## 追查迫害法輪功國際組織（追查國際）

### World Organization to Investigate the Persecution of Falun Gong (WOIPFG)

To investigate the criminal conduct of all institutions, organizations, and individuals involved in the persecution of Falun Gong; to bring such investigation, no matter how long it takes, no matter how far and deep we have to search, to full closure; to exercise fundamental principles of humanity; and to restore and uphold justice in society

## China's Organ Transplant Organizations are the Executing Entities for the Communist Party's State Crime of Live Organ Harvesting

Since 1999, led by its then-leader Jiang Zemin, the Chinese Communist Party (CCP) criminal group has been manipulating China's entire state apparatus, including the Party, government, military, armed police, judicial system, and medical institutions, through the Political and Legal Affairs Commission and the "610" system, to commit nationwide mass extermination of Falun Dafa practitioners by means of live organ harvesting for transplantation. The CCP's live organ harvesting of Falun Gong practitioners is a crime against humanity and a crime of genocide initiated on the orders of Jiang Zemin.

Since the CCP's live organ harvesting of Falun Gong practitioners is a state genocidal crime conducted as a political campaign, organ transplant institutions in all provinces, central government-controlled municipalities, and autonomous regions of mainland China, including all military, armed police, and local hospitals (medical centers) are suspected to have participated in this crime, even including a considerable number of hospitals unqualified to perform organ transplants, such as small and medium-sized hospitals and specialized hospitals. Similar to how all Chinese hospitals were involved in forced abortions during the CCP's implementation of the "one-child policy", all transplant facilities in China today have participated in live organ harvesting.

In view of the broader context of the CCP's state crime of live organ harvesting, those in charge of organ transplant hospitals/centers and similar institutions in China are suspected of having been involved in the crime of live organ harvesting from groups such as Falun Gong practitioners.

### Evidence Collection Methods

#### 1. Direct and indirect comprehensive telephone investigation and on-site investigation of the people suspected of involvement in the live organ harvesting

The subjects of our investigations include government officials, policemen, doctors and other medical personnel.

Geographical Distribution of the Subjects of Investigation, and the Duration of Investigations:

The WOIPFG's subjects of investigation are people in different positions, who are located across the entire country of China. Our investigations have been ongoing for nearly two decades, and our investigation results have always been consistent. The evidence gathered by us verifies that live organ harvesting is a systematic arrangement by the CCP.

- 1) Subjects of investigation: Presidents, directors, doctors, nurses, and security guards of organ transplant hospitals.
- 2) Hospitals involved: A considerable amount of recorded evidence has been obtained from many provincial, military, armed police, and local organ transplant hospitals (centers) across China.
- 3) Time span: Our investigations on the live organ harvesting started in 1999, and they're ongoing to this day.

#### 2. Data investigation

- 1) We have been collecting data from the hospitals' websites and press releases.

# 追查迫害法輪功國際組織 ( 追查國際 )

## World Organization to Investigate the Persecution of Falun Gong (WOIPFG)

To investigate the criminal conduct of all institutions, organizations, and individuals involved in the persecution of Falun Gong; to bring such investigation, no matter how long it takes, no matter how far and deep we have to search, to full closure; to exercise fundamental principles of humanity; and to restore and uphold justice in society

- 2) We have been searching for and analyzing medical papers on transplantation.
- 3) We have been using the website www.archive.org to view the hospitals' previously archived information.
- 4) We have been collecting reports from the official Chinese media outlets.
- 5) We have organized all the information obtained from our investigations to create a database of the hospitals.

All the facts have shown us that the CCP is by no means a rational or normal organization or political party; but instead, it is a supra-state criminal syndicate controlled by a group of criminals who have committed crimes against humanity. The CCP's logic of thinking and principles of action are anti-human, and the crimes it has committed are forms of evil that humanity had never seen previously.

WOIPFG's investigative report series contains nearly 70 investigation reports on the alleged organ harvesting of living Falun Gong Practitioners at major Chinese military and civilian hospitals and on their staff members suspected of participation in this crime. This volume contains four such investigation reports.

### Table of Contents

**WOIPFG's Investigative Report on the Alleged Organ Harvesting of Living Falun Gong Practitioners at Beijing Chaoyang Hospital, Capital Medical University and Its Staff Members Suspected of Participation ..... 2**

**WOIPFG's Investigative Report on the Alleged Organ Harvesting of Living Falun Gong Practitioners at the Third Xiangya Hospital of Central South University and Its Staff Members Suspected of Participation ..... 22**

**WOIPFG's Investigative Report on the Alleged Organ Harvesting of Living Falun Gong Practitioners at Zhongshan Hospital, Fudan University and Its Staff Members Suspected of Participation ..... 34**

**WOIPFG's Investigative Report on the Alleged Organ Harvesting of Living Falun Gong Practitioners at Shanghai General Hospital and Its Staff Members Suspected of Participation ..... 47**

**WOIPFG's Investigative Report on the Alleged Organ Harvesting of Living Falun Gong Practitioners at Beijing Chaoyang Hospital, Capital Medical University and Its Staff Members Suspected of Participation**

### Address:

Hospital headquarters' address: No. 8 Gongti South Road, Chaoyang District, Beijing, China; Post Code: 100020

West branch address: No. 5 Jingyuan Road, Shijingshan District, Beijing; Post Code: 100043

Telephone number: 010-85231000

### Preface:

## 追查迫害法輪功國際組織（追查國際）

### World Organization to Investigate the Persecution of Falun Gong (WOIPFG)

To investigate the criminal conduct of all institutions, organizations, and individuals involved in the persecution of Falun Gong; to bring such investigation, no matter how long it takes, no matter how far and deep we have to search, to full closure; to exercise fundamental principles of humanity; and to restore and uphold justice in society

Beijing Chao-Yang Hospital, Capital Medical University is the organ transplant center in Beijing, with three organ transplant qualifications of liver, kidney, and lung<sup>1</sup>. The number of organ transplants is large, and the number of kidney transplants ranks first in the country for three consecutive years<sup>2</sup>. According to the telephone investigation: Emergency transplants are available, and the waiting time for transplants is short. The director of liver transplant and doctors admitted to using Falun Gong practitioners as donors, and the transplant volume is large. In view of the background of the CCP's national crime of organ harvesting from living Falun Gong practitioners, Beijing Chao-Yang Hospital is seriously suspected of being a key institution for organ harvesting from living Falun Gong practitioners.

#### **Hospital overview:**

Beijing Chao-Yang Hospital, Capital Medical University was established in 1958. It is the Third Clinical Medical College of Capital Medical University and the hospital where Beijing Institute of Respiratory Diseases is located. It is a third-level first-class hospital in Beijing that integrates medical treatment, teaching, scientific research and diseases prevention. It is among the designated medical institutions in Beijing that are covered by Class A Medical Insurance.

The hospital currently has two locations. The hospital covers a total area of 102,800 square meters, with a construction area of 210,000 square meters. It has more than 4,300 employees and consists of 1,900 beds and 59 clinical and medical technology divisions. The number of annual outpatient and emergency visits is about 3.8 million. The number of annual inpatient admissions is more than 89,000, and the number of surgeries is about 34,000<sup>3</sup>.

#### **I. The hospital's Hepatobiliary Surgery Department is the site of the Beijing Organ Transplant Center's Liver Transplant Department**

The CCP's Ministry of Health has an organ transplant center with the capability to simultaneously perform major organ transplants, such as liver, heart, kidney, lung, small intestine and pancreas transplants. The Beijing Organ Transplant Center's Liver Transplant Department is located in the Hepatobiliary Surgery Department of Beijing Chaoyang Hospital.<sup>4</sup>

#### **II. The Department of Urology carries out kidney transplants, in a large scale**

The Department of Urology has developed rapidly. The pancreas-kidney combined transplantation was carried out in 1999. It claims to have completed more than 3,000 cases of kidney transplants by 2016, and the actual number of transplants is even greater<sup>5</sup>. The Urology Center of the hospital consists of Ward One, Ward Two, West Ward and Outpatient Center, with a total of 112 open beds<sup>6</sup>. The annual outpatient volume is more than 100,000, the annual inpatients volume is more than 2,500, and the annual operation volume is more than 2,000.

#### **1.1.1 III. The hospital has participated in the Beijing Tissue Typing Center. From 1998 to 2000, The number of kidney transplants of the hospital ranked first in China for three consecutive years**

Five hospitals, including Beijing Friendship Hospital, the PLA No. 301 Hospital, Beijing Chaoyang Hospital, China-Japan Friendship Hospital and Peking Union Medical College Hospital, have participated in the operations of the Beijing Tissue Typing Center. These hospitals belong to four systems, including the Ministry of Health, the Chinese Academy of Medical Sciences, the People's Liberation Army (PLA) and the municipality of Beijing.<sup>7</sup> Beijing Chaoyang Hospital claims that from 1998 to 2000, its number of kidney transplants ranked first in China for three consecutive years.<sup>8</sup>

## 追查迫害法轮功国际组织 (追查国际)

### World Organization to Investigate the Persecution of Falun Gong (WOIPFG)

To investigate the criminal conduct of all institutions, organizations, and individuals involved in the persecution of Falun Gong; to bring such investigation, no matter how long it takes, no matter how far and deep we have to search, to full closure; to exercise fundamental principles of humanity; and to restore and uphold justice in society

#### 1.1.2 VI. The hospital's strong surgical teams for liver/kidney transplants show that its actual organ transplant volume is massive

In 2014, World Organization to Investigate the Persecution of Falun Gong (WOIPFG) released a list of the hospital's organ transplant surgeons.<sup>9</sup> The surgeons performing kidney transplants include six chief physicians, nine associate chief physicians and 17 others, with a total of 32 surgeons. The surgeons performing liver transplants include three chief physicians, seven associate chief physicians, five attending physicians and 12 others, with a total of 27 surgeons. They are capable of forming multiple liver and kidney transplant surgical teams.

**Zhang Xiaodong** was the deputy director of Beijing Chaoyang Hospital's urinary surgery department and its chief physician. As of 2016, his surgical team had performed more than 3,000 cases of kidney transplantation.<sup>10</sup>

**Wang Wei** was an associate chief physician of Beijing Chaoyang Hospital's urinary surgery department. He obtained his doctorate in July 2004. As of 2014, he had independently carried out around 500 cases of renal transplantation and had participated in nearly 1,000 cases of kidney transplant surgeries and postoperative patient management.<sup>11</sup>

**Guan Delin** was Vice President of the First Hospital of Tsinghua University and Deputy Director of the Beijing Organ Transplant Center. As of 2014, Guan Delin had successfully performed more than 1,000 cases of kidney transplants by himself.<sup>12</sup>

*Beijing Business Today* reported on September 7, 2005 that Guan Delin had performed "more than 2,700 cases of kidney transplantation, more than 40 cases of living related kidney transplantation, nearly 20 cases of combined pancreas-kidney transplantation."<sup>13</sup> Guan Delin used to serve as the director of the urology department at the Beijing Red Cross Chaoyang Hospital.<sup>14</sup>

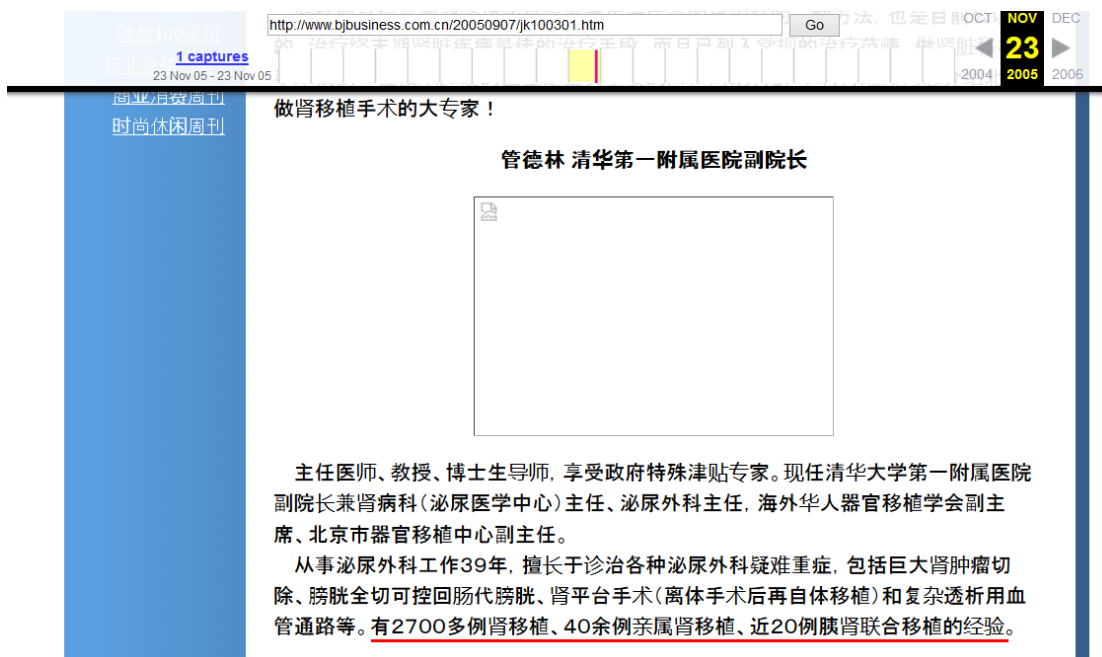

Figure 1. Snapshot of *Beijing Business Today* Website

By January 1999, he had performed more than 1,000 kidney transplants. In contrast, from January 26, 1999 to September 7, 2005, within six years and seven months, Guan Delin performed more than 1,700 cases of

## 追查迫害法輪功國際組織 ( 追查國際 )

### World Organization to Investigate the Persecution of Falun Gong (WOIPFG)

To investigate the criminal conduct of all institutions, organizations, and individuals involved in the persecution of Falun Gong; to bring such investigation, no matter how long it takes, no matter how far and deep we have to search, to full closure; to exercise fundamental principles of humanity; and to restore and uphold justice in society

kidney transplantation, while he was serving important leadership positions, performing teaching tasks and working as committee members and editorial board members. Therefore, Guan Delin's average number of kidney transplants per year was 258 cases (1,700 cases divided by 6.58 years). However, he performed only over 100 cases of kidney transplant surgeries in 1998.<sup>15</sup> So what's the reason for the large increase in Guan's workload?<sup>16</sup> Since Guan Delin alone could perform 258 cases of kidney transplantation per year, and there were so many surgeons in this hospital, how large would the annual organ transplant volume be?

#### **V. Telephone investigation: The doctors admitted to using Falun Gong practitioners as donors; the hospital can perform emergency transplants; the organ wait times are very short; the hospital has a large organ transplant volume**

##### **1. The doctors admitted to using Falun Gong practitioners as donors**

**Subject(s) of investigation:** Lang Ren, Director of Liver Transplant, Beijing Chaoyang Hospital<sup>17</sup>

**Date:** November 6, 2018 (+86-13911757869)

##### **Summary:**

“If everything goes well, it can be done two or three weeks.”

Investigator: “The donors are those Falun Gong practitioners, that kind of normal healthy donors, right?”

Lang Ren: “Right, right, correct, correct, you are right.”

(Recording 1 download: [MP3](#), Transcript download: [pdf 5](#))

**Profile:** Lang Ren is a chief physician, an editorial board member of the “*Chinese Journal of Hepatobiliary Surgery*” and a member of the Beijing Medical Association's Enteral Nutrition Committee.<sup>18</sup>

**Subject(s) of investigation:** Dr. Li, Doctor-on-duty, the Urology Surgery, Beijing Chaoyang Hospital

**Date:** December 2, 2018 (01186-10-85231457)

##### **Summary:**

Investigator: “They are still the normal kidney sources from Falun Gong (practitioners), right?”

Dr. Li: “Right, right, right.”

Investigator: “Generally speaking, if you take a donor, you should not only take a kidney, but also the heart, liver and kidney. How long does it take for this process?”

Dr. Li: “About three or four hours.”

Investigator: “It takes three or four hours to get this organ from disinfection, draping to completion, right?”

Dr. Li: “Right, right, right.”

Investigator: “Sometimes you go directly to the source of the kidney to get the organs, and sometimes you transfer them through an intermediary and get them from outside and use them at the hospital. Now you don't need an intermediary, right?”

Dr. Li: “Maybe sometimes now, but generally, yes.”

Investigator: “The organs collected by the intermediary are also normally organs of Falun Gong. The source of the organs is the same, right?”

Doctor Li: “Yes.”

## 追查迫害法輪功國際組織 ( 追查國際 )

### World Organization to Investigate the Persecution of Falun Gong (WOIPFG)

To investigate the criminal conduct of all institutions, organizations, and individuals involved in the persecution of Falun Gong; to bring such investigation, no matter how long it takes, no matter how far and deep we have to search, to full closure; to exercise fundamental principles of humanity; and to restore and uphold justice in society

---

Investigator: “My question is, what the intermediary takes is the same as what you take, right?”

Doctor Li: “Yes, right, right.”

(Recording 2 download: [MP3](#), transcript download: [pdf 84](#))

## 2. The hospital can perform emergency transplants

Usually, emergency liver transplants are emergency liver replacement surgeries performed on patients with acute or severe liver diseases, who can survive for no more than 72 hours. Due to the difficulty of emergency organ matching and the long wait times for donors, emergency liver transplants are not common in foreign countries. In China, emergency liver transplantation has been widely implemented in recent years.

**Subject(s) of Investigation:** Doctor, the Liver Transplant Doctors’ Office, Beijing Chaoyang Hospital<sup>19</sup>

**Date:** March 7, 2019 (+86-10-85231504)

**Summary:** There are a lot of liver transplants performed in this hospital. The wait time is as short as one or two days, maybe half a month sometimes. The wait wouldn’t be too long.

(Recording 3 download: [MP3](#), Transcript download: [pdf 012](#))

## 3. The organ wait times are very short

**Subject(s) of Investigation:** He Qiang, Director of Liver, Gallbladder and Spleen Surgery, Beijing Chaoyang Hospital<sup>20</sup>

**Date:** March 3, 2016 (+86-13701194928)

**Summary:** “We have always been doing liver transplants. The (organ) wait times are one to two weeks. This year, we have already performed more than a dozen cases, and the price is 700,000 yuan (per case).”

(Recording 4 download: [MP3](#), transcript download: [pdf2](#))

**Subject(s) of Investigation:** Doctor, Liver Transplant Doctors’ Office, Beijing Chaoyang Hospital<sup>21</sup>

**Date:** May 3, 2018 (+86-10-85231504)

### Summary:

1. About 100 cases are done each year.
2. It usually can be done in two weeks or so, but the wait time could be up to four weeks.
3. Investigator: Are those organs from prisoners or Falun Gong practitioners that were used previously still available?

Doctor: None of those are available now, None.

(Recording 5 Download: [MP3](#), Manuscript Download: [pdf3](#))

**Subject(s) of investigation:** Lang Ren, Director of Liver Transplant, Beijing Chaoyang Hospital<sup>22</sup>

**Date:** March 1, 2016 (+86-13911757869)

**Summary:** “If it is critical, we would have a green channel (for organs)”. “If it is a general situation, he needs to wait two weeks the longest in our hospital, because our donor sources are very abundant.”

