追查迫害法輪功國際組織

World Organization to Investigate the Persecution of Falun Gong

<https://www.upholdjustice.org/>

追查迫害法輪功國際組織 (追查國際)

World Organization to Investigate the Persecution of Falun Gong (WOIPFG)

To investigate the criminal conduct of all institutions, organizations, and individuals involved in the persecution of Falun Gong; to bring such investigation, no matter how long it takes, no matter how far and deep we have to search, to full closure; to exercise fundamental principles of humanity; and to restore and uphold justice in society

China's Organ Transplant Organizations are the Executing Entities for the Communist Party's State Crime of Live Organ Harvesting

Since 1999, led by its then-leader Jiang Zemin, the Chinese Communist Party (CCP) criminal group has been manipulating China's entire state apparatus, including the Party, government, military, armed police, judicial system, and medical institutions, through the Political and Legal Affairs Commission and the "610" system, to commit nationwide mass extermination of Falun Dafa practitioners by means of live organ harvesting for transplantation. The CCP's live organ harvesting of Falun Gong practitioners is a crime against humanity and a crime of genocide initiated on the orders of Jiang Zemin.

Since the CCP's live organ harvesting of Falun Gong practitioners is a state genocidal crime conducted as a political campaign, organ transplant institutions in all provinces, central government-controlled municipalities, and autonomous regions of mainland China, including all military, armed police, and local hospitals (medical centers) are suspected to have participated in this crime, even including a considerable number of hospitals unqualified to perform organ transplants, such as small and medium-sized hospitals and specialized hospitals. Similar to how all Chinese hospitals were involved in forced abortions during the CCP's implementation of the "one-child policy", all transplant facilities in China today have participated in live organ harvesting.

In view of the broader context of the CCP's state crime of live organ harvesting, those in charge of organ transplant hospitals/centers and similar institutions in China are suspected of having been involved in the crime of live organ harvesting from groups such as Falun Gong practitioners.

Evidence Collection Methods

1. Direct and indirect comprehensive telephone investigation and on-site investigation of the people suspected of involvement in the live organ harvesting

The subjects of our investigations include government officials, policemen, doctors and other medical personnel.

Geographical Distribution of the Subjects of Investigation, and the Duration of Investigations:

The WOIPFG's subjects of investigation are people in different positions, who are located across the entire country of China. Our investigations have been ongoing for nearly two decades, and our investigation results have always been consistent. The evidence gathered by us verifies that live organ harvesting is a systematic arrangement by the CCP.

- 1) Subjects of investigation: Presidents, directors, doctors, nurses, and security guards of organ transplant hospitals.
- 2) Hospitals involved: A considerable amount of recorded evidence has been obtained from many provincial, military, armed police, and local organ transplant hospitals (centers) across China.
- 3) Time span: Our investigations on the live organ harvesting started in 1999, and they're ongoing to this day.

2. Data investigation

- 1) We have been collecting data from the hospitals' websites and press releases.

追查迫害法輪功國際組織 (追查國際)

World Organization to Investigate the Persecution of Falun Gong (WOIPFG)

To investigate the criminal conduct of all institutions, organizations, and individuals involved in the persecution of Falun Gong; to bring such investigation, no matter how long it takes, no matter how far and deep we have to search, to full closure; to exercise fundamental principles of humanity; and to restore and uphold justice in society

- 2) We have been searching for and analyzing medical papers on transplantation.
- 3) We have been using the website www.archive.org to view the hospitals' previously archived information.
- 4) We have been collecting reports from the official Chinese media outlets.
- 5) We have organized all the information obtained from our investigations to create a database of the hospitals.

All the facts have shown us that the CCP is by no means a rational or normal organization or political party; but instead, it is a supra-state criminal syndicate controlled by a group of criminals who have committed crimes against humanity. The CCP's logic of thinking and principles of action are anti-human, and the crimes it has committed are forms of evil that humanity had never seen previously.

WOIPFG's investigative report series contains nearly 70 investigation reports on the alleged organ harvesting of living Falun Gong Practitioners at major Chinese military and civilian hospitals and on their staff members suspected of participation in this crime. This volume contains three such investigation reports.

World Organization to Investigate the Persecution of Falun Gong (WOIPFG)

To investigate the criminal conduct of all institutions, organizations, and individuals involved in the persecution of Falun Gong; to bring such investigation, no matter how long it takes, no matter how far and deep we have to search, to full closure; to exercise fundamental principles of humanity; and to restore and uphold justice in society

year¹. The records of phone investigation by the WOIPFG of this hospital indicate that doctors from this hospital directly acknowledged the use of organs from Falun Gong Practitioners.

I. Hospital Overview

THTMCHUST is one of China's tertiary level-A hospitals. According to its official website, the hospital is made up of the Main Hospital area, Guanggu Hospital area, and Zhongfa New City Hospital area. It has 62 clinical and therapy programs and departments, one national medical center, eight national key academic subjects, 30 national major clinical projects, 5000 beds, and more than 8000 employees – of which over 600 are at senior levels. The numbers of outpatients and emergency patients have stayed on top in Hubei Province².

THTMCHUST is the starting place of transplantation in China. In 2015, Huang Jiefu, deputy minister of Beijing's public health ministry, stated at China Organ Transplantation Conference held in Wuhan, "without Hubei, without Wuhan, there would be no China's organ transplantation."³ Wuhan Tongji Hospital has been consistently leading in China's organ transplantation area⁴.

II. THTMCHUST Performs Thousands of Kidney Transplants Every Year

A Kwongwah Daily article carried by news.sina.com in 2001 said, Wuhan, an important city in mid-China, is allegedly the largest organ transplant center in the nation, with Tongji Hospital of Huazhong University of Science and Technology the most famous, which is one of the earliest and the most authoritative hospitals engaged in living donor kidney transplantation, doing thousands of transplants every year. The hospital's official website boasted having the largest number of living donor kidney transplant recipients (i.e. patients waiting for kidney transplant surgery)⁵. As such, the number of organ transplants at the hospital as revealed by this report obviously did not match the number of organ sources claimed by the CCP government.

Figure 1. Snap shot of November 2011 Daily News Sina.com article

The CCP regime had always avoided talking about the donor source of organ transplant; it was not until after the international community exposed the evils of CCP's systematic organ harvesting of living donors, that former CCP's deputy minister of public health, Huang Jiefu, suddenly acknowledged at the World Conference on Liver Transplantation in July 2005 that the transplantation in China mostly used organs of death row inmates. The CCP's sudden change of tone was questioned as trying to cover up the real source of donor organs. After that the CCP regime announced that they would not use the death row inmate organs starting from Jan.1st 2015, instead, they would use citizen -donor organs (though till now, Chinese organ donations are still very few. For details please refer to WOIPFG's relevant report⁶). Be it death row inmate organs or so-called citizen donor organs, the discrepancies between the number of organs from these sources and the actual national organ transplant numbers are so huge that the CCP regime is unable to provide a credible answer. Therefore, it is not hard to understand why a lot of participating hospitals cut the numbers

追查迫害法輪功國際組織 (追查國際)

World Organization to Investigate the Persecution of Falun Gong (WOIPFG)

To investigate the criminal conduct of all institutions, organizations, and individuals involved in the persecution of Falun Gong; to bring such investigation, no matter how long it takes, no matter how far and deep we have to search, to full closure; to exercise fundamental principles of humanity; and to restore and uphold justice in society

of reported cases of organ transplants. For example, up till Jan. 16th 2016, THTMCHUST website had still claimed that kidney transplant cases be about 3000⁷, and its yearly transplants were no more than 200, both numbers are ten times less than thousands of kidney transplant surgeries per year which was previously reported by sina.com⁸.

III. THTMCHUST acknowledged using organs from Falun Gong practitioners

“With inmates such as Falun Gong practitioners, it’s guaranteed to have sufficient living donors.” “Organs were taken before the donor died.”⁹”

A relative of a doctor of this hospital said that there were many donor organs, and (before it was exposed), they went into overtime every day to do transplant surgeries¹⁰.

1. “Those (organs) from Falun Gong practitioners can be used, it’s Jiang Zemin who gave the instructions at the time, so you dared to do it, is that right?” “Doctor Gong: That’s for sure”.

Subject of Investigation: Doctor Gong, Ward II of Heart Surgery, Tongji Hospital of Huazhong University of Medical Science.

Time of Investigation: Oct. 12th, 2015

Summary of Investigation: The conversation between WOIPFG investigator and Dr. Gong reveals the following two points: one, acknowledgment of using Falun Gong practitioners’ organs in transplant surgery; two, such surgeries were done because of Jiang Zemin’s instructions.

(Recording 1. Download: [MP3](#); for transcript please refer to [pdf19](#))¹¹

Conversation excerpts:

Investigator: Oh, so organs used to be taken from jail and labor camp?

Doctor Gong: used to, yes.

.....

Investigator: Oh, the (organs) from Falun Gong, right?

Doctor Gong: Yes, the ones not claimed by relatives, but it can’t be done anymore now.

Investigator: Eh, so they have done (organ harvesting) all along? In the past, many hospitals were involved in (doing organ harvesting) in massive quantities. It was allowed at the time. It was Jiang Zemin who gave such instructions. He was the state president back then, you know.

Dr. Gong: It could be done only when there were state documents.

Investigator: Right, right, he (Jiang Zemin) gave instructions to use (organs) from those who practice qigong held in jail, and (organs) from people like Falun Gong practitioners could be used. **It’s Jiang Zemin who gave the instructions at the time, so you dared to do it, is that right?**

Dr. Gong: That’s for sure.

2. “Could you use organ from living Falun Gong donors?” “Yes, sure.”

Subject of Investigation: A nurse from Urology Surgery at Tongji Hospital of Wuhan

Date of Investigation: March 30, 2006 (telephone number: 011862783662688)

(Recording 2, download: [MP3](#); transcript download: [pdf4](#))

The following excerpts are from a recorded conversation between a WOIPFG investigator and a nurse at Tongji Hospital of Wuhan:

Investigator: “Hello. Is that Tongji Hospital of Wuhan?”

Nurse: “Yes, it is.”

追查迫害法輪功國際組織 (追查國際)

World Organization to Investigate the Persecution of Falun Gong (WOIPFG)

To investigate the criminal conduct of all institutions, organizations, and individuals involved in the persecution of Falun Gong; to bring such investigation, no matter how long it takes, no matter how far and deep we have to search, to full closure; to exercise fundamental principles of humanity; and to restore and uphold justice in society

Investigator: Is this Urology Surgery? We need to have a kidney transplant.

Nurse: Yes, that's right, this is the department for kidney transplants.

Investigator: When did you start doing kidney transplants on a large scale?

Nurse: We are the earliest to do it. We started a long time ago.

Investigator: How many operations can you do each year?

Nurse: Our hospital is one that has done the largest number of transplants. Our department has done the most in the entire Hubei area. We've done a lot, since we have ample donor organs.

Investigator: From a patient's perspective, we hope to have living donor's kidney,, we are looking for a transplantation using living prisoner's organ, such as one of Falun Gong prisoners. Is it possible?"

Nurse: Sure.

Investigator: Do you have for sure sufficient organ supplies from living inmate donors, such as Falun Gong practitioners?

Nurse: Yes, sure. When you are ready, you can come over, and we will discuss it in detail." Now let us try to know more about the transplantation scale in the hospital through its hardware and software constructions for organ transplantation.

3. Doctors and nurses at Jiujiang No. 1 People's Hospital in Jiangxi Province testified that the hospital's organs came from Wuhan Tongji Hospital, "The organs were removed when the donor was still alive."

Doctors and nurses at Jiujiang No. 1 People's Hospital in Jiangxi Province testified: "Wuhan Tongji Hospital Organ Transplant Center, their organs arrive very quickly. They have connections to the army and the court, and many of the organs they use now come from the court. The organs were provided by Wuhan Tongji Hospital."¹²

"Wuhan Tongji Hospital Organ Transplant Center, their organs arrive very quickly"

Investigation subject: Doctors and nurses of Jiujiang No. 1 People's Hospital in Jiangxi Province

Investigation time: September 2006

Investigator: Who are the donors for livers and kidneys you use in your transplants?

Hospital: Some from Guangdong, some from Wuhan. Patients need to register first so we can find a matching organ.

Investigator: Which hospital in Wuhan would you recommend?

Hospital: The transplant Center at Tongji Hospital. Patients at that center come from throughout the nation, and many from southeast Asia. They have connections with the military and the court, therefore they have no difficulty providing matching organs. Recently, many organs were provided by the court.

Investigator: Wuhan is far away. Can an organ still be used if transferred from there?

Hospital: We use airplanes. Usually the time limit is six hours from the time the organ is removed.

追查迫害法輪功國際組織 (追查國際)

World Organization to Investigate the Persecution of Falun Gong (WOIPFG)

To investigate the criminal conduct of all institutions, organizations, and individuals involved in the persecution of Falun Gong; to bring such investigation, no matter how long it takes, no matter how far and deep we have to search, to full closure; to exercise fundamental principles of humanity; and to restore and uphold justice in society

Investigator: Aren't there many prisoners?

Hospital: It is not that easy. A match has to be made, which includes not only the blood type. Matching the blood type is only the first step. Then a white blood cell antigen, PRA, and lymph test has to be done. We have no control over the organ source. Right now the court has strict control of it. There is nothing we can do if they don't want to sell them to us.

Investigator: I heard there are still many Falun Gong practitioners?

Hospital: That is the court's business and we don't know the details. Sometimes there are suitable ones and they give us a few. Your best bet is to go to Wuhan...

(Recording 3. Download: [MP3](#); Transcript Download: [pdf](#))

“Organs were taken before the donor died.”¹³”

Investigation subject: Doctors and nurses of Jiujiang No. 1 People's Hospital in Jiangxi Province

Investigation time: September 2006

Investigator: Did the organ come from a live source for the liver transplant your hospital performed on August 5?

Hospital: The transplant for that liver cirrhosis patient was successful. The liver source was from the transplant center in Wuhan.

Investigator: The liver from a live person for the transplant ensures success?

Hospital: Which live person would give a liver to you? They are all from prisoners. If they don't execute them, how can a live person willingly give you his liver? A person has only one liver.

Investigator: But livers from dead bodies can't be used. On your advertisement it says "live liver transplant."

Hospital: The prisoners are alive before being executed, aren't they? Then...

Investigator: So, their organs are removed before they are dead, aren't they?

Hospital: Yes, yes, yes. You can ask the transplant center in Wuhan. I'm very busy here... (Line cut)
(Recording 4. Download: [MP3](#); Transcript Download: [pdf](#))

IV. Overview of Tongji Organ Transplantation Institute at Huazhong University of Science and Technology

Tongji Organ Transplantation Institute at Huazhong University of Science and Technology is affiliated to Tongji Hospital. According to the hospital website, the institute is the earliest large comprehensive research center in China engaged in fundamental and clinical research in organ transplantation, currently a key laboratory for China's ministries of education and public health and a key discipline for ministry of education. It is currently the largest comprehensive medical service and research institute engaged in clinical and experimental research in organ transplantation¹⁴. As early as 1960s, this research center conducted a series of exploratory experiments in abdominal organ transplantation, almost in

World Organization to Investigate the Persecution of Falun Gong (WOIPFG)

To investigate the criminal conduct of all institutions, organizations, and individuals involved in the persecution of Falun Gong; to bring such investigation, no matter how long it takes, no matter how far and deep we have to search, to full closure; to exercise fundamental principles of humanity; and to restore and uphold justice in society

lock step with international research. The transplant number, however, was small then. The institute witnessed a rapid development after 1999 and in 2001 became China's education ministry's key laboratory for organ transplantation, the key discipline for the ministry, and the key development project for the nation's health ministry. Organ Transplantation was listed as key discipline by the education ministry in 2004 and 2008 respectively¹⁵.

Hospital official Website stated: "through nearly 50 years of hard work, Organ Transplantation Institute has become a sizable modern transplantation center and the cradle for training leading professionals in the field. At present it is capable of conducting heart, lung, liver, kidney, spleen, and pancreas transplants and pancreas-kidney combination transplant, liver-intestine combination transplant, abdominal multi-organ transplant and other difficult-to-perform clinical transplants¹⁶.

V. Large hardware and strong doctor team at the hospital

Tongji Organ Transplantation Institute at Huazhong University of Science and Technology has Basic and Clinical Departments. The Basic Department includes a Basic Research Lab, Immunization Room, Transplantation Pathology Room, Large Animal Lab, Small Animal Lab, Clinical Examination Room, etc. The Center for Basic Research in Organ Transplantation is a large, open, and comprehensive scientific research base, specially engaged in organ transplant related experiments and clinical research, and with large advanced equipment including Whole Gene Chip Scanning Analyzer, automatic rapid immunization Analyzer (IMX, TDX), Flow Cytometer, Live photomicrography and Image Analysis System, Multi-function Microplate Reader, Gel Imaging System, Real Quantification PCR, High Speed sorting Flow Cytometer and Protein Flight Mass Spectrometry, capable of satisfying the needs for deep multi-level scientific research with cells, molecular, genes and proteins. The Clinical Department has a special ward for transplantation with a building area of 2400 m², with 65 beds, and can perform heart, lung, liver, kidney, pancreas, intestine, and pancreas/kidney combined, liver/intestine combined, and abdominal multi-organ transplant, and other difficult clinical transplantation¹⁷.

The institute has a strong technical team, with a total of 65 researchers, among them 8 professors, 6 associate professors, 21 middle rank professionals, and 1 distinguished professor (Chen Zhonghua) under "Yangtze River Scholar Reward Plan" sponsored by the National Education Commission, and 2 distinguished professors (Chen Xiaoping and Chen Shi) from Huazhong University of Science and Technology. Chen Shi and Chen Zhonghua are respectively members at director level and deputy director level of organ transplantation society of China Medical Society. Multiple doctors have performed large numbers of transplant surgeries¹⁸. For details please refer to the list of individuals involved.

VI. THTMCHUST conducts large quantity of transplant related research and actively promotes transplant techniques

The Hospital's official Website states: "Currently, doctoral and master advisors at the institute are all busy with scientific research and have sufficient funding. In total it undertakes 1 subject under the national "973" Plan, 10 under Natural Science Foundation, 2 from the Ministry of Education and the Ministry of Health, 2 major subjects from Hubei Province, and 2 from Nature Foundation of Hubei Province. In the last five years 410 academic papers were published, among them 78 SCI papers and 11 books. In the area of scientific research, the approved main aim and goal include: 1. fundamental theory for transplantation immunization and its application in transplantation; 2. Transplant surgery, study on operation, and its fundamental research, 3. Xenotransplantation research; 4. Stem cell transplantation and tissue transplantation; and 5. Cell immortalization and bioartificial organ. For 10 years it has undertaken 30 projects including the National "863 Plan", "973 Project", major projects from the National Foundation for Natural Science, key clinical projects from the Department of Health, key projects from Nature Foundation of Hubei Province, and various vertical research projects from the Department of Health¹⁹.

追查迫害法輪功國際組織 (追查國際)

World Organization to Investigate the Persecution of Falun Gong (WOIPFG)

To investigate the criminal conduct of all institutions, organizations, and individuals involved in the persecution of Falun Gong; to bring such investigation, no matter how long it takes, no matter how far and deep we have to search, to full closure; to exercise fundamental principles of humanity; and to restore and uphold justice in society

Chen Zhishui of this hospital first introduced and promoted in China insitu classic non-venous bypass transplant technique, and helped over 20 large hospitals with their liver transplant surgeries. Currently it is training over 20 master and doctor degree students, and responsible for teaching surgery and organ transplantation to 5-year undergraduate students and 7 or 8-year graduate students²⁰.

VII. Name list of doctors engaged in transplant surgeries

HZKJ-TJ001 Chen Zhishui, male, born in April 1966

Personal Profile: Director of the Institute for Organ Transplantation; standing committee member of the Organ Transplant Branch of China Medical Society; standing committee member of the Organ Transplant branch of China Doctor Association; committee member at director level of Organ Transplant Society of Hubei Province; director of Organ Transplant Quality Control Center of Hubei Province; and committee member at director level of the Review Committee for Specialists in Living Donor Organ Transplantation

Born in April 1966, he graduated from Tongji University of Medical Science in 1987, and obtained his Ph.D degree of Organ Transplantation in general surgery in 1993.

He studied transplant immunization for one year at Swiss Novartis Transplant Center as a visiting scholar in 1998, and studied clinical liver transplant at US Pittsburg Starzl liver transplant research center for 3 months in 2002.

He became a master surgeon in kidney transplant operation in 1991, as clinical relative-spleen transplant in 1994, as a master surgeon of liver transplantation in 1999, and so far he's completed over 500 cases of liver transplantation with a 95% success rate. He was the first in introducing and promoting non-venous bypass in-situ classic liver transplantation technique, and he helped about 20 large hospitals with liver transplant operations²¹ and over 500 cases of kidney transplants²².

HZKJ-TJ002 Zhu Lan, female

Personal Profile: Deputy-director-level doctor of the Institute for Organ Transplantation.

He graduated from German Language Medical Class at Tongji Medical School of Huazhong University of Science & Technology in 2003.

He went to Terasaki Transplant Immunization Laboratory in the US in 2008 to do clinical testing and research in body fluid rejection and published 2 academic papers while there. In May 2009 he gave an oral speech at the annual conference of all America transplantation held in Boston, sharing experiences with international experts in the field.

Upon graduation he stayed on as a surgeon at the Institute for Organ Transplantation of Tongji Medical School affiliated with Huazhong University of Science and Technology, mainly engaged in clinical kidney and liver transplants. Having returned from overseas in July 2009, he continued to work as a clinical doctor at the Institute. As of 2013 he started getting involved in child-donor kidney transplantation, particularly in the organ acquisition, trimming, and transplant surgeries with kidneys from donor-children younger than 2 years old. He was also responsible for post-surgery management and follow-up visits, as well as assessing clinical data²³.

HZKJ-TJ003 Du Dunfong , male.

Personal Profile: Associate professor and deputy director-level doctor of Transplantation Section

In 2004 he graduated from the organ transplantation department of Tongji Medical School, an affiliate of Huazhong University of Science & Technology, with a doctoral degree after completing a Master/Doctor degree program. He was promoted to be an associate professor and deputy director-level doctor in 2008 at Tongji Medical School.

