## 追查迫害法輪功國際組織 ( 追查國際 )

### World Organization to Investigate the Persecution of Falun Gong (WOIPFG)

To investigate the criminal conduct of all institutions, organizations, and individuals involved in the persecution of Falun Gong; to bring such investigation, no matter how long it takes, no matter how far and deep we have to search, to full closure; to exercise fundamental principles of humanity; and to restore and uphold justice in society

## China's Organ Transplant Organizations are the Executing Entities for the Communist Party's State Crime of Live Organ Harvesting

Since 1999, led by its then-leader Jiang Zemin, the Chinese Communist Party (CCP) criminal group has been manipulating China's entire state apparatus, including the Party, government, military, armed police, judicial system, and medical institutions, through the Political and Legal Affairs Commission and the "610" system, to commit nationwide mass extermination of Falun Dafa practitioners by means of live organ harvesting for transplantation. The CCP's live organ harvesting of Falun Gong practitioners is a crime against humanity and a crime of genocide initiated on the orders of Jiang Zemin.

Since the CCP's live organ harvesting of Falun Gong practitioners is a state genocidal crime conducted as a political campaign, organ transplant institutions in all provinces, central government-controlled municipalities, and autonomous regions of mainland China, including all military, armed police, and local hospitals (medical centers) are suspected to have participated in this crime, even including a considerable number of hospitals unqualified to perform organ transplants, such as small and medium-sized hospitals and specialized hospitals. Similar to how all Chinese hospitals were involved in forced abortions during the CCP's implementation of the "one-child policy", all transplant facilities in China today have participated in live organ harvesting.

In view of the broader context of the CCP's state crime of live organ harvesting, those in charge of organ transplant hospitals/centers and similar institutions in China are suspected of having been involved in the crime of live organ harvesting from groups such as Falun Gong practitioners.

### Evidence Collection Methods

#### 1. Direct and indirect comprehensive telephone investigation and on-site investigation of the people suspected of involvement in the live organ harvesting

The subjects of our investigations include government officials, policemen, doctors and other medical personnel.

#### Geographical Distribution of the Subjects of Investigation, and the Duration of Investigations:

The WOIPFG's subjects of investigation are people in different positions, who are located across the entire country of China. Our investigations have been ongoing for nearly two decades, and our investigation results have always been consistent. The evidence gathered by us verifies that live organ harvesting is a systematic arrangement by the CCP.

- 1) Subjects of investigation: Presidents, directors, doctors, nurses, and security guards of organ transplant hospitals.
- 2) Hospitals involved: A considerable amount of recorded evidence has been obtained from many provincial, military, armed police, and local organ transplant hospitals (centers) across China.
- 3) Time span: Our investigations on the live organ harvesting started in 1999, and they're ongoing to this day.

### 2. Data investigation

# 追查迫害法輪功國際組織 ( 追查國際 )

## World Organization to Investigate the Persecution of Falun Gong (WOIPFG)

To investigate the criminal conduct of all institutions, organizations, and individuals involved in the persecution of Falun Gong; to bring such investigation, no matter how long it takes, no matter how far and deep we have to search, to full closure; to exercise fundamental principles of humanity; and to restore and uphold justice in society

- 1) We have been collecting data from the hospitals' websites and press releases.
- 2) We have been searching for and analyzing medical papers on transplantation.
- 3) We have been using the website [www.archive.org](http://www.archive.org) to view the hospitals' previously archived information.
- 4) We have been collecting reports from the official Chinese media outlets.
- 5) We have organized all the information obtained from our investigations to create a database of the hospitals.

All the facts have shown us that the CCP is by no means a rational or normal organization or political party; but instead, it is a supra-state criminal syndicate controlled by a group of criminals who have committed crimes against humanity. The CCP's logic of thinking and principles of action are anti-human, and the crimes it has committed are forms of evil that humanity had never seen previously.

WOIPFG's investigative report series contains nearly 70 investigation reports on the alleged organ harvesting of living Falun Gong Practitioners at major Chinese military and civilian hospitals and on their staff members suspected of participation in this crime. This volume contains three such investigation reports.

### **Preface**

According to World Organization to Investigate the Persecution of Falun Gong's (WOIPFG) investigation

## 追查迫害法輪功國際組織 ( 追查國際 )

### World Organization to Investigate the Persecution of Falun Gong (WOIPFG)

To investigate the criminal conduct of all institutions, organizations, and individuals involved in the persecution of Falun Gong; to bring such investigation, no matter how long it takes, no matter how far and deep we have to search, to full closure; to exercise fundamental principles of humanity; and to restore and uphold justice in society

records, the director of kidney transplantation at Tianjin First Central Hospital and the assistant to the hospital president Shen Zhongyang both admitted in 2006 and 2018 respectively that they used Falun Gong practitioner as donors.

The number of organ transplants has been increasing explosively at Tianjin First Central Hospital after 1999.<sup>1</sup> The rapid establishment of large organ transplant and organ transplant research institutions, coupled with massive transplant surgical teams, has rendered the hospital one of the organ transplantation work units with the fastest development and the largest volume of transplant operations in China. The Tianjin Organ Transplant Center, Tianjin Organ Transplant Research Institute and the Orient Organ Transplant Center of Tianjin First Central Hospital were rapidly established in 2000, 2002 and 2003 respectively. On September 1, 2006, a new organ transplant building with more than 500 beds (other official media reported that there were more than 700 beds dedicated to organ transplantation at the building's opening<sup>2</sup>) was put into use, and the bed utilization rate reached 90% to 131.1%. In actuality, the annual transplantation volume is estimated to have reached 5,000 to 8,000 cases.

Headed by Shen Zhongyang, the organ transplant center sent out transplant teams to guide and assist more than 50 hospitals across China to carry out the first liver transplant operations of their own and to promote the clinical implementation of liver transplantation as a routine practice throughout the country. It is one of the criminal work units suspected of participating in the most severe live organ harvesting cases.