(Recording 6 download: [MP3](#), transcript download: [pdf 4](#))

## 追查迫害法輪功國際組織 ( 追查國際 )

### World Organization to Investigate the Persecution of Falun Gong (WOIPFG)

To investigate the criminal conduct of all institutions, organizations, and individuals involved in the persecution of Falun Gong; to bring such investigation, no matter how long it takes, no matter how far and deep we have to search, to full closure; to exercise fundamental principles of humanity; and to restore and uphold justice in society

---

#### 4. The hospital has a large organ transplant volume

**Subject(s) of investigation:** Doctor, Kidney Transplant, Beijing Chaoyang Hospital<sup>23</sup>

**Date:** December 27, 2017 (+86-1085231383)

**Summary:** We have three teams doing kidney transplants; I can't tell you how many kidney transplants we've done this year; quite a lot anyway! More and more, year by year...

(Recording 7 download: [MP3](#), transcript download: [pdf7](#))

**Subject(s) of investigation:** Doctor Xu, Liver Transplant, Beijing Chaoyang Hospital<sup>24</sup>

**Date:** June 20, 2019 (+86-10-85231504)

**Summary:**

Investigator: "You usually do 200 to 300 cases in a year?"

Doctor Xu: "Yes! We do a lot, so don't worry."

(Recording 8 download: [MP3](#), transcript download: [pdf 057](#))

**Subject(s) of investigation:** Doctor-on-duty, the Liver Transplant Office, Beijing Chaoyang Hospital<sup>25</sup>

**Date:** November 19, 2019 (+86-1085231504)

**Summary:** "150 cases have been done this year (as of November 2019). The liver transplant department is divided into six medical teams. Since we're always at full capacity, we cannot admit your patient until after another patient is discharged from the hospital."

(Recording 9 download: [MP3](#), transcript download: [pdf 152](#))

**Subject(s) of investigation:** Doctor Liu Yui, Liver Transplant, Beijing Chaoyang Hospital<sup>26</sup>

**Date:** July 16, 2020 (+86-13911062788)

**Summary:**

1. Investigator: Are you Doctor Liu from the Armed Police General Hospital?

Doctor Liu: I have left the Armed Police General Hospital.

2. Come to the hospital as soon as possible, can you come tomorrow morning?

3. You come to Beijing Chaoyang Hospital to find me, at the East Bridge in Chaoyang District. Just call me.

4. We did not stop during the epidemic, we have continued doing it; we did it yesterday, and did four [transplants] in three days.

5. Investigator: If it goes well, can it be done within a month?

## 追查迫害法輪功國際組織 ( 追查國際 )

### World Organization to Investigate the Persecution of Falun Gong (WOIPFG)

Doctor Liu: It should be, I think it can be done.

6. The cost is about 800,000 yuan.

(Recording 10 download: [MP3](#), manuscript download: [pdf098](#))

### VI. An illegal organ broker disclosed the dark secrets of Chaoyang Hospital<sup>27</sup>

“There are many kidney sources, and a surgery can be scheduled within a week.” A small kidney transplant advertisement with a phone number appeared in 2017 near many Class A tertiary hospitals in Shanghai, Zhengzhou, Qingdao, Guangzhou, Xiamen and other places. Since November 2017, WOIPFG continuously investigated this case for three months. WOIPFG investigators conducted several investigations on Wang, the contact person in the advertisement, in the name of a patient’s family member, doctor and hospital organ coordinator. During this period, Wang disclosed many dark secrets regarding the organ procurement. The following are some excerpts of the telephone investigations on Wang concerning Beijing Chaoyang Hospital.

**Subject(s) of investigation:** Mr. Wang, Kidney Transplant Organ Broker (I)

**Date:** January 3, 2018 (+86 183102589794)

#### Summary:

1. Wang said that in the underground small hospital they built near Beijing Chaoyang Hospital, “They have done several times more cases than the Class A tertiary hospitals this year.”  
The family member of a patient said that they did not feel confident about Wang’s small hospital. Wang said that there was no problem, as all the surgeons were actually the doctors and directors from Class A tertiary hospitals. In his small hospital, “they have done several times more cases this year than the Class A tertiary hospitals.”  
He also said that he performed surgeries “every day”. “I finished another surgery yesterday, you know.” He said that sometime the caller could not find him by phone, because he was busy with surgeries most of the time.
2. Wang said that all the surgeries performed in the underground operating room were using living donors. In fact, many of the living donors used by some Class A tertiary hospitals were “all provided by us.” He said that he could arrange for patients to go to Chaoyang Hospital for surgeries, but the kidney sources would be the same, as they would all be living donors provided by them.
3. Wang guaranteed that the kidney sources were from young people, “who are all under 25 years old”. “Basically all of them are under the age of 25, and donors of 27 or 28 years old may be accepted if their conditions are particularly good.” Wang said repeatedly that he guaranteed the donors to be young and healthy. When the family member asked why there were so many young males, he said that they had their own channels.
4. When being asked whether he could perform organ transplant surgeries other than kidney transplants, Wang replied, “Liver transplants can also be done. For a liver, it probably takes two weeks,” but the surgery could only be performed in a Class A tertiary hospital, with a wait time of just two weeks.

(Recording 11 download: [MP3](#), transcript download: [pdf 241](#))

## 追查迫害法輪功國際組織 ( 追查國際 )

### World Organization to Investigate the Persecution of Falun Gong (WOIPFG)

To investigate the criminal conduct of all institutions, organizations, and individuals involved in the persecution of Falun Gong; to bring such investigation, no matter how long it takes, no matter how far and deep we have to search, to full closure; to exercise fundamental principles of humanity; and to restore and uphold justice in society

---

**Subject(s) of investigation:** Mr. Wang, Kidney Transplant Organ Broker (II)

**Date:** January 5, 2018 (+8618310258979)

#### Summary:

1. Wang said that they had “cooperation with Beijing’s Chaoyang (Hospital) and the Armed Police (General Hospital)”. When the investigator asked about both hospitals’ experiences, Wang said, “They have connections, you know? They are afraid of nothing!” When the investigator asked about their connections and how they were developed, Wang replied, “Their directors have connections with the military or the central government, you know? That is, even people know clearly what they’re doing; no one dares to stop them!”
2. Wang said that the underground small hospital conducts more transplant surgeries than the Class A tertiary hospitals. “In Chaoyang, we probably have three or four people, in cooperation with the (organ transplant department’s) director. So they give me five cases per person per month. You know, that’s five beds. He, he just tells you that you will be given five beds this month. That means, five cases of surgeries.”
3. Wang said, “You should know that we are [operating] illegally. If something goes wrong, you have to settle it by yourself. As long as you do this thing, you don’t want to cause any trouble. If something were to happen, such as an accident, you should handle it by yourself. Don’t, don’t make trouble publicly, don’t make it known to reporters or make trouble abroad. If you make trouble abroad, it’s troublesome.”
4. Wang said that they performed kidney excisions at night, only with their own people. “The (practice) in Chaoyang is that the donors are outside (of the hospital). Since only the liver transplants are performed inside the hospital, the donors all have their organs excised in an operating room outside. After being excised, the organs are brought over there.” Wang said that it took about two hours to perform a kidney excision, which is very simple to perform.
5. Investigator: “Originally, they arrested a large number of people, because at that time, these petitioners (i.e. Falun Gong practitioners) did not report their names. So they did (live organ harvesting) with these people. But there must be some (other arrests) later on. They have been constantly arresting people. Ah, they would dispose some of them. But after the change of state leadership, this policy still continues. It cannot be discussed openly, right? But, they are still doing it, so he can only turn a blind eye to it, right? Mr. Wang: “Yes, this, this has always been the case.”
6. Wang said that there’s an unwritten rule when cooperating with the hospitals. If something happens, “we are like this in this business: we must protect the hospitals. Because if we say it out, then everyone’s crime will become greater and heavier. So we’d rather not say it! Then we would have protected the hospitals. Then you can still operate outside for us; even if you don’t help us operate, we can still cooperate after we are released.” Wang said, “It cannot be said that (the country) does not control it. It also controls it, but that is on the surface, you know.” Wang said, “In 2012 or 2013, around that time, in the international community, a small country at UN, probably instigated by another country, accused our China about this issue. They stirred up some trouble over this issue. They did not mention Falun Gong, but brought up the issue that China used organs from executed prisoners, as a human rights issue. However, our country was able to resolve the issue at that time.”
7. The WOIPFG investigator said, “In the past, the organs from the judiciary system were mostly from Falun Gong practitioners. The organs used in transplants now are also from Falun Gong practitioners,

## 追查迫害法輪功國際組織 ( 追查國際 )

### World Organization to Investigate the Persecution of Falun Gong (WOIPFG)

To investigate the criminal conduct of all institutions, organizations, and individuals involved in the persecution of Falun Gong; to bring such investigation, no matter how long it takes, no matter how far and deep we have to search, to full closure; to exercise fundamental principles of humanity; and to restore and uphold justice in society

but they claim that they are from voluntary donors.” Wang agreed, “Right, right, correct.”

8. Wang said, “In Chaoyang, when a patient comes, the director will talk to him seriously, about how his or her operation is going to be like, but there is a problem getting kidney source. Then we will talk with the patient, and we will tell the patient, go tell the director that I have the kidney source, I have a way and I have connections, so I am able to get a kidney for you. Then the director would say, hey, sounds good, go ahead and obtain the kidney yourself, I will arrange the operation for you. Then, even if the operation fails, or some problem occurs, we have secured the patient, you know. If someone from your hospitals comes with the patient, if any problem arises and there is an investigation, he will serve as a witness. It won’t be any problem if the operation goes well, but if anything goes wrong with the operation, he will sure go after you. ”

(Recording 12 download: [MP3](#), transcript download: [pdf 242](#))

**Subject(s) of investigation:** Mr. Wang, Kidney Transplant Organ Broker (III)

**Date:** January 9, 2018 (+8618310258979)

#### Summary:

1. Speaking of money, Wang said, “When (surgeries) are performed in other hospitals, we can add a little bit of profit for you (in our pricing), more or less, do you know? We add a little bit of profit for the doctor, who’s mainly in charge of this or the director. It’s roughly, basically around 50,000 yuan...I will add another 50,000 yuan for you, and then you allocate the money among yourselves, okay?” The investigator asked, “Chaoyang and the First Central Hospital, Tianjin First Central Hospital also work like this?” Wang answered, “Yes, yes.”
2. Regarding the specific operation, physical examinations are done at the Beijing Armed Forces General Hospital, and operations are done at Chaoyang Hospital. The two procedures appear to be separately carried out. Wang said, “Chaoyang would take a look at the results of your physical examination. After the hospital looks at them, the patient would come to have a checkup again at Chaoyang, but the donor will not go through a checkup there, you know. For donors, they (Chaoyang) only look at the results from previous checkups.”
3. Wang said that the procedures are very crucial. “Chaoyang would have a quota. Within the spot in the quota, when he performs a surgery for one patient, for instance, Wang So-and-so, he would do it according to the normal procedures. That is, brain death, or (organ) donations of this kind. After performing a surgery for this patient, he does it again.... when we do it again, it would be imposture. Using Wang So-and-so’s spot within the quota to perform surgeries for other people.”
4. The real name of one single person can be used to perform surgeries for more than a dozen individuals.
5. The directors at Chaoyang Hospital prepares stamps and performs the forgery in paperwork. Wang reminds the doctors that their hospitals cannot report the actual large number of operations to the Ministry of Health.
6. Wang said that in Chaoyang there were two directors falsifying paperwork, Zhang Xiaodong and another director. After hearing the investigator mention the names of Wang Wei and others, he said that they were all doing it. There were two groups, and Hu Xiaopeng and the others were all under Zhang

## 追查迫害法輪功國際組織 ( 追查國際 )

### World Organization to Investigate the Persecution of Falun Gong (WOIPFG)

To investigate the criminal conduct of all institutions, organizations, and individuals involved in the persecution of Falun Gong; to bring such investigation, no matter how long it takes, no matter how far and deep we have to search, to full closure; to exercise fundamental principles of humanity; and to restore and uphold justice in society

Xiaodong.

7. There are at least four people like Wang providing organs to Chaoyang Hospital. And each month each of them can do more than 20 organ transplants outside the hospital. Wang said, “There are four, four people that I know. These are just the ones that I know.” The investigator said, “You see that with four people, that’s more than 80 cases. There would be over 100 cases per month.” Wang said, “They didn’t report that many cases to the higher authorities. There are many, according to me, which were not reported at all, you know. There are way too many people! It’s a little, a little, a little bit against common sense.”

## VII. List of Key Individuals Responsible for Live Organ Harvesting at Beijing Chao-Yang Hospital

### **BJCY001. Name: Guan Delin**

Serial number: BJCY001

Gender: male

Date of birth: June 16, 1941

Family origin: Anhui Province

He is a member of the Chinese Communist Party.<sup>28</sup>

**Profile:** Guan is the deputy director of the Institute of Urology, Capital Medical University; Director of Department of Urology, Beijing Chaoyang Hospital; member of The Transplantation Society (TTS); member of the Chinese Dialysis and Transplantation Society (CDTS); member of the Chinese Artificial Organ Academic Committee, member of the Organ Transplantation Key Laboratory Academic Committee of the Ministry of Health; member of the Beijing Branch of the Chinese Society of Medical Information; editorial board member of the *Chinese Journal of Organ Transplantation*; editorial board member of the *Chinese Journal of Nephrology, Dialysis and Transplantation (CNDT)* and editorial board member of the *Chinese Journal of Dialysis and Artificial Organs*.

He graduated with honors from the Department of Medicine, Capital Medical University in 1965, and was assigned to work in the Department of Urology, Beijing Friendship Hospital. He has been teaching at the Capital Medical University for 33 years. And he is currently a master’s student advisor at the Capital Medical University and was hired as a doctorate advisor at the Fourth Military Medical University in 1997.

In 1984, he went to a hospital affiliated with the Harvard Medical School to study hemodialysis and kidney transplantation. After returning to China, he established a modern large-scale hemodialysis center with Professor Yu Huiyuan. In 1994, he went to the Singapore General Hospital for advanced training for one year.<sup>29</sup>

In 1980, the study of infant kidney transplantation to adults was successful, which expanded the potential source of kidney donors. On January 26, 1999, Guan had successfully performed more than 1,000 kidney transplant operations. In 1998 alone, he performed more than 100 cases. In 1998, the Department of Urology at Chaoyang Hospital performed a total of 269 kidney transplants, of which 170 were performed by Guan Delin.<sup>30</sup> According to his profile on September 7, 2005, Guan Delin was vice-president of the First Affiliated Hospital of Tsinghua University and deputy director of the Beijing Organ Transplant Center, and had performed “more than 2,700 kidney transplants and more than 40 kidney transplants with organs donated from the recipients’ relatives, and nearly 20 cases of combined pancreas-kidney transplantation.”<sup>31</sup>

### World Organization to Investigate the Persecution of Falun Gong (WOIPFG)

To investigate the criminal conduct of all institutions, organizations, and individuals involved in the persecution of Falun Gong; to bring such investigation, no matter how long it takes, no matter how far and deep we have to search, to full closure; to exercise fundamental principles of humanity; and to restore and uphold justice in society

#### BJCY002. Name: Hu Xiaopeng

Serial number: BJCY002

Gender: male

**Profile:** Hu is chief physician and associate professor of urology.

He graduated from the Department of Clinical Medicine at Beijing Medical University in 1994 with a bachelor's degree in medicine; in 2001, he graduated from Peking University with a master's degree in medicine; in 2009, he graduated from the Capital Medical University with a doctorate in medicine.

From 2009 to 2011, he conducted post-doctoral research in the organ transplantation surgery department of the world-renowned Johns Hopkins University School of Medicine in the U.S., mainly engaging in the basic research related to bone marrow stem cells and transplant immune tolerance. He has conducted short-term academic exchanges at several universities and medical centers, such as the Massachusetts General Hospital, University of Pittsburgh Organ Transplant Center, University of Wisconsin School of Medicine and Public Health and Tokyo Women's Medical University, and has received training in organ transplantation.

He has been engaging in clinical, scientific research and teaching related to urology and kidney transplantation work for nearly 20 years. He has performed more than 600 cases of human kidney transplant surgeries and has clinical experience in postoperative management.<sup>32</sup> He mainly engages in kidney transplantation work.

#### BJCY003. Name: Wang Wei

Serial number: BJCY003

Gender: male

**Profile:** Wang Wei is associate chief physician, associate professor and master's student supervisor.

As an outstanding graduate of the Capital Medical University in 1996, he was assigned to work at Beijing Chaoyang Hospital. In 1999, he studied for a master's degree in urology, Capital Medical University; and in 2001, he became to a doctoral student. He obtained a doctorate in medicine in July 2004.

He has independently completed about 500 kidney transplants and participated in the management of nearly 1,000 cases of kidney transplantation and postoperative patient management.<sup>33</sup>

#### BJCY004. Name: Han Xiuwu

Serial number: BJCY004

Gender: male

Date of birth: 1964

Place of birth: Lixin County, Anhui<sup>34</sup>

**Profile:** Han is the director and a chief physician of the Department of Urology, West Branch of Beijing Chaoyang Hospital.

He graduated from the Department of Medicine at Anhui Medical University in 1988. After graduation, he worked in the Department of Urology at Beijing Chaoyang Hospital for 15 years and received strict systematic clinical training.

## 追查迫害法輪功國際組織 ( 追查國際 )

### World Organization to Investigate the Persecution of Falun Gong (WOIPFG)

To investigate the criminal conduct of all institutions, organizations, and individuals involved in the persecution of Falun Gong; to bring such investigation, no matter how long it takes, no matter how far and deep we have to search, to full closure; to exercise fundamental principles of humanity; and to restore and uphold justice in society

In 2002, he went to Beijing Haidian Hospital to establish its Department of Urology and served as the head of the department. In 2005, he served as deputy director of the Department of Urology, Beijing Shijitan Hospital, Capital Medical University, and director of its Kidney Transplant Center. From 2008 to 2009, he studied minimally invasive urology technologies at Peking University Third Hospital. From March to September 2010, at Beijing Friendship Hospital, he studied minimally invasive urology technologies. Han obtained a doctorate in medicine from the Capital Medical University in 2012. In 2002, he studied organ transplantation at the University of Minnesota and the Organ Transplantation Center of the University of Pittsburgh.

Han has presided over the completion of more than 600 kidney transplants, including living donor kidney transplantation, pediatric kidney transplantation, and complex and highly sensitized patient kidney transplantation.<sup>35</sup>

#### BJCY005: Wang Yong

Serial number: BJCY005

Gender: male

**Profile:** Wang is a chief physician of the Urinary Surgery Department and vice president of Yanda Hospital in Beijing.

He has visited the United States, Canada, Britain, France, Germany, Hong Kong, Taiwan and other places many times for studies and academic exchanges. He started working in the kidney transplantation field in 1998.<sup>36</sup> He has performed more than 3,000 kidney transplants.<sup>37</sup>

#### BJCY006: Li Xiaobei

Serial number: BJCY006

Gender: male

Date of birth: 1972

He is a member of the Chinese Communist Party.<sup>38</sup>

**Profile:** Li is an associate chief physician of the Urinary Surgery Department at the hospital and a youth member of the Beijing Society of Organ Transplantation, Chinese Medical

Association.

He graduated from the Capital Medical University in 1995 with a bachelor's degree. He obtained his master's and doctoral degrees under the guidance of Professor Guan Delin and Professor Zhang Xiaodong respectively, both renowned experts in urinary surgery and organ transplantation.

