## 追查迫害法輪功國際組織 ( 追查國際 )

### World Organization to Investigate the Persecution of Falun Gong (WOIPFG)

To investigate the criminal conduct of all institutions, organizations, and individuals involved in the persecution of Falun Gong; to bring such investigation, no matter how long it takes, no matter how far and deep we have to search, to full closure; to exercise fundamental principles of humanity; and to restore and uphold justice in society

## China's Organ Transplant Organizations are the Executing Entities for the Communist Party's State Crime of Live Organ Harvesting

Since 1999, led by its then-leader Jiang Zemin, the Chinese Communist Party (CCP) criminal group has been manipulating China's entire state apparatus, including the Party, government, military, armed police, judicial system, and medical institutions, through the Political and Legal Affairs Commission and the "610" system, to commit nationwide mass extermination of Falun Dafa practitioners by means of live organ harvesting for transplantation. The CCP's live organ harvesting of Falun Gong practitioners is a crime against humanity and a crime of genocide initiated on the orders of Jiang Zemin.

Since the CCP's live organ harvesting of Falun Gong practitioners is a state genocidal crime conducted as a political campaign, organ transplant institutions in all provinces, central government-controlled municipalities, and autonomous regions of mainland China, including all military, armed police, and local hospitals (medical centers) are suspected to have participated in this crime, even including a considerable number of hospitals unqualified to perform organ transplants, such as small and medium-sized hospitals and specialized hospitals. Similar to how all Chinese hospitals were involved in forced abortions during the CCP's implementation of the "one-child policy", all transplant facilities in China today have participated in live organ harvesting.

In view of the broader context of the CCP's state crime of live organ harvesting, those in charge of organ transplant hospitals/centers and similar institutions in China are suspected of having been involved in the crime of live organ harvesting from groups such as Falun Gong practitioners.

### Evidence Collection Methods

#### 1. Direct and indirect comprehensive telephone investigation and on-site investigation of the people suspected of involvement in the live organ harvesting

The subjects of our investigations include government officials, policemen, doctors and other medical personnel.

Geographical Distribution of the Subjects of Investigation, and the Duration of Investigations:

The WOIPFG's subjects of investigation are people in different positions, who are located across the entire country of China. Our investigations have been ongoing for nearly two decades, and our investigation results have always been consistent. The evidence gathered by us verifies that live organ harvesting is a systematic arrangement by the CCP.

- 1) Subjects of investigation: Presidents, directors, doctors, nurses, and security guards of organ transplant hospitals.
- 2) Hospitals involved: A considerable amount of recorded evidence has been obtained from many provincial, military, armed police, and local organ transplant hospitals (centers) across China.
- 3) Time span: Our investigations on the live organ harvesting started in 1999, and they're ongoing to this day.

### 2. Data investigation

- 1) We have been collecting data from the hospitals' websites and press releases.

# 追查迫害法輪功國際組織 ( 追查國際 )

## World Organization to Investigate the Persecution of Falun Gong (WOIPFG)

To investigate the criminal conduct of all institutions, organizations, and individuals involved in the persecution of Falun Gong; to bring such investigation, no matter how long it takes, no matter how far and deep we have to search, to full closure; to exercise fundamental principles of humanity; and to restore and uphold justice in society

- 2) We have been searching for and analyzing medical papers on transplantation.
- 3) We have been using the website [www.archive.org](http://www.archive.org) to view the hospitals' previously archived information.
- 4) We have been collecting reports from the official Chinese media outlets.
- 5) We have organized all the information obtained from our investigations to create a database of the hospitals.

All the facts have shown us that the CCP is by no means a rational or normal organization or political party; but instead, it is a supra-state criminal syndicate controlled by a group of criminals who have committed crimes against humanity. The CCP's logic of thinking and principles of action are anti-human, and the crimes it has committed are forms of evil that humanity had never seen previously.

WOIPFG's investigative report series contains nearly 70 investigation reports on the alleged organ harvesting of living Falun Gong Practitioners at major Chinese military and civilian hospitals and on their staff members suspected of participation in this crime. This volume contains four such investigation reports.

### World Organization to Investigate the Persecution of Falun Gong (WOIPFG)

To investigate the criminal conduct of all institutions, organizations, and individuals involved in the persecution of Falun Gong; to bring such investigation, no matter how long it takes, no matter how far and deep we have to search, to full closure; to exercise fundamental principles of humanity; and to restore and uphold justice in society

---

WOIPFG's investigation into the Organ Transplant Center of Zhengzhou People's Hospital confirmed once again that since 2000, the CCP has been harvesting organs from Falun Gong practitioners for huge profits. The organizations involved in the cases are located in all provinces, municipalities directly under the central government, and autonomous regions in mainland China, involving all organ transplant institutions of the military, armed police, and local hospitals (medical centers). In addition, a considerable number of small and medium-sized hospitals and specialized hospitals that do not have the conditions for transplant operations are also suspected of being involved<sup>1</sup>.

On November 6, 2018, Qu Qingshan, director of the Organ Transplantation Center of Zhengzhou People's Hospital, did not deny that they were using Falun Gong practitioners' organs in a telephone survey conducted by WOIPFG investigators. On the same day, Miao Shuzhai, the chief surgeon of the Organ Transplantation Center of Zhengzhou People's Hospital, bluntly admitted that their liver transplant donors were from Falun Gong practitioners during a telephone survey conducted by WOIPFG investigators, and the waiting time for the donor availability was only one or two weeks, one month at its longest.

From the above survey recordings, it can be determined that, following the CCP's persecution to Falun Gong, the Organ Transplantation Center of Zhengzhou People's Hospital did participate in the crime of harvesting organs from live Falun Gong practitioners, it's even more outrageous that this crime still continues to go on to this day.

#### I. Overview of the hospital

Located in the city heart area, Zhengzhou People's Hospital was founded in 1912<sup>2</sup>, presently belonging to the Affiliated Hospital of Southern Medical University, formerly the First Military Medical University of the Chinese People's Liberation Army (PLA)<sup>3</sup>, is a designated hospital for the foreign medical service of the city, a postdoctoral research base, and a Grade III Level A hospital of the country. In April 2010, Henan Academician Expert Workstation of Zhengzhou People's Hospital was established with tumor center, heart center and liver center. Zhengzhou People's Hospital has also established a "Liver Surgery Diagnosis and Treatment Center"<sup>4</sup> in cooperation with the Shanghai Changzheng Hospital belongs to the Second Military Medical University of PLA. According to WOIPFG's telephone survey of Bai Shuzhong, Minister of General Logistics and Health of the People's Liberation Army, when Jiang Zemin, the former leader of the Communist Party of China, issued a killing order against Falun Gong practitioners, various hospitals affiliated to the Chinese military have become the main body for organ harvesting from live Falun Gong practitioners, including Shanghai Changzheng Hospital, with which Zhengzhou People's Hospital was cooperated.

#### II. Overview of the Transplant Center

Zhengzhou People's Hospital is the only hospital in Henan Province that has been approved by the Ministry of Health of the Communist Party of China to own five transplant qualifications for heart, liver, kidney, small intestine, and pancreas<sup>5</sup>.

#### 1. The hospital claimed that the case number of kidney transplant operations ranked the second in China for three consecutive years.

The Kidney Transplant Department of the hospital was established in June 2002. It comes with three separate wards: a kidney disease ward, an organ transplantation ward and a blood purification ward. It became a Characteristic Specialized Department of Henan Province, Provincial Supported Crucial Area of

## 追查迫害法輪功國際組織 ( 追查國際 )

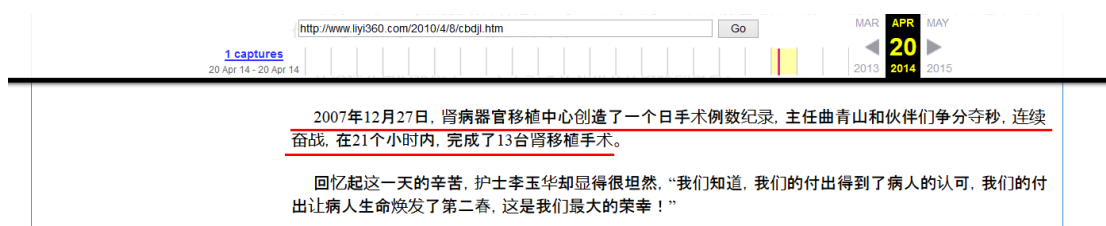

### World Organization to Investigate the Persecution of Falun Gong (WOIPFG)

To investigate the criminal conduct of all institutions, organizations, and individuals involved in the persecution of Falun Gong; to bring such investigation, no matter how long it takes, no matter how far and deep we have to search, to full closure; to exercise fundamental principles of humanity; and to restore and uphold justice in society

Henan and a Key Laboratory of Kidney Transplantation of Zhengzhou City. It claims to have ranked 2nd on kidney transplantation in China from 2006 to 2008<sup>6</sup>.

#### **2. A large number of transplants per day and the busy of doctors shows that the real number of transplants in the hospital was huge.**

On Dec. 27, 2007, a team led by Qu Qingshan, the director of the Nephrology and Organ Transplantation Center, completed 13 kidney transplant surgeries within 21 hours<sup>7</sup>. According to an article on "Chinese Etiquette Training Network" issued April, 2010", around the Chinese New Year, Doctor Xing Li of Kidney Transplant Center had been working very hard for consecutive days. He had to do the operation from 2 or 3 AM until next morning. His right eye suffered from conjunctivitis as a result. Since he had to do operations every night, he had to ask his assistants to help cleaning. <sup>8</sup>

“On Dec. 27, 2007, the Kidney Transplant Center set a record for the number of surgical operations in a single day. The team led by Director Qu Qingshan completed 13 kidney transplant operations by a continuous fight of 21 hours.”

Figure 1 Snapshot of Chinese Etiquette Training Network

#### **3. Liver Surgery Department was capable of performing more than 20 emergency liver transplants every year.**

According to public data on the official website of Zhengzhou People's Hospital in 2011, the Liver Surgery Department of the hospital completes nearly 100 liver transplants and more than 20 emergency liver transplants with acute liver failure every year<sup>9</sup>. At the same time, the hospital also carried out the first small bowel transplant in Henan Province, and was actively researching abdominal organ cluster transplantation.

#### **4. Based on the large bed volume, there is a large number of liver and kidney transplantation each year.**

According to the online public data in 2011, the Hepatobiliary Surgery Department of the hospital is an advantageous discipline and a key department in Henan Province, with a total of 52 beds<sup>10</sup>. The Nephropathy Organ Transplant Department has 90 beds open<sup>11</sup>.

#### **5. A strong team of liver and kidney transplant surgeons who conducted large number of transplants**

There are 16 doctors and 60 nurses<sup>12</sup> in the Kidney Organ Transplant Department. There are more than 40 medical and nursing staff in the department of Liver Surgery, including 5 with senior professional titles and 18 with doctor's and master's degrees<sup>13</sup>. Multiple liver and kidney transplantation teams can be formed.