追查迫害法輪功國際組織 (追查國際)

World Organization to Investigate the Persecution of Falun Gong (WOIPFG)

To investigate the criminal conduct of all institutions, organizations, and individuals involved in the persecution of Falun Gong; to bring such investigation, no matter how long it takes, no matter how far and deep we have to search, to full closure; to exercise fundamental principles of humanity; and to restore and uphold justice in society

He is good at abdominal organ transplant, including kidney, liver, and abdominal multi-organ transplants, with rich clinical experiences in organ transplant surgery, post-surgery infection, kidney transplant post-surgery nephrosis and hepatitis treatment, as well as post-transplant infections in kidney, liver, and abdominal organ transplants²⁴.

HZKJ-TJ004 Chen Gang, male, born in April 1970²⁵.

Personal Profile: He is director-level doctor and professor, deputy director of the Center for Organ Transplantation²⁶. He's also director of Animal Lab Center of Tongji Hospital. He serves as middle-aged member of Organ Transplantation Branch of China Medical Society and special editor for China Organ Transplantation Magazine and China Pediatric Surgery Magazine.

He's good at kidney transplant and related surgeries, with a wealth of clinical experiences in the use of postoperative Immunosuppressant and the treatment of related complications. In recent years he's been carrying out a range of research work in fluid rejection, immune tolerance, and pancreas transplantation²⁷.

HZKJ-TJ005 Chen Zhonghua, male, born in 1953²⁸

Personal Profile: He is director of the Institute for Organ Transplantation, deputy-director-level member of Organ Transplantation Branch of China Medical Society, director of key laboratory for organ transplantation of education ministry, and director of key laboratory for organ transplantation of health ministry. He is a grade II guest professor under Changjiang Scholar Program, vice president of China OPO Alliance, member of standing committee of Organ Transplant Branch of China Doctor Association, member of Organ Transplant Branch of China Medical Society, director-level member of Organ Transplantation Branch of Wuhan Medical Society, and deputy editor-in-chief of China Organ Transplantation magazine.

He graduated from the Department of Medicine of Tongji University of Medical Science in 1977 with both MM and MD degrees. And in 1987 he went to Cologne University for further training on Alexandra Humboldt Scholarship, Federal Republic of Germany. He started to study and work in Cambridge University, UK in 1989 and became Clinic RA, RA, and SRA at the Department of Surgery, School of Clinical Sciences, and University of Cambridge, UK. In 1996 he earned his PhD at Cambridge University, UK. In 2000 he became one of the second group of guest professors under China's education ministry's Changjiang Scholar Program.

He is mainly engaged in heart, liver, and kidney transplantation and their related immunization research²⁹.

HZKJ-TJ006 Chen XiaoPing, male, born in Fuyang, Anhui, in June 1953³⁰.

Personal Profile: Professor and director-level doctor at the Institute for Organ Transplantation.

He graduated from Bengbu Medical College in 1973, and got his Ph.D in medicine in 1985. He had since worked in the medical field of the national key discipline--general surgery of Tongji Hospital. He's accumulated rich experiences in the diagnosis and Treatment of diseases at general surgery.

He specialized in clinical liver transplantation³¹.

HZKJ-TJ007 Zhang Weiji, male, born in December 1966³²

追查迫害法輪功國際組織 (追查國際)

World Organization to Investigate the Persecution of Falun Gong (WOIPFG)

To investigate the criminal conduct of all institutions, organizations, and individuals involved in the persecution of Falun Gong; to bring such investigation, no matter how long it takes, no matter how far and deep we have to search, to full closure; to exercise fundamental principles of humanity; and to restore and uphold justice in society

Personal Profile: He is director-level doctor and associate professor at the Institute for Organ Transplantation, and member of the Organ Transplantation Branch of China Medical Society.

He graduated from the Department of Medicine of Tongji University of Medical Science in 1989, and started the same year to study for Master's degree at the Institute for Organ Transplantation at Tongji. He was selected by the national health ministry in 1995 to work for Ph.D at Mainz University, Germany on "Volkswagen Scholarship" and returned to

China in 1999.

Upon graduation in 1992 he stayed on at the college, engaging in clinical work and experimental research in kidney, liver, and pancreas transplantation. With nearly 30 years of experience in organ transplantation, he has rich experience in transplant immunization, clinical liver/kidney transplants, and pancreas transplant, and performed the first case in China of relative crossover kidney transplant; he's got his unique opinion in the areas of chronic graft loss management, the reasonable application of immunization suppression inhibitor and kidney transplant for allergy sufferers³³.

HZKJ-TJ008 Chen Dong, male

Personal Profile: He is associate professor and deputy director-level doctor at the Center for Organ Transplantation.

He graduated from Tongji Medical School affiliated with Huazhong University of Science & Technology in 2003 with a Ph.D in surgery.

He went to Western Ontario University, Canada in 2006 to do post-doctoral research work.

He mainly does clinical work in liver and kidney transplants. He has rich experience in perioperative management of liver, kidney transplants, kidney and liver transplant surgeries, reasonable application of immunization suppression inhibitor, and post-operative follow-up. In recent years, he achieved good transplant results for allergy sufferers and repeat kidney transplant patients³⁴.

HZKJ-TJ009 Liu Bing, male.

Personal Profile: Deputy director-level doctor and associate professor at the Center for Organ Transplantation

He got his Master's degree in 1997 and Ph.D in 2002 in organ transplantation at Tongji Medical School affiliated with the Huazhong University of Science & Technology.

2008 through 2009 he was studying organ transplantation at school of Medicine, Aachen University, Germany.

He is engaged in clinical liver and kidney transplants, with rich experience in the reasonable application of immunization inhibitor and chronic graft loss prevention; He also has a comprehensive understanding of current issues related to organ transplantation and transplant immunization³⁵.

HZKJ-TJ010 Lin ZhengBing, male

Personal Profile: Deputy director-level doctor and associate professor at the Center for Organ Transplantation; deputy director-level committee member at the Organ Transplant Branch of the Wuhan Medical Association.

He graduated from Tongji Medical School in 1983, and since then has been doing clinical organ transplant work.

He studied at Kanazawa Medical School of Japan in 1996.

He is mainly engaged in kidney transplantation, with rich clinical experience, especially in kidney transplant surgery and post-surgery therapy, chronic transplant kidney disease therapy, and management of various post-surgery kidney transplant complications³⁶.

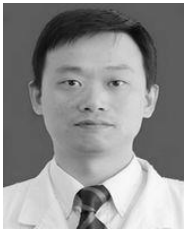

HZKJ-TJ011 Wei Lai, male

追查迫害法輪功國際組織 (追查國際)

World Organization to Investigate the Persecution of Falun Gong (WOIPFG)

To investigate the criminal conduct of all institutions, organizations, and individuals involved in the persecution of Falun Gong; to bring such investigation, no matter how long it takes, no matter how far and deep we have to search, to full closure; to exercise fundamental principles of humanity; and to restore and uphold justice in society

Personal Profile: He is director-level doctor, associate professor, and youth member of Organ Transplant Branch of both China Medical Society and China Medical Doctor Association.

He graduated from Huazhong University of Science and Technology Tongji Medical School in 1996.

He obtained a doctor in medicine degree at University of Bonn in Germany in 2007.

He has been engaged in organ transplantation and general surgery in Tongji Hospital, specialized in abdominal organs transplantation. He has rich experience in liver (including pediatric liver), kidney, small intestines, and multi-organ transplants and clinical management³⁷.

HZKJ-TJ012 Liu Dungi, male

Personal Profile: He is director-level doctor and professor.

He graduated from Huazhong University of Science and Technology Tongji Medical School in 1969. He has worked in medical field for 36 years.

In recent years, he has been to countries such as the U.S., Germany, France, and Japan for academic conferences and learning advanced technologies abroad. He has contributed a lot to the medical industry in China.

He has been doing clinical work in abdominal surgery and organ transplantation for a long time. He's good at liver, kidney, small intestines, and parathyroid transplants as well as treatment of surgical abdominal diseases³⁸.

HZKJ-TJ013 Jiang Jipin, male

Personal Profile: He is deputy director-level doctor at Organ Transplant Department.

He graduated from Huazhong University of Science and Technology Tongji Medical School in 1996 and obtained Master's degree at Tongji University of Medical Science in 2004.

In the 14 years of his professional life he has been involved in the clinical work and fundamental research in various organ transplants. His specialty includes abdominal organ transplant and psychological consulting.

He has rich clinical experience in particular in kidney and liver transplants, and post-chronic graft failure work and application of immunosuppressive drug. He has independently completed more than 50 kidney transplants, participated in 80 liver transplants, and 50 living relative donor kidney transplants.

He is good at liver and kidney transplants, and perioperative period of transplantation management³⁹.

HZKJ-TJ014 Shi Huibo, male

Personal Profile: He is attending doctor at the Institute for Organ Transplantation.

He is dedicated to prior-surgery screening and post-surgery management of kidney, liver, and pancreas transplant receptors and long term follow up. He is also focused on providing post-surgery guidance and life quality assessment to organ donors⁴⁰.

Personal Profile: He is associate professor and deputy director-level doctor at the Institute for Organ Transplantation.

He graduated from Huazhong University of Science and Technology Tongji Medical School in July, 2004, with a doctoral degree of general/organ surgery.

He is mainly involved in clinical abdominal organ transplant and fundamental research related to transplantation immunology⁴¹.

HZKJ-TJ016 Xia Suisheng, male

Personal Profile: Xia, a director-level doctor and professor, is director of the Institute for Organ Transplantation.

He graduated from Shanghai Tongji University School of Medicine in 1949. He was, first, director of Surgery at Tongji Hospital and, then, director of the Institute for Organ

Transplantation. He was tutor to 24 Master's degree students and 44 doctorate students, all

追查迫害法輪功國際組織 (追查國際)

World Organization to Investigate the Persecution of Falun Gong (WOIPFG)

To investigate the criminal conduct of all institutions, organizations, and individuals involved in the persecution of Falun Gong; to bring such investigation, no matter how long it takes, no matter how far and deep we have to search, to full closure; to exercise fundamental principles of humanity; and to restore and uphold justice in society

of whom have obtained their degrees. More than 20 of them had become doctoral advisors, professors, famous national general or transplant surgery experts. He established the first organ transplant research institute in China in 1981. And in 1986 he was approved to launch China's health ministry's key lab, which he heads, at Tongji Hospital. The lab became the health ministry's key academic project and placed Tongji Hospital in the lead nationwide and among the top overseas. He carried out pancreas transplantation in China in 1982. In the early 1980s he was the first in China to perform heterotopic spleno auto transplantation and cadaveric spleen transplant for patients with traumatic rupture of spleen, and in 1989 he again blazed the trail by conducting living relative donor spleen transplant to treat hemophilia A in China. He was the first to perform homoplasmic pancreatic islet, splenocyte, and heteroplasmic (pig) pancreatic islet transplant to successfully treat type-I diabetes in China. He successively worked on 14 different types of organ transplant, making the hospital the record holder in that score in the country. And because of these achievements, he earned the reputation of being the pioneer and founder of organ transplantation in China⁴².

HZKJ-TJ017 Chen Yifa, male

Personal Profile: Chen, a professor, is director-level doctor at Hepatobiliary Surgery.

He studied with Professor Qiu Fazuo, an academician of the Chinese Academy of Sciences and obtained his Doctor of Medicine degree in 1999. He has been in clinical surgical treatment for over 20 years.

2001 through 2004 he was in America, studying with Dr. Peter S. Heeger at Cleveland Clinic Foundation, specializing in organ transplantation immunology and cancer immunology.

Currently, he is focused on ablation and transplant treatments of primary and metastatic hepatic carcinoma, hepatic hemangioma, and cyst of liver, pancreatic head carcinoma, ampullary cancer, and hilar cholangiocarcinoma⁴³.

HZKJ-TJ018 Huang Zhiyong, male

Personal Profile: Huang is director-level doctor and professor at Hepatobiliary Surgery.

He obtained his Doctor of Clinical Medicine degree in 1996. He was promoted to be an associate professor and deputy director-level doctor in 2003 and a full professor and director-level doctor in 2006. In that year he was also hired as a tutor for doctorate students.

Between May 1995 and December 2002 he was a post-doctorate fellow at Washington University, Vanderbilt University, and Barnes-Jewish Hospital. He is one of the main participants in liver transplant surgery at the Center for Liver Surgery⁴⁴.

HZKJ-TJ019 Zhang Wanguang, male

Personal Profile : Zhang is deputy director-level doctor and associate professor at Hepatobiliary Surgery.

He is post-doctorate alumni of Vanderbilt University.

He is good at liver transplantation, with unique treatment methods for living donor liver transplantation for infants and children⁴⁵.

HZKJ-TJ020 Wang Shaofa, male

Personal Profile: Wang is an attending doctor at Hepatobiliary Surgery, good at Liver transplantation⁴⁶.

HZKJ-TJ021 Zhou Hongmin, male

追查迫害法輪功國際組織 (追查國際)

World Organization to Investigate the Persecution of Falun Gong (WOIPFG)

To investigate the criminal conduct of all institutions, organizations, and individuals involved in the persecution of Falun Gong; to bring such investigation, no matter how long it takes, no matter how far and deep we have to search, to full closure; to exercise fundamental principles of humanity; and to restore and uphold justice in society

Personal Profile: Zhou is associate professor at Aorta Surgery. He is also a post-doctorate and Master's degree advisor, and youth member of Organ Transplant Branch of China Medical Association⁴⁷.

HZKJ-TJ022 Gao Sihai, male

Personal Profile: Gao is deputy director-level doctor and associate professor at Aorta Surgery.

In recent years, he has been actively participating in the treatment of end-stage cardiopulmonary intractable disease with lung and heart transplants⁴⁸.

HZKJ-TJ023 Chen Tao, male

Personal Profile: Chen, Doctor of Medicine, is deputy director-level doctor and associate professor at Aorta Surgery. He is also a tutor for Master of Medicine degree students.

He was a visiting scholar at Texas Medical Center in America, and has been traveling abroad many times for further training in cardiopulmonary transplantation.

He has his own unique approach in the research in cardiopulmonary transplantation⁴⁹.

HZKJ-TJ024 Pan Tiecheng, male

Personal Profile: Pan is a director-level doctor and professor at Aorta Surgery, and a member of the Organ Transplantation Society of Wuhan City.

He studied in Switzerland, and has been to the U.S., U.K., Germany, and Switzerland many times for academic exchanges.

He is good at heart and cardiopulmonary transplants⁵⁰.

HZKJ-TJ025 Huang Xi, male

Personal Profile: Huang is director-level doctor and professor at Pulmonary Surgery.

He graduated from the bachelor program at Tongji University of Medical Science in 1990, and obtained his Master's degree of cardiopulmonary surgery in 1993. He has been working at Pulmonary Surgery at Tongji Hospital. He has been on clinical pulmonary surgery and its research for more than 20 years.

He was sponsored by the government to study in Germany in May, 1997. He was employed as a full-time cardiopulmonary surgeon at Saarland University Humboldt Medical Center in Germany during 1998 and 1999. He was mainly focused on cardiopulmonary work. Later, he did his research work as senior visiting scholar at University of Mainz School of Medicine in Germany. While he was in Germany, he participated in more than 1,200 major operations including radical resection for carcinoma of esophagus and lungs, lung volume reduction surgeries, various types of complicated heart surgeries, and heart and lung transplants.

He carried out lung transplantation⁵¹.

HZKJ-TJ026 Tang Yingxiong, male

追查迫害法輪功國際組織 (追查國際)

World Organization to Investigate the Persecution of Falun Gong (WOIPFG)

Personal Profile: Tang is deputy director-level doctor and associate professor at Pulmonary Surgery.

He has unique experience in lung transplant (single or double lung transplant) and cardiopulmonary transplant⁵².

HZKJ-TJ027 Fu Xiangning, male

Personal Profile: Fu, a director-level doctor and professor, is director of Pulmonary Surgery at Tongji Hospital and member of Organ Transplant Branch of the Medical Association of Hubei Province.

He led the department in performing the first single and double lung transplants in Hubei Province, making Tongji Hospital the only one qualified to do lung transplantation in Hubei Province⁵³.

HZKJ-TJ028 Sun Wei, male

Personal Profile: Sun is deputy director-level doctor at Pulmonary Surgery.

Upon graduation from Tongji University of Medical Science, he started working at Surgery Program, Tongji Hospital.

He is good at lung transplantation⁵⁴.

HZKJ-TJ029 Zhu Min, male

Personal Profile: Zhu, an associate professor and deputy director-level doctor at Pulmonary Surgery, is member of The International Society for Organ Transplantation.

He has unique understanding on the management of pulmonary perioperative period and immunomodulator adjustment.

His responsibilities include treating end-stage pulmonary disease through lung transplantation and perioperative period management, as well as immunomodulator adjustment and long term follow up⁵⁵.

HZKJ-TJ030 Yan Hua, male

Personal Profile: Yan is an associate professor and deputy director-level doctor at Pulmonary Surgery.

He graduated from the Department of Medicine at Tongji Medical School in 1986, and has been working at Pulmonary Surgery at Tongji Hospital.

His areas of research include cardiopulmonary transplant fundamentals and its clinical research⁵⁶.

HZKJ-TJ031 Zhang Hong, female

Personal Profile: Zhang is director-level doctor and professor at Ophthalmology. She is director of the Ophthalmology Department of Tongji Hospital.

She graduated from Tongji Medical School in 1983.

She obtained Doctor of Medicine degree at Heidelberg University in Germany.

She is good at cornea transplant⁵⁷.

HZKJ-TJ032 Zhou Xiongwu, Male.

追查迫害法輪功國際組織 (追查國際)

World Organization to Investigate the Persecution of Falun Gong (WOIPFG)

To investigate the criminal conduct of all institutions, organizations, and individuals involved in the persecution of Falun Gong; to bring such investigation, no matter how long it takes, no matter how far and deep we have to search, to full closure; to exercise fundamental principles of humanity; and to restore and uphold justice in society

Personal Profile: Zhou, a deputy director-level doctor at Ophthalmology, is good at corneal transplantation⁵⁸.

HZKJ-TJ033 Zhao Changsong, male

Personal Profile: Zhao, a director-level doctor at Ophthalmology, specializes in corneal transplantation⁵⁹.

HZKJ-TJ034 Hu Weikun, male

Personal Profile: Hu, a deputy director-level doctor at Ophthalmology, is good at amniotic membrane and corneal transplantation⁶⁰.

HZKJ -TJ035 Ming Changsheng, male

Personal Profile: Ming is a professor at the Institute for Organ Transplantation, director-level doctor, and tutor for doctorate degree candidates.

He graduated from Tongji University of Medical Science in 1982. He got his Master of Medicine in 1988, and upon obtaining his Doctor of Medicine in 1997 he returned to China. He went to the University of Munich Center for Transplantation, Germany in November 1991 for further study and afterward transferred to the University of Tübingen to study pancreas transplantation and combined pancreas-kidney transplantation⁶¹.

He has been doing research in combined pancreas and kidney transplantation, kidney transplantation and liver transplantation for nearly 30 years. The total number of combined pancreatic and renal transplants performed since 2000 accounts for 1/2 of the total number of transplants performed nationwide, And the modified pancreatic fluid jejunal drainage (without Roux-en-Y anastomosis) is the first of its kind in China. He has also conducted in-depth research on the prevention and treatment of transplant pancreatitis, thrombosis, rejection and pancreatic leakage after transplantation, and has developed a unique prevention and treatment program. The success rate of surgery and long-term graft survival rate reached the international advanced level, making our hospital the unit that has carried out the most combined pancreatic and renal transplants with the best results in China in recent years⁶².

HZKJ-TJ036 Chen Shi, male

Personal Profile: Chen, a director-level doctor and professor at the Institute for Organ Transplantation is director of the Academic Committee of the Key Laboratory of Organ Transplantation, Ministry of Education.

He graduated from the former Wuhan Medical College in 1969, and received a doctorate in medicine from Tongji University of Medical Science in 1985. He is a tutor for Doctor of Medicine candidates.

He studied organ transplantation in the United States, Australia and other countries.

He is focused on experimental and clinical abdominal organ transplantation research. He was the first to carry out clinical pancreas transplantation and combined pancreas-kidney transplantation in China⁶³. His specialty is abdominal organ transplantation and xenotransplantation.

HZKJ-TJ037 Gong Nianqiao, male, and born in March 1974⁶⁴.

Personal Profile: Gong is professor and director-level doctor of the Institute for Organ Transplantation.

From 1994 to 1999, he was a resident at the Institute for Organ Transplantation of Tongji Hospital, Tongji University of Medical Science. From 2000 to 2007, he was attending Surgeon at the same Institute. In 2007, he was associate professor and deputy director-level Surgeon. From 1989 to 1994, he studied at the Second Clinical College of Tongji University of Medical Science and obtained a Master's degree in medicine from Tongji University of Medical Science in 1997. In 2002, he received a Doctor of Medicine degree from Tongji Medical College of Huazhong University of Science and Technology.

From August 2003 to August 2005, he worked as a postdoctoral fellow at the Charite Hospital of Humboldt University (Berlin), Germany, in the areas of gene therapy and transplantation immunization.

He has long been engaged in the clinical work of organ transplantation, and has rich experience in the fields of kidney transplantation, pancreas and pancreas-kidney transplantation, islet transplantation, liver transplantation, etc., with excellent clinical results. He developed a safe and effective new method for inducing low immune response after transplantation and improving the long-term survival rate of grafts; he has in-depth knowledge in the prevention and treatment of acute and chronic rejection and post-transplant infection⁶⁵.

HZKJ-TJ038 Zeng Fanjun, male

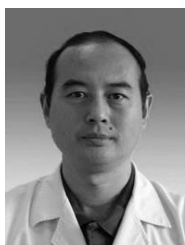

Personal Profile: Zeng is a director-level doctor and associate professor at the Institute for Organ Transplantation.