In 2002, he went to the University of Minnesota and the University of Pittsburgh's Medical Center to study kidney transplantation and pancreas transplantation. From 2006 to 2007, he was funded by the Takeda Scholarship of the Chinese Medical Association to study in the Nephrology Institute of Tokyo Women's Medical University, the largest kidney transplant center in Japan. He has more than a decade of clinical work in kidney transplantation.<sup>39</sup>

#### BJCY007: Zhang Xiaodong

Serial number: BJCY007

Gender: male

**Profile:** Zhang is the deputy director and chief physician of the Department of Urinary Surgery at the hospital, deputy secretary-general of the Management Committee of the

## 追查迫害法輪功國際組織 ( 追查國際 )

### World Organization to Investigate the Persecution of Falun Gong (WOIPFG)

To investigate the criminal conduct of all institutions, organizations, and individuals involved in the persecution of Falun Gong; to bring such investigation, no matter how long it takes, no matter how far and deep we have to search, to full closure; to exercise fundamental principles of humanity; and to restore and uphold justice in society

Chinese Renal Transplant Scientific Registration System, member of the Organ Transplant Branch of the Chinese Medical Association, and member of the Standing Committee of the Organ Transplant Branch of the Beijing Medical Association.

He once worked as a professor in the Department of Urinary Surgery, Peking University People's Hospital. At the end of 2004, he started to serve as the deputy director of the Institute of Urinary Surgery, Capital Medical University, and the director of the Urology and Nephropathy Clinic and the director of the Department of Urinary Surgery in Beijing Chaoyang Hospital.

As a top expert in urinary surgery and organ transplantation, he leads a highly academic medical team. In recent years, they have completed more than 1,000 kidney transplants, with a cumulative total of more than 3,000 cases, including 240 living related kidney transplants. In particular, they have recently carried out preoperative desensitization treatment for a considerable proportion of sensitized patients (with pre-existing antibodies > 20%) waiting for renal transplantation in China and have completed the clinical studies of 50 cases of sensitized patients' kidney transplantation holistic treatment.<sup>40</sup>

#### BJCY008: Liu Hang

Serial number: BJCY008

Gender: female

**Profile:** Liu is an associate chief physician of urinary surgery at Beijing Chaoyang Hospital.

She graduated from the Department of Clinical Medicine at Shanxi Medical University in 1992 with a bachelor's degree, and worked in the Department of Nephrology in the Second Affiliated Hospital of Shanxi Medical University. In 2000, she obtained her master's degree in Pediatric Nephrology from Union Medical University. From 2000 to 2004, she worked in the Nephrology Department of the Chinese People's Liberation Army General Hospital. In December 2004, she was decommissioned from the army and was transferred to the Department of Urology, Beijing Chaoyang Hospital.<sup>41</sup>

#### BJCY009: Ren Liang

Serial number: BJCY009

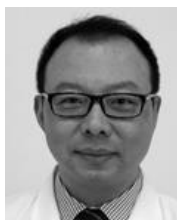

Gender: male

Date of birth: December 1969

**Profile:** Ren is an associate chief physician.

He graduated from the Department of Clinical Medicine at Shanxi Medical College, and engaged in clinical and scientific research on urological tumors in the Department of Urinary Surgery, Shanxi Provincial Cancer Hospital. From 1999 to 2002, he studied for a master's degree in the Department of Urinary Surgery, Peking University First Hospital and Peking University Institute of Urinary Surgery. From 2002 to 2005, he was a doctoral student in the Department of Urinary Surgery, Peking University People's Hospital. From 2005 to 2007, he conducted postdoctoral research in the Department of Urinary Surgery, Capital Medical University, and Beijing Chaoyang Hospital affiliated with Capital Medical University. After finishing his post-doctorate research in December 2007, he was assigned to the Department of Urinary Surgery, Chaoyang Hospital, to engage in basic research and clinical work on urological diseases, including kidney transplantation.<sup>42</sup>

#### BJCY010: Yin Hang

Serial number: BJCY010

Gender: male

**Profile:** Yin is an associate chief physician at the Department of Urinary Surgery.

## 追查迫害法輪功國際組織（追查國際）

### World Organization to Investigate the Persecution of Falun Gong (WOIPFG)

To investigate the criminal conduct of all institutions, organizations, and individuals involved in the persecution of Falun Gong; to bring such investigation, no matter how long it takes, no matter how far and deep we have to search, to full closure; to exercise fundamental principles of humanity; and to restore and uphold justice in society

---

In 1996, he graduated from the Department of Clinical Foreign Language Medicine of Bethune Medical University with a bachelor's degree in medicine. Later, he obtained a master's degree in clinical medicine and a doctorate degree in medicine from Peking University School of Medicine and Capital Medical University, respectively.

From 2011 to 2012, he was engaged in postdoctoral research at the Organ Transplant Center of the University of Wisconsin School of Medicine and Public Health, which has performed the largest number of kidney transplants and combined pancreas-kidney transplants in the United States. And he received systematic training in kidney transplantation and pancreatic transplant surgery and engaged in transplant kidney pathology research there.<sup>43</sup> He has performed nearly 300 kidney transplants independently.

#### **BJCY011: Jiang Yuguang**

Serial number: BJCY011

Gender: male

**Profile:** Jiang is an associate chief physician at the Department of Urinary Surgery. He specializes in kidney transplantation.<sup>44</sup>

#### **BJCY012: Wu Kerang**

Serial number: BJCY012

Gender: male

Date of birth: July 1935

Family origin: Shanghai

He is a member of the Chinese Communist Party.<sup>45</sup>

**Profile:** Wu is a chief physician at the Department of Urinary Surgery. He specializes in kidney transplantation.<sup>46</sup>

#### **BJCY013: Gao Juzhong**

Serial number: BJCY013

Gender: male

Date of birth: November 1942

**Profile:** Gao is President of Beijing Red Cross Chaoyang Hospital, Capital Medical University, Head of the Institute of Urinary Surgery, chief physician and professor of the Department of Urinary Surgery, and member of the Beijing Society of Organ Transplantation, Chinese Medical Association.

He graduated from Peking Union Medical University in 1968 and conducted urological clinical work in Beijing Friendship Hospital after graduation. From 1985 to 1987, he went to the University of California School of Medicine for advanced training in urinary surgery. He specializes in combined kidney-pancreas transplantation.<sup>47</sup>

#### **BJCY014: Chen Dazhi**

Serial number: BJCY014

Gender: male

## 追查迫害法輪功國際組織 ( 追查國際 )

### World Organization to Investigate the Persecution of Falun Gong (WOIPFG)

To investigate the criminal conduct of all institutions, organizations, and individuals involved in the persecution of Falun Gong; to bring such investigation, no matter how long it takes, no matter how far and deep we have to search, to full closure; to exercise fundamental principles of humanity; and to restore and uphold justice in society

**Profile:** Chen is a chief physician of hepatobiliary surgery, the director of hepatobiliary, pancreatic and splenic surgery, and member of the Organ Transplant Professional Committee of the Beijing Branch of the Chinese Medical Association. He graduated from the Department of Medicine at Harbin Medical University in 1982.

He studied at Nippon Medical University in 1987, engaging in basic and clinical research on organ transplantation, and obtained a doctorate of medicine from the university in September 1993. In the same year, he was invited by Professor Starzl, a well-known organ transplantation expert from the Institute of Organ Transplantation, University of Pittsburgh, to go to the United States for his post-doctoral research related to clinical liver transplantation and small intestine transplantation. In 1996, he was transferred to the U.S. National Institutes of Health as a researcher and returned to China in 1997.<sup>48</sup>

#### BJCY015: Lang Ren

Serial number: BJCY015

Gender: male

**Profile:** Lang is chief physician and associate professor of hepatobiliary surgery.

From March 2010 to July 2011, he was at the Wake Forest Institute for Regenerative Medicine for his post-doctoral research. The Wake Forest Institute for Regenerative Medicine is one of the four largest research institutes in this field in the world.

Since 1999, he has been engaging in clinical work and basic research of liver transplantation, and he has been engaging in the management of critically ill patients after liver transplantation in the surgical intensive care unit (SICU) for two years, as well as the postoperative management of liver transplantation and surgical critically ill patients.<sup>49</sup>

#### BJCY016: He Qiang

Serial number: BJCY016

Gender: male

**Profile:** He is the deputy director of hepatobiliary surgery, chief physician of hepatobiliary, pancreatic and splenic surgery, and member of the Organ Transplant Professional Committee of the Beijing Branch of the Chinese Medical Association.

He graduated from West China Medical Center of Sichuan University (formerly West China Medical University) in 1989. He went to Kyoto University, Japan (2003), Queen Mary Hospital, which is affiliated with the University of Hong Kong (2006), and University of Duisburg-Essen, Germany (2007) to study living donor liver transplantation.

After participating in allogeneic liver transplantation in 1999, he has successively carried out piggyback liver transplantation, modified piggyback liver transplantation, combined organ resection liver transplantation, reduced size pediatric liver transplantation, re-liver transplantation and combined liver and kidney transplantation. He is skilled at organ function maintenance during the perioperative period of liver transplantation. He has completed more than 500 liver transplants (including cases outside the hospital).<sup>50</sup>

#### BJCY017: Wu Tianming

Serial number: BJCY017

Gender: male

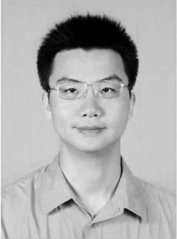

## 追查迫害法輪功國際組織 ( 追查國際 )

### World Organization to Investigate the Persecution of Falun Gong (WOIPFG)

To investigate the criminal conduct of all institutions, organizations, and individuals involved in the persecution of Falun Gong; to bring such investigation, no matter how long it takes, no matter how far and deep we have to search, to full closure; to exercise fundamental principles of humanity; and to restore and uphold justice in society

**Profile:** Wu is an associate chief physician of hepatobiliary, pancreatic and splenic surgery. He has been engaging in the clinical and basic research of liver transplantation for many years, and he has mastered the liver transplantation treatment methods for various end-stage liver diseases.<sup>51</sup>

#### BJCY018: Fan Hua

Serial number: BJCY018

Gender: male

**Profile:** Fan is an associate chief physician of hepatobiliary, pancreatic and splenic surgery, and member of European Society for Organ Transplantation (ESOT).

He graduated from the Department of Clinical Medicine, Capital Medical University in 1997 with a bachelor's degree, and he obtained a master's degree in clinical medicine from the Capital Medical University in 2007. From 2008 to 2011, he completed a doctorate degree at the University of Duisburg-Essen School of Medicine.

He is specialized in organ support and maintenance treatment during the perioperative period of liver transplantation, medium and long-term survival follow-up and management of liver transplantation patients, liver transplantation treatment and comprehensive treatment.<sup>52</sup>

#### BJCY019: Jin Zhongkui

Serial number: BJCY019

Gender: male

**Profile:** Jin is an associate chief physician of hepatobiliary, pancreatic and splenic surgery.

He graduated from Zhengzhou University (formerly Henan Medical University) in 1992 with a bachelor's degree; in 2000, he received a master's degree from Zhengzhou University; in 2003, he graduated from Huazhong University of Science and Technology Tongji Medical College with a doctorate. From May 2012 to May 2013, he was a visiting scholar at the University of Pittsburgh Medical Center.<sup>53</sup>

#### BJCY020: Li Xianliang

Serial number: BJCY020

Gender: male

**Profile:** Li is an associate chief physician of hepatobiliary surgery.

He graduated from China Medical University in 1994 and obtained a master's degree from the same university in 1997. In 2000, he was funded by the Mrs. Gordon Wu Scholarship as a visiting scholar in Queen Mary Hospital of the University of Hong Kong. In 2004, he studied under Professor Fan Shangda, an academician of the Chinese Academy of Engineering, and obtained a doctorate degree from the University of Hong Kong. He worked as a postdoctoral fellow in France in 2005. Li Xianliang was awarded the TTS Research Fellowship at the World Transplant Congress in Boston, U.S.A. in 2006, and the ESOT Senior Research Grant at the European Society for Organ Transplantation (ESOT) Annual Meeting in Paris, France in 2008. Since 2007, he has been leading his team to conduct research on transplantation immune tolerance.

## WOIPFG's Investigative Report on the Alleged Organ Harvesting of Living Falun Gong Practitioners at the Third Xiangya Hospital of Central South University and Its Staff Members Suspected of Participation

## 追查迫害法輪功國際組織 ( 追查國際 )

### World Organization to Investigate the Persecution of Falun Gong (WOIPFG)

To investigate the criminal conduct of all institutions, organizations, and individuals involved in the persecution of Falun Gong; to bring such investigation, no matter how long it takes, no matter how far and deep we have to search, to full closure; to exercise fundamental principles of humanity; and to restore and uphold justice in society

Address: No.138, Tongzipo Road, Hexi District, Changsha City, Hunan Province

#### Preface

Multiple provincial organ transplantation institutions were established in the Third Xiangya Hospital in 2003. In 2005, the Transplantation Medicine Engineering Technology Research Center of the Ministry of Health was formally established in the Third Xiangya Hospital. The hospital has abundant organ donors, and patients can obtain liver sources within two weeks. The number of organ transplants is enormous, but it is kept low-key and secretive to outsiders. During our telephone investigation, Ye Qifa, the hospital's Vice President, did not deny using organs from Falun Gong practitioners. Based on the above abnormal situation and the results of the telephone investigation, the Third Xiangya Hospital of Central South University is suspected of being one of the national organ allocation centers that harvest organs from live Falun Gong practitioners and other groups.

#### I. Hospital Overview

In 1998, the hospital passed the acceptance inspection of the Ministry of Health and became a Grade-A Tertiary Hospital. From 1999 to 2005, the hospital expanded and developed rapidly. In 2007, the hospital obtained the qualifications for liver and kidney transplantation from the Ministry of Health<sup>75</sup>. At present, the hospital has 1,800 open ward beds, 46 medical laboratories and clinical departments, and more than 2,100 employees. Organ transplantation has been the specialty of the hospital for many years<sup>76</sup>.

#### II. The hospital has great potential for organ transplants with the hardware and personnel to perform thousands of transplants every year.

In August 2001, the hospital invested nearly 100 million yuan to build a transplantation medical center of nearly 8,000 square meters, including a dialysis center, an experimental center, laminar flow operating rooms and ICU ultra-purified transplant laminar flow wards. At the same time, the Hunan Provincial Transplantation Medical Center settled in the hospital<sup>77</sup>. There are 150 ward beds available<sup>78</sup>. Based on this figure, if the bed turnover rate is 100% (the average bed occupancy rate in the national Grade-A Tertiary Hospitals is as high as 103%<sup>79</sup>), and if the hospitalization time for liver and kidney transplant is 30 days, the hospital has the potential to perform more than 1,825 ( $150 \times 365 \times 100\% / 30 = 1825$ ) cases of liver and kidney transplants per year. (Calculation method: number of ward beds X number of days in a year X bed turnover rate/average hospitalization time for liver and kidney transplant = number of liver and kidney transplants performed per year)

According to the "Central South University News" report in 2009: "Since the new surgical building of the Third Xiangya Hospital was completed and put into use, the number of beds has been increasing, from 1,000 before the start-up to 1,467. Once the 19th ward and the old cadre department open to use, the actual number of open beds is estimated to be 1,800. Since the beginning of this year, the number of inpatients has increased by 29% compared with the same period last year. The hospital bed utilization rate has reached or exceeded 100%, which is in a saturated state. Hospital leaders have even adopted the approach to shorten the average inpatient days to increase the bed turnover rate."<sup>80</sup> The actual transplant volume may be even higher.

2000年7月，医院实施以放权为核心内容的管理体制改革的探索，在业务科室试行“法人”主任负责制。其基本做法是：在医院的总体政策协调和监督下，业务科主任受医院法人的委托，在本科室范围内，完全拥有与医院法定代表人同等的权利，对科室的人、财、物实行充分的自主经营与管理，同时也对科室的学科发展、行政管理、收入分配、人事调动、设备采购等实施全面负责。

2001年7月，湖南医科大学附属第三医院更名为中南大学湘雅三医院。

2001年8月，医院投资近亿元建成了近8000平方米的移植医学中心，包括透析中心、实验中心、层流手术间及ICU超净化移植层流病房。同时湖南省移植医学中心落户该院。

2002年10月，全国知名移植医学专家叶启发教授率8名专家组成的移植学科团队加盟湘雅三医院。

2002年，医院被评为全国“百姓放心医院”，医院成为第一批进入卫生部国际紧急救援中心网络医院的单位。

2003年2月22日，医院党委正式发出文件，决定在实行法人主任负责制的基础上，设置专家委员会，试行“专家治院。”

Figure 1 Snapshot of the Third Xiangya Hospital of Central South University website

The Transplant Center has more than twenty professors and associate professors, and nearly a hundred medical, nursing, and technical staff<sup>81</sup>. "In October 2002, transplant expert Ye Qifa led a transplant team of eight experts to join the Third Xiangya Hospital."<sup>82</sup> Huang Zufa, President of the Third Xiangya Hospital, also emphasized the role of Ye Qifa's team in an interview with a reporter from the Central South University Journal: "In 2002, eight high-level organ transplant talents headed by Professor Ye Qifa, an organ transplant expert, joined our hospital..." "So far, we have carried out transplants of heart, liver, kidney, pancreatic islet cells, hematopoietic stem cells, small intestine, etc." "Our hospital has once performed two liver and five kidney transplants simultaneously, and we already have the ability to perform six or seven transplants at the same time."<sup>83</sup>

### III. The status of the hospital's Transplant Center in the organ transplant industry has been continuously upgraded.

**1. In August 2001, the Third Xiangya Hospital built a Hunan Transplantation Medical Center building<sup>84</sup>.** On September 19, 2003, when the building was officially opened, Xinhuanet published a report: *The Deputy Minister of Health of the People's Republic of China Performs a Liver Transplant at Central South University*. The article reads: " (The Transplant Center has completed) 300 liver transplants and 600 kidney transplants in the past three years. On that day, the Transplant Center arranged seven liver and kidney transplants. Huang Jiefu performed a liver transplant<sup>85</sup>."

#### 卫生部移植医学工程技术研究中心

卫生部移植医学工程技术研究中心(下称“中心”)于2005年由卫生部组织国内相关专家论证,并经卫生部批准,在中南大学湘雅三医院正式组建。中心主任和学术带头人由湖南省政府芙蓉学者计划特聘教授叶启发担任。叶启发毕业于武汉华中科技大学同济医学院,曾任卫生部器官移植重点实验室同济医院器官移植研究所常务副所长,教育部器官移植重点学科手术学学术带头人。卫生部移植医学工程技术研究中心是从事细胞、组织、器官移植和组织工程的综合性基础与应用研究中心。其中,组织及大器官移植、细胞移植(同种和异种)、组织工程的学术、学科带头人,分别由叶启发教授、王维教授、朱晒红教授担任。中心经过三年建设,已成功地开展了背驮式肝移植数百例、肾移植逾千例。其中,背驮式肝移植总数、存活率居国内领先,亲属肾移植居国内领先,并成功开展了肝肾、肝胰、肝肠、胰肾及多器官联合移植、脾移植、胰腺移植、心脏移植、劈离式肝移植和亲属肝移植以及甲状腺和甲状旁腺移植,肝、脾、胰细胞移植。在卫生部黄洁夫副部长指导下,中心与国际卫生组织和国际异种移植协会合作,制定了国际异种移植规范(长沙标准)。目前,中心拥有教授、副教授20余人,医、护、技工作人员近百人,已形成了合理的可持续发展的学术梯队,在职基础与应用研究人员均具有博士、博士后学位。中心于2008年经卫生部再次组织相关专家鉴定通过验收,卫生部移植医学工程技术研究中心正式落户于中南大学湘雅三医院。

Figure 3 Snapshot of the Third Xiangya Hospital of Central South University website

#### IV. The hospital is suspected of being a national organ allocation center, and it is highly probable that it has been an organ allocation center in Hunan Province.