## I. Hospital Overview

Tianjin First Central Hospital is a comprehensive Class A tertiary hospital featuring organ transplantation.<sup>3</sup> It has 2,150 formal medical staff members, including 334 individuals with senior professional designations. Among them, 31 experts enjoy special allowances from the State Council, three are experts with their titles endowed by Tianjin City, and one is an expert of special contribution in Tianjin City.<sup>4</sup>

The Organ Transplant Center, located in the headquarters of the hospital, ranks first among the hospital's 36 departments as the most distinctive and advantageous clinical department. In December 2000, the department was officially named Tianjin Organ Transplant Center by the Municipal Health Bureau.<sup>5</sup> In 2002, the Tianjin Organ Transplant Research Institute was established. The center has transplant surgery, internal medicine, ICU, follow-up, anesthesia, imaging, pathology, ultrasound, laboratories and other departments. And with the largest professional organ transplant teams in China capable of carrying out multiple organ transplants, including liver, kidney, pancreas, small intestine and heart surgeries, the center is considered the largest organ transplant institute in Asia.<sup>6</sup>

The Orient Organ Transplant Center of Tianjin First Central Hospital was officially established in December 2003.<sup>7</sup> It has also established Nantong Liver and Kidney Transplant Center,<sup>8</sup> which performs routine liver and kidney transplantation, as well as the Shandong Branch of the Orient Organ Transplant Center.<sup>9</sup>

## II. The massive scale of organ transplantation at the Orient Organ Transplant Center

After 1999, Tianjin First Central Hospital became one of the organ transplant work units with the fastest development and the largest number of transplants across China.

### 1. The hospital's organ transplant volume has experienced an explosive growth after 1999

In May 1994, Shen Zhongyang completed the first case of orthotopic liver transplantation after returning to China from his stay in Japan. In September 1998, he returned to Tianjin First Central Hospital to set up an

## 追查迫害法輪功國際組織 ( 追查國際 )

### World Organization to Investigate the Persecution of Falun Gong (WOIPFG)

To investigate the criminal conduct of all institutions, organizations, and individuals involved in the persecution of Falun Gong; to bring such investigation, no matter how long it takes, no matter how far and deep we have to search, to full closure; to exercise fundamental principles of humanity; and to restore and uphold justice in society

organ transplantation department and performed seven liver transplants by the end of the year. From 1994 to 1998, Tianjin First Central Hospital completed eight liver transplants in five years.<sup>10</sup>

After the establishment of the organ transplant center, transplant surgical teams were dispatched from the hospital to guide more than 50 other hospitals across the country to carry out their first liver transplants and promoted the implementation of routine clinical liver transplantation nationwide.<sup>11</sup>

Since 2000, liver and kidney transplantation has become routine clinical operations in Tianjin First Central Hospital, and its organ transplant volume has experienced an explosive growth. In 1999, 24 liver transplants were performed.<sup>12</sup> According to a news article published by ENorth Netnews, which belongs to the Tianjin municipal government, in the two years after 2000, the total cumulative number of liver transplants performed by Shen Zhongyang's team increased from 24 to 209 cases. And it took only one year in 2003 for the liver transplant volume to increase from 209 to 1,000 cases.<sup>13</sup>

In 2004, Shen Zhongyang's organ transplant department had expanded to include five branches in Tianjin, Beijing and the rest of Shandong Province. The transplant branch presided by Shen Zhongyang is located within the Armed Police General Hospital in Beijing.<sup>14</sup>

On March 17, 2005, Shen Zhongyang performed a liver transplant at the Armed Police General Hospital. The CCTV's "Oriental Horizon" program reported that "this is the 1,600th operation he has performed."<sup>15</sup>

At the end of 2005, a family member of a patient revealed to *Phoenix Weekly* that the transplant center had performed at most 24 liver and kidney transplants in one single day.<sup>16</sup>

According to the 2005 Orient Organ Transplant Center year-end summary conference, in 2005, the hospital performed 647 orthotopic liver transplants, 436 kidney transplants, 21 cases of combined liver-kidney transplantation, and two cases of combined pancreas-kidney transplantation.<sup>17</sup>

In 2006, the Organ Transplant Center at Tianjin First Central Hospital completed 676 liver transplants.<sup>18</sup>

As of 2009, Tianjin First Central Hospital had completed more than 3,300 cases of liver transplantation, 2,357 cases of kidney transplantation and 31 cases of combined pancreas-kidney transplantation.<sup>19</sup> According to the "China Liver Transplant Registration (CLTR)", by the end of 2010, the transplant teams at Tianjin First Central Hospital and the Beijing Armed Police General Hospital headed by Shen Zhongyang had completed a combined total of 6,270 liver transplants.<sup>20</sup>

On December 10, 2014, mainland Chinese newspaper *Science and Technology Daily* reported that as of December 2014, the total number of liver transplants performed by Shen Zhongyang had exceeded 10,000 cases.<sup>21</sup>

In addition, in January 2015, "Tonight Media Group" claimed that "under the guidance of Shen Zhongyang, the previous young resident doctors independently completed nearly a thousand liver transplant operations."<sup>22</sup> WOIPFG published a list of organ transplant surgeons working at the hospital in 2014. For doctors specializing in liver and kidney transplantation alone, we could find from the hospital's official website and medical papers that 110 of them had actually performed operations,<sup>23</sup> including 21 chief surgeons, 25 associate chief surgeons, 13 attending surgeons and 51 other medical personnel.

**2. After September 1, 2006, the annual number of liver and kidney transplants in the hospital was estimated to be 5,000 to 8,000 cases**

## 追查迫害法輪功國際組織 ( 追查國際 )

### World Organization to Investigate the Persecution of Falun Gong (WOIPFG)

To investigate the criminal conduct of all institutions, organizations, and individuals involved in the persecution of Falun Gong; to bring such investigation, no matter how long it takes, no matter how far and deep we have to search, to full closure; to exercise fundamental principles of humanity; and to restore and uphold justice in society

#### 1) Calculations based on bed count, bed occupancy rate and the average length of hospital stay for liver transplantation patients at Tianjin First Central Hospital's Orient Organ Transplant Center

The new building of the hospital's organ transplant center was officially opened on September 1, 2006,<sup>24</sup> with more than 500 beds.<sup>25</sup> (Others reported that the number of beds had reached 700 at that time.<sup>26</sup>)

**Bed occupancy rate (BOR):** 90 to 131.1 percent.<sup>27</sup> In 2013, the average BOR of Class A tertiary hospitals was 103 percent.<sup>28</sup>

The **average length of stay** for a liver transplant patient in China is 25 to 30 days, and the average length of stay for kidney transplants is 30 days.