## 追查迫害法輪功國際組織 ( 追查國際 )

### World Organization to Investigate the Persecution of Falun Gong (WOIPFG)

To investigate the criminal conduct of all institutions, organizations, and individuals involved in the persecution of Falun Gong; to bring such investigation, no matter how long it takes, no matter how far and deep we have to search, to full closure; to exercise fundamental principles of humanity; and to restore and uphold justice in society

Chen Guoyong: According to the screenshot of the website in 2015, as the vice president and director of the Liver transplantation surgery department of Zhengzhou People's Hospital, he has completed more than 500 cases of combined resection of large organs, more than 500 cases of kidney transplantation<sup>14</sup>, more than 300 cases of liver transplantation, and dozens of cases of liver kidney and pancreas kidney transplantation<sup>15</sup>. Chen was visiting scholar in Japan and South Korea, a trainee in Tianjin First Central Hospital and Shanghai Changzheng Hospital for multi-organ combined transplantation and living liver transplantation; He was employed as the deputy director of the Organ Transplantation Center of PLA 309 Hospital<sup>16</sup>.

Qu Qingshan: Director of the Nephrotic Organ Transplantation Center. According to the public information in 2013, Qu Qingshan himself performed more than 1,000 allograft kidney transplants, more than 150 living kidney transplants, and the first liver-kidney combined transplant in Henan Province<sup>17</sup>.

6. The new organ transplant building to be open soon

Zhengzhou People's Hospital organ transplant center has a special transplant building for transplant patients<sup>18</sup>. In December 2022, according to multiple news sources, the new organ transplant building of Zhengzhou People's Hospital is to be open soon<sup>19</sup>.

**III. Telephone investigation showed an abundant donor source can make the waiting time for a donor as short as 2 to 3 days and with a lot choice, including organs from Falun Gong practitioners; the hospital has a large number of transplants, a high turnover rate of beds and additional beds.**

**1. Organ donors can be young and good**

**1 Survey object: Chen Yongfeng, Doctor of Zhengzhou People's Hospital**

**Investigation time: June 26, 2015**

**Summary of survey results:**

The liver transplantation of our hospital is the best in Henan. We even performed a few liver transplants today, two liver transplants; "The donor is from our local. The quality can be guaranteed; if you want to do it and have plenty of time, **we can choose a good, younger liver. We have plenty of donors, so you can also choose the young and good ones**, but I cannot promise you that in the future." (Recording 1. Download: [MP3](#), Manuscript download: [pdf 45](#))<sup>20</sup>.

**2. Short waiting time**

**Subject of investigation:** Doctor on Duty of Hepatobiliary Surgery, Zhengzhou People's Hospital

**Investigation time:** June 25, 2015 (8637163933151)

**Summary of the survey results:** The doctor on duty for hepatobiliary surgery said: "Waiting for donors generally takes 3-2 days, and nearly 10 days for the unluckier. The cost is about 500,000 RMB Yuan. We have a lot of donors." When asked about the reason for a fast matching time, and the origin of donors, **the doctor replied: "This thing... um... No comment, no comment, don't ask, don't ask these things.** You can come any day, go directly to our ward, usually one or two (operations) can be assured. "(Recording 2. Download: [MP3](#), Manuscript download: [pdf 48](#))<sup>21</sup>.

**Subject of investigation:** Chen Jianbin, a liver transplant surgeon at Zhengzhou People's Hospital.

**Investigation time:** September 25, 2015.

**Summary of survey results:** When responded a telephone survey from WOIPFG, the answer definitely confirmed that the waiting time for liver transplantation can be as quick as 2-3 days, and liver transplantation can be done in ten day to a half month at most.

## 追查迫害法輪功國際組織 ( 追查國際 )

### World Organization to Investigate the Persecution of Falun Gong (WOIPFG)

To investigate the criminal conduct of all institutions, organizations, and individuals involved in the persecution of Falun Gong; to bring such investigation, no matter how long it takes, no matter how far and deep we have to search, to full closure; to exercise fundamental principles of humanity; and to restore and uphold justice in society

(Download this recording 3: [MP3](#) Manuscript details: [Appendix 11](#))<sup>22</sup>

**Subject of investigation:** Doctor of Liver Transplantation Department of Zhengzhou People's Hospital<sup>23</sup>  
Investigation time: February 26, 2019

**Summary of the survey results:** The telephone survey made it clear that (liver transplantation) should be available to within one month.

(Recording 4 download: [MP3](#), manuscript download: [pdf 008](#))

**Subject of investigation:** Nurse in the Kidney Transplantation Department of Zhengzhou People  
Investigation time: April 17, 2019<sup>24</sup>

**Summary of investigation results:** In response to an inquiry from WOIPFG investigators, she replied that more than 200 cases can be formed a year, some are done within just a few days of waiting, and there are someone waited for three to four months, or five to six months.

(Recording 5 download: [MP3](#), manuscript download: [pdf 043](#))

### 3. The doctors of the hospital admitted to using Falun Gong practitioners' organs and are still using them

**Subject of investigation:** Miao Shuzhai, Chief Surgeon of the Organ Transplantation Center of Zhengzhou People's Hospital<sup>25</sup>

Investigation time: November 06, 2018 (13938277351)

#### Summary of survey results:

Miao Shuzhai: "(Arranging a liver transplantation) generally takes one or two weeks, or to one month";

Investigator: About the donors you are currently using, you are using that kind of healthy donors, or the donors from Falun Gong, aren't you?

Miao Shuzhai: Right, right, correct!

(Recording 6. Play and download [MP3](#), please see [6.pdf](#) for the complete recording record)

(The live video (4) of the WOIPFG investigating on CCP's live organ harvesting)<sup>26</sup>

**Subject of investigation: Qu Qingshan**, director of the Organ Transplantation Center of Zhengzhou People's Hospital, **did not deny that the organs of Falun Gong practitioners were still in use**

Investigation time: November 06, 2018 (13703717386)

#### Summary of survey results:

Investigator: Another question is about your donor. The donor you are using now is till from Falun Gong (practitioners), the healthy donors, aren't you?

Qu Qingshan: Ah, all of them, all of them are healthy.

(Recording 7. Play and download [MP3](#), please see [pdf 17](#) for the complete recording)

### 4. The hospital has a large number of transplants, a high turnover rate of beds and additional beds

**Subject of investigation:** Wang Bing, liver surgeon, Zhengzhou People's Hospital

Investigation time: June 28, 2015, (+86-15038199893)

#### Summary of survey results:

In a telephone survey conducted by WOIPFG investigators, he responded:

## 追查迫害法輪功國際組織 ( 追查國際 )

### World Organization to Investigate the Persecution of Falun Gong (WOIPFG)

To investigate the criminal conduct of all institutions, organizations, and individuals involved in the persecution of Falun Gong; to bring such investigation, no matter how long it takes, no matter how far and deep we have to search, to full closure; to exercise fundamental principles of humanity; and to restore and uphold justice in society

You will get a liver donor in the second day; When we did well in the past, the number of transplants ranked second in the country; In the recent few years, the number of transplants was still ranked in the top 5 in the country. 2 cases this week and 3 last week; everybody knows that we have done a good job, and the donor jobs have never let up. We have network across the whole country, very solid relations; our hospital does a lot every year. To be honest, our hospital does not rank well in the country, but our organ transplantation is marvelous done! Very competitive.

(Download this recording 8: [MP3](#) Manuscript details: [Appendix 7](#))<sup>27</sup>

**Subject of investigation:** Department of Organ Transplantation, Zhengzhou People's Hospital, Henan  
Investigation time: October 18, 2017 (+86 + 37167077512)

#### Summary of survey results:

During the investigation, it was stated that there are 60 beds and 67 patients have been accommodated, all of whom are transplant patients. If there is a donor, several cases can be done a day. (Investigation time: 2017-10-18).....<sup>28</sup>

(Recording 9 playback and download [MP3](#), please see the [pdf 159](#) for the complete recording record)

**Subject of investigation:** Medical Office of Transplantation Department, Zhengzhou People's Hospital  
Investigation time: October 23, 2017 (+86+37167077339)

**Summary of investigation results:** Kidney transplant doctor Li told WOIPFG investigators: It is generally more than 200 or 300 (cases) in a year. The cost for donor is now basically 150,000 to 160,000 RMB Yuan. ....<sup>29</sup>

(Recording 10 playback and download [MP3](#); complete recording record please see [pdf10](#))

**Subject of investigation:** Nurses of the Transplantation Department, Zhengzhou People's Hospital  
Investigation time: January 11, 2018 (+8637167077512)

#### Summary of the survey results (From the nurses):

When she was interviewed by the tracing international telephone survey, she answered: There were less than 200 kidney (transplantation) cases in 2017, which is not as much as before. The liver and kidney (transplantations) are combined in one ward, with more than 70 beds, including 100 extra beds;

The investigator asked: Do you have a full schedule of work every month?

The answered: yes: Yes, yes! (Investigation time: 2018-01-11).....<sup>30</sup>

(Recording 11 playback and download [MP3](#), please see the [pdf11](#) for the complete recording record)

**Subject of investigation:** Nurse of Organ Transplantation Department, Zhengzhou People's Hospital  
Investigation time: April 10, 2018 (+8637167077512)

#### Summary of the survey results:

Nurse: There were more than 200 kidney transplants and 60 to 70 liver transplants last year. We have fewer liver transplant wards than kidney transplant wards. So, the bed vacancies are tight. We have more than 70 beds here at the general transplantation. (Investigation time: 2018-04-10).....<sup>31</sup>

(Recording 12 playback and download [MP3](#), please see the [pdf12](#) for the complete recording record)

**Subject of the investigation:** Clinical transplant doctor of Zhengzhou People's Hospital  
Investigation time: January 11, 2018

#### Summary of the survey results of WOIPFG investigation to the doctor:

## 追查迫害法輪功國際組織 ( 追查國際 )

### World Organization to Investigate the Persecution of Falun Gong (WOIPFG)

To investigate the criminal conduct of all institutions, organizations, and individuals involved in the persecution of Falun Gong; to bring such investigation, no matter how long it takes, no matter how far and deep we have to search, to full closure; to exercise fundamental principles of humanity; and to restore and uphold justice in society

Doctor: 167 cases of kidney and 35 cases of liver were done in last year were done, and add up to more than 200 cases altogether. We carried out the most in the year before last year, with more than 200 cases done. We have more than 200 beds, you can't say it is a small number, right? but we still had to arrange (additional patients) in the corridor. With 50 beds available, but 70 to 80 patients were admitted. The Brain Death Center is jointly managed by the Henan Provincial Red Cross Society and the Henan Provincial Department of Health; (As to the question about) the number of donors, this is mainly (handled) in the hospital, and each hospital has the operation of itself. (Investigation time: 2018-01-11).....<sup>32</sup>  
(Recording 13 playback and download [MP3](#) , please see the [pdf 13](#) for the complete recording record)

**Subject of investigation:** Clinic Nurse in the Kidney Transplant Department of Zhengzhou People's Hospital<sup>33</sup>  
Investigation time: March 4, 2019

#### Summary of survey results of the WOIPFG investigation:

Nurse: Recently, more kidney transplants have been done. The turnover rate of patients is relatively fast, and there is no room for the time being. You might be accommodated with an extra bed.  
We do about 200 cases a year.  
(Recording 14 download: [MP3](#), manuscript download: [pdf 011](#))

#### IV. List of responsible persons:

##### ZZRM001 Qu Qingshan

Sex: male

#### Personal profile:

Director of the department, chief surgeon. Vice Chairman of Henan Provincial Blood Purification Management Professional Committee, Deputy Chairman of Henan Provincial Organ Transplant Professional Committee.