On September 24, 2003, the Public Health Newspaper<sup>88</sup>, a subsidiary of the Hunan Daily Press Group, reported that Huang Jiefu had delivered a speech at the Third Xiangya Hospital to build an organ allocation network, which involved the centralized detention of living donors and the building of the allocation center: "Hunan Transplantation Medicine Engineering Technology Research Center was established on September 18. Provincial, regional, and national management networks will gradually form, playing the role of information sharing and rational utilization and allocation of resources. Moreover, the increase in the number of (organ transplant) surgeries will improve the technical development of the entire transplant medicine community. More importantly, organ transplants based on a regulated donor market have largely saved medical costs for patients. Eliminating the need to transport donors back and forth would cut the surgery cost in half, and the transplant quality would be greatly improved due to shorter wait times for organs. "

## 追查迫害法轮功国际组织 (追查国际)

### World Organization to Investigate the Persecution of Falun Gong (WOIPFG)

To investigate the criminal conduct of all institutions, organizations, and individuals involved in the persecution of Falun Gong; to bring such investigation, no matter how long it takes, no matter how far and deep we have to search, to full closure; to exercise fundamental principles of humanity; and to restore and uphold justice in society

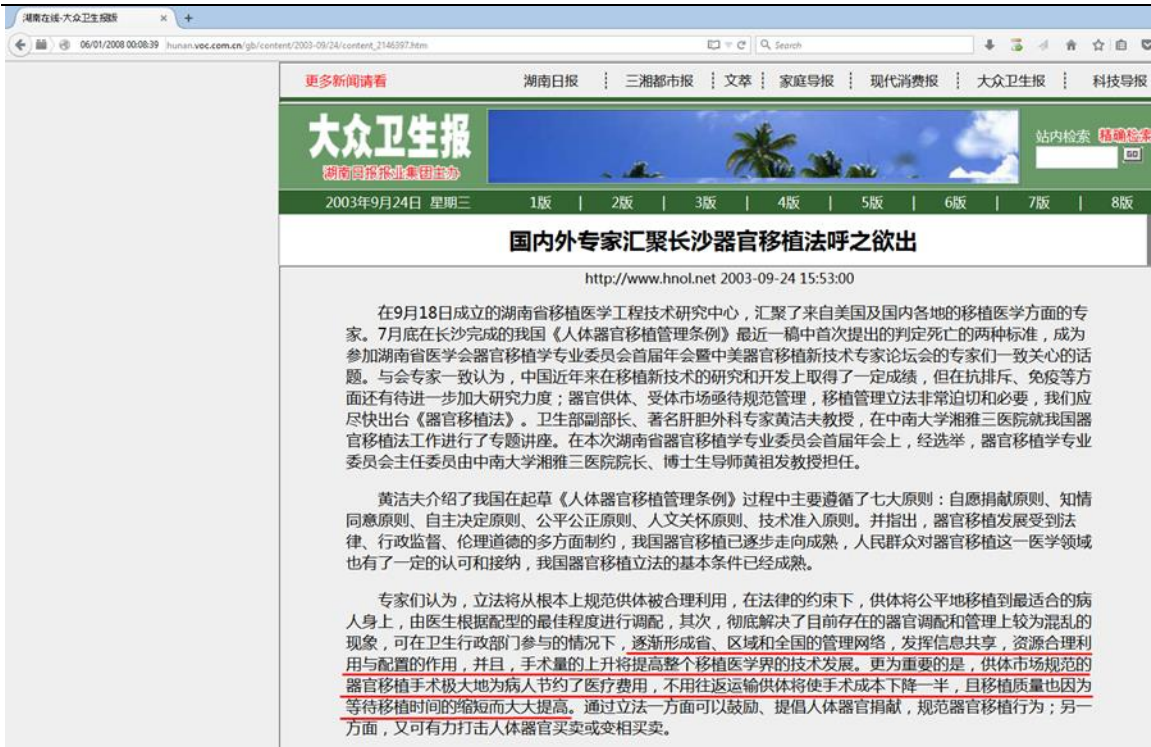

Figure 4 Snapshot of the Public Health Newspaper website in September 2004

Based on the analysis, the Ministry of Health, the military, and the police system have cooperated in setting up multiple living organ donor banks across China, detaining a large number of Falun Gong practitioners, and providing organs for transplants to hospitals nationwide. But how can these organ banks be coordinated to reduce confusion, prevent information leaks, and make them more effective? This series of issues needed to be solved urgently in 2003, the peak of the national transplantation. So, it was not a simple matter for Huang Jiefu, Vice Minister of Health, to come forward to talk about building an organ allocation network at the Third Xiangya Hospital in September 2003.

Huang Jiefu said: "Provincial, regional, and national management networks will gradually form, playing the role of information sharing and rational utilization and allocation of resources..." It is quite possible for them to place the project of the Ministry of Health in the Third Xiangya Hospital and establish a national organ allocation center. "Eliminating the need to transport donors back and forth would cut the surgery cost in half." It reflects the operation mode of unified deployment and allocation of organs nearby.

## V. Telephone investigation

1. The use of Falun Gong practitioners' organs was not denied. Donors are abundant, and the wait time for liver source is two weeks.

Investigation Subject: Ye Qifa, Vice President of the Third Xiangya Hospital of Central South University

Investigation Time: November 6, 2018 (+86-13875987051)

(Recording 1. Play or download [MP3](#). For complete transcript, please see [pdf 18](#).)

Ye Qifa: After successful matching, transplant surgery can be performed within about a month.

Investigator: Your donors are Falun Gong (practitioners), donors in normal conditions, right?

Ye Qifa: You just send me his medical record first, alright?

Personal Profile: Ye Qifa is the Director of the Transplantation Medicine Engineering Technology Research Center of the Ministry of Health. He is also a member of the Standing Committee of the Organ Transplantation Branch of the Chinese Society of Surgery, the Deputy Director of the Organ Transplantation

To investigate the criminal conduct of all institutions, organizations, and individuals involved in the persecution of Falun Gong; to bring such investigation, no matter how long it takes, no matter how far and deep we have to search, to full closure; to exercise fundamental principles of humanity; and to restore and uphold justice in society

Branch of the Hunan Medical Association, the Deputy Director of the Hunan Society of Liver Diseases, the Director of the Hunan Organ Transplant Quality Control Center, as well as the Deputy Director of the Hunan Organ Transplantation Technology Clinical Application Committee.<sup>89</sup>

Investigation Subject: Ye Qifa, Vice President of the Third Xiangya Hospital of Central South University

Investigation Time: March 4, 2016 (+86-13875987051)

Summary:

1. It cannot be regarded as a big center if one or two hundred cases cannot be done per year.

2. We haven't done many. Now we only do about 200 cases a year.

(Recording: 2. Download [MP3](#). Transcript download: [pdf 2](#))

Investigation Subject: Dr. Liu, the Third Xiangya Hospital of Central South University

Investigation Time: April 5, 2016 (+86-13975195016)

Summary: Generally speaking, a patient can get a liver source in two weeks. **The ones that we used in the past. It's all those things.** They're not allowed to be used now.... I can't tell you about this on the phone.... You'd better come here to consult.... This can't be explained clearly on the phone.

**It's mainly that we don't have patients. Liver sources are still abundant.** If a patient's condition can be maintained, usually, **he/she can obtain a liver in two weeks.** The livers we deal with have been allocated to other organ transplant centers through the national network. Our livers, the livers we deal with, will be allocated to them.

(Recording: 3. Download [MP3](#). Transcript download: [pdf 30](#))<sup>90</sup>

### 2.The number of organ transplants is enormous.

Investigation Subject: Dr. Liu, liver transplant ward of the Third Xiangya Hospital of Central South University<sup>91</sup>

Investigation Time: April 17, 2017 (+86-73188618236)

Investigation Summary: We did more than 200 kidney transplants last year. Liver transplants were slightly less than kidney transplants, and we also did 80 to 90 cases.

(Download Recording 4 [MP3](#).For complete transcript, please see [Addendum 62](#))

Investigation Subject: a surgeon in the Organ Transplant Department of the Third Xiangya Hospital of Central South University

Investigation Time: November 18, 2017 (+86-73188618835)

Investigation Summary: **We've been doing liver transplants in our hospital, and we've done a lot!**

Regarding the number of transplants, you'd better ask our leaders. We have two directors, and you can ask either of them<sup>92</sup>.

(Download Recording 5 [MP3](#).For complete transcript, please see [pdf](#))

Investigation Subject: Dr. Yi, a liver transplant surgeon in the Third Xiangya Hospital of Central South University

Investigation Time: February 8, 2018 (+86-73188618235)

Investigation Summary: Two to three hundred kidney transplants were done last year, and **there were quite a few liver transplants.**<sup>93</sup>

(Download Recording 6 [MP3](#).For complete transcript, please see [pdf](#))

Investigation Subject: a liver transplant surgeon in the Third Xiangya Hospital of Central South University<sup>94</sup>

Investigation Time: March 11, 2019 (+86-73188618235)

Summary:

Q: The wait time is generally okay, right? Is it fast? Since you do a lot here!

A: Yes, yes. We've been doing both liver transplants and kidney transplants.

Q: So, you do two to three hundred liver transplants, and two to three hundred kidney transplants as well, right?

A: Yes, yes, yes.

(Recording 7 Download [MP3](#). Transcript download: [pdf 016](#))

### **VI. Medical papers show that the quality of donor organs far exceeds that of executed prisoners, suggesting that there are other sources of healthy donors.**

According to the statistics of *Family Health Newspaper*, a subsidiary of Heilongjiang Daily Press Group, in 2003, the number of "organ donations from citizens after death" in China was still zero. By 2006, family members of twenty-two deceased agreed to donate their relatives' organs. As of November 20, 2008, the number of donors finally reached a hundred and four<sup>95</sup>. On March 7, 2012, an article on qq.com quoted Huang Jiefu, "Organ shortage is the bottleneck for the development of our country's organ transplantation industry. Due to the lack of voluntary donations from citizens, organs from executed prisoners have become the main source of organ transplants."<sup>96</sup> Huang Jiefu said in an interview with CCTV in July 2018 that the quality of the organs of executed prisoners is poor. The requirements for organ sources are very strict, and such organs cannot be obtained on the execution ground<sup>97</sup>. Medical papers show that the quality of donor organs far exceeds that of executed prisoners, indicating that there are other sources of healthy donors. And Falun Gong practitioners are most likely the major source of healthy organs.

Table 1 Examples of the quality of donor organs reported in medical papers:

March 2002 to December 2005	107 cases of liver transplants and liver excisions were performed. Livers were all harvested by in situ hypothermic perfusion whole organ resection. <b>107 donors were in good health<sup>98</sup>.</b>
January 2004 to June 2008	91 cases of orthotopic liver transplants and liver excisions were performed, including <b>80 males and 11 females aged 19-55 years, with an average of 29 years old. The preoperative liver and kidney function and virological tests were normal. Multi-organ combined rapid excision was executed<sup>99</sup>.</b>
January 2004 to July 2006	64 liver excisions were performed. <b>The donors were cadavers with no heartbeat, aged 19-55 years (average 32.5). Preoperative examination showed normal liver and kidney function, no fatty liver, no positive hepatitis C antibody or human immunodeficiency virus (HIV) antibody<sup>100</sup>.</b>

### **VII. List of Responsible Persons:**

**ZNDX-XY001 Ye Qifa**, male. Date of birth: December 5, 1954. Birthplace: Gucheng, Hubei.

#### **Personal Profile:**

Ye Qifa served as the Vice President of the Third Xiangya Hospital for more than ten years. He's currently the Director of the Transplantation Medicine Engineering Technology Research Center of the Ministry of Health located in the Third Xiangya Hospital of Central South University. He's also the Director of the Hepatobiliary Surgery Department and the Transplant Surgery Department of Zhongnan Hospital of Wuhan University. Ye Qifa is an expert who

### World Organization to Investigate the Persecution of Falun Gong (WOIPFG)

To investigate the criminal conduct of all institutions, organizations, and individuals involved in the persecution of Falun Gong; to bring such investigation, no matter how long it takes, no matter how far and deep we have to search, to full closure; to exercise fundamental principles of humanity; and to restore and uphold justice in society

enjoys special allowances from the State Council. He is also the Executive Chairman of the China OPO Alliance, the Vice President of Organ Transplantation Surgeon Branch of the Chinese Medical Doctor Association, a member of the Standing Committee of the Chinese Medical Association Organ Transplantation Branch, the Secretary-general of the Liver Transplantation Group of the Chinese Medical Association Organ Transplantation Branch, and a member of the Standing Committee of the Pharmacogenomics Professional Committee of the Chinese Pharmacological Society, etc.<sup>101</sup>

From 1989 to 1994, he studied abdominal surgery and transplantation at Heidelberg University, the University of Bonn, and the University of Rostock in Germany. In 1992, he obtained a doctorate in transplantation from Heidelberg University, Germany.<sup>102</sup>

In 2019, Ye Qifa claimed on his personal website that he had done more than 1,000 liver transplants and over 2,000 kidney transplants.<sup>103</sup>

#### ZNDX-XY002 Huang Zufa, male.

**Personal Profile:** Professor of transplantation, chief surgeon, Honorary President of Xiangya Institute of Transplantation Medicine of Central South University, Director of Hunan Transplantation Medicine Center.

He graduated from the Medical Department of the Fourth Military Medical University in September 1977. From 1979 to 1994, he worked in the Second Xiangya Hospital of Central South University, and was later transferred to the Third Xiangya Hospital of Central South University.

From 1989 to 1994, he studied abdominal surgery and transplantation at Heidelberg University, the University of Bonn, and the University of Rostock in Germany. In 1992, he obtained a doctorate in transplantation from Heidelberg University, Germany<sup>104</sup>. In 2001, he led the establishment of the Xiangya Institute of Transplantation Medicine of Central South University<sup>105</sup>.

He specializes in liver and kidney transplantation. He has successfully presided over and participated in twenty liver transplants and more than a hundred kidney transplants. He mainly focuses on the basic and clinical research of transplantation medicine<sup>106</sup>.

#### ZNDX-XY003 Ming Yingzi, female.

**Personal Profile:** Professor of transplantation, chief surgeon, Deputy Director of the Thirty-sixth Ward of the Third Xiangya Hospital of Central South University, member and secretary of the Hunan Provincial Organ Transplantation Professional Committee, member and secretary of the Hunan Provincial Organ Transplantation Quality Control Center, and expert of the Hunan Provincial Committee for Clinical Application of Human Organ Transplantation Technology

She graduated from the English-German bilingual Department of Clinical Medicine of Wuhan Tongji Medical University in 1994 and the Wuhan Tongji Organ Transplantation Institute in 2004 with a doctorate. She is proficient in English and German and has studied in Germany for above two years. In 2001, as one of the introduced talents, she followed her supervisor Professor Ye Qifa to the Third Xiangya Hospital of Central South University to carry out organ transplantation work.

She has been engaged in clinical medical treatment, teaching, and scientific research on organ transplantation for a long time. She has participated in and independently performed more than 500 kidney transplants (including living relative kidney transplants) and nearly 200 liver transplants<sup>107</sup>.

#### ZNDX-XY004 Cheng Ke, male.

## 追查迫害法輪功國際組織 ( 追查國際 )

### World Organization to Investigate the Persecution of Falun Gong (WOIPFG)

To investigate the criminal conduct of all institutions, organizations, and individuals involved in the persecution of Falun Gong; to bring such investigation, no matter how long it takes, no matter how far and deep we have to search, to full closure; to exercise fundamental principles of humanity; and to restore and uphold justice in society

**Personal Profile:** Associate professor of transplantation, associate chief surgeon, master student supervisor, academic leader of kidney transplantation in the Engineering Center. He entered Hunan Medical University for a seven-year program in clinical medicine in 1989 and obtained a master's degree upon graduation. Since July 1996, he has been engaged in clinical work in the General Surgery Department of the Third Xiangya Hospital. In 1999, he was certified as an attending surgeon. He has high attainments in the fields of hepatobiliary surgery and laparoscopic surgery. As a technical backbone, he participated in the establishment of the Organ Transplant Center of the Third Xiangya Hospital in 2000.

He specializes in organ transplants. He participated in and independently performed more than 400 kidney transplants (including more than thirty living relative kidney transplants) and nearly 100 liver transplants. With rich clinical experience in organ transplants, he is one of the main leaders in kidney transplantation in the Organ Transplant Center, especially in living relative kidney transplantation and organ transplantation follow-up. He completes more than 1,000 organ transplant follow-up visits every year<sup>108</sup>.

**ZNDX-XY005 Zhao Yujun, male.**

**Personal Profile:** Associate chief surgeon of transplantation

Since 2001, he has been engaged in clinical and basic work in organ transplantation. In clinical medicine, as a young and middle-aged backbone of Xiangya Institute of Transplantation Medicine of Central South University, he has participated in or independently completed more than 400 kidney transplants (including more than 200 living relative kidney transplants) and more than fifty liver transplants. He independently performed more than fifty cases of joint excision of multiple organs from cadavers. He completes more than 1,000 organ transplant follow-up visits every year<sup>109</sup>.

Live transplant, kidney transplant, heart transplant, etc.

**ZNDX-XY006 She Xingguo, male.**

**Personal Profile:** Attending surgeon of transplantation

Specialties: Liver transplant, kidney transplant<sup>110</sup>.

**ZNDX-XY007 Niu Ying, male.**

**Personal Profile:** Attending surgeon of transplantation, Medical Ph.D.

He is proficient in the surgical procedures of liver, kidney, and other large organ transplantation. He can deal with various common complications of liver and kidney transplant patients before and after surgery and is competent in the follow-up of transplant patients<sup>111</sup>.

Liver, kidney and other large organ transplantation.

**ZNDX-XY008 Ren Zuhai, male.**

### World Organization to Investigate the Persecution of Falun Gong (WOIPFG)

To investigate the criminal conduct of all institutions, organizations, and individuals involved in the persecution of Falun Gong; to bring such investigation, no matter how long it takes, no matter how far and deep we have to search, to full closure; to exercise fundamental principles of humanity; and to restore and uphold justice in society

**Personal Profile:** Associate chief surgeon of the Third Department of General Surgery, associate professor

After graduating from Wuhan University School of Medicine in 1987, he worked in Shanghai Jiaotong University Affiliated Hospital and the Department of General Surgery of Wuhan Tongji Hospital. In 1998, he went to the Ulm University Hospital in Germany for government-sponsored overseas education, where he specialized in laparoscopic and gastrointestinal surgery under the guidance of the famous surgical expert Professor REisele. In 2003, he was hired as an honorary clinician by Queen Mary Hospital of the University of Hong Kong. He was engaged in the clinical work of hepatopancreatobiliary surgery and liver transplantation under the guidance of Academician STFan, a world-renowned master of hepatopancreatobiliary surgery and the father of Hong Kong liver transplantation<sup>112</sup>.

#### ZNDX-XY009 Wu Kun, male.

**Personal Profile:** Professor of nephrology, chief surgeon, Director of Blood Purification Center

He's a German Medical Ph.D. and postdoctoral fellow, engaged in nephrology, dialysis, and kidney transplantation clinical and scientific research and teaching for twenty-eight years.