He graduated from Beijing University of Medical Science in 1984 and started working at the Institute for Organ Transplantation, Tongji Hospital in the same year. He is engaged in clinical work in organ transplantation, and witnessed the pioneering and developmental stage of China's organ transplantation.

In 1990, he became deputy director of the clinical department, in charge of kidney transplantation. Under his supervision, the number and quality of cadaveric kidney transplantation in Tongji Hospital was leading in the country, and the number and quality of living donor kidney transplantation ranked first in the country. In 1999, he got a promotion and became the director of the clinical department, and started clinical liver transplantation and achieved excellent results. At the same time, he was also involved in joint pancreas-kidney transplantation, heart transplantation, etc. He is one of the first generation organ transplant specialists in China⁶⁶. His expertise is all abdominal parenchymal organs transplantation, such as minimally invasive kidney transplantation, liver transplantation, infant donor kidney transplantation, and pancreas-kidney transplantation, etc⁶⁷.

HZKJ-TJ039 Zhou Ping, male

Personal Profile: Zhou, a deputy-level doctor and professor, is deputy director of the Institute for the Organ Transplantation. He is also the head of the transplantation lab. He graduated from the Medical Department of Tongji University of Medical Science with a bachelor's degree in medicine in 1982, and started working at the Institute for Organ Transplantation of Tongji Hospital. And he later obtained Master and Doctor of Medicine in Tongji University of Medical Science. He returned from overseas in April 2006 and has since served as deputy director of the Institute for Organ Transplantation of Tongji Hospital,

追查迫害法輪功國際組織 (追查國際)

World Organization to Investigate the Persecution of Falun Gong (WOIPFG)

Huazhong University of Science and Technology.

From 1996 to 2006, he was an assistant professor in the Department of Organ Transplantation at the University of Chicago.

He has worked on organ transplantation for more than 30 years, and has performed over 600 kidney transplants (including cadaver and living donor kidney transplants), several liver transplants and lung transplants, etc., with superb surgery and caring service. He set a number of records in Asia and China, such as the first combined abdominal multiple organ transplantation in Asia, the first piggyback liver transplantation in China, the longest surviving liver transplantation in China, and the first single-lung and double-lung transplantation in Central and South China⁶⁸.

He is good at kidney transplantation.

HZKJ-TJ040 Lu Xia, male

Lu is an attending Surgeon at the Institute for Organ Transplantation.

He received his bachelor and master degrees from Tongji Medical College of Huazhong University of Science and Technology. In 2003, he was a resident at the Institute for Organ Transplantation of Tongji Hospital in Wuhan City, and in 2011 he became an attending Surgeon.

He received a doctorate of medicine from the Department of Nephrology, Hannover Medical School, Germany⁶⁹.

HZKJ-TJ041 Qiu Fazu, male, born in 1914, deceased

Personal Profile: Professor and academician of the Chinese Academy of Sciences.

In 1936, he graduated from Tongji Medical University in Shanghai. After returning to China in October 1946, he worked as a professor of surgery at the Sino-American Hospital of Shanghai Tongji University School of Medicine (now Tongji Hospital) and the director of orthopedics for 40 years. After 1978, he served as Associate Dean of

Wuhan Medical College and the director of its Institute for Organ Transplantation. In 1981, he served as Dean of the Medical College of Wuhan City. Since 1984, he has served as the honorary dean of Tongji University of Medical Science.

He studied at the Medical School of the University of Munich and obtained his Doctor of Medicine in 1939. He served as a Surgeon and deputy chief Surgeon in the Affiliated Hospital of Munich University, Munich Municipal Hospital, and Dürr Municipal Hospital. He received the German Specialist Surgeon Certificate. In 1945, he was the Director of Surgery of Dur City Hospital.

He presided over the establishment of the earliest organ transplantation institution in China - the Institute for Organ Transplantation of Tongji University of Medical Science, and he was one of the pioneers and founders of organ transplantation in China⁷⁰.

HZKJ-TJ042 Zhang Bixiang, male

Personal Profile: Zhang is director-level doctor of hepatobiliary surgery, professor and doctoral supervisor. He is also deputy director of the Liver Surgery Center.

He graduated from Tongji University of Medical Science in 1984 and received a doctorate in clinical medicine from the same university in 2003.

From June 2006 to March 2009, he was engaged in post-doctoral research in Oncology Surgery, Vanderbilt University, USA.

He is involved in clinical liver transplantation⁷¹

HZKJ-TJ043 Xiao Zhenyu, male

追查迫害法輪功國際組織 (追查國際)

World Organization to Investigate the Persecution of Falun Gong (WOIPFG)

To investigate the criminal conduct of all institutions, organizations, and individuals involved in the persecution of Falun Gong; to bring such investigation, no matter how long it takes, no matter how far and deep we have to search, to full closure; to exercise fundamental principles of humanity; and to restore and uphold justice in society

Personal Profile: Xiao is a deputy director-level doctor and associate professor at Hepatobiliary Surgery.

He graduated from Tongji University of Medical Science.

Later, he studied in Germany and obtained a doctorate degree in medicine from ULM University.

The current focus includes transplantation treatment⁷².

HZKJ-TJ044 Zhao Bo, male

Personal Profile: Zhao is a director-level doctor and associate professor at Thoracic Surgery. From 2002 to 2004, he was a full-time surgeon at the German Heart Center in the Technical University of Munich, Germany⁷³.

He specializes in the basic and clinical research on cardiopulmonary transplantation.

WOIPFG's Investigative Report on the Alleged Organ Harvesting of Living Falun Gong Practitioners at the First Affiliated Hospital, Sun Yat-sen University and Its Staff Members Suspected of Participation

Hospital: The First Affiliated Hospital, Sun Yat-sen University

Address: No. 58 Zhongshan 2nd Road, Guangzhou City, Guangdong Province, China

Postal Code: 510080

Telephone Numbers: 87755766, 87332200 (switchboard)

Preface

The Organ Transplantation Department of the First Affiliated Hospital, Sun Yat-sen University is suspected to be one of the main birthplaces of live organ harvesting for transplantation in China. Its vice president He Xiaoshun and several doctors have admitted to their use of Falun Gong practitioners' organs in transplants. The First Affiliated Hospital, Sun Yat-sen University also has a "brain death center". By as early as 2010, the hospital had performed tens of thousands of organ transplants, and its individual doctors' transplant volumes had reached several thousand cases per person. Its number of transplants in a single day was astonishing, up to 19 kidney transplants per day. The hospital has ample donor sources, and the patients' organ wait times have been extremely short. For example, Huang Jiefu only spent a few hours to transfer several matching live donors, including one from this hospital, as backups for one of his operations.

Hospital Profile: The First Affiliated Hospital, Sun Yat-sen University is a state-level tertiary Class A general hospital, composed of three hospital districts, including the hospital headquarters, Huangpu District and Dongshan District.⁷⁴ The hospital has more than 4,500 formal employees and 2,228 ward beds. The hospital has 61 clinical departments and 15 medical technical departments.⁷⁵

I. Vice President He Xiaoshun and Several Doctors Have Admitted to Their Use of Falun Gong Practitioners' Organs in Transplants

追查迫害法輪功國際組織 (追查國際)

World Organization to Investigate the Persecution of Falun Gong (WOIPFG)

To investigate the criminal conduct of all institutions, organizations, and individuals involved in the persecution of Falun Gong; to bring such investigation, no matter how long it takes, no matter how far and deep we have to search, to full closure; to exercise fundamental principles of humanity; and to restore and uphold justice in society

Telephone Investigation Recording 1

Subject(s) of Investigation: Dr. Han from Guangzhou's First Affiliated Hospital, Sun Yat-sen University⁷⁶

Date: June 30, 2015 (**Phone number:** +86-2082375263)

Excerpts:

Investigator: There are 36 concentration camps in China to imprison Falun Gong practitioners. So their organs are used for transplantation. When many patients heard this, they all requested for such donor organs. Why? Because these donors are all healthy and they are practitioners.

Dr. Han: Yes, that's right. It is true that things were like that before. Now it doesn't work that way because of the international society.

(Recording 1. Download [MP3](#). Please refer to [pdf 33](#) for transcript translation)

Telephone Investigation Recording 2

Subject(s) of Investigation: Wang Changxi, director of the Kidney Transplant Department's Second Section at the First Affiliated Hospital, Sun Yat-Sen University, Guangzhou⁷⁷

Date: November 15, 2018 (**Phone number:** +86-13600450862)

Excerpts:

Investigator: I want to ask about the liver sources. You still use (those from) Falun Gong (practitioners), healthy donors, right?

Wang Changxi: All, all of them are. Now all donated ones are. All deceased citizen donors might all have these.

Personal profile: Wang Changxi is a professor, chief surgeon and PhD students' supervisor. He is currently the director of his hospital's Department of Organ Transplantation and concurrently the deputy director of its Surgery Laboratory. He is also a member of the international The Transplantation Society (TTS), a committee member of the Kidney Transplant Team of the Chinese Medical Association's Urology Branch, and a member of the Standing Committee of the Guangdong Society of Organ Transplantation⁷⁸.

(Recording 2. Download [MP3](#). Please refer to [pdf 11](#) for transcript translation)

Telephone Investigation Recording 3

Subject(s) of Investigation: He Xiaoshun, vice president of the First Affiliated Hospital, Sun Yat-sen University (First day)⁷⁹

Date: November 15, 2018 (**Phone number:** +86-13802510799)

Excerpts:

In general, it usually takes one or two weeks to arrange an operation, but sometimes [it would take] one month.

Investigator: Well, my question is: Are they the type of organs from Falun Gong (practitioners)? The organs themselves are healthy, right?

He Xiaoshun: Yes, right, right. Of course, of course.

(Recording 3. Download [MP3](#). Please refer to [pdf 12](#) for transcript translation)

Telephone Investigation Recording 4

追查迫害法輪功國際組織 (追查國際)

World Organization to Investigate the Persecution of Falun Gong (WOIPFG)

To investigate the criminal conduct of all institutions, organizations, and individuals involved in the persecution of Falun Gong; to bring such investigation, no matter how long it takes, no matter how far and deep we have to search, to full closure; to exercise fundamental principles of humanity; and to restore and uphold justice in society

Subject(s) of Investigation: He Xiaoshun, vice president of the First Affiliated Hospital, Sun Yat-sen University (Second day) ⁸⁰

Date: November 16, 2018 (**Phone number:** +86-13802510799)

Excerpts:

Investigator: Since on one hand, it is the issue of skills, on the other hand, it is the issue of the organ. The organs you use, I know they are from Falun Gong practitioners, so the organs must be good. Combining these two factors, it would be perfect.

He Xiaoshun: Correct.

(Recording 4. Download [MP3](#). Please refer to [pdf 13](#) for transcript translation)

Personal Profile: He Xiaoshun is a member of the International Liver Transplant Society, member of the International Society of Digestive Surgery, expert member of the Clinical Application Committee of the Human Organ Transplantation of the Ministry of Health, member of the Organ Transplantation Branch of the Chinese Medical Association, member of the Chinese Medical Association's Surgery Branch, vice chairman of the Guangdong Provincial Liver Disease Society, and chairman of the Organ Transplantation Professional Committee. ⁸¹

II. The First Affiliated Hospital, Sun Yat-sen University has a “Brain Death Center”

On July 20, 2015, an organ transplant surgeon at the First Affiliated Hospital, Sun Yat-sen University revealed that there were “brain death centers” across China. Huang Jiefu serves as an honorary director of the hospital’s organ transplant center. This surgeon said that prior to the abolishment of the use of executed prisoners’ organs for transplantation, the Chinese Communist Party had already set up “brain death centers” across the country to guarantee the supply of living donors to organ transplant hospitals.

The “brain death centers” are actually an additional link between the living organ donor bank and the hospitals’ organ transplant operating rooms. When a person is made “brain dead”, he would be sent to a brain death center, to have his breathing and blood circulation artificially maintained, to shorten the warm and cold ischemia times, to guarantee the quality of his organs for transplant use. On the other hand, since the people stored there are “dead”, the psychological pressure on the transplant surgeons is much smaller than direct organ excision from the “living organ donor bank”.

The First Affiliated Hospital, Sun Yat-sen University has a Brain Death Center

On July 20, 2015, Qin Han, a doctor from the Pediatric Cardiac Surgery Department at the First Affiliated Hospital, Sun Yat-sen University, which is located in Guangzhou, told a WOIPFG investigator, “We specifically have a brain death center. It is located in our South China, and it belongs to our hospital. Huangpu Hospital (where the center is located) is about 40 minutes by car (from here). Our hospital has two campuses, both of which are in Huangpu. We do surgeries in the headquarters and excise organs in Huangpu. So there will be no so-called warm ischemia. We’re supposed to be in control of (the organs from braindead people in) the whole country right now. Yes, it’s definitely like this, because now, all over the country, because our center is dedicated to operating the organ transplantation (industry). Because all over the country now, the (organs of) so-called executed prisoners have been canceled. So it is like this in the whole country. Across China, in every major city...that is, in South China, we may be a center, an organ transplant center. For example, say the whole country uses organs, there are places that need this type... so someone would call (us) to come over to excise (the organ). After all, since we are the First Affiliated Hospital, Sun Yat-sen University, they generally don’t come here to take (our organs). We basically (use all our organs) within the city, basically in Guangzhou, unless there’s an organ that we do not want, such as a wasted organ, which we don’t want. If some other province happens to need that type, then they could come

追查迫害法輪功國際組織 (追查國際)

World Organization to Investigate the Persecution of Falun Gong (WOIPFG)

To investigate the criminal conduct of all institutions, organizations, and individuals involved in the persecution of Falun Gong; to bring such investigation, no matter how long it takes, no matter how far and deep we have to search, to full closure; to exercise fundamental principles of humanity; and to restore and uphold justice in society

over to get it. The organs are mainly supplied to Guangzhou, and the First Affiliated Hospital, Sun Yat-sen University takes the priority, because (the brain death center is) operated by ourselves after all!”⁸²

(Recording 5. Download [MP3](#). Please refer to [pdf 87-1](#) for transcript translation)

(Recording 6. Download [MP3](#). Please refer to [pdf 87-2](#) for transcript translation)

Doctor of Liver Transplantation of the Third Transplant Area in the First Affiliated Hospital, Sun Yat-sen University (August 3, 2017): “There are more donors than before. The donor (organs) are from the donation of braindead patients. The organs can’t be transported. If the transport time is too long, it will affect the functions of the organs. The state has a corresponding system of distribution, but the distribution principle is proximity. The organs are distributed by the state.” “The organs are excised from the (donated) remains first, and then the remains are delivered to the schools.”

(Recording 7. Download [MP3](#). Please refer to [pdf 88](#) for transcript translation)⁸³

Doctor of Liver Transplantation from the Second Transplant Area in the First Affiliated Hospital of Sun Yat-sen University (September 26, 2017): “(Organ donors) come in batches. Sometimes several could come in, sometimes we would rest for a couple of days, then we have another batch of organ donors.” Donors would come into the hospitals, instead of organs. “Because our hospital has the qualification, we could excise (organs) by ourselves.”

(Recording 8. Download [MP3](#). Please refer to [pdf 89](#) for transcript translation)⁸⁴

III. Emergency Organ Transplants and the Short organ Wait Times

Usually, an emergency liver transplant is an emergency liver replacement operation for a patient of acute and severe liver disease, with a survival period of no more than 72 hours. Emergency liver transplantation is not common outside of China, due to the difficulty of emergency tissue typing and the long wait times for donors. However, in mainland China, emergency liver transplants have been widely performed in recent years.

Examples of Telephone Investigations

Telephone Investigation Recording 9

Subject(s) of Investigation: Jiao Xingyuan, director of Liver Transplantation of the First Affiliated Hospital, Sun Yat-sen University in Guangzhou

Date: October 7, 2017 (**Phone number:** +862082379475)

Summary: “We estimate that it takes 10 days to half a month to find the liver.” “(We’ve done emergency liver transplantation before, so) I know that we are able to do it.”⁸⁵

(Recording 9. Download [MP3](#). Please refer to [pdf 39](#) for transcript translation)

Telephone Investigation Recording 10

Subject(s) of Investigation: He Xiaoshun vice president and liver transplant specialist at the First Affiliated Hospital, Sun Yat-sen University in Guangzhou

Date: February 25, 2016 (**Phone number:** +86+1380251 0799)

Summary: “(We) have performed 30 or 40 cases of liver transplants this year (i.e. in less than 2 months), and we do (liver transplants) every week. You have the blood type B. After coming here for 2 to 3 weeks, you can have (a surgery), no more than one month the longest.”⁸⁶

(Recording 10. Download [MP3](#). Please refer to [pdf10](#) for transcript translation)

追查迫害法輪功國際組織 (追查國際)

World Organization to Investigate the Persecution of Falun Gong (WOIPFG)

To investigate the criminal conduct of all institutions, organizations, and individuals involved in the persecution of Falun Gong; to bring such investigation, no matter how long it takes, no matter how far and deep we have to search, to full closure; to exercise fundamental principles of humanity; and to restore and uphold justice in society

Telephone Investigation Recording 11

Subject(s) of Investigation: A doctor of liver transplantation from the First Transplant Area in the First Affiliated Hospital, Sun Yat-sen University⁸⁷

Date: May 6, 2018 (**Phone number:** +86-20-28823388 ext. 8277)

Summary: The hospital can perform 200 cases (of liver transplantation) every year. A lot of liver transplants were performed in 2017, and 100 cases were already completed in 2018. The wait times would be one to three months. It's possible to wait only one or two weeks.

(Recording 11. Download [MP3](#). Please refer to [pdf11](#) for transcript translation)

Telephone Investigation Recording 12

Subject(s) of Investigation: A doctor from the Kidney Transplantation Office at the First Affiliated Hospital, Sun Yat-sen University⁸⁸

Date: November 9, 2019 (**Phone number:** +86-20-87755766)

Summary: “If you are lucky, you may wait a week or two (to have the donor organ); but if you are not lucky, you can wait for two months or several months.”

(Recording 12. Download [MP3](#). Please refer to [pdf 150](#) for transcript translation)

IV. There are Ample Donor Sources and Huang Jiefu only used several hours to transfer several matching live donors as backups for his surgery

According to “Urumqi Online”, Sina.com and “*Today’s Nurse*” magazine,⁸⁹ in the afternoon of September 28, 2005, the then-Vice Minister of Health, Huang Jiefu, performed an autologous liver transplant at the First Teaching Hospital of Xinjiang Medical University and used three living people as back-up liver donors. One of them was found at the First Affiliated Hospital, Sun Yat-sen University within several hours.⁹⁰

V. The organ transplant department established by Huang Jiefu is suspected of being one of the main birthplaces of live organ harvesting for transplantation in China

Huang Jiefu, former Vice Minister of Health and the incumbent director of China’s National Organ Donation and Transplantation Committee, served as the president, vice president and director of the Hepatobiliary Surgery Department at the First Affiliated Hospital, Sun Yat-sen University, as well as president, vice president and communist party committee secretary of the former Sun Yat-sen University of Medical Sciences (SUMS) from 1987 to 2001.⁹¹

Huang Jiefu and Zheng Keli, a surgeon of kidney transplantation, established the Organ Transplantation Department at the First Affiliated Hospital, Sun Yat-sen University in 1996. The department was upgraded to become the “Guangdong Province Organ Transplant Research Center” in 1997. Since 1999, the number and clinical scale of kidney transplant operations at the First Affiliated Hospital, Sun Yat-sen University have always been among the top in China. In 2006, the center was approved by the Ministry of Health as a national kidney transplantation technical training base.⁹² In the same year, it was awarded the title of “China Liver Transplant Training Center” by the China Medical Board (CMB) in the United States and became one of the three major training centers for CMB’s liver transplantation in China, training a large number of doctors in organ transplantation technologies. It has also held many national-level organ transplant related training and education projects.⁹³

As a result, the First Affiliated Hospital, Sun Yat-sen University is regarded as one of the main birthplaces of clinical major organ transplantation in China.

追查迫害法輪功國際組織 (追查國際)

World Organization to Investigate the Persecution of Falun Gong (WOIPFG)

To investigate the criminal conduct of all institutions, organizations, and individuals involved in the persecution of Falun Gong; to bring such investigation, no matter how long it takes, no matter how far and deep we have to search, to full closure; to exercise fundamental principles of humanity; and to restore and uphold justice in society

VI. The Hospital has Well-equipped Organ Transplantation Departments, Many Organ Transplant Surgical Teams and Large-Scale Organ Transplant Operations

The organ transplantation departments at the First Affiliated Hospital, Sun Yat-sen University consist of Organ Transplant Area One (liver transplant inpatient area), Area Two (kidney transplant inpatient area), Area Three (eastern hospital area), the heart transplant inpatient service department, the organ transplant laboratory, the liver transplant specialist clinic and the outpatient department of kidney transplantation.⁹⁴

1. By as early as 2010, the hospital had performed tens of thousands of organ transplants.

As of 2017, the hospital's official website stated that its Organ Transplant Center had carried out more than 7,000 liver, kidney, heart, pancreas and small intestine transplant operations.⁹⁵ According to an article published by a newspaper called "New Express" on October 9, 2010, as of 2010, the hospital's Organ Transplant Center had performed liver and kidney transplants for over tens of thousands of patients.⁹⁶ The liver and kidney transplant volumes at the First Affiliated Hospital, Sun Yat-sen University have been consistently ranked the top among the several major organ transplant hospitals in Guangdong.