Graduated from Henan Medical University. Has been engaged in urology kidney transplantation and liver transplantation. Carried out the first living donor kidney transplantation and combined liver-kidney transplantation in Henan province.  
Carried out more than 1,000 cases of allogeneic kidney transplantation and 150 cases of living donor kidney transplantation. More than 10 liver transplants have been successfully carried out in the past three years<sup>34</sup>.

##### ZZRM002 Chen Guoyong

Sex: male

Date of birth: September 9, 1971<sup>35</sup>.

**Personal Profile:** Deputy Dean and Chief Surgeon of Zhengzhou People's Hospital, Director of Liver Transplantation, Hepatobiliary and Pancreatic Surgery, Master degree.

Corresponding member of the editorial board of "Organ Transplantation" magazine; deputy chairman of the Henan Provincial Society of Organ Transplantation; associate professor of Southern Medical University and was once employed as the deputy director of the Organ

Transplantation Center of PLA 309 Hospital<sup>36</sup>.

Graduated from Henan Medical University. Has been engaged in urology kidney transplantation and liver transplantation. Carried out the first living donor kidney transplantation and combined liver-kidney transplantation in Henan province.

In 2010 and 2012, he was a visiting scholar at Kyoto University School of Medicine in Japan and Asan Medical Center in South Korea for academic research on hepatobiliary, pancreatic and splenic diseases, and demonstrating the surgical of living donor liver transplantation<sup>37</sup>.

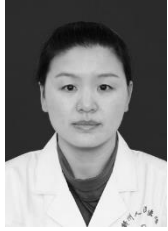

## 追查迫害法輪功國際組織 ( 追查國際 )

### World Organization to Investigate the Persecution of Falun Gong (WOIPFG)

To investigate the criminal conduct of all institutions, organizations, and individuals involved in the persecution of Falun Gong; to bring such investigation, no matter how long it takes, no matter how far and deep we have to search, to full closure; to exercise fundamental principles of humanity; and to restore and uphold justice in society

Complete more than 500 cases of combined large organ extraction, more than 500 cases of kidney transplantation, more than 100 cases of liver transplantation, 10 cases for both combined liver-kidney transplantation and combined pancreas-kidney transplantation<sup>38</sup>.

#### ZZRM003 Xing Li

Sex: female

Date of birth: November 12, 1970<sup>39</sup>.

**Personal Profile:** Deputy director of the Organ Transplantation Center, associate chief surgeon

Graduated from Henan Medical University. Has been engaged in urology kidney transplantation and liver transplantation. Carried out the first living donor kidney transplantation and combined liver-kidney transplantation in Henan province<sup>40</sup>.

#### ZZRM004 Miao Shuzhai, Sex: male.

**Personal Profile:** Deputy Director of Kidney Transplantation Department, Chief Surgeon.

Graduated from Henan Medical University. Has been engaged in urology kidney transplantation and liver transplantation. Carried out the first living donor kidney transplantation and combined liver-kidney transplantation in Henan Province.

Engages in allogeneic kidney transplantation, living donor kidney transplantation from relatives, combined liver-kidney transplantation, combined pancreas-kidney transplantation, guiding patients to rationally use immunosuppressive agents, and handling various postoperative complications<sup>41</sup>.

#### ZZRM005 Jiang Xin

Sex: male

**Personal profile:** Attending surgeon of Kidney Transplantation Department.

Graduated from Henan Medical University. Has been engaged in urology kidney transplantation and liver transplantation. Carried out the first living donor kidney transplantation and combined liver-kidney transplantation in Henan province<sup>42</sup>.

#### ZZRM006 Wang Kai

Sex: male

**Personal profile:** Attending surgeon of Kidney Transplantation Department.

Graduated from Henan Medical University. Has been engaged in urology kidney transplantation and liver transplantation. Carried out the first living donor kidney transplantation and combined liver-kidney transplantation in our province.

In recent years, has participated in the completion of more than 500 kidney transplant operations. In the past 5 years, has performed more than 300 kidney transplant operations, and has performed more than 100 combined liver and kidney operations<sup>43</sup>.

#### ZZRM007 Zhang Yanxuan

Sex: male

Date of birth: December 17, 1971<sup>44</sup>.

**Personal profile:** Deputy director of the Kidney Disease Center, attending surgeon. A member of the Organ Transplant Society of the Henan Medical Association; a member of the Transplant Immunization Branch of the Henan Immunological Society.

To investigate the criminal conduct of all institutions, organizations, and individuals involved in the persecution of Falun Gong; to bring such investigation, no matter how long it takes, no matter how far and deep we have to search, to full closure; to exercise fundamental principles of humanity; and to restore and uphold justice in society

Graduated from Henan Medical University. Has been engaged in urology kidney transplantation and liver transplantation. Carried out the first living donor kidney transplantation and combined liver-kidney transplantation in Henan province.

Has been engaged in clinical and scientific research on organ transplantation, including allogeneic kidney transplantation, living donor kidney transplantation from relatives, combined liver and kidney transplantation, combined pancreas-kidney transplantation, guiding patients to rationally use immunosuppressive agents, and managing various postoperative complications<sup>45</sup>.

#### **ZZRM008 Yang Lei<sup>46</sup>**

Sex: female

Date of birth: November 1, 1969.

**Personal profile:** Deputy Chief Surgeon of Kidney Transplantation Department.

Graduated from Henan Medical University. Has been engaged in urology kidney transplantation and liver transplantation. Carried out the first living donor kidney transplantation and combined liver-kidney transplantation in Henan Province, and participated in the management of patients after kidney transplantation<sup>47</sup>.

#### **ZZRM009 Shen Beili**

Sex: female

**Personal profile:** Deputy Chief Surgeon of Kidney Transplantation Department.

Graduated from Henan Medical University. Has been engaged in urology kidney transplantation and liver transplantation. Carried out the first living donor kidney transplantation and combined liver-kidney transplantation in Henan province.

Carry out integrated treatments such as kidney transplantation for patients with uremia, participate in the perioperative management of kidney transplant patients, and treat complications after kidney transplantation<sup>48</sup>.

#### **ZZRM010 Wang Zhun**

Sex: male

**Personal profile:** Deputy Dean, Deputy Chief Surgeon.

Graduated from Henan Medical University. Has been engaged in urology kidney transplantation and liver transplantation. Carried out the first living donor kidney transplantation and combined liver-kidney transplantation in our province.

In 2004, took the lead in carrying out liver transplantation in Zhengzhou region<sup>49</sup>.

#### **ZZRM011 Chen Yongfeng**

Sex: male

**Personal profile:** Hepatobiliary surgeon, transferred to the liver transplant ward of Henan Provincial People's Hospital<sup>50</sup>.

Graduated from Henan Medical University. Has been engaged in urology kidney transplantation and liver transplantation. Carried out the first living donor kidney transplantation and combined liver-kidney transplantation in Henan province.

Completed more than 300 cases of large organ joint extraction and participated in more than 200 cases of liver transplantation<sup>51</sup>.

#### **ZZRM012 Jiang Jinfa**

Sex: male.

**Personal profile:** Attending Surgeon of Liver Surgery Department.

Graduated from Henan Medical University. Has been engaged in urology kidney transplantation and liver transplantation. Carried out the first living donor kidney transplantation and combined liver-kidney transplantation in Henan Province.

Engaged in diagnosis and treatment of liver transplantation and other diseases<sup>52</sup>.

#### **ZZRM013 Yang Zaizhen**

**Sex:** male

**Personal profile:** Chief Surgeon, director of Heart Center, deputy director of General Surgery Department and director of the Cardiac Surgery Department

Graduated from Henan Medical University. Has been engaged in urology kidney transplantation and liver transplantation. Carried out the first living donor kidney transplantation and combined liver-kidney transplantation in Henan province.

Engaged in the research of heart transplantation technology<sup>53</sup>.

#### **ZZRM014 Zhang Xianghui**

**Sex:** male

**Personal profile:** Deputy Chief Surgeon of Cardiovascular Surgery, Division Secretary.

Graduated from Henan Medical University. Has been engaged in urology kidney transplantation and liver transplantation. Carried out the first living donor kidney transplantation and combined liver-kidney transplantation in Henan province<sup>54</sup>.

#### **ZZRM015 Wang Yanqing**

**Sex:** female

**Date of birth:** June 19, 1969.

**Personal profile:** Deputy Chief Surgeon of Ophthalmology.

Graduated from Henan Medical University. Has been engaged in urology kidney transplantation and liver transplantation. Carried out the diagnosis and treatment of the first living donor kidney transplantation, combined liver-kidney transplantation and corneal transplantation in our province<sup>55</sup>.

#### **ZZRM016 Liu Ping**

Sex: male

**Personal profile:** Deputy Director of Ophthalmology, Chief Surgeon, Part-time Professor of Southern Medical University.

Graduated from Henan Medical University. Has been engaged in urology kidney transplantation and liver

## WOIPFG's Investigative Report on the Alleged Organ Harvesting of Living Falun Gong Practitioners at the First Affiliated Hospital of Zhengzhou University and Its Staff Members Suspected of Participation

Organization: The First Affiliated Hospital of Zhengzhou University  
Address: 1 East Jianshe Road, Zhengzhou City, Henan Province, China  
Telephone number: +86-371-66913114

### Preface

The First Affiliated Hospital of Zhengzhou University Organ Transplant Center is the leading hospital of many organ transplant hospitals in Henan, with liver and kidney transplant volume in the forefront of the country for many years. Often the liver donor comes in the middle of the night, and the source of the organ is unknown. In partner with Shanghai Renji Hospital, which was a major unit in live organ harvesting in 2018, the hospital established the national regional medical center for organ transplantation in Henan, seeking the great development of organ transplantation.

### I. Hospital Overview

The First Affiliated Hospital of Zhengzhou University became a provincial and ministerial hospital in 2012. It is a third level first class, large comprehensive hospital, which is also the largest hospital in China. There are 95 clinical departments and 239 hospital wards with nearly 10,000 beds. The hospital has 12,409 working employees, 11,168 medical and health care technicians, including 523 with senior titles, 899 with associate titles, 4,733 with intermediate titles, among which 1,647 with doctoral degrees and 2,727 with master's degrees; 1 academician and 22 specially appointed academicians<sup>73</sup>.