He had been to the Nephrology Center of Essen University Hospital in Germany to study kidney disease, kidney dialysis, and kidney transplantation for four years<sup>113</sup>.

He specializes in kidney transplant-related issues. He participated in and presided over more than one hundred kidney harvesting, repairing, and transplants.<sup>114</sup>

#### ZNDX-XY010 Liu Lian, male.

**Personal Profile:** Attending surgeon of transplantation

He specializes in chronic allograft nephropathy and kidney transplants<sup>115</sup>.

#### ZNDX-XY011 Ye Shaojun, male.

**Personal Profile:** Attending surgeon of transplantation, lecturer

He is good at perioperative management of liver and kidney transplantation and postoperative follow-up and rehabilitation<sup>116</sup>.

#### ZNDX-XY012 Liu Bin, male.

**Personal Profile:** Attending surgeon of urology, lecturer

He graduated from Xiangya School of Medicine and has been engaged in clinical work in urology for more than ten years.

He specializes in kidney transplants<sup>117</sup>.

#### ZNDX-XY013 Liu Jianxin, male.

**Personal Profile:** Director of Cardiothoracic Surgery Department, chief surgeon, professor

### World Organization to Investigate the Persecution of Falun Gong (WOIPFG)

To investigate the criminal conduct of all institutions, organizations, and individuals involved in the persecution of Falun Gong; to bring such investigation, no matter how long it takes, no matter how far and deep we have to search, to full closure; to exercise fundamental principles of humanity; and to restore and uphold justice in society

He worked in general thoracic surgery at Hunan Tuberculosis Hospital in 1982 and in pediatric cardiothoracic surgery at Hunan Children's Hospital in 1987. He has studied in the Cardiothoracic Surgery Department of the Second Xiangya Hospital and the Thoracic Surgery Department of Shanghai Pulmonary Hospital.

He has also been to the International Heart Institute of Montana in the USA for further study. He has attainments in clinical research of heart and lung transplantation<sup>118</sup>.

#### ZNDX-XY014 Wang Dianjun, male.

**Personal Profile:** Deputy Director of Cardiothoracic Surgery Department, associate chief surgeon, associate professor

He has been engaged in surgical clinical teaching and scientific research for twenty-one years. He has been in Beijing Fuwai Cardiovascular Hospital of the Chinese Academy of Medical Sciences for half a year for advanced study and research.

He has attainments in clinical research in heart and lung transplantation surgery and comprehensive therapy. His main research direction is heart and lung transplantation<sup>119</sup>.

#### ZNDX-XY015 Zhao Yongxiang, male.

**Personal Profile:** Professor of cardiothoracic surgery, professor of transplantation, chief surgeon, postdoctoral fellow, master student supervisor, current leader of heart and lung transplantation of the Institute of Transplantation Medicine, Director of the Experimental Center of Transplantation Medicine, expert of cardiothoracic surgery and transplantation medicine.

After studying in the US for three years, he became a postdoctoral fellow at Harvard University and the University of Pittsburgh. He received the Humboldt-AvH and DAAD scholarships in Germany. He studied at the University of Regensburg in Germany and the University of Cambridge in the United Kingdom for one year.

He has been engaged in clinical cardiothoracic surgery and transplant medicine for more than sixteen years. He specializes in heart and lung transplantation<sup>120</sup>.

#### ZNDX-XY016 Ouyang Wen, male.

**Personal Profile:** Chief surgeon of the Department of Anesthesiology, professor of anesthesiology, Medical Ph.D., master student supervisor, member of the Chinese Association of Anesthesiologists

After graduating from the Medical Department of Hunan Medical University in 1990, he worked in the Department of Anesthesiology of Xiangya Hospital from July 1990 to January 1996 and received standardized residency training.

He obtained a master's degree in anesthesiology in 1995 and a doctorate in anesthesiology in 2006. Since February 1996, he has worked in the Department of Anesthesiology of the Third Xiangya Hospital of Central South University. In September 2007, he became the chief surgeon of the Department of Anesthesiology.

In December 2003, he served as the Director of the Department of Anesthesiology. Since then, he has been fully responsible for the medical treatment, teaching, research, and management of the Department of Anesthesiology.

### World Organization to Investigate the Persecution of Falun Gong (WOIPFG)

To investigate the criminal conduct of all institutions, organizations, and individuals involved in the persecution of Falun Gong; to bring such investigation, no matter how long it takes, no matter how far and deep we have to search, to full closure; to exercise fundamental principles of humanity; and to restore and uphold justice in society

From February to April 2005, he visited the Department of Anesthesiology of New York University Medical Center for further study.

His main focus is the basic and clinical research of anesthesia for organ transplantation<sup>121</sup>.

**ZNDX-XY017 Pan Yuling**, male. Date of Birth: January 16, 1963.

**Personal Profile:** Associate chief surgeon of the Department of Anesthesiology, associate professor

After graduating from Hunan Medical College in 1986, he has been engaged in clinical anesthesia for twenty-one years and has extensive clinical and teaching experience. From 2003 to 2005, he served as the Deputy Director of both the Department of Anesthesiology and the ICU of the Institute of Transplantation Medicine of the Third Xiangya Hospital of Central South University. From 2005 to 2007, he joined the foreign aid medical expert team organized by the Ministry of Health and the Hunan Provincial Department of Health and went to Zimbabwe to carry out medical and health foreign aid work.

He specializes in anesthesia for organ transplant surgeries. He has performed anesthesia for more than a hundred liver transplants, hundreds of cadaveric kidney transplants, and more than a hundred parental kidney transplants<sup>122</sup>.

**ZNDX-XY018 Zhou Zhiming**, male.

**Personal Profile:** Associate chief surgeon of the Department of Anesthesiology, associate professor

He graduated from Peking University Health Science Center (six-year system) in July 1992. From September 1992 to January 1994, he worked in the Department of Anesthesiology of the Second Xiangya Hospital of Central South University and received standardized residency training. Since February 1994, he has worked in the Department of Anesthesiology of the Third Xiangya Hospital of Central South University.

He participated in the anesthesia and treatment of most major surgeries in the hospital, such as combined thymus-pancreas transplants, kidney transplants, liver transplants, heart transplants, etc.<sup>123</sup>

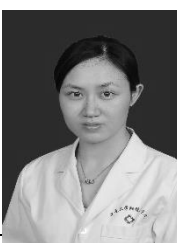

**ZNDX-XY019 Deng Zhihong**, male.

**Personal Profile:** Chief surgeon of ophthalmology, professor

He specializes in penetrating/lamellar keratoplasty for the treatment of various severe corneal diseases.<sup>124</sup>

**ZNDX-XY020 Cao Yanna**, female.

**Personal Profile:** Attending surgeon of ophthalmology

She has studied corneal transplantation, corneal tissue bioengineering and eye bank establishment at the Eye Institute of Xiamen University and Xiamen Eye Center.<sup>125</sup>

## WOIPFG's Investigative Report on the Alleged Organ Harvesting of Living Falun Gong Practitioners at Zhongshan Hospital, Fudan University and Its Staff Members Suspected of Participation

Hospital: Zhongshan Hospital of Fudan University  
Address: 180 Fenglin Road / 1609 Xietu Road, Shanghai, China

The hospital has a large number of transplants in an striking growth rate. It always has sufficient organ donors, short waiting times, and transplants as usual during pandemic. A transplant doctor openly admitted that the source of organs was from Falun Gong practitioners. Dr. Tan Yunshan, the Director of the liver pathology department, admitted that Jiang Zemin ordered the live harvesting of organs from Falun Gong practitioners for transplantation.

During the investigation by WOIPFG, a doctor at the Liver Transplant Center in Fudan University's Zhongshan Hospital was asked "whether you have the kind of [organs] from those who practice Falun Gong." The answer was: "What we have here are all of this kind."<sup>126</sup>

### I. Hospital Overview

Zhongshan Hospital of Fudan University is a third level first class general hospital. On May 23, 2007, this hospital was appointed by the Ministry of Health to perform liver, kidney and heart transplant surgeries.<sup>127</sup> It was the only hospital in Shanghai to obtain certification for heart, liver and kidney transplants all at once. Its Organ Transplant Center was established on October 30, 2001.<sup>128</sup>

### II. High volume and rapid growth-rate of transplant surgeries at the hospital

Until Sep. 22, 2007, media and hospitals made the following statements:

1. The online media *Sina.com* reported in December 2003: The total number of organ transplants at Fudan University's Organ Transplant Center has exceeded 100 cases per year, with an annual growth rate of 50 percent. On December 8, 2003, it cooperated with the world's largest organ-transplant institute and co-founded the "Fudan University Zhongshan Hospital—US Pittsburg University Thomas E. Starzl Collaborating Transplant Research Center", claiming "looking forward to reaching new milestones in the area of organ transplantation."<sup>129</sup>

To investigate the criminal conduct of all institutions, organizations, and individuals involved in the persecution of Falun Gong; to bring such investigation, no matter how long it takes, no matter how far and deep we have to search, to full closure; to exercise fundamental principles of humanity; and to restore and uphold justice in society

2. In August 2006 (article submitted on February 10), Qin Xinyu, Fudan University Zhongshan Hospital's CCP secretary, vice president, and director of general surgery, published an article on *Chinese Hospitals*, stating that at the time, major organ transplant operations on heart, lung, liver and kidney had reached about 400 cases.<sup>130</sup>

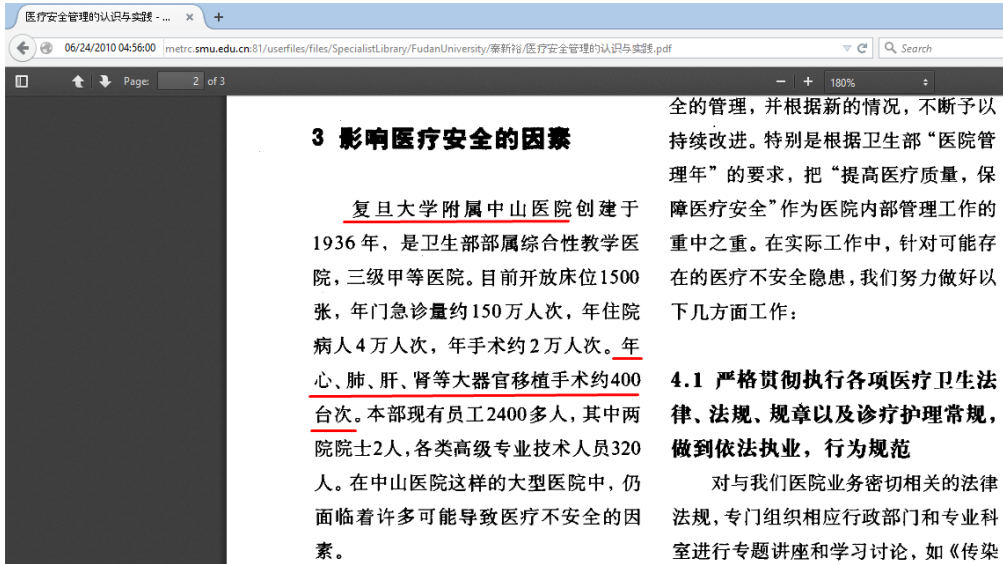

Figure 2 Snapshot of "China Hospitals" article in August 2006

3. An online archiving website (www.archive.org) disclosed that as early as 2005, the following statements appeared on the hospital's official website: "Zhongshan Hospital has completed a grand total of nearly 1,000 cases of kidney transplants, more than 200 cases of liver transplants, 107 cases of heart transplants, 6 cases of combined heart and lung transplants, and 11 cases of combined liver and kidney transplants. The number of organ transplants is rapidly increasing every year."<sup>131</sup>

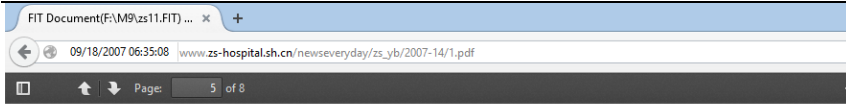

4. On Sep. 22, 2007, the following statement appeared in the special edition of the *Zhongshan Hospital Newspaper* celebrating Fudan University Zhongshan Hospital's 70-year anniversary<sup>132</sup>: "Currently, the hospital has completed a grand total of more than 2,000 cases of kidney transplants, more than 570 cases of liver transplants (11 cases of living-donor liver transplants), over 200 cases of heart transplants, 9 cases of combined heart and lung transplants and 13 cases of combined liver and kidney transplants. The number of organ transplants at the hospital is increasing rapidly every year. This will enable more and more patients with end-stage kidney, liver, heart and lung diseases to have a new lease on life."

## 器官移植 科技先锋

中山医院是全国最早开展器官移植的单位之一。设立于医院的复旦大学器官移植中心成立于2001年10月,是国内较早开展心脏、肝脏、肾脏移植单位之一,能够完全依靠本院技术力量,在多科协作下从事肾脏、肝脏、心脏等重要脏器移植和多器官联合移植。目前,中山医院成为全国首批获准开展器官移植项目的医院,且为上海市唯一同时获得心脏、肝脏和肾脏三项移植许可的医院。

均为全国首位,综合水平达国际先进水平。目前医院已累计完成肾脏移植2000多例,肝脏移植570多例(活体肝移植11例),心脏移植200多例,9例心肺联合移植和13例肝肾联合移植。医院器官移植的数量每年都在快速增加,这将使愈来愈多的终末期肾脏、肝脏、心脏和肺脏疾病的患者获得新生。

中山医院在器官移植历史上创造了亚洲、国内和上海市器官移植领域的多项第一。

Figure 3 Snapshot of the article in Zhongshan Hospital News in September 2007

It should be said that the above reports are mutually corroborating, and the development trend is consistent.

### III. The transplant center has a strong transplant surgeons' team and the huge transplant volume

1. The Zhongshan Hospital of Fudan University had a strong transplantation team. According to the surgeons list released in 2014 by WOIPFG<sup>133</sup>, there were 27 physicians in Kidney Transplantation Department, including 6 chief physicians or professors, 5 associate chief physicians or associate professors. As for Liver Transplantation Department, there were 10 chief physicians or professors, 9 associate chief physicians or associate professors. As for the Cardiac Surgery Department, there were 3 chief physicians or professors.

2. The number of transplants performed by individual doctors in the liver transplantation team reflects the huge practical number of transplants performed by the hospital.

Fan Jia is deputy director of Fudan University's Organ Transplant Center, a professor, and chief physician.<sup>134</sup> On April 16, 2001, Fan Jia finished his first liver-transplant surgery.<sup>135</sup> By December 2006, he had completed a total of more than 500 cases of liver transplants.<sup>136</sup> By 2012, he had completed over 1100 liver transplants.<sup>137</sup> Fan Jia, as the current president of Zhongshan Hospital, "He worked 80+ hours per week, and completed 100+ cases of liver transplant per year".<sup>138</sup>

[http://www.zs-hospital.sh.cn/newseveryday/zs\\_yb/315/315\\_06\\_01.htm](http://www.zs-hospital.sh.cn/newseveryday/zs_yb/315/315_06_01.htm) Screengrab

将病人的生命、党的事业、

国家的荣誉视为己任

一位来自青岛的患者在给时任上海市委书记俞正声的信里写到:“中山医院的好医生视病人如亲人,热情关怀,用心服务,坚持领导和群众一个样,外地的与本地的一个样,生人与熟人一个样,城市的与农村的一个样。”

这位病人眼中的“好医生”就是全国十大“我最喜爱的健康卫士”、全国先进工作者、本院副院长、肝肿瘤外科主任樊嘉教授,一个全心全意为病人服务的好医生,一个创造了无数生命奇迹的白衣天使,一名赤诚的共产党员。

作为一名有着20多年党龄的老党员,樊嘉教授把对党的忠诚和热爱投入到为人民健康保驾护航的医疗事业中。他爱岗敬业,医德高尚,在医疗、教学、科研等多个领域,都充分发挥了一名优秀共产党员的先锋模范作用。

他每周工作80多个小时,每年完成疑难肝肿瘤手术600余例,其中肝移植100余例,目前,累计完成各种疑难肝癌手术7000多例,肝移植手术1100多例。为了创新技术、实施肝移植、抢救病人,他日夜奋战,基本没有节假日。

他在国际上首创了肝癌门静脉癌栓的多模式综合治疗技术,完成了亚洲首例肝心联合移植、中国首例经典劈裂式肝移植、上海首例活体供肝移植,以及国内年龄最小及国际年龄最大受体肝移植、肝肾联合移植术等,技术难度及疗效均达国内外领先水平。在对肝癌肝移植进行了系统研究后,率先制定适合我国国情的肝癌肝移植适应证——“上海复旦标准”,获得广泛认同。

病人把生命交给我,

## 追查迫害法輪功國際組織 ( 追查國際 )

### World Organization to Investigate the Persecution of Falun Gong (WOIPFG)

To investigate the criminal conduct of all institutions, organizations, and individuals involved in the persecution of Falun Gong; to bring such investigation, no matter how long it takes, no matter how far and deep we have to search, to full closure; to exercise fundamental principles of humanity; and to restore and uphold justice in society

The figure above is only the number of transplants completed by one doctor. From the above team analysis, the hospital has at least 10 chief physicians, 9 associate chief physicians, and Fan Jia himself, as the president of Zhongshan Hospital of Fudan University, must have many management and administrative matters to deal with, it is impossible for him to be the person who does the greatest number of surgeries. How about other doctors who can perform surgery? Let us see a few examples below.

Zhou Jian, the chief physician and professor of Organ Transplantation Center of Zhongshan Hospital of Fudan University. As of June 2022, nearly 3,000 liver transplants have been completed.<sup>139</sup>

Huang Xiaowu, the chief physician of liver tumor surgery, Zhongshan Hospital of Fudan University, participated in nearly a thousand cases of liver transplants, and served as the group leader of liver transplant ward.<sup>140</sup>

Qiu Shuangjian, the deputy director, chief physician and professor of liver tumor surgery, Zhongshan Hospital of Fudan University, served as a principal member of the liver transplant team, has participated in the majority of liver transplants in Zhongshan Hospital, being the surgeon in 500 cases.<sup>141</sup>

Huang Cheng, the associate chief physician and associate professor of liver tumor surgery, Zhongshan Hospital of Fudan University, has already participated in more than 500 cases of liver transplantation since 2002.<sup>142</sup>

Shi Yinghong, the associate chief physician and associate professor of liver tumor surgery, Zhongshan Hospital of Fudan University, was involved in more than 400 cases of liver transplantation.<sup>143</sup>

### **3. The number of kidney transplantation per year is much higher than that of liver transplantation**

The above report shows that the hospital has done many liver transplants, and the following one shows that the hospital's annual transplant volume of kidney transplants is even higher.

a) According to published reports, the number of kidney transplants in this hospital is 4 to 5 times that of liver transplants.

In 2005, the hospital official website stated "Zhongshan Hospital has accumulated nearly a thousand cases of kidney transplant, and over 200 cases of liver transplant. The number of organ transplants are increasing rapidly every year."<sup>144</sup> The number of publicly reported kidney transplants is five times that of liver transplants.

On September 22, 2007, *Zhongshan Hospital Journal*, the hospital newspaper's special edition for the 70th Anniversary<sup>145</sup>, mentioned "At present, the hospital has completed more than 2000 cases of kidney transplants in total, and over 570 cases of liver transplants. And the number of organ transplants is increasing every year." The number of publicly reported kidney transplants is nearly four times that of liver transplants.

b) The Hospital has strong kidney transplantation team.