#### Annual Transplantation Quantity at Tianjin First Central Hospital's Orient Organ Transplant Center:

**5,475 cases** (500 beds × 365 days × 90% / 30 days), using 90 percent as the average BOR, and 30 days as the average length of stay

**7,975 cases** (500 beds × 365 days × 131.1% / 30 days), using 131.1 percent as the average BOR, and 30 days as the average length of stay

**8,544 cases** (500 beds × 365 days × 131.1% / 28 days), using 131.1 percent as the average BOR and 28 days as the average length of stay

Based on the above analysis and calculations, we believe that in as early as September 2006, the number of liver and kidney transplants at this hospital had reached more than 5,000 cases a year, and during its peak period, the number almost reached 8,000 cases per year.

In 2014, the hospital had more than 1,500 beds. At the end of 2015, the renovation and expansion project increased this number to 3,200 beds.<sup>29</sup> What the scale of its liver and kidney transplantation should have been?

#### 3. The organ transplant center continuously upgrades its equipment and expands its infrastructure

Year	Organ Transplant Center's Equipment and Infrastructure
2002	<p>The hospital began treating South Korean patients in 2002, and a total of over 500 individuals have received treatment so far. A large number of South Korean patients rushed in, rendering the existing medical facilities of Tianjin First Central Hospital extremely insufficient.</p> <p>The hospital converted the 4th to 7th floors of its 12-storey building into dedicated organ transplant inpatient service area, and renovated 76 ward beds, with 62 of which being in single rooms or suites. In addition, the Orient Organ Transplant Center also borrowed the 8th floor of the TEDA International Cardiovascular Hospital in the Tianjin Economic Technological Development Area (TEDA) as an inpatient service area dedicated to South Korean patients. And at the same time, the rooms on the 24th and 25th floors of a nearby hotel were converted into wards for South</p>

## 追查迫害法輪功國際組織 ( 追查國際 )

### World Organization to Investigate the Persecution of Falun Gong (WOIPFG)

To investigate the criminal conduct of all institutions, organizations, and individuals involved in the persecution of Falun Gong; to bring such investigation, no matter how long it takes, no matter how far and deep we have to search, to full closure; to exercise fundamental principles of humanity; and to restore and uphold justice in society

	Korean patients waiting for organ transplants. Prior to the construction of the new organ transplant center building, it was divided into four liver transplantation teams and three kidney transplant teams, with 120 beds altogether. <sup>30</sup>
2006	The Tianjin Municipal Communist Party Committee and the Tianjin municipal government invested about 170 million yuan in the construction of the Orient Organ Transplant Center's new building. With a construction area of 46,000 square meters, the organ transplant building was completed and put into use in August 2006. <sup>31</sup> The new building of the Organ Transplant Center was officially opened on September 1, 2006, <sup>32</sup> with more than 500 beds. <sup>33</sup> (Others reported that the number of beds had reached 700 at that time. <sup>34</sup> ) The 2006 Reconstruction Project Manual of Tianjin First Central Hospital stated, "The utilization rate of liver and kidney transplant beds is over 90%." <sup>35</sup> The average hospital stay for liver transplantation at this hospital is 25 to 30 days. <sup>36</sup>
2013	After the new building had been in use for many years, the hospital claimed, "In 2013, the development of various disciplines in our hospital achieved different degrees of progress." "The bed utilization rate increased by 5.7% year-on-year," reaching 131.1%. Therefore, the hospital added 300 more beds to the existing 1,200 ward beds, making a total of 1,500 beds. And it also added some beds to the organ transplant center. <sup>37</sup>
2015	The Organ Transplant Center had become the largest organ transplantation base in Asia, the birthplace of clinical liver transplantation in China and the "Transplant Technology Application Base" in Tianjin. At the end of 2015, the third phase of the expansion project was put into use, with 3,200 ward beds. <sup>38</sup>

### III. The waiting time in this hospital is extremely short and at most 24 liver and kidney transplants have been performed in one day, and the doctors are very busy

The United States has a large organ donation system. According to a report by the United States Department of Health and Human Services in 2007, the average wait times for a liver and a kidney in the United States were two and three years, respectively.<sup>39</sup>

#### 1. The hospital's average wait time for organs in 2005 was two weeks.

According to the official website of the Orient Organ Transplant Center, its average wait time for organs in 2005 was two weeks.<sup>40</sup>

#### 2. Multiple surgeries are performed simultaneously

Tianjin First Central Hospital can perform multiple and even several dozen kidney and/or liver transplants on the same day or at the same time. It is impossible to obtain such large number of suitable organs from executed prisoners on the same day.

## 追查迫害法輪功國際組織 ( 追查國際 )

### World Organization to Investigate the Persecution of Falun Gong (WOIPFG)

To investigate the criminal conduct of all institutions, organizations, and individuals involved in the persecution of Falun Gong; to bring such investigation, no matter how long it takes, no matter how far and deep we have to search, to full closure; to exercise fundamental principles of humanity; and to restore and uphold justice in society

*Xinhua Net (Tianjin)* reported on February 7, 2005 that the Orient Organ Transplant Center completed 108 liver transplants (four to five liver transplants every day, if surgeries were performed on only five working days per week) and 43 kidney transplants in January 2005.<sup>41</sup> A patient's family told *Phoenix Weekly* that the transplant center once performed as many as 24 liver and kidney transplants in one day.<sup>42</sup> The Orient Organ Transplant Center is capable of doing nine liver transplants and eight kidney transplants simultaneously.<sup>43</sup>

### 3. The transplant surgeons at this hospital were very busy

An old report on *Phoenix Weekly* (Issue 5, 2006) titled "Investigation on Foreigners Going to China for Organ Transplants" reported<sup>44</sup>:

"Tianjin First Central Hospital set a record in December 2004 when they completed 44 liver transplants in one week. Yet by the time when the article was written in 2006, the 2004 record had become a very small number of organ transplants. By then, the transplant surgeons of Tianjin First Central Hospital had almost no days off: "The transplant surgeons at this hospital were so busy shuffling between hospital wards and operation rooms that, they didn't even have time to greet one another. They were often heard saying 'too busy these several days, more than 10 operations a day...Some surgeons even performed operations overnight, without having any sleep ...We performing liver transplants also has peak season and off season. ...However, some surgeons complained that the only slow season for liver transplants is the month after the Chinese New Year. They are very busy for the rest of the year, especially before the Chinese New Year. They didn't have much time to stay at home."