### II. Organ Transplant Center

The Organ Transplant Center of the hospital is an advantageous key department. The director of the Transplant Center, Zhang Shuijun, was promoted to be the deputy secretary of the Party Committee of the hospital. The number of liver and kidney transplants in the transplant center ranks among the top hospitals in China, among which the number of pediatric kidney transplant cases ranks the Number 1 among domestic hospitals for four consecutive years. The First Affiliated Hospital of Zhengzhou University is also the organ transplant center of Henan Province<sup>74</sup>. In 2017, the First Affiliated Hospital of Zhengzhou University ranked third in the country in terms of liver transplantation, fourth in kidney transplantation, and children's kidney transplantation ranked first in the country for 4 consecutive years<sup>75</sup>.

#### 1、Kidney Transplantation Department

The department includes specialized outpatient clinic, inpatient department with tissue matching laboratory and hemodialysis center. The number of kidney transplants has been the first in Henan Province for many years. In 2015 it completed 230 cases of kidney transplants, which ranked the fifth in China.

The department has a team of more than 40 staff members of transplant surgeons, nurses, examiners and organ donation coordinators, including 7 surgeons, 2 professors, 2 associate professors and 2 postgraduate instructors. There are 47 open beds and 10 monitoring beds in the department<sup>76</sup>.

The children's kidney transplantation in the First Affiliated Hospital of Zhengzhou University ranks first in the country for many years in a row. In 2021, the Kidney Transplant Center completed 109 cases of children's kidney transplants, making it the first children's kidney transplant center that completed more than 100 kidney transplants in a single year<sup>77</sup>.

## 追查迫害法輪功國際組織 ( 追查國際 )

### World Organization to Investigate the Persecution of Falun Gong (WOIPFG)

To investigate the criminal conduct of all institutions, organizations, and individuals involved in the persecution of Falun Gong; to bring such investigation, no matter how long it takes, no matter how far and deep we have to search, to full closure; to exercise fundamental principles of humanity; and to restore and uphold justice in society

## 2、Hepatobiliary and Pancreatic and Liver Transplantation Surgery

The Department of Liver Transplantation Surgery is the liver transplantation center in Henan Province. The hepatobiliary-pancreatic and liver transplantation surgery actually operates more than 450 beds. There are 18 professors, 10 associate professors and more than 30 attending surgeons, all with doctoral or master's degrees<sup>78</sup>.

## 3. Media reported that the transplant volume in a single day is amazing

*Dahe Healthy Newspaper* reported on March 27, 2014: the hospital's Liver Transplant Center completed 4 liver transplants successfully on the same day, for 2 patients with liver cirrhosis and 2 with liver cancer.<sup>79</sup>

According to a report on *Henan Daily* in 2019: From March 26 to 27, a total of 13 organ transplants were completed in the River Hospital area of Zheng University First Affiliated Hospital, including 8 kidney transplants, 3 liver transplants and 2 lung transplants<sup>80</sup>.

## 4. Super-short waiting time for transplantation, emergency transplantation

According to the report from the hospital's official website, that on March 4, 2020, Professor Zhao Gaofeng of Thoracic Surgery as leading surgeon, working with the team of Anesthesiologists led by Professor Wang Yong, the team of ECMO led by Professor Li Jun, and the organ transplantation team from the operating room, completed the hospital's **fourth** case of emergency rescue operation of lung transplant surgery. The patient was admitted to the hospital on February 29, 2020, and a matching donor lung was found in Qingdao, Shandong, and the donor organ was harvested at 5 am on March 4, 2020<sup>81</sup>. That is to say, before this operation, the hospital has completed 3 cases of emergency lung transplantation.

According to the report from the official website of the Zhengzhou University, that in April 2020, the First Affiliated Hospital of Zhengzhou University completed three cases of emergency lung transplantation within 24 hours<sup>82</sup>.

## III. Establishment of National Regional Medical Center for Organ Transplantation in Henan

On March 22, 2018, the Branch of Central China Organ Transplantation Center was inaugurated at the East Campus of the First Affiliated Hospital of Zhengzhou University. The center is jointly built by two hospitals, the First Affiliated Hospital of Zhengzhou University and Shanghai Renji Hospital. Henan is a province with large population (having abundant organ donors and recipients), but relatively insufficient high quality medical resources. Shanghai Renji Hospital, on the other hand, is a leader in organ transplantation in China (but lacks organ donors and recipients). As the leading hospital for organ transplantation in Henan Province, Zhengzhou University First Affiliated Hospital is also at the forefront of liver and kidney transplantation and surgery volume in China for many years. The combination of the two hospitals, with complementary advantages, is strongly promoting the development of a national regional medical center for organ transplantation in Henan Province<sup>83</sup>.

## IV. Telephone Investigation:

**Summary :Over a thousand cases of liver transplant; donor liver often arrived in the middle of the night so liver transplant conducted overnight; can be done if paying more money; live organ harvest; donor aged about 40 years old; transplantation continued during the pandemic.**

### World Organization to Investigate the Persecution of Falun Gong (WOIPFG)

To investigate the criminal conduct of all institutions, organizations, and individuals involved in the persecution of Falun Gong; to bring such investigation, no matter how long it takes, no matter how far and deep we have to search, to full closure; to exercise fundamental principles of humanity; and to restore and uphold justice in society

**“The patients come here at night and we do the liver transplantation surgeries overnight. That is very common here.”**

**Subject of Investigation:** Li Gongquan, liver transplantation doctor of the First Affiliated Hospital of Zhengzhou University<sup>84</sup>

**Date:** March 19, 2015 (Phone number: 8637166862192)

On March 19, 2015, Doctor Li Gongquan, a liver transplant surgeon at Zhengzhou University First Affiliated Hospital told a WOIPFG investigator over the phone, “It could be done within a week. If you want, we can do organ matching with him...”

(Recording 1: [MP3](#); Transcript Download: [pdf8](#))

### **Investigative Recording 2. Doctor Liu Yifan in the doctors’ office for liver transplantation at the First Affiliated Hospital of Zhengzhou University, Henan Province<sup>85</sup>**

Phone number: +86 37167967127

Date: 12/16/2016

1. “We did 16 cases [of liver transplantation] in November, and in [December], we did 6 cases.”
2. “This year, from January 1, 2016 to the present, we have done 139 cases.”

(Download Recording [MP3](#); please see [Addendum 46](#))

**Investigation Object:** Dr. Yuan Bai of liver transplantation department

**Investigation Date:** March 3, 2017<sup>86</sup>

Summary: Waiting time for the donor here is quite good, better than that in "Beijing, Shanghai and Guangdong". If lucky, it can be done on the same day; maybe you come and pay more money then it can be done. The donor came to us from a state’s special agency, no one knows when to have it.

Investigator: Nowadays if spend more money, can you find that kind of donor from prison?

Dr. Yuan Bai: Not anymore, the state has banned it all and not allowed to use it. Very interesting, Ah!

#### **Investigation Object: Dr. Sun Ran of liver transplantation department<sup>89</sup>**

Investigation Date: July 31, 2017 (Phone #: +86-15890608008)

Summary: Nearly 100 cases of liver transplantation were done in the first half of the year. Those with blood type that is easy to find a match may be done in a few days. I'm not clear about the source of the organ, some are donated from critical ICU patients.

(Download [MP3](#) of the recording 6, please see [pdf 6](#) for full transcript)

#### **Investigation Object: A doctor at liver transplant center**

Investigation date: October 30, 2017<sup>90</sup>

Summary:

1. This year what we have done will break two hundred cases very soon, the case done last Saturday is the one hundred and ninetieth case.

2. Someone who came from Shenzhen, Guangdong, said our hospital has more liver source here, probably this is true. The more the liver donors available here, the shorter waiting time will be.

3. As long as our hospital has applied for and the liver becomes available, we do it even if it's in the middle of the night. Most of the surgeries are done in the middle of the night, because the liver comes in the mid-night. If you only do it during daytime working hours, how can you do so many surgeries? Our professors here just do it whenever a liver becomes available!

4. Last year, a new hospital was opened in the new district of the East Zhengzhou, and it is estimated that the liver transplant can be carried out in the East district next month.

Professors do surgeries on both hospitals. They all run between two sides.

5. The corridor and stairwell in the old district are full of extended beds, too many patients, not enough beds to stay! Anyway, now a ward with regular and extended beds can basically receive more than a hundred patients.

6. Zhang Jiakai and Guo Wenzhi, two of them, they both engaged in liver transplantation.

(Recording 7. Download: [MP3](#), please see [pdf 7](#) for full transcript)

#### **Investigation Object: A doctor at liver transplant doctor's office of the First Affiliated Hospital**

Zhengzhou University

Investigation time: January 28, 2018 (Phone #: +86-37167967127)

Summary: More than 310 cases of liver transplants were conducted last year, and 14 cases were done so far in this year<sup>91</sup>.

(Recording 8. Download: [MP3](#), please see [pdf 8](#) for full transcript)

#### **Investigation Object: Dr. Yang Han of liver transplant<sup>92</sup>**

Investigation Date: 2018-04-25 (Phone #: +86-37166279137)

## 追查迫害法輪功國際組織 ( 追查國際 )

### World Organization to Investigate the Persecution of Falun Gong (WOIPFG)

To investigate the criminal conduct of all institutions, organizations, and individuals involved in the persecution of Falun Gong; to bring such investigation, no matter how long it takes, no matter how far and deep we have to search, to full closure; to exercise fundamental principles of humanity; and to restore and uphold justice in society

---

Summary: More than 90 cases have been done this year, and it takes more than a month to do a liver transplant; liver donor, used to be a death row prisoner; now it's from a brain-dead patient, which is to say that his heart keeps beating and his organs are always in a state of perfusion<sup>93</sup>.

(Recording 9. Download: [MP3](#), see [pdf 9](#) for full transcript)

#### **Investigation Object: A nurse at the ward of the kidney transplantation department of the First Affiliated Hospital of Zhengzhou University**

Investigation Date: May 3, 2018 (Phone #: +86-37166862191)

Summary: Nearly 400 kidney transplants were done last year (2017).

Four kidney transplant operations were performed tonight.<sup>94</sup>

(Recording 10. Download: [MP3](#); Transcript Download: [pdf 163](#))

#### **Investigation Object: Dr. Yang Han from the Liver Transplant center<sup>95</sup>**

Investigation Date: June 2, 2018 (Phone #: +8637166279137)

Summary: Last year there were more than 200 cases, this year there have been 110 cases already. Type A (blood donor) is not easy to find. The estimated waiting time is about two weeks to one month. Many of the directors in Shanghai have cooperation with us, because their patients can't wait too long to get the liver donors. They all bring their patients to Henan to do it. The nationwide rank of transplant volume: the first one is Renji, the second one is Zhejiang University, the third is us, the fourth may be Xiangya. Tianjin First Central Hospital is the largest one, however it has no data, because they have a part of data that is not released, so there is no way to know how many (cases) it conducted after all.