There are 27 kidney transplant doctors, 6 senior titles (chief physician or professor), and 5 associate chief physicians, which can form multiple kidney transplant teams.

### **4. Hospital organ donor has been sufficient all the time**

The hospital's official website claimed: "In recent years, due to the shortage of donors, the number of organ transplants in the country has generally decreased. However, the kidney transplant at Zhongshan Hospital is a standout<sup>146</sup>. The number of kidney transplants has been increasing year by year."

## **IV. Telephone Investigation**

## 追查迫害法輪功國際組織 ( 追查國際 )

### World Organization to Investigate the Persecution of Falun Gong (WOIPFG)

To investigate the criminal conduct of all institutions, organizations, and individuals involved in the persecution of Falun Gong; to bring such investigation, no matter how long it takes, no matter how far and deep we have to search, to full closure; to exercise fundamental principles of humanity; and to restore and uphold justice in society

**Summary: The transplant doctor directly admits that the source of the organs is Falun Gong practitioners, the wait time is short, and the transplantation is as usual during the epidemic.**

#### 1. The transplant doctor openly admits that the source of the organ is from Falun Gong practitioners

**Investigation Subject:** A Doctor from Zhongshan Hospital of Fudan University, Shanghai<sup>147</sup>

**Investigation time:** March 16, 2006. Phone Number: 011862164041990

Investigation phone record:

Investigator: Hello. Is this the Zhongshan Hospital?

Nurse: Yes, transplant ward.

**Investigator:** Is this the Liver Transplant Center?

Nurse: Yes. How may I help you?

**Investigator:** I want to have a consultation.

Nurse: Please wait.

**Doctor:** Hello! Hello!

**Investigator:** Are you a doctor? Can you do transplant surgery?

**Doctor:** Yes, I can.

**Investigator:** How long do I have to wait?

**Doctor:** About a week after you come.

**Investigator:** Are there any organs from Falun Gong practitioners? I heard that this kind is generally very good.

**Doctor:** What we have here is all this type.

**Investigator:** Oh, the healthy ones are all come from Falun Gong practitioners and they are fresh, usually within how many hours?

**Doctor:** It should be OK within 24 hours, but we generally control it within 10 hours.

**Investigator:** Could you tell me whom should I contact with about it?

**Doctor:** You should contact the court department.

**Investigator:** Do you get them from other area or locally?

**Doctor:** We have both.

**Investigator:** So you have both out of town and local supplies?

**Doctor:** Yes.

(Recording 1. Download: [MP3](#); Transcript Download: [pdf2](#))

**Investigation Subject:** Dr. Tan Yunshan, Director of Liver Pathology Department, Zhongshan Hospital, Fudan University, Shanghai

Investigation Date: February 8, 2015. Phone number: +86-13681972360

Summary of content:

Tan Yunshan: "All the livers that have been used in liver transplant operations performed now come from the 'source.' Of course, we know who the donors were, as to whether these donors were Falun Gong practitioners or not, that's not our concern. As long as the organs meet our standard, we don't care who the donors are."

Investigator: "Do you know that Bai Shuzhong, the former Minister of PLA General Logistics Department of Health has confessed that Jiang Zemin had ordered the organ harvesting from living Falun Gong practitioners for transplants? So is every hospital doing surgeries under that policy?"

Tan Yunshan: "Yes, that's right."<sup>148</sup>

(Recording 2. Download: [MP3](#); Transcript Download: [pdf 32](#))

## 追查迫害法輪功國際組織 ( 追查國際 )

### World Organization to Investigate the Persecution of Falun Gong (WOIPFG)

To investigate the criminal conduct of all institutions, organizations, and individuals involved in the persecution of Falun Gong; to bring such investigation, no matter how long it takes, no matter how far and deep we have to search, to full closure; to exercise fundamental principles of humanity; and to restore and uphold justice in society

Tan Yunshan also told the investigator: All our livers are taken from the original source! Why is that? Since we extract the organs ourselves, we can make sure to get all the original information of all donors. If we entrust someone else to do it, they won't be able to guarantee this, so we do ourselves to control this. Our hospital gets the vast majority of livers by ourselves.

(Recording 3. Download: [MP3](#); Transcript Download: [pdf 86](#))<sup>149</sup>

## 2. Short waiting time

Investigation Subject: Huang Xiaowu, liver transplant surgeon at Zhongshan Hospital<sup>150</sup>

Investigation Date: January 28, 2016. Phone number: +86-13701811021

Summary: We do a lot (**of organ transplants**). In the case of blood type B, it can be done after waiting for 1 to 2 months. We have performed a dozen (surgeries) this year.

(Download Audio 5 [MP3](#). Transcript Download: [pdf5](#))

## 3. Transplantation as usual during pandemic period

Investigation Subject: Nurse in the hepatic surgery ward of Zhongshan Hospital, Fudan University<sup>151</sup>

Investigation Date: April 2, 2020. Phone number: +86 21-64041990

Summary of content.

1. There are many hepatic surgery wards, and many of them can do liver transplantation.
2. Fan Jia is our Hospital President. (He also does liver transplant)
3. We are not affected by the epidemic. Transplant clinic is open.
4. You have no way to find a doctor (now), the doctors have gone to surgery.

(Audio 6 download: [MP3](#), manuscript download: [pdf025](#))

## V. The official website is not updated and the data has been tampered with.

**Since 2005, the webpage of the organ transplantation center stopped updating and revising the data, then deleted the whole webpage**

1. From 2005 until July 24, 2014, the webpage of the hospital introduction was not changed<sup>152</sup> with the same statement "Zhongshan Hospital has completed nearly 1,000 cases of kidney transplants and more than 200 cases of liver transplants. The number of organ transplants is increasing rapidly every year."<sup>153</sup>

2. In September 2007, *Zhongshan Hospital Journal*, the hospital newspaper's 70 Anniversary special issue, mentioned that kidney transplant had reached over 2,000 cases.<sup>154</sup> But in July 2014, it changed to "the number of kidney transplant in Zhongshan Hospital already exceed 1,000 cases now."<sup>155</sup> How could the kidney transplants decrease?

<http://transplantation.com.cn/About.Asp>, Not Found.

3. After July 2014, this hospital directly deleted the whole website of organ transplantation center. If you input <http://transplantation.com.cn/About.Asp> for search, it shows "Not Found."

## VI. The hospital is suspected of killing living people

According to the research paper titled as "Long-term results of 298 cases of orthotropic heart transplantations: a single center experience" which was published on Chinese J Transplant, May 2011, Vol 5

## 追查迫害法輪功國際組織 ( 追查國際 )

### World Organization to Investigate the Persecution of Falun Gong (WOIPFG)

To investigate the criminal conduct of all institutions, organizations, and individuals involved in the persecution of Falun Gong; to bring such investigation, no matter how long it takes, no matter how far and deep we have to search, to full closure; to exercise fundamental principles of humanity; and to restore and uphold justice in society

No 2. Pages 10-14 by Yang Shouguo etc. from Organ Transplantation Center of Fudan University, on Section 1.2 Donors' information and preservation of donors' hearts:

From May 2000 to April 2011, "there were 298 cases of orthotropic heart transplantations carried out. 291 donor hearts were from cadavers, 7 hearts were from brain-dead donors. Donors were aged 18 to 45-years-old. Average age is 26.8(±4.5). 283 were males and 15 females. **All "donors" had no obvious history of cardiovascular diseases or other major organ diseases.** The procuring methods of the hearts were the same as previously reported. Among these 298 cases, after 2007, 60 hearts were extracted when the donors had ventricular fibrillation or after the heart stopped beating, and the rest were extracted while the heart was still beating.<sup>156</sup>,

The authors indicated here that at least 231 healthy young people, while not brain dead and with their heart still beating, were put on hospital beds, and killed for their hearts.

On March 7, 2012, an article on qq.com quoted Huang Jiefu, "Organ shortage is the bottleneck for the development of our country's organ transplantation industry. Due to the lack of voluntary donations from citizens, organs from executed prisoners have become the main source of organ transplants.<sup>157</sup>" Huang Jiefu said in an interview with CCTV in July 2018 that the quality of the organs of executed prisoners is poor. The requirements for organ sources are very strict, and such organs cannot be obtained on the execution ground<sup>158</sup>. Medical papers show that the quality of donor organs far exceeds that of executed prisoners, indicating that there are other sources of healthy donors.

The medical papers have the following descriptions: "None have a clear history of cardiovascular disease or other major organ diseases," "60 donor hearts were harvested in ventricular fibrillation or cardiac arrest, and the rest were harvested while the heart was still beating." These statements show that the quality of donor organs far exceeds that of executed prisoners, and the source of donors is dubious. Moreover, the article stated that 291 cases were hearts provided by cadavers, but most of them were obtained while the hearts were still beating, which also does not meet the situation of cadaveric donors.

## VII. List of Main responsible persons

**FDDX-ZS001 Fan Jia**, Male. Date of Birth: March 1958. Member of the Chinese Communist Party. Place of birth: Kunshan, Jiangsu province.<sup>159</sup>

Personal profile: President of Zhongshan Hospital, Director of Shanghai Institute of Liver Diseases, Executive Vice President of Fudan University Liver Cancer Institute, Director of Fudan University Organ Transplantation Center, deputy Director of Department of Oncology, Shanghai Medical College of Fudan University, Director of Shanghai Liver Tumor Clinical Medical Center. Served as a member of the Discipline Review Group of the Academic Degrees Committee of the State Council, a director of the Oncology Branch of the Chinese Medical Association, a director of the Liver Cancer Committee of the Chinese Anti-Cancer Association, a member of the Hepatology Group of the Chinese Society of Surgery, a vice chairman of the Shanghai Anti-Cancer Association, and a vice chairman of the Oncology Branch of the Shanghai Medical Association. Fan Jia graduated from Nantong Medical College in 1983; became the member of the Chinese Communist Party in 1987; received his master's degree from Nanjing Railway Medical College in 1988; received his MD degree from Shanghai Medical University in 1995.

From 1999 to 2000, he went to the University of Pittsburgh Transplant Center as a senior visiting scholar to conduct clinical research in liver transplantation and liver surgery<sup>160</sup>.

He works 80 hours per week and performs more than 500 surgeries per year. Over the past 20 years, he has performed more than 7,000 difficult liver cancer surgeries and more than 1,300 liver transplant surgeries.<sup>161</sup>

In recent years, he has successfully performed more than 1340 liver transplants.<sup>162</sup>

To investigate the criminal conduct of all institutions, organizations, and individuals involved in the persecution of Falun Gong; to bring such investigation, no matter how long it takes, no matter how far and deep we have to search, to full closure; to exercise fundamental principles of humanity; and to restore and uphold justice in society

Specialized in liver tumor diagnosis and treatment, liver transplantation. He has long been in charge of the hospital's medical, scientific research and information work.

#### **FDDX-ZS002 Zhou Jian, Male. Date of birth: 1967.**

Personal profile: Chief Physician, Professor. He is currently the Deputy Director of Liver Surgery at Zhongshan Hospital and Liver Cancer Institute of Fudan University, Deputy Head of Liver Transplantation Group, Secretary of Shanghai Liver Tumor Clinical Medical Center, and Secretary General of Collaborative Center of Zhongshan Hospital of Fudan University and Thomas E. Starzl Transplantation Institute, University of Pittsburgh, USA.

He graduated from the former Shanghai Medical University (now Fudan University) in 1991. He studied for his PhD in 1997 under the supervision of world-renowned oncology authority

Dr. Tang Zhaoyou and received his PhD in 2001. He was promoted by exception to professor and doctoral supervisor in 2006.

In 2001, he went to the United States to study basic and clinical research in liver transplantation and hepatic surgery. He has attended many liver transplantation and hepatic surgery surgeries by famous professors from the United States, Germany, Hong Kong and Taiwan to learn the advanced experience from the world's top colleagues.<sup>163</sup>

As of June 2022, nearly 3,000 liver transplants have been completed.<sup>164</sup>

#### **FDDX-ZS003 Qiu Shuangjian, Male. Date of birth: 1968.**

Personal profile: Chief Physician, Professor, Deputy Director of Liver Tumor Surgery. From 1999 to 2000, he went to the University of Pittsburgh Organ Transplantation Center to conduct basic and clinical research on liver transplantation and immunotherapy and gene therapy for liver cancer. In September 2001, he visited the Liver Transplantation Center of the Queen Mary Hospital of the University of Hong Kong for an exchange program.

As a key member of the liver transplantation team at Zhongshan Hospital, he has participated in most of the liver transplants performed at Zhongshan Hospital, including 500

cases in which he was the surgeon.<sup>165</sup>

Specializes in liver transplantation.

#### **FDDX-ZS004 Wang Lu, Male. Date of birth: October 1968.**

Personal profile: Chief physician of liver tumor surgery, Associate professor.

In 2002, as a "Clinical Associate Surgeon", he went to work in the Department of Hepatobiliary and Pancreatic Surgery at Queen Mary Hospital of the University of Hong Kong Medical Center, one of the world's living donor liver transplant centers. He participated in operations such as donor liver extraction, liver planting, and the second time liver transplantation.

Participated in more than 40 cases of liver transplant operations.<sup>166</sup>

Personal profile: Associate Chief Physician and Associate Professor of Liver Tumor Surgery.

In 2002, he graduated from the Department of Hepatobiliary Minimally Invasive Surgery, the First Affiliated Hospital of Sun Yat-sen University, and in 2005, he graduated from the Department of Liver Tumor Surgery, Zhongshan Hospital, Fudan University, under the tutelage of Professor Fan Jia.

He has participated in and accumulated more than 500 cases of liver transplantation experience since 2002.

<sup>167</sup>

Specializes in liver transplantation.

#### **FDDX-ZS006 Shi Yinghong, Male.**

### World Organization to Investigate the Persecution of Falun Gong (WOIPFG)

To investigate the criminal conduct of all institutions, organizations, and individuals involved in the persecution of Falun Gong; to bring such investigation, no matter how long it takes, no matter how far and deep we have to search, to full closure; to exercise fundamental principles of humanity; and to restore and uphold justice in society

Personal profile: Associate Chief Physician and Associate Professor of Liver Cancer Surgery.

In May 2005, he went to the University of Pittsburgh Medical Center to conduct research on tumor cell death and liver cancer metastasis and obtained a series of research results. In 2007, he performed clinical and basic research on living donor liver transplantation at the Liver Transplant Center of Chang Gung Memorial Hospital, Kaohsiung, Taiwan. Mainly involved in more than 400 cases of liver transplantation and more than 30 cases of living donor liver transplantation, including the first adult-adult right-half-liver living donor liver transplantation in Shanghai, adult-child living donor liver transplantation, and the first adult liver-heart combined transplantation in Asia. <sup>168</sup>

#### FDDX-ZS007 Wang Xiaoying, Male.

Personal profile: Associate Chief Physician of Liver Cancer Surgery  
Specializes in liver transplantation. <sup>169</sup>

#### FDDX-ZS008 Huang Xiaowu, Male. Date of birth: 1971.

Personal profile: Chief physician of liver tumor surgery.

After graduating from the Department of Medicine of Shanghai Medical University (now Fudan University Shanghai Medical College) in 1994, he stayed at the school and worked in the Department of Liver Surgery of Zhongshan Hospital. In 1999, he studied under the academician Tang Zhaoyou, an internationally renowned liver cancer authority, for a doctorate degree in surgery.

In 2002, he went to the University of Michigan Medical School Cancer Center to study for more than one year. Participated in or performed nearly a thousand cases of liver transplants and served as the leader of the liver transplantation ward. Zhongshan Hospital has completed large number of liver transplants with extensive difficulty. <sup>170</sup>

Capable of performing liver transplantation.

#### FDDX-ZS009 He Yifeng, Male.

Personal profile: Attending physician of liver tumor surgery  
Specializes in perioperative treatment of liver transplantation. <sup>171</sup>

#### FDDX-ZS010 Sun Jian, Male.

Personal profile: Associate Chief Physician of Liver Tumor Surgery  
Specializes in liver transplantation. <sup>172</sup>

#### FDDX-ZS011 Xu Yang, Male.

Personal profile: Associate Chief Physician, Associate Professor.

In 2001, he went to the Liver Transplant Center of Queen Mary Hospital of the University of Hong Kong to engage in liver transplantation and liver cancer clinical and basic research.

## 追查迫害法輪功國際組織 ( 追查國際 )

### World Organization to Investigate the Persecution of Falun Gong (WOIPFG)

To investigate the criminal conduct of all institutions, organizations, and individuals involved in the persecution of Falun Gong; to bring such investigation, no matter how long it takes, no matter how far and deep we have to search, to full closure; to exercise fundamental principles of humanity; and to restore and uphold justice in society

Mainly engaged in liver surgery and liver transplantation. Participated in more than 300 cases of liver transplant.<sup>173</sup>

Specializes in liver transplantation.

#### **FDDX-ZS012 Shen Zaozuo, Male.**

Personal profile: Attending physician of liver cancer surgery

Specializes in liver transplantation.<sup>174</sup>

#### **FDDX-ZS013 Shi Guoming, Male.**

Personal profile: Associate Chief Physician of Liver Cancer Surgery

Specializes in liver transplantation.<sup>175</sup>

To investigate the criminal conduct of all institutions, organizations, and individuals involved in the persecution of Falun Gong; to bring such investigation, no matter how long it takes, no matter how far and deep we have to search, to full closure; to exercise fundamental principles of humanity; and to restore and uphold justice in society

Personal profile: chief physician and professor of urology. Currently served as the deputy director of the Institute of Urology, Fudan University, deputy director of the Department of Surgery, Zhongshan Hospital of Fudan University.

Graduated from Shanghai Medical University with a bachelor's degree in 1985, received a master's degree from Shanghai Medical University in 1995, and graduated from Shanghai Medical College of Fudan University with a doctorate in 2001.

Further studied at the University of Montreal, Canada, and was engaged in organ transplantation models from June 1996 to September 1997.

Capable of performing kidney transplantation. Major research direction: kidney transplantation. <sup>182</sup>

**FDDX-ZS020 Xu Ming**, Male. Date of birth: 1968.

Personal profile: Associate Chief Physician and Associate Professor of Urology.

Graduated from the former Department of Medicine of Shanghai Medical University in July 1992, graduated from the former Graduate School of Shanghai Medical University in 1997, and has been working in the Department of Urology in Zhongshan Hospital since 1997.

Independently completed major operations such as allogeneic kidney transplantation. <sup>183</sup>

**FDDX-ZS021 Sun Li-An**, Male. Date of birth: 1963.

Personal Profile: Associate Professor of Urology.

Graduated from Shanghai Medical University in 1987 with a degree in clinical medicine.

Further studied intracavitary urology at the Minimally Invasive Surgery Center of the First Hospital of Guangzhou Medical College from April to June 1998.

From November 2002 to March 2003, studied laparoscopic techniques at the University of California, Los Angeles, USA.

Capable of performing kidney transplantation. <sup>184</sup>

**FDDX-ZS022 Guo Jianming**, Male. Date of birth: 1967.

Personal Profile: Chief Physician of Urology, Professor.

Graduated from Shanghai Medical University with a doctorate degree in medicine,

supervised by Prof. Zhang Yongkang and Prof. Wang Guomin. He has been engaged in clinical Urology of Zhongshan Hospital since then, and successively served as a resident, attending physician and associate chief physician in urology.