2. The hospital's number of transplants in a single day is astonishing, up to 19 kidney transplants per day.

Guangzhou Daily reported on March 14, 2006 that a reporter witnessed five liver transplants and six kidney transplants being performed simultaneously in the operating rooms at the First Affiliated Hospital, Sun Yat-sen University. The reporter also mentioned that the hospital performed as many as 19 cases of kidney transplantation in one day; and its highest record of liver transplants is six cases of liver transplantation and one case of multi-organ transplantation in one day.⁹⁷

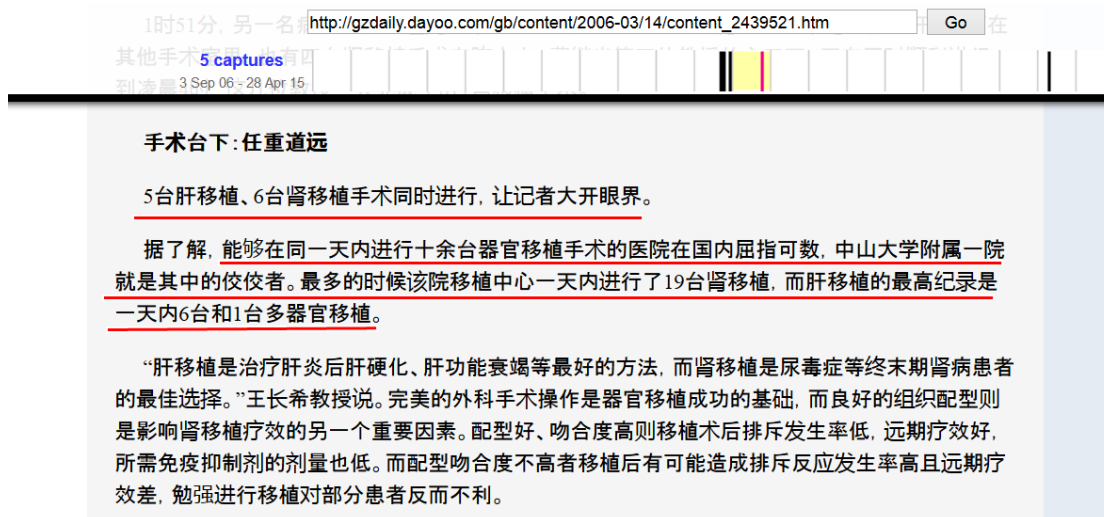

Figure 1 Snapshot of the *Guangzhou Daily* webpage

3. A "famous remark" of He Xiaoshun, vice president of the First Affiliated Hospital, Sun Yat-sen University, reveals the secret.

追查迫害法輪功國際組織 (追查國際)

World Organization to Investigate the Persecution of Falun Gong (WOIPFG)

To investigate the criminal conduct of all institutions, organizations, and individuals involved in the persecution of Falun Gong; to bring such investigation, no matter how long it takes, no matter how far and deep we have to search, to full closure; to exercise fundamental principles of humanity; and to restore and uphold justice in society

He Xiaoshun once said, “The number of liver transplants in the whole country in 2000 was 10 times that of 1999; and by 2005, the number tripled from that in 2000.”⁹⁸ This means that there was a 30-fold increase in the number of liver transplants from 2000 to 2005. The explosive growth of China’s organ transplants after 1999 coincides with the time period, during which the Chinese Communist Party (CCP) persecutes Falun Gong practitioners. This actually implies the earth-shattering crime that had not yet surfaced: behind the explosive growth of China’s organ transplant industry, it is the harvesting of living Falun Gong practitioners’ organs.

Phoenix Magazine Network published an article titled “The Inside Story of Human Organ Trafficking in China” on November 5, 2013. The article quoted the above mentioned remark from He Xiaoshun and inferred, “The year 2000 marked a watershed in China’s organ transplant industry.”⁹⁹

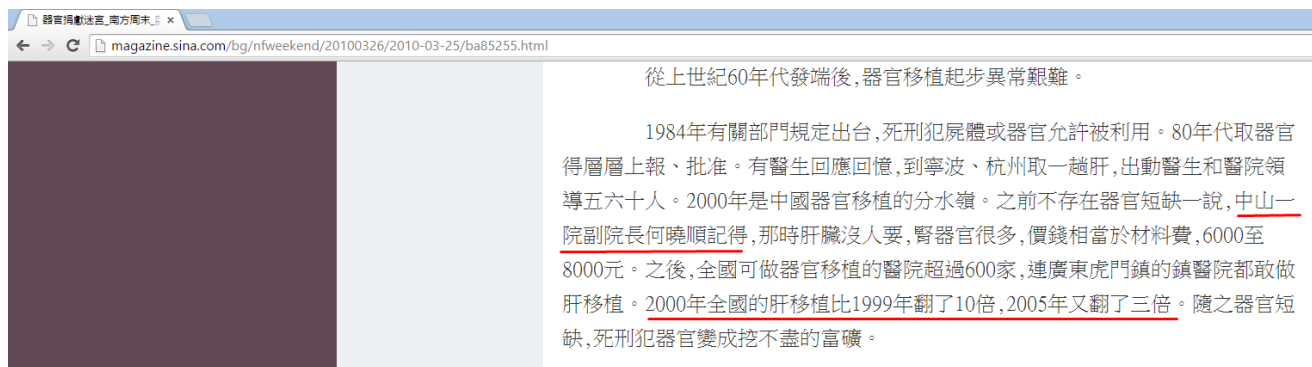

Figure 2 Snapshot of the Sina News webpage in November 2013

In 1999, China had 118 cases of liver transplant.¹⁰⁰ According to He Xiaoshun, in 2005 alone, China’s liver transplants reached 5,192 cases. The First Affiliated Hospital, Sun Yat-sen University claimed that they had “the most organ transplant categories in the entire country, and the total scale of organ transplants is second in the country.”¹⁰¹

4. The individual doctors’ transplant volumes at the hospital have reached several thousand cases per person.

Huang Jiefu, an honorary director at the First Affiliated Hospital, Sun Yat-sen University,¹⁰² told a journalist from *Guangzhou Daily* in March 2013 that he performed more than 500 liver transplants in 2012, and among them, only one transplant used a donated organ.¹⁰³ During an investigation telephone call on June 3, 2015, after hearing that Huang Jiefu did more than 500 liver transplants in one year, Dr. Han of the hospital’s Hepatobiliary Surgery Department said, “We have done more than 1,500 cases by now!”

news.dayoo.com/guangzhou/201303/13/73437_29475945.htm

去年底，黃潔夫到廣州參加會議時，就利用會議間隙親自主刀了3例肝移植手術。當本報記者提起此事時，黃潔夫說：“我去年做的肝移植手術有500多例，去年11月到廣州做的那台肝移植手術，是按照中國標準公民自願捐獻的首例肝移植手術。我作為全國人體器官移植臨床應用委員會（OTC）的主任委員，我要帶頭去向捐獻者鞠躬，讓醫務人員尊重生命，同時推廣宣傳我們的器官捐獻工作。”

Figure 3 Screenshot of a news article stating that Huang Jiefu performed more than 500 transplants in one year

Professor Zheng Keli, the chief surgeon of the hospital’s Urology Department, has presided over more than 3,000 kidney transplants.¹⁰⁴

追查迫害法輪功國際組織 (追查國際)

World Organization to Investigate the Persecution of Falun Gong (WOIPFG)

To investigate the criminal conduct of all institutions, organizations, and individuals involved in the persecution of Falun Gong; to bring such investigation, no matter how long it takes, no matter how far and deep we have to search, to full closure; to exercise fundamental principles of humanity; and to restore and uphold justice in society

According to the official website of the First Affiliated Hospital, Sun Yat-sen University in 2012, Professor Wang Changxi, director of the Organ Transplantation Department, already had the clinical experiences of performing more than 2,000 cases of transplantation. Among them, more than 700 cases of kidney transplantation were performed by him as the main surgeon.¹⁰⁵

As of February 2016, Zhu Xiaofeng, a professor in the Organ Transplantation Department, had performed more than 1,000 liver transplants, of which more than 600 cases were performed by him as the main surgeon. He has also performed 13 cases of upper abdominal organ cluster transplantation and 16 cases of combined pancreas-kidney transplantation.¹⁰⁶

As of February 2016, Yuan Xiaopeng, associate chief surgeon of the Organ Transplantation Department, had participated in more than 3,000 kidney transplant operations and performed more than 500 kidney transplant operations as the main surgeon.¹⁰⁷

...

WOIPFG released a list of organ transplant doctors in this hospital in 2014.¹⁰⁸ Among the liver and kidney transplant surgeons, we were able to discover from the hospital's official website and medical papers that 53 of them had actually performed operations, including 16 chief surgeons, nine associate chief surgeons and eight attending surgeons. The doctors at the hospital could form more than 10 liver and kidney transplant surgical teams.

VII. The hospital is the one that Taiwanese go to the most in the mainland for transplants

According to The Epoch Times, the Taiwan Supervisory Council corrected the Ministry of Health and Welfare's inaccurate notification of overseas organ transplants on March 8, 2019. Supervisory member Tian Qiuji further pointed out that there are four main hospitals for people from Taiwan to receive transplants in mainland China, and among them the First Affiliated Hospital of Sun Yat-Sen University in Guangzhou has the most.¹⁰⁹

According to a report by The Epoch Times, "A Chinese Doctor Performed Kidney Transplants for 66 Patients from Taiwan in 3 Years, and 5 in 3 Days, which is Unusual":

According to an investigation report released by the Taiwan Supervisory Council on March 7, 2019, from July 1, 2015 to September 19, 2018, a total of 368 people went abroad for organ transplants, of which 73 have no data on in which countries, hospitals, and by which doctors their transplants were done. And 281 of the remaining 295 people received organ transplants in China, and the First Affiliated Hospital of Sun Yat-sen University in Guangzhou had the most--78 people; and there were 66 kidney transplant recipients in this hospital, and the attending surgeons for them all was Yuan Xiaopeng.

The investigation report pointed out that, 8 times Yuan Xiaopeng performed kidney transplants for two patients in China on the same day, and the rest of the transplant operations were also done quite close one to another. The most frequent one was between March 15 and 17 of 2016, when 5 were done. The least frequent one was just over 5 months apart, that is, after the operation on June 17, 2018, the Ministry of Health and Welfare decided on July 9 of the same year to ask the National Health Insurance Department to discuss that for those who did not report completely, the National Health Insurance will not pay anti-rejection drugs. Thereafter, the operation record became available on November 23 of the same year. Over 3 years after the amendment of the "Regulations on Human Organ Transplantation", there are still cases of overseas transplants that have not been fully reported. Among the 63 people who were followed up by the Hospital Affiliated to China Medical University, 57.14% had not completed the notification. And among the kidney patients who received Yuan Xiaopeng's transplant surgery, another 58 people (about 88%) were followed up by the Hospital Affiliated to Sun Yat-sen Medical University, all of which were inconsistent with the norm.¹¹⁰

Figure 4. Timeline of Kidney Transplants done by Chinese doctor Yuan Xiaopeng for Patients from Taiwan. (Reporter Yuan Shigang/Tabulation)

VIII. Dr. Zhou Yidi, formerly working in the medical department of the hospital, said that the CCP’s live organ harvesting really exists. Around 2002, her hospital performed at least two transplant operations every day. ¹¹¹

Zhou Yidi, who used to work in the medical department of the First Affiliated Hospital of Sun Yat-sen University in Guangzhou, said in an interview with reporters that the CCP’s live organ harvesting really exists. Around 2002, her hospital performed at least two transplant operations every day.

Zhou Yidi, former doctor of the Sun Yat-Sen Hospital: “We have a specialized organ transplant center. At the Affiliated Hospital of Sun Yat-Sen University, Huang Jiefu established the country’s first transplant center. When he just returned from overseas, liver and kidney transplants were not that common, and I didn’t notice it at the time, but anyway, when I was there, their liver transplant center was getting bigger and bigger.” “Because it’s a center, it has different beds, and it’s full every day. At least one or two surgeries were done, this was the minimum.”

Zhou Yidi said that any organ transplant needs organ matching, and it is not easy to achieve successful matching in medicine. If there were no organ banks and organ matching, how could there be so many organ transplants in mainland China? “How come our hospital is so lucky that every day there are so many kidney transplants and liver transplants? How come the matching here was successful so quickly? This is simply impossible. It will be possible only when you have many people available as donors. ”

Zhou Yidi said that when working in the hospital's medical department, the hospital clearly stipulated that it would not accept any organs approved by private or non-government health department, and the only source was official channels. Zhou Yidi said that in 2002, the director of the department instructed her to take the hospital request slip to the Guangdong provincial government for its approval seal.

Zhou Yidi said: “Going to the provincial government to get a seal, our hospital request slip needs to have a stamp from the provincial government, and then the stamped approval slip is given to the people in the medical department. Then the people in the medical department will take this to the police-prosecutor-court systems to complete the following procedure (live harvesting). ”

IX. The CCP attaches great importance to the scientific and technological research and development of organ transplantation and invests a lot of money

The CCP attaches great importance to the scientific and technological research and development of organ transplantation, and programs related to organ transplantation can get a large amount of financial support from the government.

The following is a list of research funds hosted by He Xiaoshun.¹¹²

- 1) A key organ transplantation technical sub-project of the state's "863 Program" (aka. State High-Tech Development Plan): The diagnosis and treatment strategies for infectious diseases related to the survival of transplanted organs (2.88 million yuan, 2012-2015)
- 2) Guangzhou Municipal Science and Technology Project: The application value of MicroRNA molecular markers in predicting early rejection after liver transplantation operations (600,000 yuan, 2013-2015)
- 3) A hospital clinical discipline key project under the Ministry of Health: The Clinical and Experimental Research on Improving the Quality of Donated Organs after Cardiac Death (4 million yuan, 2010-2012)
- 4) National Natural Science Foundation of China's general project: The anti-apoptotic mechanism of Adiponectin in liver ischemia-reperfusion injuries (600,000 yuan, 2009-2012)
- 5) National Natural Science Foundation of China's general project: The research on the regulation and mechanism of Calpain-2 on autophagy in fatty liver ischemia-reperfusion injuries (800,000 yuan, 2012-2015)
- 6) Special sub-project of scientific research in the health industry: The establishment, optimization and promotion of key technical standards for organ vitality assessment, organ in vitro repair and liver transplantation for donors after cardiac death (650,000 yuan, 2011-2013)
- 7) Sub-project of the National Science and Technology Support Program: Fundamental research on small-scale liver transplantation related applications (650,000 yuan, 2008-2010)
- 8) Sub-project of the National Science and Technology Support Program: Research on key surgical techniques of abdominal multiple organ transplantation (250,000 yuan, 2008-2010)
- 9) Guangdong Provincial Science and Technology Plan's key project in clinical medicine: An open, forward-looking, randomized and controlled clinical study on the safety and effectiveness of tauroursodeoxycholic acid capsules for adjuvant treatment after liver transplantation (600,000 yuan, 2011-2014)
- 10) A doctoral program from the special research fund for doctoral disciplines of the Ministry of Education: The regulatory mechanism and research of TLR4 signals of organ donors and recipients on regulatory T cells during organ ischemia reperfusion (80,000 yuan, 2011-2013)
- 11) Funding for work entrusted by the Department of Medical Service Supervision of the Ministry of Health: The study on the quality control standards of DCD (donation after cardiac death) donated organs (50,000 yuan, 2010-2012)

追查迫害法輪功國際組織 (追查國際)

World Organization to Investigate the Persecution of Falun Gong (WOIPFG)

- 12) He presided over a key hospital clinical subject under the Ministry of Health: The experimental and clinical trials of split liver transplantation (2 million yuan, 2009-2010)
- 13) Guangdong Provincial Science and Technology Plan's project: The experimental and clinical research on brain-dead donor livers as a source of organs for clinical liver transplantation (50,000 yuan, 2008-2010)
- 14) The Ministry of Education's "Program for New Century Excellent Talents" (500,000 yuan, the Ministry of Education)
- 15) A Guangzhou Municipal Science and Technology Research Project: The experimental and clinical research on organ cluster transplantation and its immune tolerance formation mechanism (150,000 yuan)
- 16) Clinical research on orthotopic liver transplantation in the treatment of severe hepatitis (a key research project of the Guangdong Provincial Science and Technology Commission). (200,000 yuan, 2001-2003)
- 17) The relationship between the expression of adhesion molecules in bile and liver transplant rejection (National Natural Science Foundation of China) (80,000 yuan, 1996-1998)

X. A Medical Paper Reveals Suspected Live Organ Harvesting

The First Affiliated Hospital, Sun Yat-sen University used "tracheal intubation" before heart and lung excisions.

The hospital used two donors in two combined heart-lung transplants in 2006: "In both cases, the donors were male, 28 and 32 years old respectively, and both were **diagnosed as brain-dead patients**, without heart disease or any infectious disease."¹¹³ Their first step of excising the hearts and lungs is "pre-anaesthesia treatment", including "tracheal intubation".¹¹⁴

**2.2.1 麻醉术前处理 为缩短供心肺的取血时间，
巡回护士快速开放静脉通道，将供体体位摆好(平卧
位，两上肢分别置于供体两旁)并固定妥当。协助麻
醉医生进行支纤镜检查后进行气管插管。**

Figure 5 An excerpt from the medical paper revealing a suspected case of live organ harvesting

An excerpt from the medical paper reads, "In order to shorten the blood collection time from the donor's heart and lungs, the circulating nurses quickly opened the venous access, placed the donor in position (in a supine position, with the two upper limbs on each side of the donor) and fixed the donor properly. They assisted the anesthesiologist to perform the tracheal intubation after bronchoscopy."

Since the two "patients" had already been "diagnosed as brain-dead", they should have already had the tracheal intubation to maintain breathing. However, the above-mentioned cutting steps show that the "patient" was not intubated at that time, and he was directly "diagnosed" as brain death without intubation for rescue, and then "tracheal intubation" was performed after the heart and lungs were cut, which shows that the organ donor was a living person, and the process of organ harvesting is the process of harvesting the organ from a living person.

XI. List of responsible persons:

追查迫害法輪功國際組織 (追查國際)

World Organization to Investigate the Persecution of Falun Gong (WOIPFG)

To investigate the criminal conduct of all institutions, organizations, and individuals involved in the persecution of Falun Gong; to bring such investigation, no matter how long it takes, no matter how far and deep we have to search, to full closure; to exercise fundamental principles of humanity; and to restore and uphold justice in society

ZSDX 001 He Xiaoshun

Gender: male
Date of birth: 1964
A member of Chinese Communist Party

Job Titles: 2003.10-2009.4, Director of the Department of Organ Transplantation, The First Affiliated Hospital of Sun Yat-sen University. From 2009.4-now, academic leader of organ transplantation in the First Affiliated Hospital of Sun Yat-sen University, deputy dean, director of Huangpu District Management Committee. Vice President of the First Affiliated Hospital of Sun Yat-sen University, member of the International Society of Liver Transplantation, member of the International Society of Digestive Surgery, expert member of the Clinical Application Committee of Human Organ Transplantation of the Ministry of Health of China, member of the Organ Transplantation Branch of the Chinese Medical Association, member of the Surgery Branch of the Chinese Medical Association, Vice President of Guangdong Society of Liver Diseases, Chairman of the Organ Transplant Professional Committee.¹¹⁵

On November 5, 2013, "Southern Weekend" quoted He Xiaoshun in the article "Organ Donation Labyrinth": "The year 2000 was a watershed in China's organ transplantation." "The number of liver transplants nationwide in 2000 was 10 times that of 1999. This number tripled in the year 2005."¹¹⁶ "Guangzhou Daily" reported on March 14, 2006 that 19 kidney transplants were performed in the First Affiliated Hospital of Guangzhou Sun Yat-sen University in one single day. At this time, He Xiaoshun was the director of the transplantation division¹¹⁷.

As of 2017, the hospital's official website stated that its Organ Transplant Center he headed had carried out more than 7,000 liver, kidney, heart, pancreas and small intestine transplant operations.¹¹⁸

ZSDX002 Qiu Shaopeng

Gender: male
Date of birth: May 1958
Place of birth: Shantou City, Guangdong Province

Personal profile: Chief Surgeon, Professor, Head of Division of Urology

Doctoral degree, currently a professor of urology and doctoral supervisor. He began to work in September 1975, took his undergraduate education at Sun Yat-sen University of Medical Sciences from 1978 to 1982. In 1990, he was admitted as a part on-the-job graduate student studied for a master's degree at Sun Yat-sen University of Medical Sciences and transferred to a doctoral program. He gained his MD degree in 1994, half a year early than normal. He is engaged in clinical and research work of kidney transplantation¹¹⁹.

ZSDX003 He Yulong

Gender: male.
Personal profile: professor of gastrointestinal and pancreatic surgery, doctoral supervisor. Good at combined organ cluster transplantation to treat advanced gastrointestinal tumors¹²⁰.

ZSDX004 Fu Qian

追查迫害法輪功國際組織 (追查國際)

World Organization to Investigate the Persecution of Falun Gong (WOIPFG)

Gender: female.

Personal profile: Assistant researcher of Organ Transplantation Department.

Engaged in research on transplantation immunity and tissue matching for more than ten years. Good at perioperative management of kidney transplantation and long-term follow-up management of postoperative patients, tissue matching, immunosuppressant metabolic genetics and drug concentration monitoring, treatment of anti-HLA antibodies and acute/chronic humoral rejection before and after kidney transplantation¹²¹.

ZSDX005 Qu Jingsong

Gender: male

Date of birth: July 1968

Place of birth: Panyu, Guangzhou City, Guangdong Province

Personal profile: Chief surgeon and professor of cardiac surgery

Graduated from university in 1991 and received doctoral degree from Sun Yat-sen University of Medical Science in 2000. He has served as a clinical visiting scholar, postdoctoral fellow, and professor in the Medical Center of University of California Los Angeles and the Cardiovascular Center of Medical College of Wisconsin, the largest heart transplantation center and adult congenital heart disease center respectively in the United States, for nearly 6 years. recruited by the "Hundred Talents Program" of Sun Yat-sen University in 2008. Good at the diagnosis and medical treatment of various congenital and acquired heart diseases such as valvular disease, coronary heart disease and macrovascular disease. Main research direction: Pathogenesis and treatment of cardiovascular diseases. He has presided over and participated in scientific research projects funded by NIH USA, Ministry of Science and Technology of China, National Natural Science Foundation of China and other scientific researches. Social part-time job: Academician of Chest Doctor of American University, Life Member of American Association for Outstanding Cardiovascular Academic Research, a member of American Heart Association, American Physiological Society and other societies, a judge committee member for cooperation project of science and technology and Guangzhou Overseas High-level Talent Recruit Plan.

Good at heart transplantation¹²².

ZSDX006 Wu Zhongkai

Gender: male.

Personal profile: Deputy Director of Cardiac Surgery, Chief Surgeon, Professor

The main research direction is heart lung transplantation¹²³.