(Recording 11. Download: [MP3](#); Transcript Download: [pdf 80-2](#))

#### **Investigation Object: Doctor-on-duty at the Liver Transplant Department, the First Affiliated Hospital of Zhengzhou University, Henan Province<sup>96</sup>**

Investigation Date: June 25, 2018

Summary:

Investigator: About a thousand cases in a year?

Doctor: A lot of them, ah~, Dr. Yang should know more about this.

#### **Investigator: Did you have about a thousand cases of liver transplants last year?**

Doctor: Ah ~ it should be ~, if not a thousand cases, at least several hundred cases.

Investigator: Can you find a relatively younger aged donor?

**Doctor: Generally speaking, (donors) aged around 40. They are mainly young people."**

(Recording 12. Download: [MP3](#); Transcript Download: [pdf 48](#))

#### **Investigation Object: A nurse in the kidney transplant ward of the First Affiliated Hospital of Zhengzhou University<sup>97</sup>**

Investigation Date: February 22, 2019 (Phone #: +86-371-66862191)

Summary: We are ranked in the top five nationwide. Nearly 400 cases of kidney transplants were done last year. We have abundant donors. We don't even stop for Chinese New Year, no holidays. We are quite busy now, today we have kidney available for matching.

(Recording 13. Download: [MP3](#), Manuscript Download: [pdf007](#))

Investigation Date: April 9, 2020 (Phone #: +86-37167967127)

#### Summary:

1. It is the designated hospital (accepting patients diagnosed positive with CCP virus).
2. If you would like to come, make an appointment with our Director Guo Wenzhi every Thursday morning.
3. The general waiting time is not soon, estimated to be more than two weeks.
4. The hospital nucleic acid test costs more than 300 Yuan, at one's own expense.
5. Zhang Shuijun is retired, but he is still working in our department, so you can make an appointment with him.

(Recording 20. download: [MP3](#), manuscript download: [pdf030](#))

#### **V: List of responsible persons:**

**ZZDX001 Zhang Shuijun, Male. Date of birth: April 1958. Han nationality, native of Yiyang, Henan Province<sup>105</sup>.**

**Personal Profile:** Professor of Hepatobiliary and Pancreatic Surgery, Chief Surgeon, having the title of National Top 100 Excellent Doctors, Doctoral Supervisor, Vice President of the First Affiliated Hospital of Zhengzhou University.

Graduated from Henan Medical University in 1982.

Once engaged in advanced studies in hepatobiliary and pancreatic surgery and organ transplantation techniques at Tokyo Medical University and Mary's Hospital of the University of Hong Kong in Japan.

Successfully performed the first case of clinical liver transplant in Henan Medical University in 1997, which was an earlier liver transplant in China. In 1998, he successfully performed the first case of combined pancreas-kidney transplant in Henan Province. Since 2005, he has performed more than 50 consecutive cases of in-situ liver transplants using the advanced modified backpack liver transplantation technique based on thorough preparation<sup>106</sup>.

**ZZDX002 Feng Guiwen, Male.**

**Personal Profile:** Associate Chief Surgeon, Professor and Director of Kidney Transplantation. Deputy director of the Organ Transplantation Branch of Henan Medical Association and the editorial board member of "Organ Transplantation" Journal. Graduated and received a master's degree in urology from Zhengzhou University in 2002 and a doctoral degree in kidney transplantation from Southern Medical University in 2005. Worked and studied at the Organ Transplantation Center of Oslo University Hospital in Norway as a visiting scholar in 2011.

He has been engaged in urology, kidney transplantation and blood purification for more than 25 years, and has performed more than 1000 cases of kidney transplants and more than 30 cases of DCD kidney transplants for children. He still holds the records of the "kidney transplantation for the oldest (79 years old) recipient in Henan, the oldest (76 years old) donor in China and the youngest (4 years old) and the lightest body weight (10.7 kg) recipient in China". He specializes in liver transplantation as well as combined pancreas-kidney transplantation and routine kidney transplantation and clinical kidney transplant HLA matching<sup>107</sup>.

## **WOIPFG's Investigative Report on the Alleged Organ Harvesting of Living Falun Gong Practitioners at the Third Affiliated Hospital of Sun Yat-Sen University and Its Staff Members Suspected of Participation**

Address: No. 600, Tianhe Road, Tianhe District, Guangzhou

## 追查迫害法輪功國際組織 ( 追查國際 )

### World Organization to Investigate the Persecution of Falun Gong (WOIPFG)

To investigate the criminal conduct of all institutions, organizations, and individuals involved in the persecution of Falun Gong; to bring such investigation, no matter how long it takes, no matter how far and deep we have to search, to full closure; to exercise fundamental principles of humanity; and to restore and uphold justice in society

On May 23, 2007, this hospital was designated by the Ministry of Health to carry out liver transplantation,<sup>122</sup> and was promulgated by Guangdong Province in 2004 as a Grade A hospital for liver and kidney transplantation.<sup>123</sup> Doctors from Guangxi Minzu Hospital testified that the Third Affiliated Hospital of Sun Yat-sen University could find such Falun Gong donors.<sup>124</sup> This hospital participated in criminal activities of killing and stealing organs. Telephone investigations showed: a large number of transplants, many transplant teams, suspected of live organ harvesting. The doctor on duty at the Lingnan Hospital of the Third Affiliated Hospital of Sun Yat-sen University admitted that the source livers must be taken before the donor's death, not after.

#### **I. The liver transplant center of this hospital is a national key discipline of the Ministry of Education and a national key clinical specialty of the Ministry of Health,<sup>125</sup> an affiliated unit of the Guangdong Organ Transplant Research Center, and a national level organ transplant diagnosis, treatment and research center**

The Liver Transplant Center of this hospital is the main unit of the "Liver Transplant Center of Sun Yat-Sen University Organ Transplant Institute" and is also an affiliated unit of the "Guangdong Provincial Organ Transplant Research Center".<sup>126</sup> "Their liver transplantation technology represents the first-class level of liver transplantation in China, and the total number of liver transplantation cases is at the leading level in China. It is currently one of the fastest-growing and best-growing liver transplant centers in China."<sup>127</sup> The center claims to have built a national-level organ transplantation diagnosis, treatment and research center with outstanding specialties, leading in South China, radiating to Hong Kong, Macao and Southeast Asia, first-class in China and having considerable international influence.<sup>128</sup> The hospital's kidney transplantation also ranks among the top in China and in Guangdong Province.<sup>129</sup>

#### **II. Large quantity of liver and kidney transplantation cases**

##### **1. The large quantity of liver transplantation inferred from the number of hospital beds and the turnover rate of the center**

The Liver Transplantation Center of this hospital has five professional focus areas including liver transplantation, pancreas, small intestine and combined organ transplantation, and transplant intensive care medicine. There are five wards, one transplant radiology interventional diagnosis and treatment group, one transplant ultrasound diagnosis and treatment group, one specialized laboratory and one biological treatment center for organ transplantation, with 113 open beds currently.<sup>130</sup>

##### **2. Chen Guihua personally performed nearly 3,000 liver transplant operations in this hospital**

## 追查迫害法輪功國際組織 ( 追查國際 )

### World Organization to Investigate the Persecution of Falun Gong (WOIPFG)

To investigate the criminal conduct of all institutions, organizations, and individuals involved in the persecution of Falun Gong; to bring such investigation, no matter how long it takes, no matter how far and deep we have to search, to full closure; to exercise fundamental principles of humanity; and to restore and uphold justice in society

The current honorary president of the Third Affiliated Hospital of Sun Yat-sen University and professor of liver transplantation, Chen Guihua, has accumulated experience in nearly 3,000 liver transplantation operations in this hospital.<sup>131</sup>

### 3. The amount of kidney transplants ranks among the top in China and Guangdong Province.

The Research Institute of Organ Transplantation of the Third Affiliated Hospital of Sun Yat-Sen University stated that “the number and quality of kidney transplants are continuously increasing every year. It is expected that the number of kidney transplants in our hospital will reach more than 200 cases per year in the next few years, ranking among the top in China and Guangdong Province.”<sup>132</sup>

### III. The hospital has a strong team of liver and kidney transplant doctors

The list of transplant doctors in this hospital released by WOIPFG in 2014 included 28 liver transplant doctors.<sup>133</sup> Among them, there are 6 chief surgeons, 7 associate chief surgeons, 2 attending surgeons, and 13 others. The hospital has a total of 28 doctors engaged in liver transplantation, which can form multiple liver transplant teams.

According to "Southern Magazine" on February 23, 2006, Chen Guihua, the dean of the Third Affiliated Hospital of Sun Yat-sen University, completed 246 cases of liver transplantation within one year in 2005.<sup>134</sup> On the night of February 10, 2004, four liver transplants were performed simultaneously, with Dean Chen Guihua being the chief surgeon.<sup>135</sup> Chen Guihua completed 246 cases of liver transplantation in one year.

<http://admin.nfyk.com/former/public/article/print.asp?id=1771> Screengrat

从1993年开始第一例肝移植手术至今，陈规划已主持完成了近1000例肝移植，仅2005年一年就完成246例，手术成功率近100%。病人一年生存率约90%，达国际先进水平。也就是说，在陈规划行云流水般的手术刀下，近千生命得到了重生。

广州一位被强行实施了肝移植术的作家曾在中山三院肝移植病友会上哽咽地说：“真的要感谢陈院长，没有他，我今天就不能在这里讲这番话。”原来，作家患肝硬化10年，总觉得肝移植风险太大，坚决不做肝移植术。在他肝病发作，昏迷不醒，内科医生称其生命将以小时计算时，其家属果断做出接受肝移植的决定。手术后30多天，作家便步履轻松地出了院，重新开始了正常的生活和工作。每次谈起死而复生的经历，他都感慨万分。

Figure 2 Snapshot of Southern Magazine's webpage

The Department of Kidney Transplantation currently has 8 full-time kidney transplant clinicians, including 4 with senior professional titles, 3 with intermediate professional titles, and 1 with junior professional titles; 6 of them have doctor's degree, the remaining 2 have master's degree, and 3 have overseas study experience; giving strong technical skills and go talent tier, and the chief surgeons have experience in hundreds of operations.<sup>136</sup>

### IV. Doctors at Guangxi Minzu Hospital testified that the hospital used Falun Gong donors

**Subject of investigation:** Lu Guoping, doctor of Guangxi Minzu Hospital

**Investigation time:** May 22, 2006

In 2008, the Chinese embassy and consulate in Canada released a TV program produced by Hong Kong Satellite TV Chinese Channel, which interviewed some "participants" based on the CCP's denial of live

## 追查迫害法輪功國際組織 ( 追查國際 )

### World Organization to Investigate the Persecution of Falun Gong (WOIPFG)

To investigate the criminal conduct of all institutions, organizations, and individuals involved in the persecution of Falun Gong; to bring such investigation, no matter how long it takes, no matter how far and deep we have to search, to full closure; to exercise fundamental principles of humanity; and to restore and uphold justice in society

organ harvesting from Falun Gong practitioners. In the TV program, Lu Guoping, a doctor at Guangxi Minzu Hospital, admitted that he was the person interviewed over the phone on May 22, 2006, but denied what he had said. However, Lu Guoping has obvious stuttering accent, and the investigation recording is more than half an hour, impossible to manually falsify. Therefore, the video of the CCP's rebuttal has become excellent evidence for identifying the parties involved. Chinese embassy and consulate released the video, effectively testifying the authenticity of the live harvesting.

