persecution of Falun Gong; to bring such investigation, no matter how long it takes, no matter how far and deep we have to search, to full closure; to exercise fundamental principles of humanity; and to restore and uphold justice in society.

Date: May 2, 2020 (+86-055162922103)

Subject(s): Nurse, the Fourth Kidney Inpatient Service Section, the First Affiliated Hospital, Anhui Medical University

Summary

1. We've been doing it during the pandemic, and we do that as long as we have (a matching organ) available to us.
2. It is recommended to go to Liao Gui Yi, Director Liao.
3. He comes to the outpatient clinic on the third floor on Tuesday mornings, so you can make an appointment with him! (For liver transplant) at our hospital, just go to Director Liao.
4. We just did two operations last week.

Translation

Nurse: Hi, hello.

Investigator: Hi, hello, is this the Fourth Inpatient Service Section of the First Affiliated Hospital, Anhui Medical University?

Nurse: Yes.

Investigator: Hey, hello. Let...let me ask you about something. Regarding having a kidney transplant at your hospital, I want to ask you, do you have a hospital bed available now?

Nurse: Hospital bed? We are usually near capacity. If you want to get it done here, the Director would definitely need to take a look at all aspects of your case, to make an assessment first.

Investigator: As we are in the middle of the epidemic, do you still do it?

Nurse: Yes, we do. We've been doing it.

Investigator: Oh, so you've been doing it during the epidemic?

Nurse: We've been doing it all along, and we do that as long as we have (a matching organ) available to us.

Investigator: Oh, then if we go there now, do we need to be quarantined?

Nurse: You, you, you... don't you have the Director's ...? The Director should have given you a contact group, such as a WeChat group. You should be in that group, right?

Investigator: Ah, we, we are...

Nurse: If you get registered, you should...

Investigator: Then I'll briefly ask you. That is, if you're still doing that during the epidemic, then, how can we get registered? Should I bring the patient over directly, or just bring over the patient's files by myself first?

Nurse: Why don't you bring the files over first? You can just do that first. Our Director on Thursdays, or on Tuesdays? He comes to the outpatient clinic on the third floor on Tuesday mornings, so you can make an appointment with him!

Investigator: On Tuesday mornings?

Nurse: For a Tuesday morning, you can make an appointment online. After you have done that, then you can go to the outpatient clinic. Go and take a look at the related accomplishments.

Investigator: On Tuesday mornings.

Nurse: Yes, yes, yes, you can do that online. By following the official account of the First Affiliated Hospital at Anhui Medical University on WeChat, you can make an appointment right there! You can't miss it.

Investigator: Then may I ask you to recommend the doctor that does the best job? May I?

Nurse: That, of course, would be our Director Liao, Liao Gui Yi.

Nurse: You would be in the Transplant Inpatient Service Section. As for Liao Guiyi, Gui is as in "Zhengui" (precious).

Investigator: And one more thing, if we go there now, we will not be quarantined, right?

Is your hospital a designated COVID-19 hospital?

Nurse: What designated hospital?

Nurse: If you register for an appointment with Director Liao, you can come consult him at the outpatient clinic!

Nurse: If you have a fever, if you come from an infected area, um, you must have that... have that fever symptom, so how high is it? Definitely you need to go through that, and you will definitely not be able to get admitted so fast. You must go through some related tests, such as CT or nucleic acid tests. These tests must be done at the outpatient clinic. You are from out of town, right?

Investigator: Um, I'm from out of town, I am at Liu An.

Nurse: Oh, if you, you have that symptom, because everyone coming to his outpatient clinic needs to scan the code.

Investigator: Oh, we don't have a fever, so we definitely have no problem. In that case, besides this Director Gui, is there another Director who can do it better?

Nurse: If you come to our hospital, just go to our Director Liao.

Investigator: Other than Director Liao, is there another Director who can do a better job? We just want to get it done faster.

Nurse: Our Director is in charge of this area, our Director Liao is in full charge. If you want us (Anhui Hospital) to do it, then you have to go to our Director Liao.

Investigator: Oh, all right then, may I ask whether you can do two or three operations a month now?

Nurse: Yes, yes, yes, when you come...yes, we just did that last week.

Investigator: Well, how many cases can you do in one month now?

Nurse: That depends. Last week we did two cases.

Investigator: Oh, okay, okay.

Nurse: Last week we did two cases as well. Such things, as you know, cannot be certain. How many cases we will do this week--it's hard to say, isn't it?

Investigator: I was thinking, if you have done a lot, I'll be more assured. Otherwise, as you could imagine, if we spend so much money, but end up losing both our loved one and the money instead, that is why I...if your hospital...

Nurse: That thing, as you have just said, everything has a probability. It cannot be that everything that we told you has no risk. That's impossible, right?

Investigator: Okay, okay, thank you.

Nurse: All right, you, you can go to the outpatient clinic then, and please consult again, okay?

Investigator: Okay, okay, thank you!