ZSDX007 Zhou Jian

Gender: male

Personal profile: organ transplant surgeon

After graduating from Sun Yat-Sen University in 2012 with a doctorate in medicine, he worked in the Eastern Hospital of the First Affiliated Hospital of Sun Yat-Sen University.

During the master's degree program in 2006, he went to Tokyo Toho University for

Personal profile: professor and chief surgeon of cardiac surgery

Main education and work experience:

1995.10-present: Professor, Head of Department, Department of Cardiac Surgery, Sun Yat-Sen Medical University

1987.11-1990.1: PhD student, lecturer, Department of Cardiac Surgery, Zhongshan Medical University

1985.7- 1987.10: Attending, Lecturer, Department of Cardiac Surgery, Sun Yat-Sen Medical University

1982.7-1985.6: Postgraduate, Sun Yat-Sen Medical University

1976.12-1982.6: Surgeon, Guangzhou Railway Central Hospital

1976.12: Graduated from the Medical Department of Zhongshan Medical College.

1992.6-1995.9: Associate Researcher, BUMC Cardiac Surgery, USA

1990.1-1992.5: Postdoctoral fellow, NEMC, Tufts University, USA. Successively performed the first heart transplantation and combined heart-lung transplantation¹²⁸.

ZSDX012 Xu Yingqi

Gender: male.

Personal profile: Chief surgeon of cardiac surgery

1978.9-1983.7 graduated from Zhongshan Medical University with a bachelor's degree

1983.7-1989.9 Obtained a master's degree

1994: Department of Cardiothoracic Surgery, Tampere University Hospital, Finland,

1983.7-Present Chief Surgeon of Cardiac Surgery, The First Affiliated Hospital of Sun Yat-sen University

Proficiency in heart transplantation, etc., with rich clinical experience¹²⁹.

ZSDX013 Dai Yuping

Gender: male

Personal profile: chief surgeon, professor, doctoral supervisor, division director of urology.

He has accumulated certain experience in diagnosis and treatment of kidney transplantation¹³⁰.

ZSDX014 Zhu Xiaofeng

Gender: male.

Personal profile: Professor of the Department of Organ Transplantation; Deputy Chairman of the Organ Transplant Professional Group of the Guangdong Provincial Society of Liver Diseases; Secretary of the Human Organ Transplant Clinical Application Committee of the Guangdong Provincial Department of Health; Member of the Standing Committee of the Guangdong Provincial Society of Organ Transplantation

追查迫害法輪功國際組織 (追查國際)

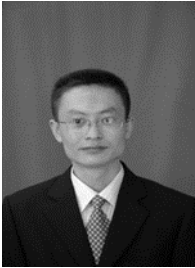

World Organization to Investigate the Persecution of Falun Gong (WOIPFG)

To investigate the criminal conduct of all institutions, organizations, and individuals involved in the persecution of Falun Gong; to bring such investigation, no matter how long it takes, no matter how far and deep we have to search, to full closure; to exercise fundamental principles of humanity; and to restore and uphold justice in society

Main education and work experience:

Graduated from undergraduate degree in 1983 and began to work in general surgery; received a master's degree in surgery in 1985; received a doctorate in 1994; promoted to associate professor in 1994; worked in the Department of Organ Transplantation, First Affiliated Hospital of Sun Yat-sen University in Guangzhou at the end of 1996, promoted to professor in 2000, and became a doctoral supervisor in 2003, Deputy Director of Transplantation Department, third-level professor. From 1995 to 1996, he went to Germany for postdoctoral research in general surgery and organ transplantation. He started organ transplantation in 1991 and has performed more than 1,000 liver transplants so far (2014?), of which more than 600 have been performed by himself personally. The main surgical types completed include classic, piggyback, modified piggyback, volume reduction and pediatric liver transplantation, combined liver and kidney transplantation, etc., and successfully performed the first upper abdominal organ transplant in Asia (13 cases have been completed). Successfully performed cases first in Asia of combined liver and small bowel transplantation, the first domestic liver transplantation with two livers and three recipients, the first domestic liver transplantation combined with pancreaticoduodenectomy, mother-child parent-child small bowel transplantation, and the first living-donor right liver transplantation (with middle hepatic vein) in South China, the first domestic liver transplantation, the first joint pancreas-kidney transplantation in Sun Yat-sen University (16 cases have been completed), etc ¹³¹.

ZSDX015 Li Jun

Gender: male

Personal Profile: Deputy Chief Surgeon of Organ Transplantation Department

2001-2004: Master program of Surgery, Sun Yat-sen University,

2008-2011, PhD program, Sun Yat-sen University

He has been engaged in kidney transplantation for 13 years, carrying out more than 80 cases of kidney transplantation every year¹³².

ZSDX016 Yin Shengli

Gender: male.

Personal Profile: Chief Surgeon of Cardiac Surgery Division

Education Background:

November 2003 - June 2004: Infant thoracic surgery training at the Children's Heart Center, UCSF, USA, received a certificate on Treatment of Infant Heart Disease and Cardiopulmonary Transplantation, under the mentoring of Prof. Tom R. Karl and Prof.

Hoops.

September - October 1999: Heart transplantation training at the Berlin Heart Center, Germany, under the mentoring of Professor Yuguo Weng.

September 1992 - July 1995: Master program of Cardiac Surgery supervised by Professor Sun Peigu.

September 1982 - July 1988: (Undergraduate study at) the Department of Clinical Medicine, Sun Yat-sen Medical College.

Work Experience:

December 2006 - present: Chief Surgeon of Cardiac Surgery Division of the First Affiliated Hospital of Sun Yat-sen University.

November 2003-June 2004: Visiting Scholar for clinical study at the Infant Thoracic Surgery of Children's Heart Center in UCSF, US.

December 1999-November 2006: Associate Professor of Cardiac Surgery, Associate Chief Surgeon

追查迫害法輪功國際組織 (追查國際)

World Organization to Investigate the Persecution of Falun Gong (WOIPFG)

To investigate the criminal conduct of all institutions, organizations, and individuals involved in the persecution of Falun Gong; to bring such investigation, no matter how long it takes, no matter how far and deep we have to search, to full closure; to exercise fundamental principles of humanity; and to restore and uphold justice in society

December 1993-November 1999: Attending Surgeon of Cardiac Surgery Department

July 1988-November 1993-Resident Surgeon in Surgery received a certificate on Treatment of Infant Heart Disease and Cardiopulmonary Transplantation, under the mentoring of Prof. Tom R. Karl and Prof. Hoops.

November 2003-June 2004: Training at the Infant Thoracic Surgery of Children's Heart Center in UCSF, United States, Infant Heart Disease Treatment and Heart Lung Transplantation (certificate), Tutor: Prof. Tom R. Karl and Prof. Hoops.

September - October 1999: Heart transplantation training at the Berlin Heart Center, Germany, under the mentoring of Professor Yuguo Weng.

After returning to China, assisted the department to carry out two cases of the youngest combined heart and lung transplantation in China and the first adult heart transplantation in Sun Yat-sen University¹³³.

ZSDX017 Jiao Xingyuan

Gender: male.

Personal Profile: Professor of organ transplant surgery, Director of the Third District of Transplant Surgery Department.

In July 1991, he graduated from The Medical College of Xi 'an Jiaotong University (formerly Xi 'an Medical University), received his bachelor's degree of medicine in the same year, graduated and received his master's degree and doctor's degree In July 1997 and July 2000 respectively, under the supervising of Professor Shi Jingsen. Since July 2000, he had been engaged in post-doctoral research in the Clinical Medicine Pos-doc Research Station of Sun Yat-sen University under the mentoring of Professor Huang Jiefu. In September 2002, he entered the Hepatobiliary Department of the Second Affiliated Hospital of Guangzhou Medical College after leaving the pos-doc station. In 2011, he was taken by the Organ Transplant Center of the First Affiliated Hospital of Sun Yat-sen University as a discipline backbone and served as the Director of the Third District of Transplant Surgery Department.

In January 2005, he went to The Department of Organ Transplant-General Surgery, Essen School of Medicine, Duisburg-Essen University, Germany, and worked as a postdoctoral researcher under the tutorship of Professor Broelsch CE, the President of the European Society of Hepatobiliary and Pancreas and the Society of Organ Transplantation.

Mastering of liver transplantation¹³⁴.

ZSDX018 Xiong Mai

Gender: male.

Personal Profile: Associate chief surgeon of cardiac surgery department

Major Education and work Experience:

September 1993 ~ July 2000: Sun Yat-sen University of Medical Sciences, seven-year master's program.

July 2000 ~ December 2003: The First Affiliated Hospital of Sun Yat-sen University Cardiothoracic Surgery Residency.

August 2003 ~ April 2004: Participation in the establishment of the cardiac surgery department of the Affiliated Hospital of Guiyang Medical College.

December 2003 ~ December 2009: Attending surgeon of cardiothoracic surgery and cardiac surgery at the First Affiliated Hospital of Sun Yat-sen University.

September 2005 ~ December 2008: Doctoral student of cardiac surgery at the First Affiliated Hospital of Sun Yat-sen University.

追查迫害法輪功國際組織 (追查國際)

World Organization to Investigate the Persecution of Falun Gong (WOIPFG)

To investigate the criminal conduct of all institutions, organizations, and individuals involved in the persecution of Falun Gong; to bring such investigation, no matter how long it takes, no matter how far and deep we have to search, to full closure; to exercise fundamental principles of humanity; and to restore and uphold justice in society

December 2009 to present: Associate chief surgeon of cardiac surgery at the First Affiliated Hospital of Sun Yat-sen University.

November 2010 ~ January 2012: A member of the 11th Service Mission under the Organization Department of the CCP Central Committee, temporary in the Cardio-cerebrovascular Disease Hospital of the General Hospital of Ningxia Medical University

Since 1998, he has been specialized in cardiac surgery and received standardized training for master's and doctor's degrees. He is mainly engaged in the diagnosis and treatment and perioperative management of heart transplantation and heart-lung transplantation¹³⁵.

ZSDX019 Wang Dongping

Gender: male

Date of Birth: October 1965

Place of Birth: Shangqiu city, Henan Province

Personal Profile: Associate chief surgeon of organ Transplantation Department

Graduated with a bachelor's degree in 1988, a master's degree in 1995, and a doctor's degree in 2002. Engaged in thoracic surgery, pediatric surgery, emergency surgery, general surgery for years. Engaged in liver transplantation for 10 years.

Mainly engaged in the clinical and scientific research of liver transplantation, pancreas transplantation, small intestine transplantation and multi-organ transplantation.¹³⁶

ZSDX020 Wang Guodong

Gender: male

Personal Profile: Associate professor of organ transplantation

Education and Work Experience:

August 1988 ~ July 1993: Xinxiang Medical College, Henan

August 1993 ~ July 1994: Regional People's hospital of Nanyang, Henan

August 1994 ~ July 1997: Master student of Sun Yat-Sen Medical University

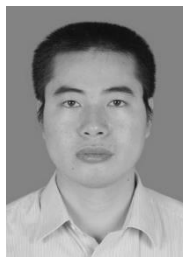

July 1997~ April 2002: The First Affiliated Hospital of Sun Yat-Sen University

July 2000 ~ October 2005: Doctoral student of the First Affiliated Hospital of Sun Yat-Sen University

October 2005 ~ present: The First Affiliated Hospital of Sun Yat-Sen University. Senior visiting scholar and postdoctoral fellow at the University of Pennsylvania (Upenn) of the United States from 2002 to 2005, received training on living donor liver transplantation and pediatric liver transplantation, and conducted experimental research on liver regeneration after liver transplantation.

Has been engaged in liver surgery, liver transplantation surgery and pancreatic kidney transplantation for more than 18 years. Familiar with perioperative management and long-term follow-up of liver and pancreas transplant patients, including donor surgery, organ repair, transplantation, vascular biliary tract reconstruction. Focus on liver surgery, liver transplantation and pancreatic kidney transplantation¹³⁷.

ZSDX021 Wang Xiaoping

Gender: male.

Personal Profile: Attending surgeon of the Organ Transplantation Department

Graduated from the First Affiliated Hospital of Sun Yat-sen University, Master of Clinical hepatobiliary surgery, doctor degree of clinical liver transplantation¹³⁸.

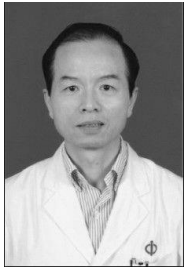

追查迫害法輪功國際組織 (追查國際)

World Organization to Investigate the Persecution of Falun Gong (WOIPFG)

To investigate the criminal conduct of all institutions, organizations, and individuals involved in the persecution of Falun Gong; to bring such investigation, no matter how long it takes, no matter how far and deep we have to search, to full closure; to exercise fundamental principles of humanity; and to restore and uphold justice in society

ZSDX022 Wang Zhiping

Gender: male

Date of Birth: February 1956

Place of Birth: Qiyang County, Hunan Province

Personal Profile: Professor and chief surgeon of cardiac surgery¹³⁹.

December 2012 - present: Professor, chief surgeon, Department director, Department of Cardiac Surgery, The First Affiliated Hospital of Sun Yat-sen University

March 2003 - December 2010: Professor, Deputy Director of department, Department of Cardiothoracic Surgery, The First Affiliated Hospital of Sun Yat-sen University.

February 2002 ~ February 2003: Postdoctoral research at the Cardiothoracic Surgery Department in the Medical School of the University of Colorado, US.

September 1996 ~ January 2002: Associate professor, cardiothoracic surgery department of the First Affiliated Hospital of Sun Yat-sen University.

February 2000 ~ Jun 2002: Visiting scholar, cardiac surgery department of the German Berlin Heart Center.

August 1995 ~ August 1996: Visiting scholar on thoracic surgeons, the Affiliated Hospital of Tampere University, Finland.

July 1994 ~ July 1995: Attending surgeon, Cardiothoracic Surgery Department, the First Affiliated Hospital of Sun Yat-sen University.

August 1991 ~ July 1994: PhD student in the First Affiliated Hospital of Sun Yat-sen University.

January 1987 ~ July 1991: Attending surgeon, Cardiothoracic Surgery Department, Xiangya Hospital Affiliated to the Hunan Medical University.

August 1983 ~ December 1986: Master's degree student of the Second Affiliated Hospital of Hunan Medical University.

August 1978 ~ July 1983: Attending surgeon, Surgery Department, the Second Affiliated Hospital of Hengyang Medical College.

August 1975 ~ August 1978: Clinical Medicine Department of Hengyang Medical College.

February 2002 ~ February 2003: Postdoctoral fellow, Department of Cardiothoracic Surgery, University of Colorado School of Medicine, USA.

February 2000 ~ Jun 2002: Visiting scholar, Cardiac Surgery at the German Berlin Heart Center.

August 1995 ~ August 1996: Visiting scholar, thoracic surgeon's department, Affiliated Hospital of Tampere University, Finland.

ZSDX023 Wang Changxi

Gender: male

Personal Profile: Professor of Organ Transplantation Department, member of Kidney Transplantation Group of Urology Branch of Chinese Medical Association, standing committee member of Guangdong Organ Transplantation Society, editorial board member of Chinese Journal of Organ Transplantation and Journal of Organ Transplantation.

From 1980 to 1985, He was a student in Suzhou Medical College, majoring in clinical medicine. After graduation, he had been worked in the urology department of Nanhua Hospital affiliated to Nanhua University. From 1988, he began to study and work in the First Affiliated Hospital of Sun Yat-sen University. He obtained the master's degree of urology in 1991 and the Doctor's degree in organ transplant surgery in 1999. He was promoted to associate professor in the same year and chief surgeon in 2004. He worked as deputy Director of the Surgical Laboratory from 2004 to 2009 and has been director of the Organ Transplantation Department since October 2009.

In 2000, he went to The Novartis Transplantation Immunology Research Center at the University of Basel, Switzerland, and devoted to the clinical work and research of kidney transplantation after coming back

追查迫害法輪功國際組織 (追查國際)

World Organization to Investigate the Persecution of Falun Gong (WOIPFG)

home.

He has been engaged in kidney transplantation research since 1989 and has more than 2000 cases of clinical experience, including presiding over more than 700 cases of primary kidney transplantation, and dozens of children, elderly people and many special patients with severe lower urinary tract abnormalities were performed, treatment of severe infections such as postoperative rejection, cytomegalovirus pneumonia, fungal pneumonia and tuberculosis. Since taking charge of the kidney transplantation work in 2009, he has completed the most DCD kidney transplantation in China¹⁴⁰.

ZSDX024 Luo Honghe

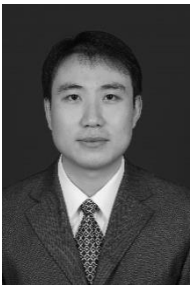

Gender: male

Personal profile: Chief surgeon of the Department of Cardiovascular Medicine ¹⁴¹

Deep research on heart and lung transplantation.

ZSDX025 Hu Anbin

Gender: male

Personal profile: Deputy Chief Surgeon of Organ Transplantation Department

Education and work experience:

September 1993 - July 1998: Undergraduate student and bachelor's degree in Binzhou Medical College, Shandong

August 1998 - August 1999, Resident surgeon in Huantai Branch of Qilu Affiliated Hospital of Shandong University

September 1999 - July 2004, Master and PhD co-student in Hepatobiliary Surgery, Wuhan Union Hospital of China.

July 2004 - July 2006, Post doctorate at the Department of Organ Transplantation, The First Affiliated Hospital of Sun Yat-sen University

August 2006 - December 2008: Lecturer/Attending Surgeon at the Department of Organ Transplantation, The First Affiliated Hospital of Sun Yat-sen University

December 2008 - present, Associate Professor/Associate Chief Surgeon, Department of Organ Transplantation, the First Affiliated Hospital of Sun Yat-sen University

April 2011 to present: Supervisor of master students in the Organ Transplantation Department of the First Affiliated Hospital of Sun Yat-Sen University.¹⁴²

Mainly engaged in liver transplantation. In addition, has carried out the joint pancreas-kidney transplantation for 8 years for the treatment of diabetes and renal failure and other diseases.

ZSDX026Yuan Xiaopeng

Gender: male,

Personal Profile: Associate Professor of Organ Transplantation Department

Graduated from the First Military Medical University in 1995. He began to work on organ transplantation in 1998.

Participated in more than 3000 cases of kidney transplantation and presided over more than 500 cases of primary kidney transplantation. Familiar with blood purification, tissue

追查迫害法輪功國際組織 (追查國際)

World Organization to Investigate the Persecution of Falun Gong (WOIPFG)

matching and kidney transplantation. Specializes in kidney transplantation in patients with high sensitization (PRA positive), diabetic nephropathy, and elderly patients¹⁴³.

ZSDX027 Zhan Wenhua

Gender: male.

Personal Profile: Chief surgeon and professor of Gastrointestinal and Pancreatic Surgery Department

September 1979 - July 1982: Graduate student of Sun Yat-Sen Medical University.

July 1982 - present: Gastrointestinal Pancreatic Surgery Department of the First Affiliated Hospital of Sun Yat-Sen University

January - July 1991: Trainee of School of Medicine, Hong Kong University

December 1992 - March 1993: Visiting Fellow at Nagasaki University

December 1994: Accelerated promotion to professor and chief surgeon, the First Affiliated Hospital of Sun Yat-sen University

March 1998 - March 2002: Director of General Surgery and Director of Gastrointestinal Pancreatic, the First Affiliated Hospital of Sun Yat-sen University

Jun 1996 - Jun 2000: Executive President of the First Affiliated Hospital of Sun Yat-sen University

Jun 2000 - December 2004: President of the First Affiliated Hospital of Sun Yat-sen University Jun 2004 - July 2008: Director of the Research Center for The Diagnosis and Treatment of Gastric Cancer, Sun Yat-sen University

September 2005 - December 2011: Chief Academic Leader of gastrointestinal and pancreatic surgery, the First Affiliated Hospital of Sun Yat-sen University.

In cooperation with the Organ Transplantation Department, the first abdominal multi-organ transplantation and liver transplantation for gastric cancer, colorectal cancer and liver metastasis in Asia was completed. Specializes in the clinical and experimental transplantation of pancreas and islet¹⁴⁴.

ZSDX028 Fei Jiguang

Gender: male

Personal Profile: Associate chief surgeon of Organ Transplantation Center

September 1982 - July 1987: Henan Medical University

October 1987 - July 1989: Yuanyang People's Hospital, Henan

September 1989 - July 1992: Master student of Henan Medical University

September 1992 - July 1997: People's Hospital of Henan Province

September 1997 - July 2000: Doctoral program student of Sun Yat-Sen Medical University

September 2000 - present: The First Affiliated Hospital of Sun Yat-sen University.

Engaged in urology and kidney transplantation work for more than 10 years¹⁴⁵.

ZSDX029 Zhao Qiang

Gender: male

Personal Profile: Attending surgeon of Organ Transplantation Department

Graduated from an eight-year successive postgraduate and doctoral program of Clinical Medicine Program in Sun Yat-sen University. Trainee to Indiana University Hospital Transplant Center, the fourth largest transplant center in the United States, to learn liver transplantation and multi-organ transplantation technology in 2012¹⁴⁶.

追查迫害法輪功國際組織 (追查國際)

World Organization to Investigate the Persecution of Falun Gong (WOIPFG)

To investigate the criminal conduct of all institutions, organizations, and individuals involved in the persecution of Falun Gong; to bring such investigation, no matter how long it takes, no matter how far and deep we have to search, to full closure; to exercise fundamental principles of humanity; and to restore and uphold justice in society

ZSDX030 Deng Suxiong

Gender: male

Personal Profile: Associate chief surgeon of Organ Transplantation Department

Major education and work experience: Graduated from Hunan Medical University in 1995 with a seven-year program of clinical medicine and received a master's degree; worked in the urology department of the Third Xiangya Hospital after graduation; studied for a doctor's degree in the Urology Department of the First Affiliated Hospital of Sun Yat-sen University in 2000; Has been worked in the Organ Transplantation Department of the First Affiliated Hospital of Sun Yat-sen University till now after graduation.

Skilled and able to perform cadaver kidney cutting, donor kidney dressing and allogeneic kidney transplantation with low incidence of surgical complications¹⁴⁷.