(Recording 1: [MP3](#); Transcript Download: [pdf37](#))

**Summary of the investigation: Seven or eight kidney transplants per week, and they can do more than a dozen kidney transplants. They have dozens of kidney transplants every month, so they have no worries about organs. "The Third Affiliated Hospital of Sun Yat-sen University can find this kind of Falun Gong donors."<sup>137</sup>**

#### Excerpts:

Question: I know, because your Guangxi Minzu Hospital is good at surgery. That is, can you find the organs of Falun Gong practitioners? If you can find it, then I'll come over. Can you find it?

Answer: It is quite troublesome. If you want to go quickly, I suggest you go to Guangzhou, where organs are very easy to get. Yes, yes, it is the Third Affiliated Hospital of Sun Yat-sen University.

Question: The Third Affiliated Hospital of Sun Yat-sen University. What is the doctor's name?

Answer: Dr. Miao.

Question: Is that so, what they are looking for are also the organs of Falun Gong practitioners? Those are very healthy, right?

Answer: Yes, yes, yes.

Question: For example, the ones you use before, were they from detention centers or prisons?

Answer: Found in prisons. ...

#### V. Participating in criminal activities of killing and stealing organs

According to a report on the cover of *Caijing Magazine* on September 1, 2009, the Third Affiliated Hospital of Sun Yat-sen University participated in the crime of killing homeless people and stealing their organs.<sup>138</sup>

**VI. Telephone investigation shows: large number of transplants, many transplant teams, the third place in the country for liver transplantation, the establishment of Lingnan Hospital, aid to the Third Hospital of Shenzhen, short waiting time and live organ harvesting**

##### 1) Large amount of transplantation

**Subject of Investigation:** Guo Xuekun,<sup>139</sup> a kidney transplant doctor at the Third Affiliated Hospital of Sun Yat-sen University in Guangzhou

**Investigation Date:** January 9, 2016 (Telephone number: +86-13580325531)

**Summary:** One case was just done today, and 7 cases of kidney transplantation have been done in the past few days. The donors sources are local, and the donors are obtained by doctors who perform liver transplantation.

(Recording 2. Download [MP3](#), Manuscript Download: [pdf 2](#))

## 追查迫害法輪功國際組織 ( 追查國際 )

### World Organization to Investigate the Persecution of Falun Gong (WOIPFG)

To investigate the criminal conduct of all institutions, organizations, and individuals involved in the persecution of Falun Gong; to bring such investigation, no matter how long it takes, no matter how far and deep we have to search, to full closure; to exercise fundamental principles of humanity; and to restore and uphold justice in society

**Subject of Investigation:** Doctors of liver transplantation at the Third Affiliated Hospital of Sun Yat-sen University, Guangzhou

**Investigation Date:** October 27, 2017 (Telephone number: +86-2082179622)

**Summary:** Many liver transplants were performed, but I cannot tell you the specific number. Register with a professor and ask.

(Recording 3 download [MP3](#), please see the [pdf 3](#) for the complete recording)<sup>140</sup>

**Subject of Investigation:** Nurse Luo in the liver transplantation ward of the Third Affiliated Hospital of Sun Yat-sen University (Lingnan Hospital)<sup>141</sup>

**Investigation Date:** December 18, 2019 (Telephone number: +86-20-82179000)

**Summary:** Our hospital is a hospital specializing in liver diseases, and what we did are all liver transplants. There are two Third Affiliated Hospitals of Sun Yat-sen University in Guangzhou, and our Lingnan Hospital is on the Huangpu side. It is the largest transplant base here in Lingnan. We can perform more than 200 operations a year.

(Recording 4. Download: [MP3](#); Translation Download: [pdf 185](#))

### 2) Ranked No. 3 in the National Liver Transplant

**Subject of Investigation:** Doctors in the Liver Transplant Ward of Lingnan Hospital, The Third Affiliated Hospital of Sun Yat-Sen University

**Investigation Date:** October 2, 2019 (Telephone number: +86-20-82179622)

**Summary:** Our hospital did 376 liver transplants last year, and ranked third in the country. We are the best in liver transplantation in Guangdong Province. The number of transplants mainly depends on the source of liver.

(Recording 5. Download: [MP3](#); Translation Download: [pdf 112](#))

**Subject of Investigation:** Nurses in the liver transplantation ward of the Third Affiliated Hospital of Sun Yat-sen University<sup>142</sup>

**Investigation Date:** May 19, 2020 (Telephone number: +86-20-82179633)

#### **Summary:**

1. Director Yi Shuhong is doing it.
2. We ranked in the third place in the country in liver transplantation last year.
3. Question: Then he had to do hundreds of operations last year, right? To rank the third in the country.  
Answer: Yes, yes, yes.

(Recording 6. download: [MP3](#), manuscript download: [pdf074](#))

### 3) Multiple transplant teams

**Subject of Investigation:** Nurses in the liver transplantation ward of Lingnan Hospital, the Third Affiliated Hospital of Sun Yat-sen University<sup>143</sup>

**Investigation Date:** October 1, 2019 (Telephone number: +86-20-8217900)

**Summary:** Our department is all at the chief surgeon level, under each chief surgeon is a transplant team of professors! We can perform two to three hundred liver transplants a year. (Recording 7. Download: [MP3](#); Translation Download: [pdf 110](#))

**Subject of Investigation:** Nurse Luo in the liver transplantation ward of the Third Affiliated Hospital of Sun Yat-sen University (Lingnan Hospital)<sup>144</sup>

**Investigation Date:** December 18, 2019 (Telephone number: +86-20-82179000)

To investigate the criminal conduct of all institutions, organizations, and individuals involved in the persecution of Falun Gong; to bring such investigation, no matter how long it takes, no matter how far and deep we have to search, to full closure; to exercise fundamental principles of humanity; and to restore and uphold justice in society

**Summary:** We have several professors as chief surgeons in liver transplantation. There are two Professors Zhang, one Professor Zhang Tong and one Professor Zhang Yingcai. There is also an associate professor, and a director, Yi Shuhong, Director Yi. Yi Shuhong has been the director of our department since the beginning.

(Recording 8. Download: [MP3](#); Translation Download: [pdf 185](#))

#### 4) The Transplantation Center of Shenzhen Third Hospital is a team from Sun Yat-Sen Third Hospital

**Subject of Investigation:** Dr. Zeng, attending surgeon of the Liver Transplantation Department of Shenzhen Third Hospital<sup>145</sup>

**Investigation Date:** December 13, 2019 (Telephone number: +86-15012755716)

**Summary:** We have a total of ten doctors, divided into two groups. Director Jiang is the main surgeon, as well as Director Zhao Dong. The three of us are the main surgeons. We are a new center, and the team originally came from the Third Hospital of Sun Yat-Sen Hospital. There are about a dozen people in the whole team. We came here together, and we have been here for more than three years.

(Recording 9. Download: [MP3](#); Translation Download: [pdf 179](#))

#### 5) Waiting time: 1-2 weeks

**Subject of Investigation:** Doctors in the liver transplantation ward of Lingnan Hospital, the Third Affiliated Hospital of Sun Yat-sen University<sup>146</sup>

**Investigation Date:** October 2, 2019 (Telephone number: +86-20-82179622)

**Summary:** To wait for liver donation, rent a place near the hospital, it is impossible to stay hospitalized while waiting. The waiting time can be a week or possibly half a month.

(Recording 10. Download: [MP3](#); Translation Download: [pdf 112](#))

#### 6) Live organ harvesting

**Subject of Investigation:** Subject of the investigation: Doctor on duty in Lingnan Hospital, the Third Affiliated Hospital of Sun Yat-sen University<sup>147</sup>

**Investigation Date:** October 2, 2019 (Telephone number: +86-20-82179622)

**Summary:** The donor liver cannot be taken after death, must be taken before death.

(Recording 11. Download: [MP3](#); Translation Download: [pdf 112](#))

### VI. List of Responsible Persons

#### ZSDX-D3YY 001 Chen Guihua

Job Title: Dean, Deputy Secretary of the Party Committee, Professor of the Third Affiliated Hospital of Sun Yat-sen University. Member of the Standing Committee of the Organ Transplantation Society of the Chinese Medical Association and Deputy Head of the Liver Transplantation Group, Chairman of the Guangdong Organ Transplantation Society, Director of the Guangdong Organ Transplantation Research Center, and Director of the Organ Transplantation Research Institute of Sun Yat-sen University.

Personal profile: Chen Guihua presided over the completion of clinical liver transplant operations, accounting for 1/10 of the national liver transplant operations. In 2005 alone, he operated 246 cases of liver transplantation. On February 10, 2006, he performed four liver transplant operations.<sup>148</sup> Focus on liver and pancreas transplantation.<sup>149</sup> He has accumulated experience in nearly 3,000 cases of liver

### WOIPFG's Investigative Report on the Alleged Organ Harvesting of Living Falun Gong Practitioners at the Second Xiangya Hospital of Central South University and Its Staff Members Suspected of Participation

Address: No.139, Renmin Road Central, Changsha City, Hunan Province

## 追查迫害法輪功國際組織 ( 追查國際 )

### World Organization to Investigate the Persecution of Falun Gong (WOIPFG)

To investigate the criminal conduct of all institutions, organizations, and individuals involved in the persecution of Falun Gong; to bring such investigation, no matter how long it takes, no matter how far and deep we have to search, to full closure; to exercise fundamental principles of humanity; and to restore and uphold justice in society

#### Preface

The Second Xiangya Hospital of Central South University has a state-level liver transplant center. Since 2002, the number of liver and kidney transplants has soared, and the actual number of transplants is enormous. The OPO human organ donation coordination team is in name only. The donation amount is small, but the sources of organs are abundant, and the wait time of patients is short. There have been many emergency liver transplants every year. The unusual development of the organ transplant business in this hospital coincides with the brutal persecution of Falun Gong by the CCP across the country. Given the background of the CCP's national crime of live organ harvesting, this hospital is suspected of participating in the crime of live organ harvesting from Falun Gong practitioners and other groups.