Capable to performing major surgeries such as kidney transplantation. <sup>185</sup>

**FDDX-ZS023 Zhang Li**, Male. Date of birth: 1964.

Personal Profile: Associate Professor of Urology.

Graduated from the former Shanghai Medical University Medical Department in June 1988, has been working in the urology department of Zhongshan Hospital since graduation.

Capable of performing common urological procedures independently, including allogeneic kidney transplantation and extensive urological procedures. <sup>186</sup>

**FDDX-ZS024 Xu Zhibing**, Male. Date of birth: 1971.

Personal Profile: Associate Chief Physician of Urology, Associate Professor.

Graduated from clinical medicine of Shanghai Medical University in 1994 and received his MD degree from Fudan University in 2001.

Further studied in Singapore Central Hospital Urology Center in 2004.

Capable of perform major surgeries such as kidney transplantation. <sup>187</sup>

**FDDX-ZS025 Jiang Jingen**, Male.

To investigate the criminal conduct of all institutions, organizations, and individuals involved in the persecution of Falun Gong; to bring such investigation, no matter how long it takes, no matter how far and deep we have to search, to full closure; to exercise fundamental principles of humanity; and to restore and uphold justice in society

**Personal Profile:** Professor of Nephrology. Director of the Department of Science and Education. Graduated from the Department of Medicine of Fudan University Medical College (formerly Shanghai First Medical College, later Shanghai Medical University) in 1969. After graduation, he stayed to work in Zhongshan Hospital of Fudan University Medical College (formerly Shanghai Medical University) till now. He is a mentor for master's students. Served as a manager for internal medicine of kidney transplantation since 1988.

He has been working in nephrology, especially in charge of renal transplantation for 12 years, and he does daily checkups and has treated about 400 renal transplant patients.<sup>188</sup>

#### **FDDX-ZS026 Zheng Ruheng, Male. Date of birth: July 1952.**

**Personal Profile:** Chief Physician of Thoracic Surgery, Professor. Graduated from Shanghai Medical University in 1978.

In 2004, he went to Washington University Barnes Jewish Hospital (National Lung Transplant Center) for further study.

He has served as Deputy Director of Thoracic Surgery (presided over the work) and head of the lung transplantation team at Zhongshan Hospital of Fudan University.

He led the lung transplant team and completed the first lung transplant in September 2004.<sup>189</sup>

#### **FDDX-ZS027 Tan Lijie, Male.**

**Personal Profile:** Deputy Director of Thoracic Surgery, Chief Physician.

Graduated from the Department of Medicine of the former Shanghai Medical University in 1993 and received his PhD degree in 2001.

In 2003, he went to Washington University Medical Center Barnes-Jewish Hospital to study lung transplantation and new techniques in thoracic surgery under the supervision of renowned thoracic surgeons JD Cooper and Prof. GA Patterson.

After returning to China in 2004, as the main operator, he completed the first lung transplant in Fudan University.<sup>190</sup>

#### **FDDX-ZS028 Fan Hong, Male. Member of the Chinese Communist Party.**

**Personal Profile:** Deputy Chief Physician of Thoracic Surgery, Associate Professor.

Graduated from Department of Medicine of the former Shanghai Medical University in 1993 and practiced clinical work in the Thoracic Surgery of the Shanghai Zhongshan Hospital, where he was promoted to Attending Physician in 1998 and to Associate Chief of Thoracic Surgery in 2007. He was awarded as an Excellent Member Communist Party of Zhongshan Hospital in 2008.

In 2007, as a visiting scholar he went to Massachusetts General Hospital (MGH), Harvard Medical School, USA, under the supervision of Professor Douglas J. Mathisen, a famous thoracic surgeon.

As one of the main members, he participated in the first lung transplant in Zhongshan Hospital.<sup>191</sup>

#### **FDDX-ZS029 Ge Di, Male.**

**Personal Profile:** Deputy Director of Thoracic Surgery, Chief Physician

In 2004, he studied lung transplantation and other clinical work in thoracic surgery under the supervision of Professor Patterson, a renowned lung transplant specialist at Thoracic Surgery of Barnes-Jewish Hospital, Medical Center of University of Washington, USA.

In recent years, he started to carry out clinical work in lung transplantation.<sup>192</sup>

#### **FDDX-ZS030 Xu Zhenglang, Male.**

After graduation, he has been practicing clinical work in the Department of Cardiac Surgery at Shanghai Zhongshan Hospital and Shanghai Cardiovascular Institute, successively served as a resident, attending physician and associate chief physician of cardiac surgery. In the first half of 1998, sponsored by Sun Yat-sen Hospital, went to University of Mississippi Medical Center and Starr -Wood Heart Surgery Center in the United States, where he mainly studied heart transplantation and coronary artery bypass surgery. Has completed 70 cases of heart transplants and 2 cases of heart-lung surgeries.<sup>198</sup> Mainly specializes in perioperative management of heart transplantation.

**FDDX-ZS036 Yang Shouguo**, Male. Date of birth: February 1976.

**Personal Profile:** Associate Chief Physician of Cardiac Surgery

Graduated from Shanghai Medical University with a master's degree in clinical medicine in 2000, received a doctorate degree in surgery from Fudan University in 2012. Served as an attending physician in cardiac surgery from 2004 to 2011, and as an associate chief physician in cardiac surgery from 2011 to present.

From September 2006 to September 2007, as a postdoctoral fellow in cardiac surgery at the University of California, Los Angeles (UCLA) Medical Center, USA, conducted research on heart transplantation.

Specializes in heart transplantation for advanced heart disease.<sup>199</sup>

## WOIPFG's Investigative Report on the Alleged Organ Harvesting of Living Falun Gong Practitioners at Shanghai General Hospital and Its Staff Members Suspected of Participation

### Preface

Shanghai General Hospital is one of the hospitals in the city that carries out the largest variety and number of organ transplants. The official website reported in 2016 that since 2001, the hospital has consistently maintained the third place nationwide in the total number of annual liver transplants<sup>200</sup>. The development of the hospital's organ transplant business is in sync with the CCP's persecution of Falun Gong, and the source of organ donors is extremely rich. For example, Tan Jianming, Director of the Shanghai Organ Transplantation Research Center<sup>201</sup>, used eight spare donor organs for a kidney transplant operation for a patient at the Shanghai General Hospital in 2003.<sup>202</sup>

Dr. Li Wengang, the subject of a telephone investigation in 2017, said, "President Peng Zhihai has done more than 5,000 cases (liver transplants), and in previous years was able to do more than 400 cases per year." When asked about the availability of Falun Gong donor in a telephone investigation in 2018, Peng Zhihai said, "No problem, no problem." In the broader context of the Chinese Communist Party (CCP)'s state crime of organ harvesting from living donors, the hospital is suspected of participating in the crime of organ harvesting from living members of Falun Gong and other groups.

Hospital address: 85 Wujin Road, Shanghai City

### Hospital Overview

The hospital is a tertiary level-A general hospital, and the venue of Shanghai Clinical Medical Center for Organ Transplantation and the Institute of Organ Transplantation of Shanghai Jiao Tong University. The

## 追查迫害法輪功國際組織 ( 追查國際 )

### World Organization to Investigate the Persecution of Falun Gong (WOIPFG)

To investigate the criminal conduct of all institutions, organizations, and individuals involved in the persecution of Falun Gong; to bring such investigation, no matter how long it takes, no matter how far and deep we have to search, to full closure; to exercise fundamental principles of humanity; and to restore and uphold justice in society

hospital branches out into two parts, Hongkou and Songjiang, covering an area of about 295,000 square meters. There are 4206 employees, including 570 with senior titles and 1411 with Master's degree or above. There are 1820 approved beds. There are 68 clinical tertiary disciplines and medical-technical disciplines in the two northern and southern parts.<sup>203</sup>

#### **I. One of the hospitals with the most types and numbers of organ transplants in the city**

In August 2001, Shanghai Clinical Medical Center for Organ Transplantation was established and affiliated with Shanghai General Hospital. The Center, which started out with kidney transplantation, was established on the basis of Shanghai Organ Transplantation Research Center and Shanghai Tissue Matching Center. The hospital claims to have carried out various kidney transplants, heart transplants, liver transplants, combined liver-kidney transplants, combined pancreas-kidney transplants, combined kidney-adult islet cell transplants and other substantial large organ transplants, corneal transplants, allogeneic finger transplants, as well as fetal islet cell transplants, bone marrow transplants, peripheral blood stem cell transplants and umbilical cord blood hematopoietic stem cell transplants, a total of twelve major types<sup>204</sup>, and is one of the hospitals in the city carrying out the largest variety and number of organ transplants<sup>205</sup>. The Institute of Organ Transplantation of Shanghai Jiao Tong University is also located at Shanghai General Hospital<sup>206</sup>. The official website reported in 2016 that since 2001, the hospital has consistently maintained the third place nationwide in annual total number of liver transplants<sup>207</sup>.

#### **II. The hospital used eight spare donor organs for one kidney transplant**

Tan Jianming, director of the Shanghai Organ Transplantation Research Center<sup>208</sup>, performed a kidney transplant on a patient at Shanghai General Hospital in 2003. During the following two weeks, this patient and four kidneys were tested for blood and other matches. Due to the patient's antibody reaction, none of the kidneys were a match and as a result all four kidneys were taken away. The patient returned to this hospital about two months later. Four more kidneys were brought in for similar testing; when an eighth kidney proved to be a match, the transplant was completed successfully. Dr. Tan told the organ recipient that the eighth kidney was from a death row inmate.<sup>209</sup>

#### **III. The organ transplantation center carries out emergency liver transplant with sufficient donor sources**

In 2002, the first emergency liver transplant in Shanghai was performed, and in 2004, the first emergency blood group incompatible liver transplant in China was successfully performed to treat acute liver failure. 10 cases have been completed so far, among which 4 cases were the first internationally reported blood group incompatible active consecutive second transplant.<sup>210</sup>

#### **IV. The team of liver and kidney transplant doctors is strong and the actual transplant volume is large.**

The name list released by WOIPFG in 2014 includes the transplant doctors of the hospital.<sup>211</sup> About the doctors specialized in kidney transplantation alone, We were able to find from the official website and papers that 31 of them did do the surgery, including 9 chief physicians, 5 associate chief physicians and 17 others. For liver transplant doctors, we can find from the official websites and papers 26 of them who did do the surgery, including 6 chief physicians, 5 associate chief physicians, 5 attending physicians and 10 others. Multiple liver and kidney transplant teams can be formed.

Tan Jianming, director of the Shanghai Organ Transplantation Research Center.<sup>212</sup> Tan used eight kidneys for matching for a kidney transplant at Shanghai General Hospital in 2003.<sup>213</sup> Tan had performed more than 4,200 kidney transplants as of June 2014.<sup>214</sup>

## 追查迫害法輪功國際組織 ( 追查國際 )

### World Organization to Investigate the Persecution of Falun Gong (WOIPFG)

To investigate the criminal conduct of all institutions, organizations, and individuals involved in the persecution of Falun Gong; to bring such investigation, no matter how long it takes, no matter how far and deep we have to search, to full closure; to exercise fundamental principles of humanity; and to restore and uphold justice in society

Peng Zhihai was vice president of Shanghai General Hospital and director of the Shanghai Organ Transplant Center.<sup>215</sup> In April 2017, according to Li Wengang, a hepatobiliary surgeon at Xiamen No.174 Hospital, on a survey call, "Peng Zhihai from the transplant center at Shanghai Jiao Tong University has been here for a few days and is preparing for surgery at Xiamen University. President Peng Zhihai has done more than 5,000 cases (liver transplants) and was able to do more than 400 per year in previous years."<sup>216</sup>

#### V. Large number of organ transplant beds

The Department of Urology, with 3 exclusive wards (1 ward in the hospital's southern branch and 2 wards in the hospital's northern branch), has a total of 126 general beds (38 in the southern branch and 88 in the northern branch) and 20 non-fixed beds in the hospital's ICU, day ward and special needs ward of the International Medical Center. The department is a national clinical drug experimental base.<sup>217</sup> Kidney transplantation is the traditional strength of the urology department and is the core component of Shanghai Clinical Medical Center for Organ Transplantation (located in Shanghai General Hospital)<sup>218</sup>.

The Department of General Surgery of Shanghai General Hospital is the organ transplantation center of Shanghai and the quality control center of liver transplantation of Shanghai. In recent years, the department with Prof. Peng Zhihai as its head, has carried out complex hepatobiliary and pancreatic surgery in the era of liver transplantation, and established a liver cancer treatment system integrating liver descending treatment - liver resection - liver transplantation - salvage liver transplantation and formed a clinical standard. At present, the Department of General Surgery has 5 wards with 243 beds in two sub-departments in the north and south, with hepatobiliary and pancreatic surgery, gastrointestinal surgery and breast and thyroid surgery under it<sup>219</sup>.

#### VI. The hospital promotes liver transplantation to other medical units in Shanghai and across China

Shanghai General Hospital has promoted liver transplantation to other medical units in Shanghai as well as 11 provinces and 2 cities across China. The target units include: Renji Hospital of Shanghai Second Medical University, Xinhua Hospital of Shanghai Second Medical University, Ninth People's Hospital of Shanghai Second Medical University, Eastern Hospital of Shanghai Tongji University, Changhai Hospital of Shanghai Second Military Medical University, Eastern Hepatobiliary Hospital of Shanghai Second Military Medical University, Shenzhen People's Hospital, Second Hospital of Shandong Medical University, Dongguan People's Hospital, Hospital of Jiangxi Medical University, Hospital of Xi'an Medical University, Henan 153 Hospital, Wuxi Second People's Hospital of Jiangsu Province, and the Hospital of Xi'an Medical University. Xi'an Medical University Hospital, Henan 153 Hospital, Jiangsu Wuxi Second People's Hospital, Fujian Medical University Hospital, Qinghai Medical College Hospital, Guizhou Dujun People's Hospital, Hunan Medical University Xiangya Hospital, Xinjiang Medical University Cancer Hospital.<sup>220</sup>

Meng Jianzhu, the Secretary of the Jiangxi Provincial Party Committee, personally connected the First Affiliated Hospital of Nanchang University with the Shanghai Organ Transplant Center (First People's Hospital) to establish a joint and collaborative relationship.<sup>221</sup> The First Affiliated Hospital of Nanchang University had a record of completing six large organ transplants simultaneously in one day.<sup>222</sup>

#### VII. Doctors admitted organs used were from Falun Gong practitioners, and said that donors were available every day and were all living persons.

The following is a transcript of the conversation between a WOIPFG investigator and an anonymous doctor with the Liver Transplant Center of the First People's Hospital affiliated with Shanghai Jiao Tong University in a telephone investigation.

Investigator: I wanted to know how long the waiting time will be?

Doctor: We have donors, we have them every day. We are doing it today.

## 追查迫害法輪功國際組織 ( 追查國際 )

### World Organization to Investigate the Persecution of Falun Gong (WOIPFG)

To investigate the criminal conduct of all institutions, organizations, and individuals involved in the persecution of Falun Gong; to bring such investigation, no matter how long it takes, no matter how far and deep we have to search, to full closure; to exercise fundamental principles of humanity; and to restore and uphold justice in society

Investigator: But aren't you telling me the fresh ones will be used, the ones from living persons...

Doctor: They are all from living persons, they are all from living persons.

Investigator: There is one type that comes from those who practice qi gong. They have good healthy body.

Doctor: Yes, we have them.<sup>223</sup>

(Recording 1. Play and download [MP3](#). See [pdf3](#) for full transcript)

Here is another phone investigation dialogue between a WOIPFG investigator and Peng Zhihai, vice president of Shanghai General Hospital and director of the Organ Transplant Center.

**Date of Investigation:** November 16, 2018 (Tel: +86-13761010066)

Investigator: You are still using Falun Gong donors, the ones that are healthy, right?

Peng Zhihai: It's definitely healthy. How could unhealthy ones be used!

Investigator: The major thing is, you make sure that there is no doubt about the donor issue, the Falun Gong donor!

Peng Zhihai: No problem, no problem.

Peng's personal profile: member of the Surgery Branch of the Chinese Medical Society, member at deputy director level of the General Surgery Branch of Shanghai Medical Society, member at deputy director level of the Hepatobiliary Diseases Branch of the China Association of International Exchange for the Promotion of Health Care, standing member of the Organ Transplantation Branch of the Chinese Medical Society, vice chairman of the Organ Transplantation Physicians Branch of the Chinese Physicians Association, member at director level of the First Session of the Professional Committee for Transplant Management of the Organ Transplantation Physicians Branch of the Chinese Physicians Association, deputy chief of liver transplantation team of Organ Transplantation Branch of the Chinese Medical Society, member at director level of the Organ Transplantation Society of Shanghai Medical Society, director of Shanghai Organ Transplantation Clinical Medical Center, director of Shanghai Organ Transplantation Research Center, director of Shanghai Liver Transplantation Quality Control Center, and director of Shanghai Jiao Tong University Organ Transplantation Institute.<sup>224</sup>

(Recording 2. Play and download [MP3](#). See [pdf 14](#) for full transcript)

## VIII. The main responsible persons

### SH1RMYY001 Tan Jianming

Titles: director of Transplantation Urology Department and director of Urology Research Department with Shanghai General Hospital; director of Shanghai Organ Transplantation Research Center and director of Shanghai Organ Transplantation Clinical Medical Center. He is also vice president of Fuzhou General Hospital of Nanjing Military Region, director of Organ Transplantation Research Institute of Nanjing Military Region, and director of Urology Department of Fuzhou General Hospital of Nanjing Military Region. He enjoys a special government allowance from the State Council. He is a member of the Standing Committee of the Chinese Society of Organ Transplantation, a member of the Medical Science and Technology Committee of the People's Liberation Army, a member at deputy director level of the PLA Professional Committee of Urology, a member of the Standing Committee of the Medical Science Committee of Nanjing Military Region, a member at director level of the Professional Committee of Nanjing Military Region, and a member at deputy director level of the Organ Transplantation Branch and Urology Branch of the Chinese Medical Society of Fujian Province. He is a master, doctor and postdoctoral supervisor of Shanghai Fudan University, Shanghai Jiao Tong University, Second Military Medical University and Fujian Medical University.

Personal profile: Graduated from college in 1984, received a master's degree from the Fourth Military Medical University in 1989, received a doctorate in surgery from Shanghai Medical University in 1996, left the postdoctoral station of clinical medicine at West China Medical University in 1998, and went to the University of California Medical Center and the Tissue Matching Center in 1996, as a visiting scholar. Tan

has performed more than 4,200 kidney transplants, completed 23 combined liver-kidney transplants, 9 combined pancreas-kidney transplants, 45 combined kidney-islet transplants, 1 combined liver-pancreas-kidney transplant, 786 combined kidney-stem cell transplants, and 1 combined kidney-islet-stem cell transplant.<sup>225</sup>

#### SH1RMYY002 Peng Zhihai

Titles: professor, physician at director level, doctoral supervisor, vice president of Shanghai General Hospital, director of Shanghai Organ Transplantation Center, director of Shanghai Liver Transplantation Quality Control Center, director of Shanghai Jiao Tong University Organ Institute, standing member of the Organ Transplantation Society of Chinese Medical Association, vice chairman of the Liver Transplantation Society of Chinese Medical Association, administrative director of Shanghai Medical Branch of Chinese Medical Association, member at director level of Shanghai Organ Transplantation Society, and a member at deputy director level of the Shanghai General Surgery Society. expert pool member of "863" project, expert in the preparation of national "11th Five-Year Plan" science and technology key support project guidelines, member of the Standing Committee of the Chinese Medical Association Organ Transplantation Society, member of the Chinese Medical Association Surgical Society, member at director level of the Shanghai Medical Association Organ Transplantation Society, member at deputy director level of the Society of General Surgery and the Society of Organ Transplantation of the Shanghai Medical Association. Personal profile: Graduated from Tongji Medical University with a doctorate in 1993. In 1993 and 1995, he was promoted to associate chief physician, associate professor and chief physician. In 1996, he was transferred to Shanghai General Hospital as a talented person, and in 1998, he became the director of General Surgery of the First People's Hospital, and in 1999, he became the vice president of the hospital. He was appointed as the supervisor of master and doctoral students in 1995 and 2000 respectively, and was awarded the Austrian government scholarship to study at Graz University, Austria in 1996 and Mount Sinai Hospital, USA for organ transplantation study in 2000. He has performed over 800 liver transplants and combined organ transplants around 2015<sup>226</sup>.