ZSDX031 Deng Ronghai

Gender: male

Personal Profile: Organ transplant surgeon

September 2001/09 - Jun 2008: Master's degree student, seven-year program of clinical medicine, Tongji Medical College, Huazhong University of Science and Technology

September 2010 - Jun 2013: Doctor's degree student, the First Affiliated Hospital of Sun Yat-Sen University

July 2008 - August 2010: First People's Hospital of Guangzhou, surgery surgeon

May 2011 - October 2012: Visiting scholar at the Microbial and Immune Teaching and Research, University of Toledo, US

July 2013 - present, surgeon in Department of Organ Transplantation, The First Affiliated Hospital of Sun Yat-sen University. May 2011 - October 2012, Visiting scholar at the Department of Microbiology and Immunology, University of Toledo, US. During the period of PhD study, visited the Department of Microbiology and Immunology of University of Toledo, Ohio, USA, for one and a half years, to carry out the research on immune tolerance of islet transplantation, as a visiting scholar.¹⁴⁸

ZSDX032 Qiu Jiang

Gender: male.

Personal Profile: Associate chief surgeon of Organ Transplantation Department

Major education and work experience:

1991-1996: Scholar's degree in Tongji Medical University

1996-2000: Surgical Department of Guangzhou Children's Hospital

2000-2003: Master's degree student, Sun Yat-Sen university

2005-2008: PhD degree student in Sun Yat-Sen university

2003 - present: Organ Transplantation Department, the First Affiliated Hospital of Sun Yat-Sen University

2008: Trainee in Toronto General Hospital

2009: Trainee in College of Medicine, National Cheng Kung University

Engaged in kidney transplantation for 10 years and completed more than 400 kidney transplantation surgeries (including living kidney transplantation for more than 100 cases). Skilled in perioperative management of kidney transplantation patients, treatment of critical, severe and complex complications, and

追查迫害法輪功國際組織 (追查國際)

To investigate the criminal conduct of all institutions, organizations, and individuals involved in the persecution of Falun Gong; to bring such investigation, no matter how long it takes, no matter how far and deep we have to search, to full closure; to exercise fundamental principles of humanity; and to restore and uphold justice in society

use of immunosuppressive drugs. Extensive understanding in the fields of immunosuppression-associated infections (especially CMV infections), pediatric kidney transplantation and living kidney transplantation¹⁴⁹.

ZSDX033 Guo Zhiyong

Gender: male

Personal Profile: Resident surgeon of Organ Transplant Center

Education:

September 2007 - July 2010: Surgery Doctoral degree, Sun Yat-sen University

September 2000 - July 2007: Master's degree of seven-year program in clinical medicine, Sun Yat-sen University

Work Experience:

January 2015 - present: Associate professor, Associate chief surgeon, The First Affiliated Hospital of Sun Yat-sen University

January 2014 - present: Master student supervisor, Sun Yat-sen University

January 2013 - December 2014: Attending surgeon in Organ Transplant Center, The First Affiliated Hospital of Sun Yat-sen University

July 2010 - December 2012: Resident surgeon, Scientific Research Secretary, Organ Transplant Center, The First Affiliated Hospital of Sun Yat-sen University

Professional affiliations:

January 2009 - present: Member of the American Society of Organ Transplantation

January 2014 - present: Member of World Organ Transplant Association

December 2013 - present: Member of Journal Editorial Board for World Journal of Gastroenterology and World Journal of Hepatology. Journal editorial assistant for Hepatobiliary Surgery and Nutrition; Hepatobiliary Surgery and Nutrition

September 2008 - December 2009: Ph.D. degree of immunology, National Public Joint Culture Program in University of Toledo, Ohio, USA

August 2006 - October 2006: Exchanged student in University of California, San Francisco (UCSF), organ transplantation study

Has been engaged in the clinical work and basic research of hepatobiliary surgery, liver transplantation, pancreas transplantation, small intestine transplantation and multi-organ transplantation for a long time, with more than 300 cases of clinical liver transplantation experience, and skilled in the donor and recipient operation and perioperative management of liver transplantation and other abdominal organ transplantation. Speciated in liver transplantation of liver cancer, immune function assessment of transplant recipients and individualized immunosuppressive therapy, relevant clinical studies have been adopted by the authoritative American Clinical Guidelines for Liver Transplantation. Rich clinical experience in liver transplantation for end-stage liver disease caused by rare etiologies¹⁵⁰.

ZSDX034 Zhong Fotian

Gender: male.

Personal Profile: Professor of thoracic surgery

Main research direction: cardiopulmonary transplantation (myocardial protection, lung function protection)¹⁵¹.

To investigate the criminal conduct of all institutions, organizations, and individuals involved in the persecution of Falun Gong; to bring such investigation, no matter how long it takes, no matter how far and deep we have to search, to full closure; to exercise fundamental principles of humanity; and to restore and uphold justice in society

ZSDX035 Chen Guangxian

Gender: male.

Personal Profile: Associate professor and associate chief surgeon of the Department of Cardiology (second Department of Cardiology)

Education and working experience:

September 1992 - June 1997: Clinical Medicine Department, Sun Yat-Sen Medical University

July 1997 - June 2002: Resident doctor of cardiothoracic surgery, the First Affiliated

Hospital of Sun Yat-sen University

September 2001 - June 2004: Master degree student of Cardiac surgery, The First Affiliated Hospital of Sun Yat-sen University

July 2002 - December 2009: Attending surgeon of cardiothoracic surgery and cardiac surgery in the First Affiliated Hospital of Sun Yat-sen University

September 2005 - December 2008: PhD candidate in cardiac surgery, The First Affiliated Hospital of Sun Yat-sen University

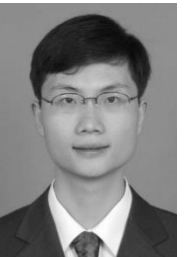

December 2009 to present: Associate professor and associate chief surgeon of cardiac Surgery department of the First Affiliated Hospital of Sun Yat-sen University

Since 1997, has been specialized in cardiac surgery and received standardized training for master's and doctor's degrees. Mainly engaged in the diagnosis and treatment of heart and lung transplantation and perioperative management¹⁵².

In 2009, went to the Organ Transplantation Center of Northwestern University for Post-doctoral Research and clinical exchange.

Has been engaged in clinical work of kidney transplantation for more than 10 years and has more than 800 cases of clinical experience of kidney transplantation¹⁵³.

ZSDX036 Chen Guodong

Gender: male.

Personal Profile: Associate professor, Associate chief surgeon, Department of Transplantation. Member of American Transplantation Society (AST) and Organ Transplantation Branch of Guangdong Medical Association.

2002: Bachelor of Medicine, Sun Yat-sen University

2005: Master's degree of Surgery, Sun Yat-sen University

2013 Doctor of Surgery, Sun Yat-sen University

2009: Postdoc of Organ Transplant Center, Northwestern University, USA

Has been engaged in clinical work of kidney transplantation for more than 10 years. An associate professor associate chief surgeon and master's degree student supervisor of organ transplantation department.

2009, went to the Organ Transplantation Center of Northwestern University for Post-doctoral Research and clinical exchange.

Has been engaged in clinical work of kidney transplantation for more than 10 years and has more than 800 cases of clinical experience of kidney transplantation¹⁵⁴.

Gender: male

Personal Profile: Resident surgeon of Organ Transplantation Department

Education experience:

2008/09 - 2013/06: PhD candidate of transplant surgeon, the First Affiliated Hospital of Sun Yat-Sen University

2005/09 - 2008/07: Master's degree student of general surgery, the Second Affiliated Hospital of Shantou University Medical College

2000/09-2005/07: Undergraduate student of clinical medicine, Gannan Medical University

Work experience

2013/07 - present: Resident surgeon in organ transplantation department, the First Affiliated Hospital of Sun Yat-Sen University

2009/03 - 2010/03: PhD student intern in organ transplant surgery, the First Affiliated Hospital of Sun Yat-Sen University

2006/08 - 2008/08: Master graduate student intern in general surgery, the Second Affiliated Hospital of Shantou University Medical College

2004/03 - 2005/04: Undergraduate interns, the First Affiliated Hospital of Gannan Medical University

2010/11 - 2013/0: Postdoctoral research, Department of Immunology, University of Southern California, United States ¹⁵⁷

ZSDX040 Yinghua CHAN

Gender: male

Personal Profile: Associate chief surgeon of Organ Transplantation Department

1997/09 - 2002/06: Undergraduate of clinical, Guangzhou Medical University
2002/09 - 2004/06: Master graduate student of surgery, the First Affiliated Hospital of Sun Yat-Sen University
2004/09 - 2007/06: PhD student of surgery, the Third Affiliated Hospital of Sun Yat-Sen University
2007/07 - 2008/12: Resident surgeon of liver transplantation center, the Third Affiliated Hospital of Sun Yat-Sen University

2008/12 - 2012/09: Attending surgeon of liver transplantation center, the Third Affiliated Hospital of Sun Yat-Sen University

2012/10 - 2014/12: Attending surgeon of organ transplantation department, the First Affiliated Hospital of Sun Yat-Sen University

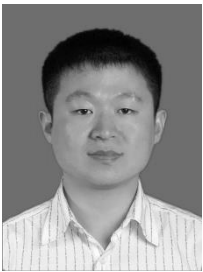

2014 /12 - present: Associate chief surgeon of organ transplantation department, the First Affiliated Hospital of Sun Yat-Sen University

Graduated from Sun Yat-sen University in 2007 with a doctor's degree in surgery. Has been engaged in liver surgery, liver transplantation, liver cirrhosis and liver cancer transplantation. Skilled at liver transplantation and comprehensive treatment for liver cancer, hepatitis B liver cirrhosis and other end-stage liver diseases and carries out in-depth and systematic research. Rich clinical experience in the treatment of liver transplantation, perioperative period and postoperative medium- and long-term management of liver transplantation, comprehensive treatment of liver cancer, and treatment of critical and severe diseases such as hepatitis B cirrhosis, portal hypertension and liver failure¹⁵⁸. Researches focus on the clinical work and basic hepatobiliary surgery, liver transplantation, and abdominal organ cluster transplantation, with more than 400 cases of clinical liver transplantation experience¹⁵⁹.

ZSDX041 Ju Weiqiang

Gender: male.

Personal Profile: Associate chief surgeon of Organ Transplantation Department

Graduated from The Department of Clinical Medicine of Shandong Medical University in 2000 and got the master's degree in medicine in 2003. After graduation, he stayed to work in the center. Received his MD in 2009.

Can independently complete the donor liver cutting and dressing work and liver transplantation surgery, as the first assistant can cooperate with the leading surgeon to complete a variety of complex liver transplantation and abdominal organ combined transplantation surgery. Has participated in more than 800 cases of clinical liver transplantation, among which more than 50 cases have been completed as the principal surgeon. Clinical experience in perioperative management of liver transplantation and color Doppler ultrasound monitoring of blood flow of liver transplantation. Experienced in liver transplantation for children. Assistance in the Asia's first successful abdominal organ cluster transplantation (now finish 14 cases) and the highest age (76 years old) liver transplantation in Asia, assisted successfully the first domestic mother parent small bowel transplantation, conducted the first adult expanding right living donor liver transplantation and the first simultaneous pancreas kidney transplantation in south China. In 2007, went to Mary Hospital of The University of Hong Kong for further study on living donor liver transplantation and perioperative management¹⁶⁰.

ZSDX042 Han Fanghai

Gender: male

Date of birth: August 1963

Place of birth: Jimo city, Shandong Province.

Personal Profile: Chief surgeon, professor, deputy director of Gastrointestinal and Pancreatic Surgery

Started to work in August 1986, doctor's degree; a member of the Chinese Communist Party; chief surgeon of Gastrointestinal and Pancreatic Surgery; master's graduate student tutor.

Undertook a large number of transplant research projects:

1. Pancreatic kidney transplantation combined with transplantation for diabetes mellitus and diabetic nephropathy. The CMB fund, project number: 96-636
2. The pancreas transplantation molecular biology diagnosis of acute rejection. Science and Technology Department of Sichuan province, project number: 03JY029—081—1
3. The study of the pancreas transplantation immune exemption caused by the second signal blocking. Science and Technology Department of Sichuan province, project number: 03JY029—087—2
4. The pancreas transplantation immune exemption caused by CTLA-4Ig genes introduction. Doctoral Foundation of Ministry of Education, Project No.: 2003061-0071¹⁶¹

ZSDX043 HAN Ming

Gender: male.

Personal Profile: Attending surgeon of Organ Transplantation Department

Graduated from Norman Bethune University of Medical Science with a bachelor's degree in 2005, and entered Sun Yat-Sen University as an exam-free postgraduate. Under the guidance of professor He Xiaoshun, a famous organ transplant expert in China, he graduated from his successive postgraduate and doctoral programs in 2010.

Engaged in general surgery and organ transplantation, and experienced in indications, contraindications and perioperative management of liver, kidney, pancreas and multiple organ transplantation¹⁶².

Specialty: Basic and clinical research of organ transplantation and liver regeneration.

ZSDX044 Ma Yi

Gender: male.

Personal Profile: Chief surgeon of Organ Transplantation Department

Graduated from the Department of Clinical Medicine in 1991 and obtained the master's and doctor's degree of surgery in Sun Yat-Sen University in 2003. Has been engaged in clinical work in general surgery and liver transplantation surgery for 20 years.

Specializes in liver surgery, liver transplantation and pancreas transplantation surgery¹⁶³.

ZSDX045 Luo Rongjiang

Gender: male.

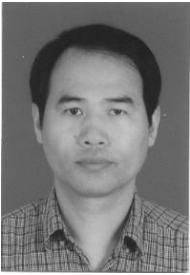

Profile: Associate professor of ophthalmology

Visited the National Eye Center of Singapore and the Mayo Medical Center of the United States.

Skilled in the diagnosis, treatment and operation of keratopathy (keratoplasty)¹⁶⁴.

ZSDX046 Huang Gang

Gender: male

Personal Profile: Associate chief surgeon of Organ Transplantation Department, member of American Transplantation Society (AST), member of Organ Transplantation Branch of Guangdong Medical Association

1998.9 ~ 2003.6: Bachelor of Clinical Medicine, China Medical University

2003.9 ~ 2008.6: Doctoral candidate of surgery, the First Affiliated Hospital of Sun Yat-Sen University

2008.7 ~ 2011.12: Resident surgeon in Organ Transplantation Department, the First Affiliated Hospital of Sun Yat-Sen University

2011.12 ~ 2015.12: Attending surgeon in Organ Transplantation Department, the First Affiliated Hospital of Sun Yat-Sen University

2015.12 ~ present: Associate chief surgeon in Organ Transplantation Department, the First Affiliated Hospital of Sun Yat-Sen University

Jun. 2014 ~ Jul. 2015: Visiting scholar of Governmental Program at Transplantation Pathology Department of UPMC, Montefiore Hospital and Thomas E. Starzl Transplantation Institute of The University of Pittsburgh medical Center

Received his doctor's degree in surgery from Sun Yat-sen University in 2008. Has been engaged in clinical work and basic research related to kidney transplantation. With clinical experience of more than 800 cases of kidney transplantation, skilled in perioperative management of kidney transplantation in patients with uremia caused by various causes, diagnosis and treatment of complications such as acute and chronic rejection, infection and recurrence of renal disease after kidney transplantation¹⁶⁵.

WOIPFG's Investigative Report on the Alleged Organ Harvesting of Living Falun Gong Practitioners at Renji Hospital (affiliated with Shanghai Jiaotong University School of Medicine) and Its Staff Members Suspected of Participation

Preface

Renji Hospital is China's first-class Grade A general medical institution affiliated with Shanghai Jiaotong University¹⁶⁶. It is designated by the CCP's ministry of health as the medical center dedicated to liver and kidney transplantation¹⁶⁷. According to the hospital, since 2011, the number of liver transplant operations has ranked first in the country for 11 consecutive years, and the number of liver transplants performed in children has ranked first in the world for 9 consecutive years.¹⁶⁸ As of October 2022, the hospital had completed 3,000 children's liver transplants.¹⁶⁹ The hospital, with its strong professional staff, large number of patients and beds, and high turnover rates. Telephone investigations showed that the hospital admits that it still uses organs from Falun Gong practitioners, and takes organs directly from the source of the army; the

World Organization to Investigate the Persecution of Falun Gong (WOIPFG)

To investigate the criminal conduct of all institutions, organizations, and individuals involved in the persecution of Falun Gong; to bring such investigation, no matter how long it takes, no matter how far and deep we have to search, to full closure; to exercise fundamental principles of humanity; and to restore and uphold justice in society

waiting time for transplants is short; the hospital has a large number of transplants, far exceeding the number of organs donated in Shanghai.

I. General Introduction

Renjin Hospital, with four compounds and Shanghai Tumor Institute, has a staff of 2511 (South Compound not included) as of the end of 2013, among whom 328 are senior experts at full or associate professor level, 57 are PhD tutors, 148 are Master's tutors¹⁷⁰.

II. Large amount of transplant

According to the hospital, since 2011, the number of liver transplant operations has ranked first in the country for 11 consecutive years, and the number of liver transplants performed in children has ranked first in the world for 9 consecutive years

In Apr. , 2015, the news web of Shanghai Jiaotong University claimed that the annual hepatobiliary Surgery at Renji hospital led Shanghai for 8 years, topped the nation for 4 years since 2011, and the number of liver transplant surgery for children ranked 1st in the world for 4 years.¹⁷¹ According to Phoenix Web's report, the hepatobiliary surgery department of Renji Hospital is the largest medical center for liver transplant surgery in the nation in terms of the numbers of surgery and patient visits.¹⁷²

Timestamp: 2016-0

作为国内顶尖的肝脏移植中心之一，仁济医院肝脏外科肝移植年度手术量连续8年居上海首位，自2011年以来连续4年居全国首位；小儿活体肝移植自2011年以来连续4年居全球首位，肝移植术后患者的长期存活率达到国际领先水平。诺华全国肝移植示范中心的落成，不仅可以促进国内移植中心定期分享交流肝移植手术技术和管理经验，推动肝移植手术技术和长期管理理念的发展，还能够加速中国肝移植事业发展、加强与国际先进肝移植中心接轨，让更多的中国肝移植患者受益。

值得一提的是，该示范中心不仅关注肝移植手术技术层面的问题，就连手术施行前的伦理审查和法律手续等流程，也将是该中心培训内容的重要组成部分。未来，该中心将致力于移植领域高精专的医学人才的培养，实现最新研究成果和先进临床经验共享，并将从捐献者评估、法律文件签署、免疫抑制剂最优方案制定、器官摘取到手术及术后管理的流程，先进移植技术等各个方面加强学员培训。

Figure 1 Snapshot of Shanghai Jiaotong University's News Net

On Apr. 3, 2015, Xinhua Net carried an article from *Jiefang Daily*, claiming too that the hepatobiliary surgery department of Renji Hospital ranked 1st in the annual number of liver transplant surgeries in China for 4 consecutive years.¹⁷³

Additionally, it was reported that the yearly incremental increase of surgeries at Renji Hospital is making it the largest domestic liver transplantation center, surpassing the organ transplantation center at the First Central Hospital of Tianjin, which, according to public data, performed d nearly 10,000 liver transplant surgeries in 2014.¹⁷⁴

According to the report on the hospital's official website, as of November 2021, more than 6,100 liver transplants have been performed, and the number of liver transplants has ranked first in the country for ten consecutive years. In 2006, the first professional pediatric liver transplantation team in China was founded, consisting of transplant surgery, pediatric internal and surgical medicine, pediatric anesthesia and intensive

World Organization to Investigate the Persecution of Falun Gong (WOIPFG)

To investigate the criminal conduct of all institutions, organizations, and individuals involved in the persecution of Falun Gong; to bring such investigation, no matter how long it takes, no matter how far and deep we have to search, to full closure; to exercise fundamental principles of humanity; and to restore and uphold justice in society

care, and more than 2,700 cases of pediatric liver transplantation were conducted. The hospital conducted the largest number of pediatric liver transplants in the world in the recent eight years.¹⁷⁵

According to Xinhuanet, as of November 2022, the number of liver transplants performed by liver surgery ranks first in the country for 11 consecutive years, and the number of pediatric liver transplants performed in a single center ranks first in the world for 9 consecutive years.¹⁷⁶

According to People.com, Shanghai Renji Hospital took the lead in forming the first professional committee for children's organ transplantation in China. The hospital went from the first child liver transplant in October 2006 to the 1,000th in August 2017, to the 2,000th in October 2019, and to the 3,000th in October 2022. It took eleven years for the first 1,000 liver transplants for children, and only three years for the third 1,000 cases!¹⁷⁷

III. A Strong team of liver transplant surgeons and large number of surgeries performed

WOIPFG published a list of transplant surgeons at this hospital in 2014. There are 24 transplant doctors that can be found on the official website and research papers who have been confirmed to have performed transplant surgeries. These surgeons include 2 doctors at director level, 3 at deputy director level, and 12 attending surgeons. Many doctors have performed large numbers of transplant surgeries and are able to put together multiple liver transplantation teams.