## IV. Telephone investigation shows that the main source of donors is Falun Gong practitioners, the number of transplants can reach thousands of cases per year, the waiting time for organs is short, and the number of donated organs from the Red Cross is far lower than the actual number of transplants

### 1. The main donor sources are Falun Gong practitioners

Judging from the CCP's media reports and the information publicly disclosed on the transplant center's website, the volume of transplants performed by Tianjin First Central Hospital is high enough to question the CCP's rhetoric about the source of organs. In the absence of an organ donation system, definitely not all organs used for transplantation in hospitals come from executed prisoners.

**The director of kidney transplantation and the assistant to hospital president Shen both admitted, in 2006 and 2018 respectively, that they were using Falun Gong members as donors.**

In March 2006, insiders exposed the tragedy of organ harvesting from living Falun Gong practitioners in Sujiatun, Shenyang, and another major source of organs was unveiled.<sup>45</sup>

Example of a WOIPFG telephone investigation: Both the hospital's kidney transplant director and the president's assistant admitted, in 2006 and 2018 respectively, that they were using Falun Gong practitioners as donors.

**Subject of Investigation: Bai Rongsheng**, Liver transplant doctor and an assistant to President Shen Zhongyang at Tianjin First Central Hospital.<sup>46</sup>

Date: November 15, 2018 (Tel: +86-13803019898)

Investigator: "Regarding liver donors, the situation now is that in general they are the type of healthy donors, right? The kind from Falun Gong practitioners, right?"

Bai Rongsheng: "Right, right, right, ah."

(Recording 1. Download: [MP3](#); Transcript Download: [pdf 10](#))

## 追查迫害法輪功國際組織 ( 追查國際 )

### World Organization to Investigate the Persecution of Falun Gong (WOIPFG)

To investigate the criminal conduct of all institutions, organizations, and individuals involved in the persecution of Falun Gong; to bring such investigation, no matter how long it takes, no matter how far and deep we have to search, to full closure; to exercise fundamental principles of humanity; and to restore and uphold justice in society

**Subject of Investigation: Song Wenli**, chief kidney transplant surgeon, Organ Transplant Center of Tianjin First Central Hospital<sup>47</sup>

**Date:** March 15, 2006 (Tel: +86-13920128990)

#### **Summary:**

Investigator: Is this Director Song of Tianjin First Central Hospital?

Song Wenli: Ah, yes, speaking, please!

Investigator: ...His doctor told him that the kidney source was quite good, (because) the donor did exercises. (When the doctor was asked about) what kind of exercises it was, (his answer) was Falun Gong. That is, Falun Gong practitioners are generally healthy and fit... [Interrupted by Song]

Song Wenli: Of course! We also have this kind of situations here. We also have this kind of donors, who have breathing or heartbeat, so to speak. We also have these. We probably have had over a dozen kidneys of this kind so far this year.

(Recording 2. Download: [MP3](#); Transcript Download: [Addendum](#))

**Profile of Song Wenli:** Director of Kidney Transplantation in the Organ Transplant Center of Tianjin First Central Hospital, member of the Organ Transplantation Branch of the Chinese Medical Association, and member of the Organ Transplantation Branch of the Tianjin Medical Association. He has completed more than 2,000 kidney transplant cases.<sup>48</sup>

## **2. Telephone recordings show that the hospital can perform several thousand organ transplants per year**

In October 2017, kidney transplant doctors at Tianjin First Central Hospital reported that they could perform 400 or 500 cases of kidney transplants and liver transplants respectively each year. In May 2018, the liver transplant doctor said that there were 400 to 500 liver transplants a year, and all teams performed them, and each team did hundreds of cases! Another liver transplant doctor said that the center has more than ten liver transplant teams. Roughly estimated, thousands of liver and kidney transplants are performed every year.

A doctor at the Tianjin First Central Hospital Organ Transplantation Centre confirmed a large volume of transplants as late as 2017<sup>49</sup>

On October 17, 2017, Dr. Feng, a kidney transplant doctor on the 6th Floor of the Oriental Organ Transplantation Building at Tianjin First Central Hospital, said that they do kidney transplants just as frequently as liver transplants, four or five hundred a year.

(Recording 3. Download: [MP3](#); Transcript Download: [pdf 79](#))

On May 4, 2018, a liver transplant doctor on the 8th floor of the Oriental Organ Transplantation Building of the Tianjin First Central Hospital told investigators that there are four or five hundred liver transplants a year, and every team does them. The investigator asked this liver transplant doctor: Can you do more than a thousand cases a year? The answer? "That's not all! We have several teams, each team has done hundreds of cases! We have done even more than that." <sup>50</sup>

(Recording 4. Download: [MP3](#); Transcript Download: [pdf 6-1](#))

On May 8, 2018, another liver transplant doctor on the 8th floor of the Oriental Organ Transplantation Building of Tianjin First Central Hospital said in an investigation call: "There are many liver donors, and there are transplants every day. Each director leads a team to perform [operations.]" The investigator asked how many transplant teams there were. The other party blurted out "ten ~" before hurriedly changing the topic: "Ah ~ they're all very good!" <sup>51</sup>

(Recording 5. Download: [MP3](#); Transcript Download: [pdf 6-2](#))

## **3. The average wait time for organs was short.**

## 追查迫害法輪功國際組織 ( 追查國際 )

### World Organization to Investigate the Persecution of Falun Gong (WOIPFG)

To investigate the criminal conduct of all institutions, organizations, and individuals involved in the persecution of Falun Gong; to bring such investigation, no matter how long it takes, no matter how far and deep we have to search, to full closure; to exercise fundamental principles of humanity; and to restore and uphold justice in society

On May 4, 2018, a WOIPFG investigator asked a doctor from the Liver Transplantation Doctors' Office on the 8th Floor of Tianjin First Central Hospital, "Do you perform more than 1,000 cases like my friend said? Every year." The doctor replied, "More than that. But among our several (surgery) teams, there are at least several hundred cases by each team."<sup>52</sup>

(Recording 6. Download: [MP3](#); Transcript Download: [pdf 6-1](#))

On March 13, 2019, Orient Organ Transplant Center's liver transplant surgeon Doctor Li (+86-22-23626857) said, "The wait time may be a month at most, may be a week at least. In general, one month is enough."<sup>53</sup>

(Recording 7. Download: [MP3](#); Transcript Download: [pdf 019](#))

On March 15, 2019, Associate Chief Surgeon Li Jiang from the liver transplant doctors' office at the Orient Organ Transplant Center (+86-2223626857) said, "We can get it done soon." "Write down my mobile phone number: 138 2046 7120." "We have so many, so many, so many directors..."