**Hospital Overview:** The Second Xiangya Hospital of Central South University is a Grade-A Tertiary Hospital founded in 1958. It is currently the largest hospital in Changsha. It now has 3,500 ward beds, forty clinical departments, nine medical laboratories, and 5,032 employees.<sup>169</sup>

Among the affiliated hospitals of Central South University, the Second Xiangya Hospital has the most complete organ transplant qualifications. Approved transplant programs include liver, kidney, heart and lung transplants.<sup>170</sup>

#### **I. The hospital has a state-level liver transplant center, and the number of transplants ranks among the top in the country.**

The Organ Transplant Center of this hospital was founded in September 2001 with Professor Qi Haizhi as the Director. The Organ Transplant Department of General Surgery was founded in July 2005 with an independent ward. In 2007, it passed the assessment of the Ministry of Health and became a state-level liver transplant center. The center has carried out liver transplants, pediatric liver transplants, reduced-size liver transplants, combined liver-kidney transplants, combined pancreas-kidney transplants, combined liver-pancreas transplants, etc. The hospital claims that both its liver transplantation and combined liver organ transplantation are at the leading level in the province.<sup>171</sup>

#### **1. Large amount of transplantation**

The number of liver transplants and kidney transplants completed in the first half of 2016 ranked among the top five in the country, and the number of liver transplants in the first half of 2018 ranked among the top four in the country.

Since 2015, the number and quality of liver transplants in this hospital have grown by leaps and bounds. The hospital announced that it completed 155 liver transplants in 2016, ranking fourth in the country, and the number of DCD liver transplants ranks third in the country. It claims to have completed more than 200 liver transplants annually, ranking steadily among the top ten in the country. In 2017, the hospital obtained the qualifications for small intestine and pancreas transplantation. The Organ Transplant Department has completed more than 1,000 liver transplants in total. In 2019, it was approved as one of the first ten training bases for liver transplantation surgeons nationwide.<sup>172</sup>

According to the official website of the hospital: In the first half of 2016, the number of organ transplants in major domestic hospitals was ranked, and the number of liver transplants and kidney transplants in the Second Xiangya Hospital ranked among the top 5 in the country, the first in the province and leading in the central and southern regions.<sup>173</sup>

According to the official website of the hospital: the number of liver transplants in the Second Xiangya Hospital has been increasing rapidly year by year, ranking first in Hunan Province and in the forefront of the

### World Organization to Investigate the Persecution of Falun Gong (WOIPFG)

To investigate the criminal conduct of all institutions, organizations, and individuals involved in the persecution of Falun Gong; to bring such investigation, no matter how long it takes, no matter how far and deep we have to search, to full closure; to exercise fundamental principles of humanity; and to restore and uphold justice in society

country for many years in a row. In the first half of 2018, it ranked in the top four in the country. In the first ten months of 2018, the Second Xiangya Hospital completed 200 cases of liver transplants<sup>174</sup>.

A special attention needs to be drawn to is that the number of transplants mentioned above is only the reduced number officially announced by the CCP.

### **2. The number of kidney transplants has repeatedly hit new highs, and the number of single-day transplants is large, ranking among the top in the country.**<sup>175</sup>

The Kidney Transplant Department of the Organ Transplant Center has developed at a rapid pace. "The organ donor network has gradually expanded to the whole country, and the hospital has set up organ resource sharing relationships with more than ten transplant centers in China."<sup>176</sup>

Those surgeons, led by Director Peng Longkai, often work all night long without sleep to carry out surgeries.<sup>177</sup>

According to a report on Hunan Online's official website on October 21, 2005: Transplant surgeons often work for more than twenty hours continuously during the surgery. After resting for three to four hours, they'll perform another round of surgeries. The scrub nurses have changed several shifts, but the surgeons are still working on surgeries. It's common for them to complete more than ten surgeries in two to three days. Once, they performed nine kidney transplant surgeries within one day.<sup>178</sup>

Screengrab

一个好医生不光要严谨，还要勤奋，作为一个移植科医师，还要能吃得苦中苦。他们在手术时，经常是连续工作20多个小时，休息三四个小时又是一轮手术，洗手护士换了好几茬，医师还在手术台上。两三天下来，做十几台手术是常有的事，曾经创造了一天成功完成9台肾移植手术。所有患者手术最关键部分，彭主任都要亲自把关，十几台手术下来经常是累得腰酸背痛。手术做完了，科里从主任到医师都要参加术后监护，密切观察病情，直到患者病情稳定好转。

近年来，随着医院投入力度的逐步加大，肾移植科病友就医环境和医护人员工作环境极大改善；依托中南大学湘雅二医院强大的综合实力，肾移植科正在朝着国内一流的器官移植中心迈进。

Figure 1 Snapshot of Hunan Online

On October 17, 2014, the transplant team of the Second Xiangya Hospital of Central South University carried out a heart-lung combined transplant, an orthotopic liver transplant, a kidney transplant and two corneal transplants within one day<sup>179</sup>.

On July 23, 2020, the transplant team of the Second Xiangya Hospital of Central South University completed 2 liver transplants and 4 kidney transplants within one day<sup>180</sup>.

### **II. Since 2002, the number of transplants has soared, and the actual number of transplants is enormous.**

Since 2002, the hospital's kidney transplant quantity has dramatically increased. Peng Longkai, Deputy Director of Organ Transplant Center of the Second Xiangya Hospital and Director of Organ Transplant Department of Urology, began to preside over kidney transplant work in 2002. Within six months of that year, the number of kidney transplants in the hospital exceeded the total number of kidney transplants in the hospital over the years, setting a historical record for the hospital.<sup>181</sup> Peng Longkai has fully presided over the clinical work and basic research of kidney transplants. He has personally performed more than 2,000 kidney transplant surgeries.<sup>182</sup>

**彭龙开**:男, 1965年出生, 毕业于中南大学湘雅医学院(原湖南医科大学), 博士学位, 主任医师, 泌尿外科教授, 博士研究生导师。现任担任湘雅二医院器官移植中心副主任兼泌尿外科移植科主任、中国肾移植科学登记系统管理委员会委员、中国医师协会器官移植学分会肾移植专业委员会委员、中国透析移植研究会委员、湖南省器官移植学会分会副主任委员、湖南省器官移植医疗质量控制中心主任、湖南省人体器官获取组织专家组组长、湖南省临床免疫学分会委员、湖南省计划生育技术专业委员会委员、《器官移植当代视点》编委、《中国肾友》杂志编委、《中国组织工程研究与临床康复》编委、《中国医师》杂志编委、《中南大学学报(医学版)》审稿人、湖南省自然科学基金评委、湖南省卫生计生厅课题评审专家、湖南省科技成果评审专家。主持多项省部级课题, 发表论文60余篇, 其中SCI收录论文10余篇。培养博士研究生6名, 硕士研究生10余名。2003、04、05年连续三年获中南大学湘雅二医院医疗新技术特等奖, 2006年度亲属肾移植获中南大学湘雅二医院医疗新技术三等奖, 儿童器官捐献与器官移植获2014年度中南大学湘雅二医院医疗新技术一等奖, 获2014年度中南大学医疗新技术二等奖。从事泌尿外科临床工作20余年, 对肾上腺疾病、前列腺疾病、泌尿系肿瘤和肾移植等有较深的造诣。全面主持肾移植临床及基础研究工作, 经验丰富, 亲自主刀2000余例肾移植手术, 包括湖南省首例婴儿DCD供肾成人肾移植术, 世界首例蛋白S缺乏并下腔静脉髂静脉广泛闭锁的亲属活体肾移植术(利用人工血管), 湖南省首例Rh血型不合活体供肾亲属肾移植术, 湖南省首例夫妻间供肾活体肾移植术, 湖南省首例儿童肾移植术, 以及先天性心脏病/风心病患者肾移植术、高致敏患者肾移植术、再次肾移植术等高风险高难度肾移植手术。2010年, 因工作突出, 彭龙开教授被国家卫生部、食品药品监督管理局、中医药管理局评为“全国医药卫生系统先进个人”。

Figure 2 Snapshot of the Second Xiangya Hospital of Central South University

### III. The hospital has a strong team of liver and kidney transplant surgeons.

The Department has eleven licensed surgeons with the ability to clinically apply kidney transplant technology and one laboratory experimenter in the kidney transplant laboratory. Among them, there are two professors and five attending surgeons. There are nine people with doctoral degrees and two with master's degrees. There is one doctoral supervisor and one master student supervisor. So far, six doctoral students and more than ten master students specializing in kidney transplant have been trained, and several batches of organ transplant surgeons for advanced studies from other hospitals have been trained.<sup>183</sup>

The Organ Transplant Department of General Surgery has nineteen medical staff, including three professors, one associate professor, one doctoral supervisor, and two master student supervisors. The organ transplant ward of general surgery and transplant ICU are divided into liver transplant group, combined organs transplant group, transplant ICU group, and artificial liver support system.<sup>184</sup> The staff can form multiple liver and kidney transplant teams, which can perform multiple liver and kidney transplant surgeries simultaneously.

### IV. The OPO human organ donation coordination team is in name only.

The hospital officially established the "Organ Procurement Organization (OPO) of the Second Xiangya Hospital of Central South University" in January 2014, with seven full-time human organ donation coordinators and one part-time human organ donation coordinator.<sup>185</sup>

#### 1. Telephone investigation on coordinator Guo Yong<sup>186</sup>

Investigation Subject: (OPO member) organ donation coordinator Guo Yong answered the phone

Investigation Time: April 25, 2017 (+86-13787120686)

Summary:

1. We have seven coordinators liaising with local hospitals.
2. We ask the doctors to explain to patients. The patients' families don't trust us. Instead, they trust the doctors!
3. Patients and their families do not trust us. The Red Cross is responsible for explaining to them.
4. According to provincial government documents, the hospital has to pay 80,000 CNY for each donated organ.

### World Organization to Investigate the Persecution of Falun Gong (WOIPFG)

To investigate the criminal conduct of all institutions, organizations, and individuals involved in the persecution of Falun Gong; to bring such investigation, no matter how long it takes, no matter how far and deep we have to search, to full closure; to exercise fundamental principles of humanity; and to restore and uphold justice in society

## 2. Telephone investigation on coordinator Tan Liang<sup>187</sup>

Investigation Subject: (OPO member) organ donation coordinator Tan Liang answered the phone

Investigation Time: April 24, 2017 (+86-15116101512)

Summary:

- 1) Q: I'd like to know how you expand this business, I mean, to get so many organs.  
A: Well, for this, mainly the doctors from different hospitals help us carry out the work. This is the key part. After all, they are all part of the medical donation system, which is, er, more convenient.
- 2) Q: Have you got many donated organs from the Red Cross?  
A: The Red Cross? Which part are you referring to? ... How to say this? ... I also heard that (the Red Cross) donated very few.
- 3) Q: Have you got many organs from the website of National Health and Family Planning Commission?  
A: Uh, organs from National Health and Family Planning Commission? ... Oh, er, do you mean those allocated ones through the network? Well, just so so, just so so.
- 4) Q: Were all these more than 300 kidney transplants witnessed by the Red Cross?  
A: No, the hospitals notified us. If it was suitable, we just took it. Among these more than 300 cases, there were some living donors (donations from relatives). About 15%.