#### SH1RMYY003 Zhang Xianyou

Titles: Chief Physician and Professor of Urology Center  
Personal profile: Graduated from Shanghai Medical University, started receiving special allowance from the State Council in 1993. He is mainly engaged in renal replacement (dialysis and transplantation) treatment.<sup>227</sup>

#### SH1RMYY004 Qiu Jianxin

Titles: Chief Physician and Professor of Urology.  
Personal profile: Graduated from Shanghai Medical University with a doctorate degree in urology and went to UCLA in 2004 for further study in urology. He has long been engaged in the clinical work of kidney transplantation, specializing in kidney transplantation and postoperative follow-up with rich experience.<sup>228</sup>

#### SH1RMYY005 Fan Yu

Titles: Chief Physician and Professor of Urology. Director of Kidney Transplantation Department.  
Personal profile: Graduated from Tongji Medical University with a master's degree in medicine. 1998, he studied at the Clinical Hospital of Hannover Medical School in Germany. He has accumulated rich experience in kidney transplantation, especially specializing in kidney transplantation and the diagnosis and treatment of urological tumors.<sup>229</sup>

### World Organization to Investigate the Persecution of Falun Gong (WOIPFG)

To investigate the criminal conduct of all institutions, organizations, and individuals involved in the persecution of Falun Gong; to bring such investigation, no matter how long it takes, no matter how far and deep we have to search, to full closure; to exercise fundamental principles of humanity; and to restore and uphold justice in society

#### SH1RMYY006 Shen Bing

Title: Deputy Chief Physician of Urology

Personal profile: Graduated from Fudan University School of Medicine (formerly Shanghai Medical University) with a master's degree in medicine. From 2007 to 2008, he studied at the University of Hamburg Medical School (UKE) in Germany. He specializes in kidney transplantation, including kidney transplantation using living relative's organs, and the application of postoperative immunosuppressive drugs and management of complications.<sup>230</sup>

#### SH1RMYY007 Qin Yan

Title: Deputy Chief Physician of Urology

Personal profile: Graduated from Fudan University School of Medicine with a PhD in Nephrology in 2003, has been working in the Kidney Transplantation Department of the First People's Hospital of Shanghai Jiao Tong University since July 2003, mainly engaged in preoperative evaluation of kidney transplantation, diagnosis and treatment of postoperative medical complications, and evaluation and preparation of relative kidney transplantation donors and recipients, has rich experience in medical complications such as pneumonia, chronic transplant nephropathy, rejection, immunosuppressant use, cardiac and cerebral complications, and urinary tract infections after kidney transplantation, and has accumulated extensive experience in the adjustment of immunosuppressive drugs and management of complications after kidney transplantation.<sup>231</sup>

#### SH1RMYY008 Liu Zhihong

Title: Deputy Chief Physician of Urology

Personal profile: Graduated from the former Shanghai Medical University in 1997. He specializes in kidney transplantation and postoperative adjustment of immunosuppressive drugs.<sup>232</sup>

#### SH1RMYY009 Xu Dongliang

Title: Deputy Chief Physician of Urology

Personal profile: Graduated from Fudan University School of Medicine in 2004 with a doctorate in Surgery. He specializes in kidney transplantation and other surgeries.<sup>233</sup>

#### SH1RMYY010 Guo Yifeng

Title: Chief Physician of Urology

Personal profile: Postdoctoral Fellow, Fudan University. He specializes in kidney transplantation, including kidney transplantation using living relative's organ, and the application of postoperative immunosuppressive drugs and management of complications.<sup>234</sup>

#### SH1RMYY011 Liu Yong

Title: Chief Physician of Urology

Personal profile: Graduated from Shanghai Medical College of Fudan University (formerly Shanghai Medical University). He has long been engaged in clinical and scientific research of organ transplantation (kidney), and now mainly focuses on clinical and research work of transplantation immunity. He has accumulated rich experience in the adjustment of immunosuppressant and management of complications after kidney transplantation.<sup>235</sup>

#### SH1RMYY012 Tang Xiaoda

Titles: Chief Physician of Urology, professor, organ transplant Specialist. He was a member of the Standing Committee and member at deputy director level of the Chinese Society of Organ Transplantation. Now he is a member at director level of Chinese Dialysis Transplantation Research Society and a consultant of Shanghai Organ Transplantation Clinical Medical Center. He is the former president of West China Hospital of Sichuan University.

Personal profile: Specializes in organ transplantation, kidney transplantation and transplantation immunization.<sup>236</sup>

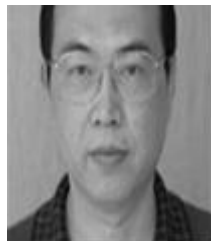

#### SH1RMYY013 Ling Guiming

Titles: Chief Physician, professor and supervisor for master's degree students of Urology Department

Personal profile: Graduated from the Medical Department of Shanghai Medical University in 1969, has been working in the Department of Urology at Shanghai General Hospital since 1970, serving as a resident, attending physician, deputy chief physician, associate professor, chief physician and professor. For the past 30 years, he has been engaged in work in urology, blood dialysis, and kidney transplantation. He belongs to the first generation of medical workers in China to engage in clinical and research work in this field.<sup>237</sup>

#### SH1RMYY014 Chen Guoqing

Title: Chief Physician of General Surgery

Personal profile: Graduated from Shanghai Medical University. He now specializes in organ transplantation, including liver transplantation and combined transplantation of multiple organs, especially in perioperative management of organ transplantation, post-transplantation immunosuppressant application and post-surgical complication management.<sup>238</sup>

#### SH1RMYY015 Wang Zhaowen

Title: Deputy Chief Physician of General Surgery

Personal profile: Graduated from the Department of Clinical Medicine of Taishan Medical College in July 1994 with a bachelor's degree in medicine; started to work in the Department of General Surgery of the First People's Hospital in Tai'an, Shandong Province in September 1994; entered Shanghai Medical College of Fudan University (formerly Shanghai Medical University) in September 2000 to pursue his master's degree in surgery, and started his doctoral degree program ahead of schedule in September 2002, and received his medical doctorate in July 2005. He has been working in the First People's Hospital of Shanghai Jiao Tong University since July 2005. His main areas of research are the prevention and treatment of complications following liver transplantation.<sup>239</sup>

#### SH1RMYY016 Xu Junming

Titles: Deputy director, chief physician, and professor at the Clinical Medical Center of General Surgery

Personal profile: Graduated from Zhejiang University in 2001 with a doctorate in Surgery and a postdoctoral fellowship from Fudan University School of Medicine.

During 2007-2008, he was sponsored by China to study at UCLA Medical Center and obtained a temporary physician license in California to participate in a large number of

organ transplant operations.

He is the chief surgeon for more than 300 liver transplants.<sup>240</sup>

#### SH1RMYY017 Zhong Lin

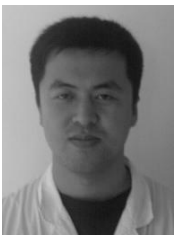

Titles: Chief physician and professor at the Organ Transplant Center of Shanghai Jiao Tong University and Shanghai Organ Transplant Institute; associate professor of General Surgery; and young member of Shanghai Organ Transplant Society

Personal profile: Graduated from Chongqing Medical University in 1996 with both bachelor and master's degrees, stayed in the university after graduation for 4 years of work in vascular surgery. He pursued his doctorate in surgery at Shanghai Medical

College of Fudan University from 2000 to 2003, and postdoctoral fellowship at the Organ Transplantation Center of Shanghai General Hospital from 2003 to 2005. In 2005 and 2006, he studied pancreas transplantation and living-donor liver transplantation at the University of Geneva Medical School in Switzerland and Chang Gung Hospital in Taiwan, respectively. From May 2008 to May 2009, he studied liver transplantation and transplantation immunology at Eppendorf Hospital, University of Hamburg, Germany under the YTT program of Shanghai Government.<sup>241</sup> Since 2003, he has been engaged in research and clinical work in liver transplantation, pancreas transplantation and combined abdominal organ transplantation.

He is mainly engaged in liver transplantation and abdominal large organ transplantation, and has performed 150 liver transplants, 1 combined pancreas-kidney transplant, 8 combined liver-kidney transplants and 10 liver re-transplants in the past three years.<sup>242</sup>

#### SH1RMYY018 Xing Tonghai

Title: Deputy chief physician of Liver Transplantation Unit

Personal profile: In 1994, he enrolled in a seven-year program of the Department of Clinical Medicine of Shanghai Medical University, and received his Master's degree in surgery in 2001. In the same year, he went on to the postgraduate department of Fudan University School of Medicine (formerly Shanghai Medical University) and graduated in July 2004 with a Doctor of Medicine degree in Surgery from Fudan University School of Medicine. He started working in the liver transplantation unit of the First People's Hospital of Shanghai

Jiao Tong University in 2003. During his doctoral studies, he was mainly engaged in the research of artificial liver in the perioperative application of liver transplantation, including the isolation of adult hepatocytes, large-scale culture, freezing and resuscitation, zoonosis research and the practical application of non-artificial liver research, and was responsible for the work of artificial liver and hemodialysis for liver transplantation, and engaged in the treatment of more than 50 cases and 200 patients with blood purification. Now he is in charge of ICU work in the ward.<sup>243</sup>

#### SH1RMYY019 Zhou Guangwen

Titles: Chief physician of General Surgery. Member of Shanghai Society of Organ Transplantation.

Personal profile: He worked in the Department of General Surgery at Shanghai Ruijin Hospital from 1996 to 2010, and was transferred to Shanghai General Hospital (south branch) in October 2010 to preside over the clinical work of hepatobiliary and pancreatic surgery. In 2000, he studied in Pittsburgh Thomas E Starzl Hepatobiliary and Pancreatic Medical Center, USA. Returning from the United States, he performed the first split liver transplant, the first in situ assisted partial cadaveric liver transplant and living-donor liver transplant in

China, which was one of the top ten medical news in China in 2002. On December 14, 2004, he participated as a key member in the first total abdominal organ transplant in Asia (7 organs in total).<sup>244</sup> He specializes in organ transplantation (liver transplantation and multivisceral transplantation).

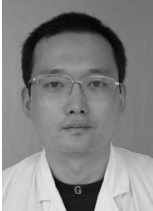

#### SH1RMYY020 Sun Xing

Title: Deputy chief physician of General Surgery

Personal profile: Graduated from Wuhan Tongji Medical University in 1995 with a master's degree in clinical medicine. Upon graduation he started working in the Department of General Surgery of Wuhan Tongji Hospital under the supervision of Professor Chen Xiaoping and he conducted clinical diagnosis and treatment of hepatobiliary diseases for three years. At the end of 2001, he returned to Shanghai to conduct clinical and basic research on liver transplantation under the supervision of Professor Peng Zhihai at Shanghai General Hospital, and to pursue his doctorate on the job at Shanghai Medical College of Fudan University. In 2006 he obtained his doctorate in clinical surgery. In 1999, he was sent to the United States by China Fund for Overseas Studies as a visiting scholar at Johns Hopkins University. He has accumulated solid theoretical knowledge and practical experience in general surgery during his more than 10 years of clinical work. He has participated in many major operations such as donor liver excision, donor liver trimming, and recipient liver transplantation, and has mastered the diagnosis and management of various post-transplant complications and accumulated rich experience in the management of critically ill patients in the peri-operative period of transplantation.<sup>245</sup>

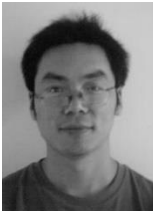

#### SH1RMYY021 Deng Guilong

Title: Deputy chief physician of General Surgery

Personal profile: He received his Ph.D. degree in Surgery from Zhejiang University in 2004, and conducted his postdoctoral research in liver transplantation at the Liver Transplantation Unit of the First People's Hospital of Shanghai Jiao Tong University in 2004. During the postdoctoral period, he was mainly engaged in the research of prevention of hepatitis B recurrence after liver transplantation, and has his own unique experience and opinion. He has accumulated rich experience in liver transplantation and perioperative management.<sup>246</sup>

#### SH1RMYY022 Qi Xiaosheng

Title: Attending physician at General Surgery

Personal profile: Graduated from the Second Military Medical University in July 2003 with a doctorate degree in surgery. He worked in the kidney transplantation clinic for many years. In July 2003, he joined the postdoctoral station of the Organ Transplantation Center of Shanghai General Hospital, and his research interest is distant kidney dysfunction in the perioperative period of liver transplantation and postoperative period. He has been working in the hospital since June 2005. He has participated in hundreds of liver retrieval, liver repair and liver transplantation procedures. He is familiar with the perioperative management of liver transplantation and combined liver and kidney transplantation patients, and is good at the diagnosis and treatment of common post-transplantation complications, such as kidney failure, biliary complications, rejection reactions, infections, etc. He has also accumulated rich experience in the long-term follow-up of post-operative patients, adjustment of immunosuppression protocols and protection of liver and kidney functions.<sup>247</sup>

#### SH1RMYY023 Li Tao

Title: Attending Physician at General Surgery

Personal profile: Currently, he is mainly engaged in research in liver transplantation and clinical management experience of liver transplant patients.<sup>248</sup>

#### SH1RMYY024 Wang Shu-Yun

Title: Attending physician at General Surgery

Personal profile: He enrolled in 7-year program at the Medical School of Fudan University in 1995, and started working in the general surgery department of the First People's Hospital of Shanghai Jiao Tong University after graduation. He was at the time the secretary of the liver transplantation group of Shanghai Organ Transplantation Medical Center. He was admitted to the doctoral program of Shanghai Jiao Tong University in 2004, and continued to work in the hospital after graduation in 2007. He specializes in perioperative management of liver transplantation, rescue and management of critical cases in ICU. He is responsible for matters related to liver tissue biopsy and pathological analysis after liver transplantation.<sup>249</sup>

#### SH1RMYY025 Huang Li

Title: Attending physician at General Surgery

Personal profile: He enrolled in the Department of Clinical Medicine of Shanghai Medical University in 1995, and received his medical bachelor's degree in 2000. In the same year, he was admitted to Fudan University School of Medicine (formerly Shanghai Medical University) as a postgraduate in surgery under the supervision of Professor Peng Zhihai, and studied for his master's degree in 2000 through 2002 and Ph.D 2002 through 2005. During the postgraduate period, he was mainly engaged in clinical skills training in general surgery and liver transplantation. He has been working in the liver transplantation ward of the First People's Hospital of Shanghai Jiao Tong University since July 2005.<sup>250</sup>

#### SH1RMYY026 Zhang Jinyan

Title: Attending physician of General Surgery

Personal profile: Graduated from Xiangya Medical College of Central South University in 2001 with a Bachelor's degree in Clinical Medicine. In the same year, he was admitted to the university for postgraduate research in transplantation and received his doctorate in medicine from Xiangya Medical School of Central South University in 2006. In 2004, he was awarded a German scholarship to work in the transplantation department of ESSEN University Hospital in Germany, where he conducted clinical research related to living donor liver transplantation. In October 2006, he returned to China and started working at the post-doctoral station of liver transplantation at the First People's Hospital of Shanghai Jiao Tong University. He is engaged in clinical and basic research in liver transplantation under the supervision of Professor Peng Zhihai<sup>251</sup>.

#### SH1RMYY027 Fan Junwei

Title: Deputy chief physician of General Surgery

Personal profile: He received his master's degree in surgery from Xi'an Jiao Tong University School of Medicine in July 2002 and his doctorate in surgery from Shanghai Jiao Tong University School of Medicine in 2008. He started working in the school after graduation. He has participated in many liver retrieval, liver repair and liver transplantation operations as well as patient perioperative management.<sup>252</sup>

#### SH1RMYY028 Peng Wen

Title: Head nurse of Liver Transplantation Ward, Department of General Surgery (13F)

Personal profile: Since graduating from Shanghai General Hospital Nursing School in 1985, she has been engaged in clinical nursing work. She has been the head nurse of the general surgery department for more than 10 years, and concurrently the head nurse of the liver transplantation ward since the establishment of the liver transplantation nursing team in

2001.<sup>253</sup>

#### SH1RMYY029 Qiu Zhengjun

**Titles:** Chief physician of General Surgery, professor, and director of General Surgery.  
**Personal profile:** A Wenzhou Medical College graduate, Qiu graduated from Shanghai Medical University Graduate School in July 1993 with a doctorate in surgery, and stayed in Shanghai General Hospital to work in General Surgery after graduation. He has successfully performed more than 160 cases of liver transplantation, combined liver-kidney transplantation and combined pancreas-kidney transplantation. He specializes in liver transplantation.<sup>254</sup>

#### SH1RMYY030 Liu Yan

**Title:** Chief physician of Ophthalmology; head of Ophthalmic Surface Diseases Group, Shanghai General Hospital; head of Corneal Transplantation, Shanghai Organ Transplantation Clinical Medical Center  
**Personal profile:** He received his doctorate degree in clinical ophthalmology in 1998. He specializes in corneal limbal stem cell and conjunctival transplantation, scleral transplantation, and combined cataract, glaucoma, and botanical corneal transplantation.

255

#### SH1RMYY031 Sheng Minjie

**Title:** Chief physician of Ophthalmology  
**Personal profile:** Since 1974, Sheng has been a physician, attending physician, deputy chief physician and chief physician in the Ophthalmology Department of Shanghai Tenth People's Hospital. Sheng has been studying corneal transplantation and artificial cornea under Professor Zheng Yiren, and is currently the head of the Corneal Disease Group of the Shanghai Medical Society. Sheng has been seeing patients in the Special Needs Clinic of Shanghai General Hospital since 2002. Sheng specializes in ophthalmic corneal transplantation.<sup>256</sup>

#### SH1RMYY032 Chen Jiawei

**Titles:** Chief physician, professor, and director of Pathology Department  
**Personal profile:** Chen graduated from the Medical Department of Harbin Medical University in 1982. During 1996-1997, Chen went to the University of Pittsburgh, USA, for transplantation pathology training. Chen is especially good at the pathological diagnosis and differential diagnosis of heart transplantation, liver transplantation, kidney transplantation and small intestine transplantation rejection.<sup>257</sup>

## 追查迫害法輪功國際組織 ( 追查國際 )

### World Organization to Investigate the Persecution of Falun Gong (WOIPFG)

To investigate the criminal conduct of all institutions, organizations, and individuals involved in the persecution of Falun Gong; to bring such investigation, no matter how long it takes, no matter how far and deep we have to search, to full closure; to exercise fundamental principles of humanity; and to restore and uphold justice in society