(Recording 8. Download: [MP3](#); Transcript Download: [pdf 024](#))

**4. Dr. Yang Han from the Liver Transplant center said: "Tianjin First Central Hospital is the largest one, but there is no way to know how many (cases) it conducted after all."**

**Investigation Object: Dr. Yang Han from the Liver Transplant center<sup>54</sup>**

Investigation Date: June 2, 2018 (Phone #: +8637166279137)

Summary: Last year there were more than 200 cases, this year there have been 110 cases already. Type A (blood donor) is not easy to find. The estimated waiting time is about two weeks to one month. Many of the directors in Shanghai have cooperation with us, because their patients can't wait too long to get the liver donors. They all bring their patients to Henan to do it. The nationwide rank of transplant volume: the first one is Renji, the second one is Zhejiang University, the third is us, the fourth may be Xiangya. Tianjin First Central Hospital is the largest one, however it has no data, because they have a part of data that is not released, so there is no way to know how many (cases) it conducted after all.

(Recording 9. Download: [MP3](#); Transcript Download: [pdf 80-2](#))

**5. Organ donations from the Red Cross Society are minimal (for data after 2015)**

Starting from January 1, 2015, the use of executed prisoners' organs as a source of transplant donor organs was completely banned by the CCP. The CCP claimed that voluntary organ donation after the death of citizens would become the only organ source for transplantation.<sup>55</sup>

In 2017, several thousand cases of organ transplantation were performed in Tianjin First Central Hospital alone. Meanwhile, Shandong Province (where Tianjin is located) received only over 100 organ donations witnessed by the Tianjin Red Cross Society in 2017.

**Official reports: numbers of organ donations**

**Table 1. Officially Reported Numbers of Donated Organs from 2015 to 2018**

Year	Cumulative Number of Organ Donations

### World Organization to Investigate the Persecution of Falun Gong (WOIPFG)

To investigate the criminal conduct of all institutions, organizations, and individuals involved in the persecution of Falun Gong; to bring such investigation, no matter how long it takes, no matter how far and deep we have to search, to full closure; to exercise fundamental principles of humanity; and to restore and uphold justice in society

Comparison Graph of the Number of Voluntary Organ Donors in Tianjin City and the Liver Transplant Volume in the Tianjin First Central Hospital in 2017

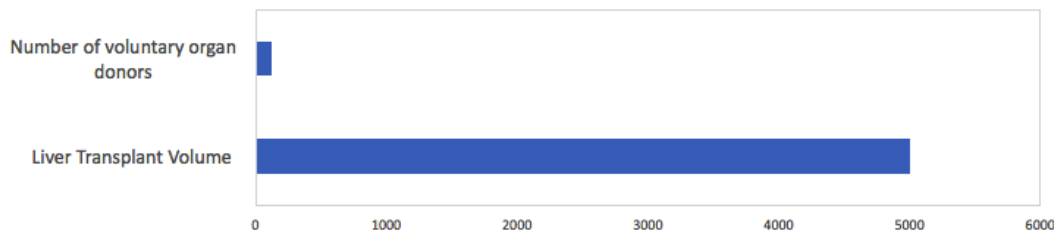

Figure 1. Comparison Graph of the Number of Voluntary Organ Donors in Tianjin City and the Liver Transplant Volume in the Tianjin First Center Hospital in 2017

Tianjin has three hospitals designated by the Ministry of Health to carry out liver and kidney transplantation. The annual volume of liver and kidney transplantation in the Tianjin First Central Hospital is as large as several thousand cases per year.<sup>61</sup>

The large gap between the number of organ donations and transplant volume indicates that there are major donor sources other than organ donations.

## V. Medical Papers Show live organ harvesting

### 1. Organs from “brain dead” patients

China has never had any brain death legislation, diagnostic criteria for brain death and a sound organ donation system, so there are no “brain-dead organ donors” in China, voluntary or not.

On July 11, 2006, *People's Daily* published an article titled “Our country’s first donation heart transplant was successful.” The article stated “On July 1, 2006, the 18th brain dead donor donated a heart. The transplant surgery was successful. This is the first successful case of heart transplant using a brain dead donor.” The article also quoted Dr. Chen Zhonghua saying, “by far there are 18 cases of successful brain death organ donation in China.”<sup>62</sup>

An Aug. 22, 2014 article on qq.com titled “No brain death regulation in China, 90% of doctors are not clear about the specifications either” says there are 80 countries in the world that have brain death regulations, but not China.<sup>63</sup>

A medical paper of Tianjin First Central Hospital stated that “2,195 liver transplants were performed from 2002 to 2006, and 2,500 donor livers were excised from cadavers. The healthy donors were all lab tested negative for hepatitis, syphilis and AIDS. Their livers were excised after they became brain-dead.”<sup>64</sup> From 2002 to 2006, it was illegal that 2,500 donor livers were excised after they became brain-dead.

### 2. Many medical papers show that the warm ischemia times were short; live organ harvesting is suspected

The warm ischemia time is zero or ultra-short, indicating that there is heartbeat and blood supply when the organ is harvested. That is, the organ is harvested from living donors. Generally, it can be done only from a brain-dead or living donor.

## 追查迫害法輪功國際組織 ( 追查國際 )

### World Organization to Investigate the Persecution of Falun Gong (WOIPFG)

To investigate the criminal conduct of all institutions, organizations, and individuals involved in the persecution of Falun Gong; to bring such investigation, no matter how long it takes, no matter how far and deep we have to search, to full closure; to exercise fundamental principles of humanity; and to restore and uphold justice in society

A medical paper from Tianjin First Central Hospital published in *the Chinese Journal of Hepatobiliary Surgery* in February 2007 claimed, “The warm ischemia times of the donor livers from 200 brain-dead cadavers without heartbeat from 2003 to 2005 were less than eight minutes.”<sup>65</sup>

In most cases mentioned in the medical paper, the warm ischemia times were only a few minutes. This implies that the process of liver excision was the process of turning a living “donor” into “a cadaver without heartbeat”, which would be the process of live organ harvesting.

The following medical paper describes the experiences of liver excisions at Tianjin First Central Hospital.