(Download Recording 2 [MP3](#). For complete transcript, please see [Addendum 9](#))

## V. Investigation Recording

**In summary: The short waiting time, all fresh donors, large number of liver and kidney transplants, abundant source of liver donors, emergency transplantation.**

### 1. The wait time is short, and all organs are from living donors.

Investigation Subject: a nurse-on-duty from Liver Transplant Department

Investigation Time: March 19, 2015

Summary: (The wait time for liver transplant) is just a few days if it's short. It may be above two weeks if it's long! Q: Are they all living donor organs? A: That's for sure! <sup>188</sup>

(Recording 3 Download: [MP3](#), Transcription: [Appendix 6](#))

### 2. "Three or four hundred kidney transplants were performed last year. Liver sources are abundant, and sometimes two or three surgeries are performed a day."

Investigation Subject: Nie Menghua, Head Nurse of Kidney Transplant Ward Three

Investigation Time: April 18, 2017 (+86-73185296141)

Summary: We indeed have shorter wait times here than in other places. Last year we did three to four hundred cases (of kidney transplants).

(Recording 4. Download: [MP3](#); Transcript Download: [pdf 171](#)) <sup>189</sup>

Investigation Subject: A surgeon of Liver Transplant Department<sup>190</sup>

Investigation Time: September 6, 2017 (+86-73185295208)

To investigate the criminal conduct of all institutions, organizations, and individuals involved in the persecution of Falun Gong; to bring such investigation, no matter how long it takes, no matter how far and deep we have to search, to full closure; to exercise fundamental principles of humanity; and to restore and uphold justice in society

**Summary:** One to two hundred liver transplants have definitely been done this year. Nearly 20 transplants were done last month. Generally, it's normal to do more than ten transplants a month! In Hunan, basically, it is the Second Xiangya Hospital that does liver transplants. The wait time varies. Some patients come today and can get transplants done tomorrow. Some patients are waiting for livers, while sometimes the liver is waiting for the patient!

(Download Recording 5 [MP3](#). For complete transcript, please see [pdf5](#))

**Investigation Subject:** A nurse-on-duty of Liver Transplant Department<sup>191</sup>

Investigation Time: April 10, 2018 (+86-73185295408)

Summary: There are quite a lot of liver transplants done this year, almost every day.

(Download Recording 6 [MP3](#). For complete transcript, please see [pdf6](#))

**Investigation Subject:** A nurse in the liver ward<sup>192</sup>

Investigation Time: May 8, 2019 (+ 86-73185295108)

Summary: The liver source is still abundant. Sometimes two or three transplants can be done a day.

Q: Generally, the wait time is half a week to a month, right?

A: Almost. Should be like this.

(Recording 7 Download: [MP3](#); Translation Download: [pdf 047](#))

**Investigation Subject:** Doctor on duty of Kidney Transplant Department of Xiangya Hospital Central South University<sup>193</sup>

Investigation Time: September 24, 2019 (+ 86-731-89753702)

Summary:

1) Q: They said your hospital can do four to five hundred cases (of kidney transplants) a year, right?

A: Not so many here. The Second Xiangya Hospital can do that many.

2) Q: Then how many (kidney transplants) can you do here a year?

A: About a hundred and forty cases a year.

(Recording 8. Download: [MP3](#); Translation Download: [pdf 104](#))

**V. “We have the largest number of liver sources, and there are many patients for emergency liver transplants in our hospital every year.”**

**Investigation Subject:** A surgeon in the Organ Transplant Department of General Surgery

Investigation Time: Nov 2017 (+86-73185295208)

Summary: In the whole Hunan region, our liver sources should be the most. Our hospital should have the most liver sources. There are lots of patients for emergency liver transplants in our hospital every year. A lot! The vast majority of our patients come for emergency liver transplants.<sup>194</sup>

(Recording 9. Download: [MP3](#); Transcript Download: [pdf 43](#))

**Investigation Subject:** A nurse in the liver transplant ward of the Second Xiangya Hospital of Central South University<sup>195</sup>

Investigation Time: May 8, 2019 (+ 86-731-85295108)

Summary: There are no ward beds available now. Liver sources are still abundant. Sometimes two or three liver transplants can be done within a day.

(Recording 10. Download: [MP3](#); Translation Download: [pdf 047](#))

## VI. List of Responsible Persons:

**ZNDX-XY001 Peng Longkai**, male. Date of birth: 1965.<sup>196</sup>

## 追查迫害法輪功國際組織 ( 追查國際 )

### World Organization to Investigate the Persecution of Falun Gong (WOIPFG)

To investigate the criminal conduct of all institutions, organizations, and individuals involved in the persecution of Falun Gong; to bring such investigation, no matter how long it takes, no matter how far and deep we have to search, to full closure; to exercise fundamental principles of humanity; and to restore and uphold justice in society

**Personal Profile:** Deputy Director of Organ Transplant Center of the Second Xiangya Hospital and Director of Organ Transplant Department of Urology, Chief Surgeon, Professor, member of the Management Committee of the Chinese Kidney Transplant Scientific Registration System, member of the Kidney Transplant Professional Committee of the Organ Transplant Branch of the Chinese Medical Doctor Association, member of Chinese Dialysis and Transplantation Association, Deputy Director of the Organ Transplantation Society Hunan Branch, Director of the Hunan Provincial Organ

Transplantation Medical Quality Control Center, and leader of the Hunan Provincial Human Organ Procurement Organization Expert Group.

After graduating from the Department of Clinical Medicine of Hunan Medical College in 1989, he began to work in the Surgical Department of the Second Affiliated Hospital of Hunan Medical University as a teaching assistant and surgical resident. In 1993, he was admitted to Hunan Medical University as a graduate student and obtained his medical Ph.D. in 1997. Then he worked in the Department of Urology of the Second Affiliated Hospital of Hunan Medical University. Since March 2005, he has served as Deputy Director of the Organ Transplant Center and Director of the Organ Transplant Department of Urology at the Second Xiangya Hospital and was promoted to Chief Surgeon of Urology in September 2007. In May 2009, he became a doctoral supervisor.

He began to preside over kidney transplant work in 2002. Within six months of that year, the number of kidney transplants in the hospital exceeded the total number of kidney transplants in the hospital over the years. He has personally performed more than 2,000 kidney transplant surgeries.<sup>197</sup>

**ZNDX-XY002 Qi Haizhi, male.**

**Personal Profile:** Director of the General Surgery Department of the Second Xiangya Hospital of Central South University, Chief Surgeon of the Organ Transplant Department of General Surgery, Deputy Director of the Organ Transplant Center, and Director of the Organ Transplant Department of General Surgery.

After graduating from the Medical Department of Hunan Medical University in August 1983, he specialized in general surgery. In December 1988, he was promoted to attending surgeon. In 1994, he began to preside over the basic research of liver transplant in the hospital. In September 1994, he was promoted to associate professor. In 2006, he served as a member of the Hunan Provincial Committee for Clinical Application of Human Organ Transplant Technology.<sup>198</sup>

In April 1998, he performed the province's first piggyback allograft orthotopic whole liver transplant for a patient with liver disease. In September 2001, he successfully performed an emergency liver transplant for a child with fulminant hepatic failure. From 2001 to 2006, he performed combined liver-kidney transplants, combined pancreas-kidney transplants, and combined liver-pancreas transplants. He has completed more than 70 liver transplants.<sup>199</sup>

Qi Haizhi and his team performed many organ transplant surgeries. In 1998, he performed the first orthotopic whole liver transplant. In 2001, he performed the first pediatric liver transplant, the first liver transplant due to fulminant hepatic failure, and the first stage one combined liver-kidney transplant in Hunan Province. In 2005, he performed the first stage one combined pancreas-kidney transplant. In 2006, he performed the first stage one combined liver-pancreas transplant. In December 2010, Qi Haizhi and his team performed an intra-abdominal combined transplant of eight organs, including the liver, pancreas, spleen, stomach, etc., for one patient.<sup>200</sup>

#### ZNDX-XY003 Hu Jianguo, male.

**Personal Profile:** Professor. He used to be the Director of the Department of Cardiothoracic Surgery of the Second Xiangya Hospital and the Director of the Hunan Provincial Institute of Cardiovascular Diseases.<sup>201</sup>

He graduated from Hunan Medical College in 1973. He used to be the Director of the Department of Cardiothoracic Surgery of the Second Xiangya Hospital, the Director of the Hunan Provincial Institute of Cardiovascular Diseases, and the Director of the Research Office of Cardiovascular Surgery for 18 years. In 1997, he went to Duke University in the US for further study.

He presided over the first combined heart-lung transplant in Hunan Province.<sup>202</sup>

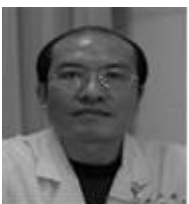

#### ZNDX-XY004 Yin Bangliang, male.

**Personal Profile:** Professor. He used to be the President of the Second Xiangya Hospital of Central South University, the Deputy Director of the Hunan Institute of Cardiovascular Diseases, the Deputy Director of the Hunan Provincial Key Laboratory of Cardiovascular Research, the Deputy Director of the Department of Cardiothoracic Surgery of the Second Xiangya Hospital, and the Director of Organ Transplant Center of the Second Xiangya Hospital.

He graduated from Hunan Medical College in 1975. In 1989, he went to study at the Medical School of the University of Mainz, Germany and obtained his Ph.D. In 1997, he went to the Duke University School of Medicine in the US for further study. He specialized in heart transplant, heart-lung transplant, etc.<sup>203</sup>

#### ZNDX-XY005 Xie Xubiao, male. Date of birth: 1970.<sup>204</sup>

**Personal Profile:** Professor and Deputy Director of the Organ Transplant Department of Urology

In July 1993, he graduated from Hunan Medical University with a bachelor's degree in medicine. In September 1996, he was admitted to the Department of Urology of the Second Affiliated Hospital of Hunan Medical University to study for a master's degree. In September 1998, he continued to study for a doctoral degree. In July 2001, he graduated with a doctorate in clinical medicine (surgery). After graduation, he worked in the Department of Urology of the Second Xiangya Hospital of Central South University and was promoted to attending surgeon in September of the same year. In April 2003, he was transferred to the Organ Transplant Center of the Second Xiangya Hospital of Central South University, mainly engaged in kidney transplants. After the establishment of the Organ Transplant Department of Urology in March 2005, he has been working there until now.

In 2012, he went to the University of Pittsburgh Medical Center in the US to study for half a year as a visiting scholar.

He has extensive experience in the following fields: follow-up of patients after kidney transplant, adjustment and conversion of immunosuppressive drugs, protection and maintenance of renal function after kidney transplant, delayed recovery of renal function after kidney transplant, reversal of rejection, prevention and treatment of severe postoperative infection, and the treatment of complex postoperative complications.<sup>205</sup>

## 追查迫害法輪功國際組織 ( 追查國際 )

### World Organization to Investigate the Persecution of Falun Gong (WOIPFG)

To investigate the criminal conduct of all institutions, organizations, and individuals involved in the persecution of Falun Gong; to bring such investigation, no matter how long it takes, no matter how far and deep we have to search, to full closure; to exercise fundamental principles of humanity; and to restore and uphold justice in society