Xiaqiang, a doctor at director level and professor, is the director of the Organ Transplantation Center at Renji Hospital.¹⁷⁸ According to a report from *Remin Web* on Jun. 2006, "As to how many liver transplant surgeries have been performed, even Xia Qiang couldn't figure it out himself. He only remembered his own highest record: 6 liver transplant surgeries in a single day."¹⁷⁹

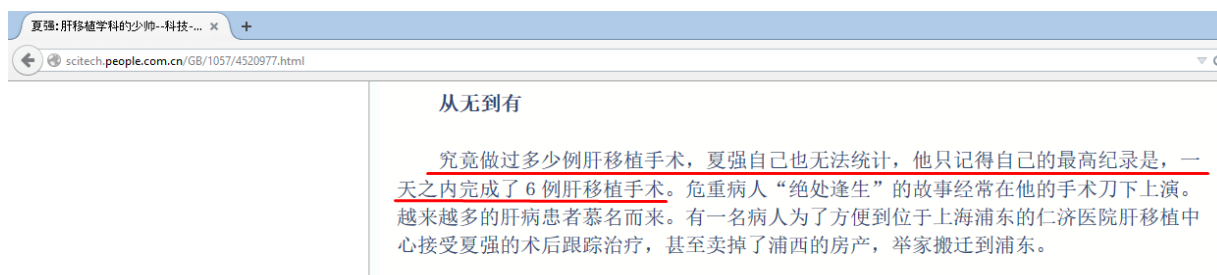

Figure 2 Snapshot of the June 2006 *Renmin Web* article

In addition to Xiaqiang, many other doctors at Renji Hospital have also performed large numbers of transplant surgeries, which can be seen in a report of February 1, 2016 on Shanghai Transplantation Net. The examples are as follows:

Zhang Jianjun, doctor at director level at the department of liver surgery of Renji Hospital, completed nearly 1,000 cases of liver transplantation and second liver transplantation, and hundreds of cases of live liver transplantation for infants and children.¹⁸⁰

Xu Ning, doctor at director level at the department of liver surgery of Renji Hospital, has started to work in the clinical and research fields on liver transplantation and pancreas transplantation since 2001. He performs

more than 130 liver transplant surgeries per year, assists more than 10 provincial hospitals with their liver transplant surgeries¹⁸¹, and participates in more than 1,000 cases of liver transplants.¹⁸²

Li Qigen, doctor at director level at the department of liver surgery of Renji Hospital, performed over 1,000 cases of liver transplant and hundreds of cases of live liver transplant, and more than 150 cases of liver transplant for infants and children.¹⁸³

Han Longzhi, doctor at director level at the department of liver surgery of Renji Hospital, performed more than 500 cases of adult liver transplant surgeries and more than 150 cases of live liver transplantation for infants and children.¹⁸⁴

Xing Tianyu, doctor at director level at the department of liver surgery of Renji Hospital, has been involved as of now in the completion of more than 500 cases of liver transplantation.¹⁸⁵

Shen Conghuan, doctor at director level at the department of liver surgery of Renji Hospital, has engaged in liver transplant at the organ transplant center since Oct. 2004¹⁸⁶ and has participated in more than 500 cases of liver transplants along with 100 cases of liver transplants for infants and children.¹⁸⁷

Lu Tianfei, resident doctor at the liver transplant center of Renji Hospital, started working at the center in July 2006¹⁸⁸ and has participated in more than 500 cases of liver transplants so far.¹⁸⁹

IV. Doctors' erratic schedules reveal large numbers of transplant surgeries

The transplant surgeons were overwhelmed with work, with almost no days off. They seemed to be busy all the time, as can be revealed from media reports and doctors' accounts. Prof. Xia Qiang said, "I adopted a military style management for my team. Every health care professional must have his cell phone on 24 hours a day, as liver transplant surgery requires that they go out to retrieve the donor organ at any time, and must be prepared to operate. Our doctors are on call all the time." One doctor who was responsible for harvesting donated livers had logged over 60,000 kilometers in the air over 3 months. What frequently occurred was "on his way to exit the airport, the person was instructed to transfer to a flight for another place."¹⁹⁰

"Inside the Renji Hospital, there are two big rooms full of kids waiting painstakingly for a liver donor. 60% of pediatric patients with biliary atresia waiting for liver donation in the entire country are gathered here. Because of large volumes of operations, the Renji Liver Transplant Center was immediately notified once a liver source is identified around the country. Therefore, doctors here must make sure their cell phones are on 24 hours a day, and be ready to travel for organ harvesting anytime, anywhere."¹⁹¹

An article published in 2013, "Non-Stop Liver Transplant Surgeries in Renji Hospital Made Doctors Unable to Leave through the Night", said, "This summer, Professor Xia Qiang at Renji Hospital's Organ Transplant Center has been extremely busy. Operations were scheduled one after another, and he wasn't able to leave the hospital throughout the night. The annually increasing volume of surgeries is making Renji Hospital the nation's largest liver transplant center."¹⁹²

追查迫害法輪功國際組織 (追查國際)

World Organization to Investigate the Persecution of Falun Gong (WOIPFG)

To investigate the criminal conduct of all institutions, organizations, and individuals involved in the persecution of Falun Gong; to bring such investigation, no matter how long it takes, no matter how far and deep we have to search, to full closure; to exercise fundamental principles of humanity; and to restore and uphold justice in society

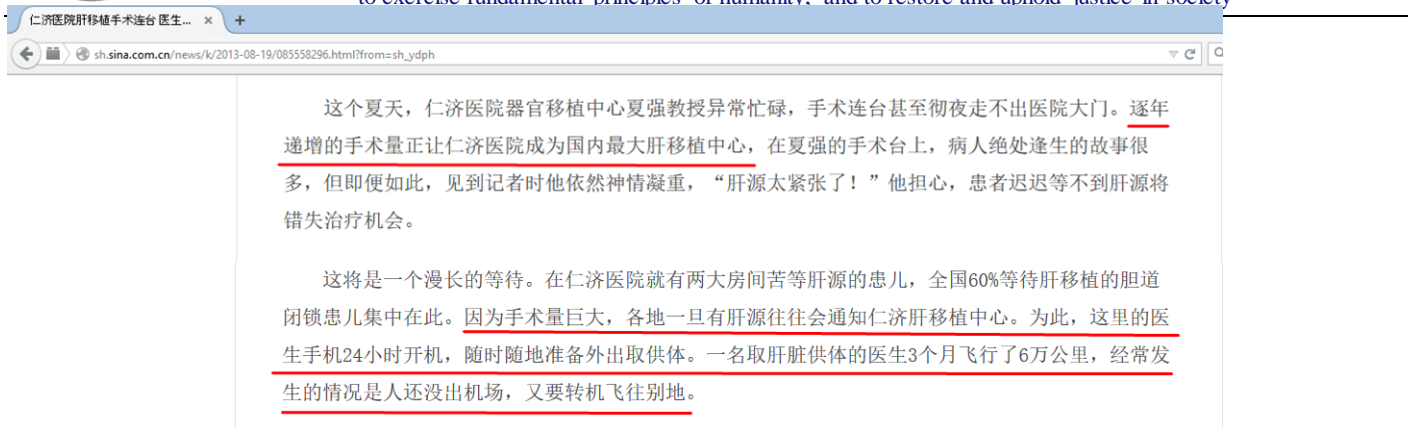

Figure 3 Snapshot of August 2013 Sina Shanghai article

Qiu Feng, doctor at deputy director level with Urology Surgery Division of Renji Hospital, and deputy Minister of the Medical Department said, “I need to perform 6 kidney transplant surgeries in a row, started from 4pm to 6 am the next morning. After about one hour's sleep, the rounds followed. This is not the highest record, my highest record was working four days and nights without sleep, performing surgery at night and seeing patients during daytime, because there's no time to lose in using the donor's organ. Once a kidney became available, the transplant surgery must be performed immediately. And this is my job.”¹⁹³

V. The hospital's infrastructure, number of beds, and high turnover rate, all indicate large number of transplant surgeries

Organ Transplantation Center of Renji Hospital has hundred-level laminar flow operating rooms and ten-thousand level laminar flow wards, which allows 6 liver transplant surgeries being performed at the same time.¹⁹⁴ The center maintains a professional website and forum on organ transplantation, Shanghai Transplantation Web, that has millions of hits in the nation.

Now let's take a look at how the number of beds has grown at the center.

a) In October 2004, the number of beds for liver transplant patients grew to 23 from the previous 13. Xiaqiang said, “On the fourth day after I arrived at the Renji Hospital, I performed the first liver transplant surgery. In the week that follows, we successfully carried out 4 liver transplant surgeries.” The supervisors at the hospital witnessed Xia Qiang's capability, as well as the potential of this young transplant team. They immediately made the decision to increase the number of beds at the liver transplant center from 13 to 23, during the “October 1st” holiday period.¹⁹⁵

b) On June 28, 2007, according to the China Organ Transplant website, the number of beds for liver transplant patients reached 90.¹⁹⁶

追查迫害法轮功国际组织 (追查国际)

www.transplantation.org.cn/ZJiaoTongDaXueYiXueYuanFuShuRenJanDui/2007-06/1587.htm

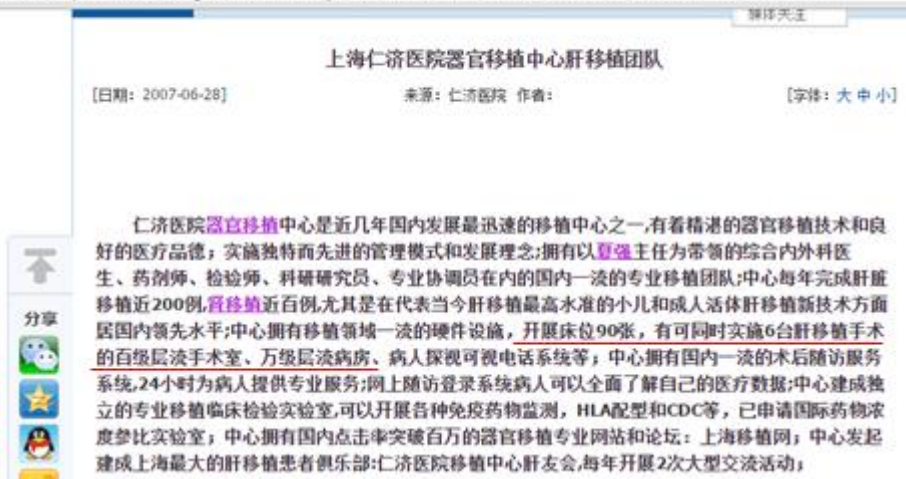

Figure 4 Snapshot of June 2007 China organ transplants web page

c) On December 25, 2015, the website of the medical college of Shanghai Jiaotong University reported that there were 110 hospital beds for liver transplants in 2014. “At present Renji Hospital has 3 inpatient areas, 110 hospital beds and more than 70 health care personnel. It has become the nation’s key clinical specialist center, the key academic center under the nation’s ‘211 Project’, the National Clinical Pharmacology Institution, and the top clinical project of the Shanghai Health and Planning Commission.”¹⁹⁷

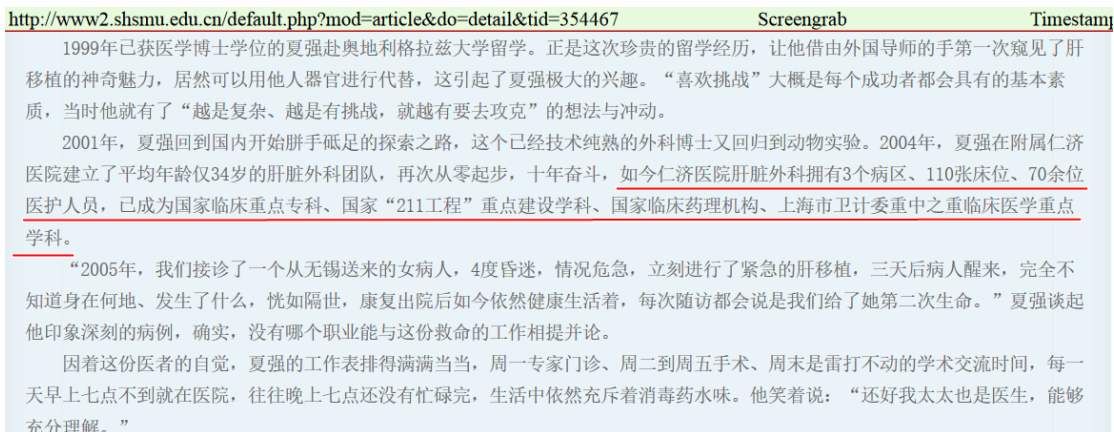

Figure 5 Snapshot of Medical College of Shanghai Jiaotong University web page

d) The patients at the urology division of Renji Hospital stay in the center for an average of about five days. Starting from July 2005 day-treatment patient wards were lunched, strict regulations were enforced, and 20 male urological conditions were determined as those for which the surgery would be performed during the day, as a result of which the patients’ hospitalization time was significantly reduced and most patients could be released from the hospital after one day’s stay.¹⁹⁸

There were only 2000 beds even after four hospital branches were added, so many approaches were adopted

追查迫害法轮功国际组织 (追查国际)

World Organization to Investigate the Persecution of Falun Gong (WOIPFG)

To investigate the criminal conduct of all institutions, organizations, and individuals involved in the persecution of Falun Gong; to bring such investigation, no matter how long it takes, no matter how far and deep we have to search, to full closure; to exercise fundamental principles of humanity; and to restore and uphold justice in society

to to speed up the bed turnover, including the "Day Surgery Center", which enabled the surgical patients to only "stay" 24-48 hours, increasing the turnover of beds substantially, and decreasing patient medical expenses by 10% - 30%.¹⁹⁹

仁济医院新病区开启高频吞吐节奏 借机场灵感打造

发布日期: 2013-09-18

医院的病房可以像什么? 挠破头恐怕都想不到这个地方: 机场。

这个假想正在上海交通大学医学院附属仁济医院真实上演。经8年探索, 仁济医院正形成本市规模最大、涵盖病种与术式最多的“日间手术中心”之一。通过改造住院流程、升级医技水平、开发信息系统等, 这里模拟着机场的运行机制与高频吞吐节奏: 科室医生统一向病房申请床位与手术室, 手术病人仅在医院“滞留”24 - 48小时, 床位周转率大幅提高, 病人医疗费下降10% - 30%。

Figure 6 Snapshot of Eastday Web page

VI. Telephone investigations showed that the hospital admits that it still uses organs from Falun Gong practitioners, and takes organs directly from the source of the army; the waiting time for transplants is short; the hospital has a large number of transplants, far exceeding the number of organs donated in Shanghai.

1. Hospital admitted organs obtained directly from military and organs from Falun Gong still used

Up to Feb 7, 2015, the head nurse at liver transplantation unit of Renji Hospital had admitted that organs were sourced from the military.²⁰⁰ Yet the military does not control the prisons and death row criminals. So this “source” were most likely from the live organs of the detained Falun Gong practitioners.²⁰¹

On the phone record of an investigation by WOIPFG, the nurse on duty at liver transplantation unit of Renji Hospital said, “We get our organs directly from the source. We have many channels, they are all over the country, not just the places near us. We can use live organs. We take organs directly from living donors, so the quality is definitely ensured. When we go to take the organs, we examine the plasma, HID and blood type, which would all be determined at the scene. Then after we excise the organs, the patients would get ready. Before the livers arrive, the patients will already be in the operating room. We’ve always booked round-trip plane tickets.”

追查迫害法輪功國際組織 (追查國際)

(Recording 1. Download: [MP3](#); For recording transcript, please see [pdf 85](#))

Later, on February 8, 2015, Tan Yunshan, chief Surgeon from the Liver Pathological Department at the Affiliated Zhongshan Hospital of Fudan University, told a WOIPFG investigator, “All the livers that have been used in liver transplant operations performed now come from the ‘source.’ Since we extract the organs ourselves, we can make sure all original data and condition. If we entrust someone else to do it, we won’t be able to guarantee this, so we do ourselves to control this. Our hospital gets most of livers like this and we exactly know whether this liver can be transplanted or not.”²⁰²

(Recording 2. Download: [MP3](#); Transcript Download: [pdf 86](#))

Investigation target: Hang Hualian, doctor at deputy director level with the division of Liver Transplantation at Shanghai Renji Hospital

Date: November 8, 2018 (+86-18616206806)

(Recording 3. Download: [MP3](#); for recording transcript, please see [pdf 9](#))

Excerpts

Hang Hualian: Come and see me tomorrow. I’ll try to get it done for you within one week.” Investigator: You are using Falun Gong (practitioner) donors now, right?” Hang Hualian: Yes, this is for sure.

Personal Profile: Member of the Transplant Surgery Technical Committee of the Organ Transplantation Surgeon Branch of the Chinese Medical Association, member of the Stem Cell and Tissue Transplantation Committee of the Organ Transplantation Surgeon Branch of the Chinese Medical Association, member of the Hepatobiliary and Pancreatic Surgery Committee of the Cross-Strait Medical and Health Exchange Association, and the chief examiner of the National Examination for Licensed Doctors.²⁰³

2. Short waiting time for transplant surgery and emergency treatment

The Organ Transplant Center of Renji Hospital of Shanghai Jiaotong University completed 8 emergency liver transplants in one year from September 2004 to October 2005.²⁰⁴

Kong Defu, liver transplant surgeon at Shanghai Renji Hospital

Investigation call made on March 18, 2017 (+86-18817667836)

Excerpts: As many as 700 cases were done in 2016. Over one hundred have been done this year. The patients here used to wait a very short period of time before they could get donor organs from prison. It’s no longer the case. Many organs were obtained from out of town. As soon as livers became available, they’d be sent over very quickly.

(Recording 4. Download [MP3](#); For a complete recording transcript, please see [pdf 144](#))

Hang Hualian, director of liver transplant division of Shanghai Renji Hospital

Investigation call made on March 25, 2017 (+86-18616206806)

Excerpts: For [Blood] Type B, if nothing unusual happens, it should be taken care of within two week. Almost invariably, we do two cases a day. Last year 521 cases were done, and this year about one hundred cases have been done so far. The quality of livers from death row prisoners cannot be guaranteed. We now mostly use organs from brain-dead patients.

(For recording 5, please download [MP3](#); For a complete transcript [pdf 62](#))

3. Transplant volume at the hospital far exceeds organ donations in Shanghai

1) Large amount of transplant

Telephone investigations showed that in 2016, more than 700 liver transplants were performed.

Investigation target: Kong Defu, doctor with liver transplant division of Shanghai Renji Hospital

Call made on March 18, 2017 at +86-18817667836

Excerpt: In 2016, the number of cases done could be 700.

(Recording 6. Download [MP3](#). Please refer to [pdf 144](#))²⁰⁵.

Official reports: On December 29, 2017, Renji Hospital announced that in 2017, the number of its liver transplant surgeries exceeded 800, close to 100 more than that of 2016. On August 23, 2017, Xia Qiang's team announced another figure: Renji Hospital's Liver Transplant Center performed 1,000 cases of liver transplantation for children²⁰⁶.

2) Official reports: numbers of organ donations in Shanghai

Table 1. Officially Reported Numbers of Donated Organs from 2013 to 2018

Year	Number of Organ Donations	Cumulative Number of Organ Donations
August 2013 to June 2016		The accumulated number of organ donations had exceeded 200 cases. ²⁰⁷
2016	A total of 138 cases of human organ donation were completed in 2016. ²⁰⁸	
July 9, 2017	The 100th case of organ donation was made on this day in 2017. ²⁰⁹	
August 25, 2017		The accumulated number of organ donations reached 400. ²¹⁰
May 1, 2018	The 63rd case of organ donation was made on this day in 2018. ²¹¹	

3) Phone Investigation: Volume of organ donations in Shanghai

Table 2. Table of 2015-2018 volume of organ donations

追查迫害法輪功國際組織 (追查國際)

World Organization to Investigate the Persecution of Falun Gong (WOIPFG)

To investigate the criminal conduct of all institutions, organizations, and individuals involved in the persecution of Falun Gong; to bring such investigation, no matter how long it takes, no matter how far and deep we have to search, to full closure; to exercise fundamental principles of humanity; and to restore and uphold justice in society

Date	Year	Person talked to	Organization	Organ Donation Situation
December 17, 2015	2015	a staff member	the Red Cross Society of China, Shanghai Branch, Huangpu District	The work started only in the first half of last year. There was a document from above for this work, and it's very difficult to get organ donations. As of now, there have been only five successful cases of organ donations in Shanghai. (Recording 7. Download MP3 ; Transcript Download: Attachment pdf 190)

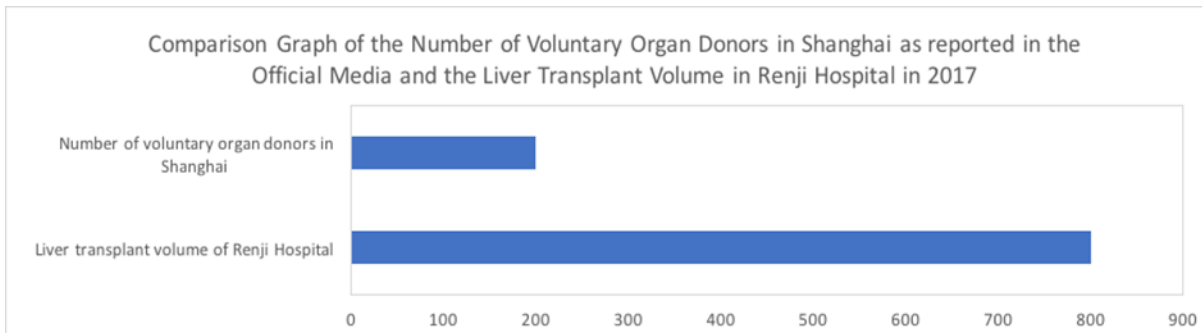

Figure 7. Comparison Graph of the Number of Voluntary Organ Donors in Shanghai as Reported in the Official Media and the Liver Transplant Volume in Renji Hospital in 2017

There are eight hospitals designated by the Ministry of Health to carry out liver transplants and seven hospitals designated by the Ministry of Health to carry out kidney transplants in Shanghai.

This is partial information on the organ transplant situation in only one of the hospitals designated by the Ministry of Health to carry out organ transplants in Shanghai, and its volume already far exceeds the officially published quantity of organ donations in the entire city.