In the April 2008 issue of *Tianjin Journal of Nursing*, a medical paper published by Tianjin First Central Hospital, stated that the hospital “performed 2,195 cases of liver transplant operations from 2002 to 2006, and 2,500 cadaveric donor livers were excised. The healthy donors were all lab tested negative for hepatitises, syphilis and AIDS. Their livers were excised after they became brain-dead.”<sup>66</sup> This means that the number of donors was larger than the number of liver excisions, and that the number of liver excisions was larger than that of transplanted organs. Moreover, the usability of the organs was determined only after the donor’s abdomen was opened. The paper’s “Preliminary Inspection of Donor Liver Quality” section mentioned the observation of the liver color after the abdominal incision to determine fatty liver state, and “moderate and worse fatty livers were generally abandoned”. At this moment, the abdomen of the “donor” would have already been opened, but the liver would not have yet been removed.<sup>67</sup>

**3.2.1 供肝质量初检** 供体切取采用腹部大十字切口,协助医生拉开右侧肋弓,观察供肝表面颜色,肝表面有无脂肪颗粒,肝下缘是否锐利。如肝下缘变钝,表面发黄并可见脂肪颗粒即判断为脂肪肝。按脂肪肝轻、中、重分级来决定供肝的留取。一般中度以上脂肪肝采取放弃的态度,因中度以上脂肪肝术后易发生移植肝原发无功或肝功能延时恢复。

#### 3.2.1 Preliminary Inspection of Donor Liver Quality

A large cross incision in the abdomen was cut to allow the doctor to pull the right costal arch open to observe the surface color of the donor liver, whether there were lipid particles on the liver surface, and whether the lower edge of the liver was sharp. If the lower edge of the liver had become blunt, its surface had become yellow and lipid particles were visible, the organ would be determined to be a fatty liver. According to the level classification of mild, moderate and severe fatty livers, the excision of the donor liver would be determined. Generally, moderate and worse fatty livers would be abandoned, because if such fatty livers were transplanted, the situation of primary liver non-function or delayed graft liver function recovery would likely occur.

Regarding the livers that had already been excised, there would also be an on-site “intraoperative laboratory test” to directly determine whether the donor livers were going to be kept or not.

**3.3 术中化验检测** 术中化验检测结果直接决定是否保留供肝。我中心现对每个供体都进行现场快速检测,包括血型、肝功、梅毒、HIV等。在现场操作时可以采取等倍稀释血液后滴入视窗或先在视窗滴入原血1滴后再滴入缓冲剂或等渗盐水。等候20 min观察窗口即可出现结果。为保证化验的准确,可采取验3套试纸。

## 追查迫害法輪功國際組織 ( 追查國際 )

### World Organization to Investigate the Persecution of Falun Gong (WOIPFG)

To investigate the criminal conduct of all institutions, organizations, and individuals involved in the persecution of Falun Gong; to bring such investigation, no matter how long it takes, no matter how far and deep we have to search, to full closure; to exercise fundamental principles of humanity; and to restore and uphold justice in society

#### 3.3 Intraoperative Laboratory Tests

The results of intraoperative laboratory tests directly determine whether to retain the donor livers or not. Our center practices on-site rapid testing for each donor, including blood type, liver functions, syphilis and HIV. In the on-site operation, a blood sample diluted with equal amount of water would be dripped into the window, or one drop of the original blood would be dripped into the window, before the buffer or isotonic saline is dripped. Then wait for 20 minutes to observe the results from the window. To ensure accuracy of the test, three sets of test papers could be used.

Although the title of the paper mentioned “cadaveric livers”, the warm ischemia times of all donor livers were nevertheless indicated as within 10 minutes, the excision times were within 30 minutes, and the cold ischemia times were within 12 hours. The paper mentioned that “their livers were excised after they became brain-dead”. It’s possible that living donors were sent to the excision site, and the donors were killed during the excision process.

#### **3. Shen Zhongyang created the standard operation method for obtaining liver donors from "cadaveric donors without heartbeat", which can control the warm ischemia time within 5 minutes, which is the process of turning a living person into a corpse**

Shen Zhongyang created the standard operation method for obtaining livers from "cadaveric donors without heartbeat": independently developed a pipeline for perfusion of the abdominal aorta and portal vein system, and created a "cadaveric donor without heartbeat" liver donor suitable for China's characteristics. The acquisition method can control the warm ischemia time within 5 minutes and shorten the operation time to 30 minutes. At present, this combined perfusion method has become the standard acquisition method of "cadaveric donors without heartbeat" commonly used in China. This technology has obtained one utility model patent (the first to achieve this)<sup>68</sup>. The warm ischemia time can be controlled within 5 minutes, which is impossible for "corpse" or "heartless" donors, which proves that the process of removing the liver is the process of "donor" transforming from living body to "heartless corpse".

## VI. Field visits by South Korean journalists

In 2017, reporters from the TV station “TV Chosun”, which is under South Korea’s largest daily newspaper “Chosun Ilbo”, went to China to conduct field investigations. In October 2017, the field investigation of China’s largest organ transplant center, Orient Organ Transplant Center of Tianjin, showed that:<sup>69</sup>

### **1. The wait times for organ transplants in the hospital were several days or weeks**

In 2017, several South Korean reporters went to China to conduct field investigations. The wait times for organ transplants in the hospital were several days or weeks.<sup>70</sup>

### **2. The organ transplant center could perform several thousand organ transplant operations every year**

Patients from the Middle East, South Korea and other countries can receive organ transplants within several days or weeks of waiting in a hotel near the hospital; if a special donation is made to the hospital’s foundation, the organ transplant process will be accelerated. The hospital layout map in the center’s hall shows multiple organ transplant wards designated for foreign patients. A nurse from the International Organ Transplantation Department revealed to the investigating reporters that the department actually completed eight organ transplant operations on the first day of the department’s establishment. The investigation team observed that there were more than a dozen operating rooms, which were still fully in use throughout the

## 追查迫害法輪功國際組織 ( 追查國際 )

### World Organization to Investigate the Persecution of Falun Gong (WOIPFG)

To investigate the criminal conduct of all institutions, organizations, and individuals involved in the persecution of Falun Gong; to bring such investigation, no matter how long it takes, no matter how far and deep we have to search, to full closure; to exercise fundamental principles of humanity; and to restore and uphold justice in society

day. After the over 500 ward beds dedicated to organ transplantation became fully occupied, foreign patients would be placed in rooms on several floors of a nearby hotel, which means that the center could perform several thousand organ transplant operations every year, providing organ transplants to Chinese and foreign patients on demand.

## VII. Overseas collaboration and years of organ transplant tourism boom

**1. Overseas collaboration:** with funding from the United States-based China Medical Board, Inc., Tianjin First Central Hospital established the “China Liver Transplant Training Center”

In July 2006, with funding from the United States-based China Medical Board, Inc., Tianjin First Central Hospital established the “China Liver Transplant Training Center” and held four national clinical liver transplant conferences.<sup>71</sup> The organ transplant center that Shen Zhongyang was ordered to build assisted 66 medical units in 22 regions across China to carry out clinical liver transplantation, accounting for two-thirds of the country’s existing liver transplant centers.<sup>72</sup>

### 2. Overseas business advertisement: years of organ transplant tourism boom

*Sanlian Life Weekly* reported in 2004 that in just a few years, tens of thousands of overseas patients had come to China for organ transplants, setting off an “organ transplant tourism”. This article described the thriving organ transplant tourism: “In addition to South Koreans, Tianjin First Central Hospital (aka. the Orient Organ Transplant Center) also has patients from nearly 20 countries and regions in Asia, including Japan, Malaysia, Egypt, Pakistan, India, Saudi Arabia, Oman, Hong Kong, Macao and Taiwan.” *Phoenix Weekly* also reported that mainland China had become an emerging center for organ transplants worldwide.<sup>73</sup> As of 2017, organ transplant tourism was still booming.

Huang Jiefu, chairman of the China Human Organ Donation and Transplantation Committee, was interviewed by Shen yidu (a reporting column of *Beijing Youth Daily* with online ID: intodeepthoughts) during the two sessions of the Chinese Communist Party in March 2017, claiming that the “organ transplant tourism” was extinct in China as of the previous year (2016).<sup>74</sup> However, in 2017, several South Korean reporters went to China to conduct field investigations and discovered that the Orient Organ Transplant Center has an international diagnosis and treatment center and dedicated wards for foreign transplant patients. A large number of South Koreans and Middle Easterners come here for transplant operations every year. In 2017, Middle Eastern patients outnumbered Korean patients. The staff of the hospital said that the government had banned transplant tourism, but they just turned a blind eye to it.<sup>75</sup>

## VIII. The CCP has designated organ transplantation as a national industry, invested a lot of money, and included it in the research and development of many national-level projects

China attaches great importance to the scientific and technological research and development of organ transplantation, and transplant-related projects can get a large amount of financial support from the government.

Shen Zhongyang is currently the chief expert of the organ transplantation key technology projects of the National 863 Program, the subject matter expert of the biological and medical technological field of the National 863 Program, the deputy chairman of the Organ Transplantation Branch of the Chinese Medical Association, and the fifth chief editor of “*China Critical Care and Emergency Medicine*”, member of the editorial board of “*Chinese Journal of General Surgery*”, “*Chinese Journal of Hepatobiliary Surgery*” and other journals.<sup>76</sup>

## 追查迫害法輪功國際組織 ( 追查國際 )

### World Organization to Investigate the Persecution of Falun Gong (WOIPFG)

To investigate the criminal conduct of all institutions, organizations, and individuals involved in the persecution of Falun Gong; to bring such investigation, no matter how long it takes, no matter how far and deep we have to search, to full closure; to exercise fundamental principles of humanity; and to restore and uphold justice in society

After 2000, since the establishment of its Organ Transplant Center and Organ Transplant Research Institute, the hospital has invested a total of 20 million yuan to carry out basic and clinical research related to organ transplantation.<sup>77</sup>

#### IX. Hospitals profit a lot from transplantation

The rapidly expanding business has allowed the Oriental Organ Transplant Center to obtain huge revenue. According to media reports, liver transplantation alone could bring at least 100 million yuan in revenue to the center each year.<sup>78</sup> In September 2006, the new building of the Oriental Organ Transplant Center opened. This transplant center with an investment of 130 million yuan and 500 beds will bring huge income to Tianjin First Center.<sup>79</sup>

#### X. The Tianjin Municipal Government has invested 130 million yuan to build the Oriental Organ Transplantation Building. Zhang Gaoli, secretary of the Tianjin Municipal Party Committee, attaches great importance to the development of the transplant center

The Tianjin municipal government announced in December 2003 that it would invest 130 million yuan to construct a building dedicated to organ transplantation for Tianjin First Central Hospital.<sup>80</sup> The Orient Organ Transplant Building, opened for business in 2006, has since become the largest organ transplant center in Asia.<sup>81</sup>

On July 17, 2010, Zhang Gaoli, then Secretary of the Tianjin Municipal Communist Party Committee, inspected and encouraged the center to “continue to give full play to its advantages in organ transplantation.” In that year, the total liver transplants performed at the center accounted for one third of total liver transplantation cases in China.<sup>82</sup>

Shen Zhongyang’s career has been advancing along with his organ transplant volume. After Shen returned to China in 1998, he successively served as the head of the Organ Transplantation Department at Tianjin First Central Hospital, the director of the Organ Transplant Research Institute and the vice president of Tianjin First Central Hospital. In 2007, he became the president of Tianjin First Central Hospital.<sup>83</sup> In just one decade, Shen Zhongyang went from a general surgeon to the president of a large comprehensive Class A tertiary hospital (the top grade of the Chinese hospital classification system).

#### XI. List of Responsible Persons

##### TJYZ001.

**Name:** Shen Zhongyang

**Gender:** male

**Date of birth:** November 1962

**Place of birth:** Shenyang City, Liaoning Province

**Profile:**

Shen Zhongyang is the director of the Organ Transplantation Center at Tianjin First Central Hospital, director of the Tianjin Organ Transplant Research Institute, director of the Organ Transplant Research Institute of the Armed Police General Hospital, and the president of Tianjin First Central Hospital. He enjoys special allowances for experts from the State Council, and he is a professor at Nankai University and Tianjin Medical University and a doctoral student supervisor. He is the chief expert of the organ transplantation key technology projects of the National 863 Program and chief expert of organ transplantation in the Core Group of the Central Health Committee.<sup>84</sup> (The Central Health Committee is an

organization under the CCP Central Committee mainly responsible for the personal health of the CCP top officials.)