4. Large volume of transplant surgeries at Renji as verified by other hospitals

Investigation subject: liver transplant surgeon with Changhai Hospital affiliated with the No.2 Military Medical University. Tel.: +86-2131161855

Investigation time: June 1, 2018

Excerpt: Last year over 100 liver transplant surgeries were performed and 500 to 600 kidney transplant surgeries performed. And today there will be two liver transplant surgeries and two kidney transplant surgeries. Liver donors can be found in 10 days or half a month. A liver transplant would cost one million yuan and a kidney transplant would cost 500,000 yuan. Where can you find a liver donor for 150,000 yuan? Liver and kidney donors would become available in ten days. Transplant surgeries are being done every day, there are many of them. We are doing far less than Renji.²¹²

追查迫害法輪功國際組織 (追查國際)

World Organization to Investigate the Persecution of Falun Gong (WOIPFG)

To investigate the criminal conduct of all institutions, organizations, and individuals involved in the persecution of Falun Gong; to bring such investigation, no matter how long it takes, no matter how far and deep we have to search, to full closure; to exercise fundamental principles of humanity; and to restore and uphold justice in society

(Recording 8. Download: [MP3](#); Transcript Download: [pdf 141](#))

Investigation subject: Yang Han, liver transplant doctor with the Liver Transplant Department of the First Affiliated Hospital with Zhengzhou University

Investigation time: June 2, 2018 Tel.: +8637166279137

Excerpt: Organ donation costs about 350,000 yuan, surgery costs between 500,00 and 550,000 yuan all together. The organ donation fees are calculated by the Red Cross, the compensations to the donor's family are figured out first, and then we are notified as how much we should charge you. With blood type A, it's not easy; the waiting time is anywhere between two weeks and a month. The surgery can be done within one week. Transplant volume nationwide: Renji ranked first, Zhejiang University the second, we are the third, and the fourth may be Xiang Ya.

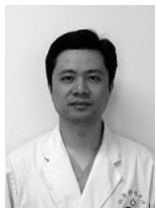

Tianjin First Central Hospital has the largest number of transplants in the country, but it has no data, because they have a data report that is not released, so there is no way to know how many (cases) it did conduct.

(Recording 9. Download: [MP3](#); Transcript Download: [pdf 80-2](#))

VII. Name list of doctors engaged in transplant surgeries

SHJT001 Xia Qiang

Gender: Male

Year of birth: 1978

Personal profile: director of organ transplantation center, doctor at director level, and professor; member of organ transplantation group, surgery branch of China Medical Society; member of organ transplantation group, Shanghai branch of China Medical Society; and member of the board of registration of liver transplantation.

Graduated from Anhui Medical University and got his Bachelor's degree in medicine in 1978; graduated from Fudan University and got his Ph.D in medicine in 1997; and from October 1999 to October 2000, studied and worked as a senior visiting scholar at Lagos University, Austria sponsored by the Austrian government.

Upon returning to China, he worked as doctor at deputy director level at the division of general surgery of the First People's Hospital in Shanghai, deputy director at research office on surgery, deputy director at the research center on organ transplantation in Shanghai, associate professor at Fudan University, and tutor for Master's degree students. In 2002 he was hired as an associate professor by the medical college of Shanghai Jiaotong University. And in 2003 he was promoted to be a doctor at director level.²¹³

The transplantation center completed half of the liver transplantation from living donor for infants and children nationwide and two thirds of the liver transplantation from living donor for adults in Shanghai. Its liver transplantation volume led Shanghai for eight consecutive years and started leading the nation in 2011²¹⁴.

According to the official website, as of November 2021, Xia Qiang and his team had completed more than 6,100 liver transplants.²¹⁵ As of October 2022, the team had completed 3,000 children's liver transplants.²¹⁶ As of November 2022, the number of liver transplant operations had ranked first in the country for 11 consecutive years, and the number of liver transplants performed by a single center for children had ranked first in the world for 9 consecutive years.²¹⁷

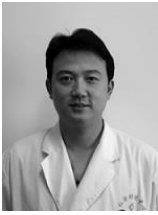

追查迫害法輪功國際組織 (追查國際)

SHJT002 Zhang Ming,

Male

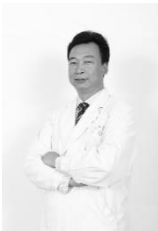

Personal profile: Doctor at deputy director level

He graduated in 1999 from the Second Military Medical University and got his Master's degree in clinical medicine, and in 2002 he got his Ph.D in medicine. He was an attending doctor and lecturer at the military organ transplant research institute of Changzheng Hospital affiliated with the Second Military Medical University. Upon his discharge from the military in 2004, he became an attending doctor at deputy director level with the division of liver surgery of Renji Hospital affiliated with Shanghai Jiaotong University.

He mainly engaged in clinical and research work related to liver surgery and organ transplantation, as well as clinical liver and kidney transplantation, especially the liver transplantation for children and micro-surgery technology²¹⁸.

SHJT003 Zhang Jianjun,

Male

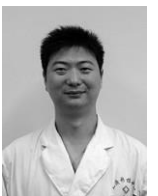

Personal profile: deputy director of the organ transplantation section, doctor at director level, professor, tutor for Ph.D candidates, and member of the transplantation and immunization branch of Shanghai Immunization Society²¹⁹.

In 1991 he graduated from the Medical University of China and got his Bachelor's degree. From 1991 to 1998 he was a surgeon and attending doctor at 150 Central Hospital of PLA. In 2001 he received training in liver transplantation at the division of transplant surgery of Tianjin No.1 Central Hospital, studying with Professor Shen Zhongyang. In July 2004 he got his Ph.D in medicine from the Second Military University²²⁰.

He's done nearly 1000 liver transplant surgeries and repeat liver transplant surgeries. He's performed over 200 liver transplant surgeries with organs from living donors for infants and children.

SHJT004 Chen Xiaosong,

Male

Personal profile: Doctor at deputy director level

In 1996 he graduated from the Second Military Medical University and got his Bachelor's degree. He got his Master's degree in 1999 and worked in the division of infectious diseases, ICU for kidney transplant patients and ICU for liver transplant patients in Changzheng Hospital.

His main field of research is the rescuing of transplant patients in critical condition. As of August 2004, he engaged in rescuing work in 192 liver transplant surgeries and over 200 kidney transplant surgeries²²¹.

SHJT005 Xu Ning,

Male

追查迫害法輪功國際組織 (追查國際)

World Organization to Investigate the Persecution of Falun Gong (WOIPFG)

To investigate the criminal conduct of all institutions, organizations, and individuals involved in the persecution of Falun Gong; to bring such investigation, no matter how long it takes, no matter how far and deep we have to search, to full closure; to exercise fundamental principles of humanity; and to restore and uphold justice in society

Personal profile: Doctor at deputy director level in the division of liver and gallbladder surgery, associate professor

He graduated from Shanghai Medical College affiliated with Fudan University. He started engaging in liver transplantation, clinical, research, and teaching work in the division of liver and gallbladder surgery in 2001.

He worked as a visiting scholar at the National Cancer Center in Italy and at the division of abdominal organ transplant of University of Leuven Hospital, Belgium, the second largest hospital in Europe. He's engaged in work in liver and gallbladder surgeries and the clinical work in liver transplant. He's been involved in over 1000 liver transplant surgeries. In recent years, he's undertaken most of the work in surgery consultations outside of his division, Each year he assisted other hospitals in completing about 30 liver transplant and liver surgeries²²². Starting from 2001 he engaged in clinical and research work in liver and pancreas transplantation. Each year he performed over 130 liver transplant surgeries and assisted a dozen provincial level hospitals in liver transplant surgeries, including for adults, infants, and children²²³.

SHJT006 Yuan Xiaodong,

Male

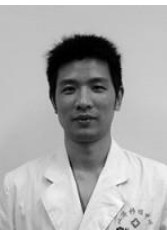

Personal profile: Doctor at director level in the division of urology surgery

Postdoc at Shanghai Jiaotong University

Ph.D student at Harvard University sponsored by China

From 2008 to 2010, he studied at the division of transplant surgery of Brigham and Women Hospital affiliated with Harvard University, primarily in the field kidney transplantation²²⁴.

SHJT007 Li Qigen, Male

Personal profile: Attending doctor at the Center for Liver Transplantation

In 1995 he graduated from the Department of Marine Medicine of the Second Military University and got his Bachelor's degree. In 2004 he got his Ph.D in clinical medicine. His tutor was Professor Yang Guangshun with Dongfang Liver and Gallbladder Hospital.

He performed over 1000 liver transplant surgeries, hundreds of liver transplant surgeries with organs from living donors, and more than 150 liver transplant surgeries for infants and children²²⁵.

SHJT008 Wang Xin,

Male

Personal profile: Attending doctor at the Center for Liver Transplantation

Following his graduation from the Department of English Clinical Medicine of China Medical University, he started studying with Professor Yang Guangshun at Dongfang Hospital for Liver and Gallbladder Surgeries, engaging in research in clinical liver transplantation and getting his Master's degree.

追查迫害法輪功國際組織 (追查國際)

To investigate the criminal conduct of all institutions, organizations, and individuals involved in the persecution of Falun Gong; to bring such investigation, no matter how long it takes, no matter how far and deep we have to search, to full closure; to exercise fundamental principles of humanity; and to restore and uphold justice in society

He performed over 200 liver transplant surgeries²²⁶.

SHJT009 Tong Ying,

Male

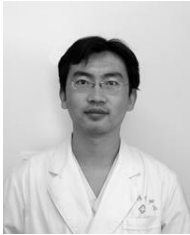

Personal profile: Attending doctor and Ph.D in medicine

In 1997 he graduated from the Department of Military Medicine of the Second Military University. Thereafter he engaged in clinical work at Dongfang Hospital for Liver and Gallbladder Surgeries in Shanghai for 10 plus years, and got his Master's and Ph.D in medicine²²⁷.

SHJT010 Han Longzhi,

Male

Personal profile: Attending doctor at the Center for Liver Transplantation

Following his graduation from the Department of English Clinical Medicine of China Medical University, he started studying with Professor Yang Guangshun at Dongfang Hospital for Liver and Gallbladder Surgeries, engaging in research in clinical liver transplantation and getting his Master's degree.

He performed over 500 liver surgeries for adult patients and more than 150 liver surgeries with organs from living donors for infants and children²²⁸.

SHJT011 Xia Lei,

Male

Personal profile: Attending doctor at the Center for Liver Transplantation

In 2003 he got his Master's degree after completing a 7-year program at the Department of Military Medicine of the Second Military University. During the time while he was working toward his Master's, he was involved in close to 40 liver transplant cases. He started to work for Dongfang Hospital for Liver and Gallbladder Surgeries after graduation.

He is primarily involved in organ acquisition and trimming²²⁹.

SHJT012 Luo Yi,

Male

Personal profile: Attending doctor at the Center for Liver Transplantation

In 2002 he graduated from the Second Medical University in Shanghai and got his Bachelor's degree. From July 2002 to September 2004 he was a resident doctor at the division of general surgery of Renji Hospital in Shanghai. In September 2004, he became a resident doctor at the division of liver surgery of Renji Hospital. Since 2009 he's been an attending doctor at the division of liver surgery. February through June 2012, he was studying minimally invasive liver surgery using laparoscopy at South-west Hospital for Liver and Gallbladder. He's now an expert in that surgery²³⁰.

SHJT013 Xing tianyu, Male, born in 1980

Personal profile: Attending doctor at the Center for Liver Transplantation

In 2003 he graduated from the Second Medical University in Shanghai and got his Bachelor's degree. From July 2003 to September 2004 he was a resident doctor at the division of general surgery of Renji Hospital in Shanghai. In September 2009 he became a doctor at the division of liver surgery. April through August 2011, he was studying with Academician Chen Zhaolong the liver surgery at Changgeng Hospital in Kaohsiung, Taiwan. He's been involved in the completion of over 500 liver transplant surgeries, including more than 80 liver transplant surgeries using organs from living donors for young children²³¹.

SHJT014 Shen Conghuan,

Male

Personal profile: Attending doctor at the Center for Liver Transplantation

In July 2002 he graduated from the Department of Clinical Medicine of the Second Medical University in Shanghai and got his Bachelor's degree. From August 2002 to September 2004, he was a resident doctor at the surgery division of Renji Hospital of Shanghai, working in turn at general surgery, thoracic surgery, anesthesia, ICU, Urology, and orthopedics. In October 2004 he joined the division of liver surgery of Renji Hospital²³².

SHJT015 Xi Zhifeng,

Female

Personal profile: Attending doctor at the Center for Liver Transplantation

In 2006 she graduated from a 7-year English-taught Master's program in clinical medicine at the Medical College of Shanghai Jiaotong University.

She is engaged in liver surgery and liver transplant internal medicine. Her major field of research is in prevention and treatment of hepatitis B recurrence after liver transplantation and perioperative treatment of liver transplantation²³³.

SHJT016 Hang Hualian,

Male

Personal profile: Attending doctor and lecturer at the Center for Liver Transplantation

In 2003 he graduated from the Second Military University and got his Bachelor's degree. In 2007 and 2010 he got his Master's degree in clinical medicine and Ph.D in surgery respectively at the Medical College of Nanjing University, studying with Ding Yitao, a nationally renown expert on liver and gallbladder surgery, and Professor Chou Yudong. Upon obtaining his Ph.D, he worked at the First Hospital in Nanjing affiliated with Nanjing Medical University for two years. In June 2012 he was transferred in a talent introduction program to the

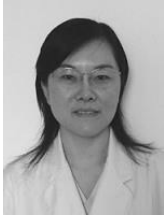

追查迫害法輪功國際組織 (追查國際)

World Organization to Investigate the Persecution of Falun Gong (WOIPFG)

To investigate the criminal conduct of all institutions, organizations, and individuals involved in the persecution of Falun Gong; to bring such investigation, no matter how long it takes, no matter how far and deep we have to search, to full closure; to exercise fundamental principles of humanity; and to restore and uphold justice in society

division for liver surgery of Renji Hospital affiliated with the Medical College of Shanghai Jiaotong University²³⁴.

SHJT017 Xue Feng,

Female

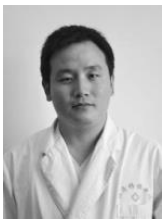

Personal profile: Associate Professor and doctor at deputy director level

In 1995 she graduated from the former Second Medical University in Shanghai, majoring in immunology and rheumatology. She studied with Professor Chen Shunle and got her Master's degree. From 1995 to 1999, she was a resident doctor and attending doctor at the division of rheumatology of Renji Hospital. She got her Ph.D in medicine in Japan in 2004 and returned to Renji Hospital in 2006 as a doctor at deputy director level and tutor for Master's degree students at the center for organ transplantation at Renji Hospital.

In 1999, sponsored by Japan's ministry of education, she went to Japan to pursue her doctor's degree, studying liver fibrosis treatment and organ transplantation immunity research under Professor Kogen Shiro, a famous transplant expert in Japan.

She is primarily involved in the diagnosis and treatment of end-stage liver disease and the internal diseases in the field of liver transplantation. She's also responsible for the testing work in the transplant lab and the experiment on clinical medication, including the study of new medicines related to liver transplantation, transplant matching, and the monitoring of drug concentration²³⁵.

SHJT018 Lu Tianfei,

Male

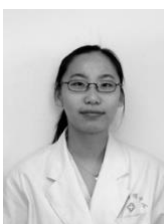

Personal profile: Resident doctor at the Center for Liver Transplantation

In 2008 he graduated from the Medical College of Shanghai Jiaotong University and got his Master's degree. He studied with Professor Xia Qiang, director of the division of liver surgery at Renji Hospital.

From February 2011 to September 2012 he was a postdoc at the Central Lab for Liver and Pancreas Transplantation of UCLA, his field of study being the mechanism of liver ischemia-reperfusion injury.

He's performed so far more than 500 liver transplant surgeries²³⁶.

SHJT019 Wang Siyue,

Female

Personal profile: Coordinator at the Center for Organ Transplantation at Renji Hospital

She is responsible for follow-up data collation, online publication, reviewing of results and notification of doctors' instructions²³⁷.

SHJT020 Zhou Tao,

追查迫害法輪功國際組織 (追查國際)

World Organization to Investigate the Persecution of Falun Gong (WOIPFG)

To investigate the criminal conduct of all institutions, organizations, and individuals involved in the persecution of Falun Gong; to bring such investigation, no matter how long it takes, no matter how far and deep we have to search, to full closure; to exercise fundamental principles of humanity; and to restore and uphold justice in society

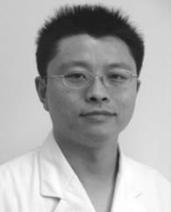

Male

Personal profile: Resident doctor and teaching assistant at Pediatric Transplant Ward of the division of liver surgery and the division of surgery of Shanghai Medical Center for Children.

He's mainly engaged in liver transplant surgery for children using organs from living donors²³⁸.

SHJT021 Song Yu,

Male, born in 1973

Personal profile: Attending doctor at the Center for Organ Transplantation

In 1996 he graduated from the Department of Military Medicine of the Second Military Medical University and got his Bachelor's degree. He then worked at the university's affiliate, Changhai Hospital for ten years, specializing in medical diagnosis and treatment of liver disease. He got his Master's degree in clinical medicine in 2002. In 2003 he attended the College of Management affiliated with Fudan University, and received his MBA²³⁹.

SHJT022 Wang Yanan,

Male

Personal profile: Doctor at director level at the Center for Kidney Transplantation

He graduated from the Department of Marine Medicine of the Second Military Medical University.

He has a wealth of experience in kidney transplantation and the diagnosis and treatment of kidney tumor. He started the combined transplantation of pancreas and kidney in Shanghai and has done two such surgeries. His main fields of study are basic and clinical research on kidney transplantation and pancreas-kidney transplantation. He's primarily engaged in kidney transplantation²⁴⁰.

SHJT023 Ying Liang,

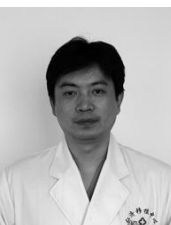

Male, born in June 1980

Personal profile: Attending doctor and lecturer at the Center for Organ Transplantation

In July 2005, he graduated from the Department of Clinical Medicine of the Second Medical University in Shanghai. He completed a 7-year program and got his Master's degree.

Since 2005, he's been doing kidney transplantation at the division of urology of Renji Hospital²⁴¹.

SHJT024 Qiu Feng,

Male, born on December 22, 1968

Personal profile: Doctor at deputy director level, associate professor, director of the division of kidney transplantation, and young member of Transplantation Committee of Shanghai Chinese Medical Society

He graduated from the Department of Medicine of the Second Medical University in Shanghai in 1993.

追查迫害法輪功國際組織 (追查國際)

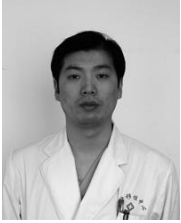

World Organization to Investigate the Persecution of Falun Gong (WOIPFG)

To investigate the criminal conduct of all institutions, organizations, and individuals involved in the persecution of Falun Gong; to bring such investigation, no matter how long it takes, no matter how far and deep we have to search, to full closure; to exercise fundamental principles of humanity; and to restore and uphold justice in society

He specializes in kidney transplantation and has performed over 300 allogeneic kidney transplant surgeries²⁴².

SHJT025 Liu Wei,

Male

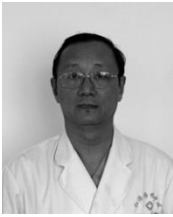

Personal profile: Attending doctor at the division of urology

In 2001 he graduated from the Department of Clinical Medicine of the Second Medical University in Shanghai. He completed a 7-year program and got his Master's degree in clinical medicine. As a graduate student, he was mainly engaged in clinical work related to urology. He started to do kidney transplantation in 2000 and he's since performed over 300 kidney surgeries, including more than 20 cases he completed independently²⁴³.

SHJT026 Ling Jianyu,

Male, born in August 1945

Personal profile: Doctor at director level at the Center for Organ Transplantation

In 1969 he graduated from the Medical Department of the Second Medical College in Shanghai; in 1977 he started working at the division of urology; and in 1979 he started specializing in allogeneic kidney transplantation. In 1982 he graduated from the Second Medical University in Shanghai and got his Master's degree. He specialized in kidney transplantation.

From 1991 to 1993 he was at the Vascular and Kidney Transplant Center of the Medical Center in Westchester, New York Medical College, U.S.A. for further study on kidney transplantation.

He's done more than 1000 kidney transplant surgeries, including those with the elderly, children, and family members as donors²⁴⁴.

SHJT027 Zhou Zhihua,

Male

Personal profile: Attending doctor at the division of urology

2001 through 2006 he was studying at the division of urology

and kidney transplant ward of Shanghai Changzheng Hospital. In 2006 he graduated from the Second Military University, got his Ph.D in kidney transplantation at the division of urology, and in the same year, joined the kidney transplant team at Renji Hospital affiliated with the Medical College of Shanghai Jiaotong University.

He was engaged in completing nearly 100 cases of kidney transplantation²⁴⁵.

He's experienced in organ preservation and basic and clinical aspects of kidney transplantation.

SHJT028 Chen Changzhi,

Male, born in 1950

Personal profile: Doctor at director level and professor at the division of Thoracic Surgery

In 1981 he got his Master's degree at Beijing Medical University. In 1989 he got his Ph.D in cardiovascular surgery at the Second Medical University in Shanghai. In 1997 he became

追查迫害法輪功國際組織 (追查國際)

World Organization to Investigate the Persecution of Falun Gong (WOIPFG)

To investigate the criminal conduct of all institutions, organizations, and individuals involved in the persecution of Falun Gong; to bring such investigation, no matter how long it takes, no matter how far and deep we have to search, to full closure; to exercise fundamental principles of humanity; and to restore and uphold justice in society

deputy director of the division of Thoracic Surgery. 2001 through 2004 he was director of the division of cardiovascular surgery.

In 1993 he went to the United States for further study of new technology of coronary artery surgery and heart valve plasty, as well as the protection of heart muscle, lung preservation, and organ transplantation²⁴⁶.

SHJT029 Liu Lin,

Male

Personal profile: Director of the division of ophthalmology, doctor at director level, professor

Once director of the division of ophthalmology of Changhai Hospital and member at deputy director level of the Committee of Ophthalmology in the Military²⁴⁷

SHJT030 Li Peiling,

Female, born in 1963

Personal profile: Doctor at director level and associate professor at the division of ophthalmology

In 1985 she graduated from the Medical Department of the Medical College affiliated with Dongnan University (formerly Nanjing Railroad Medical College) and got his Bachelor's degree. She is member of corneal disease group of Shanghai Medical Society. She has long been engaged in ophthalmology clinical, teaching and scientific research for more than 20 years. She is good at diagnosis and treatment of cataract, glaucoma, corneal disease and ocular surface diseases²⁴⁸.