Shen Zhongyang presided over the completion of a liver transplant operation at the hospital in 1994. In 1998, he established the Organ Transplant Department, which later developed into the Orient Organ Transplant Center in 2006. At the same time, he established the largest organ transplant center in Beijing at the Armed Police General Hospital and served as the center's director.<sup>85</sup> As of the end of 2014, his team had completed nearly 10,000 liver transplants.<sup>86 87</sup>

#### TJYZ002.

**Name:** Zang Yunjin

Gender: male

Date of birth: October 29, 1964

**Profile:** Zang Yunjin is vice president of Qingdao University Medical Group, director of surgery and director of the Organ Transplant Center at the Affiliated Hospital of Qingdao University, and chief surgeon and professor at the hospital's Institute of Organ Transplant

Medicine.<sup>88</sup>

He is also deputy director of the Institute of Liver Transplantation at the Armed Police General Hospital, as well as chief surgeon and professor at the institute. He also holds positions as director and chief surgeon of the Liver Transplant Department of Shandong Qianfoshan Hospital, affiliated with School of Medicine, Shandong University. He is also director of the Shandong Branch of the Orient Organ Transplant Center, and chief surgeon at the Orient Organ Transplant Center of Tianjin First Central Hospital.<sup>89</sup> He is a surgeon member of the International Liver Transplant Society (ILTS), standing committee member of the Military Organ Transplant Professional Committee of the Chinese Medical Association, vice chairman of the Shandong Provincial Organ Transplant Professional Committee, a specially-invited expert of the Medical Expert Committee of Shandong Science and Technology Press and editorial board member of "*Shandong Medicine*" journal.

**Overseas training experiences:** From September 1999 to December 2000, he studied liver transplantation techniques as a visiting scholar, at the University of Pittsburgh Medical Center's (UPMC) Thomas E. Starzl Transplantation Institute, under the tutelage of John J. Fung, former president of the International Liver Transplantation Society. In June 2000, he was accepted as a surgeon member by the International Liver Transplantation Society.

In September 2001, after receiving transplant training in the U.S., he joined the Organ Transplant Department of Tianjin First Central Hospital and the Orient Organ Transplant Center, and he carried out liver transplants under the guidance of Shen Zhongyang. He was later able to complete liver transplants on his own and provided training for other hospitals in Hebei, Henan and Shandong Provinces in over 100 operations.<sup>90</sup> In January 2005, Zang joined the Armed Police General Hospital's Liver Transplant Research Institute to perform liver transplantation, and he was appointed deputy director of the institute, chief surgeon and professor. Between January 2004 and August 2008, he performed 1,600 cases of liver transplantation.<sup>91</sup>

In February 2014, the Affiliated Hospital of Qingdao University announced the establishment of its Organ Transplant Center and invited Zang Yunjin to become the center's director. Zang has led his team to realize a so-called "leapfrog development", and the center's number of liver transplant operations ranked among the major domestic organ transplant centers, reaching the domestic advanced level. Its liver transplant volume ranked first in Shandong for two consecutive years, and was among top ten in China.<sup>92</sup> By 2019, more than 1,800 liver transplants had been completed.<sup>93</sup> In the early morning of February 26, 2021, he committed

Date of birth: 1968

**Profile:** Pan Cheng is a chief surgeon at the Organ Transplant Center, member of the International Society of Liver Transplantation and member of the Organ Transplantation Branch of the Tianjin Medical Association.

He graduated from the former Zhongshan Medical University in 1992 and worked in general surgery after graduation. In 1998, he started to engage in liver transplantation clinical work. In 2001, he went to the Thomas E. Starzl Transplantation Institute, University of Pittsburgh in the US, to study liver transplantation for one year.

Pan Cheng has independently completed more than 1,000 cases of whole liver transplantation and more than 100 cases of living donor liver transplantation. The liver transplantation procedures that he has carried out include classic bypass liver transplantation, classic non-bypass liver transplantation, piggyback liver transplantation, reduced-size liver transplantation, split liver transplantation, liver re-transplantation, living donor liver transplantation and pediatric liver transplantation.<sup>104</sup>

He has conducted in-depth research on subjects, such as donor organ harvesting and preservation, diseased liver resection, vascular anastomosis, liver transplantation preoperative and postoperative management, treatment of portal vein thrombosis in liver transplantation and living donor liver transplantation.

## WOIPFG Investigative Report on Suspected Live Organ Harvesting by Third Medical Center of PLA General Hospital (Formerly Known as General Hospital of Chinese People's Armed Police Forces) and Persons Involved

Address: No. 69 Yongding Road, Haidian District, Beijing  
Telephone: 010-57976114 (switchboard), 010-57976688 (switchboard)  
<http://www.bj-doctor.cn/yiyuan/10988.html>

The evidence from years of investigation by the WOIPFG indicates that the General Hospital of Chinese People's Armed Police Forces has long been harvesting organs from living Falun Gong practitioners. Moreover, organ transplant research was suddenly launched after 1999, and organ transplantation has developed rapidly since, which is highly synchronized with the advent and course of the CCP's persecution of Falun Gong. The waiting times are extremely short, the source of organ donors is conveniently sufficient, and there are multiple expert transplant teams, etc. It is one of the units with huge numbers of transplants in the entire nation and PLA. It is one of the most serious criminal units suspected of engaging in live organ harvesting from Falun Gong practitioners.

The General Hospital of Chinese People's Armed Police Forces is a large-scale comprehensive tertiary Class A hospital that integrates medical treatment, health care, teaching, scientific research, and rescue. The hospital has 54 departments and 1,380 beds. There are 13 doctoral tutors, 100 master's tutors, a national-

---

level “postdoctoral research workstation,” a university medical teaching and doctor training base.<sup>131</sup>.

#### **I. The General Hospital of Chinese People's Armed Police Forces has never stopped harvesting organs from living Falun Gong practitioners**

##### **1. The Beijing General Hospital of Armed Police cuts tendons in limbs of Falun Gong practitioners before live organ harvesting**

On July 25, 2022, Japanese economic commentator Ushio Sugawara reported to WOIPFG, that before harvesting organs from live Falun Gong practitioners, the Beijing General Hospital of Armed Police cuts off tendons in Falun Gong practitioners arms and legs, in order to keep the organs in a relaxed state and ensure the quality of organs.

The insider also revealed, that a doctor from the General Hospital of the Armed Police said, "Because the population in China is large, we can supply any number of donors that are suited for organ transplantation." In other words, they have as many as live people as they want, for the purpose of harvesting organs. There are enough Chinese, ready to be slaughtered at will. This is another evidence that there is a Nazi type of concentration camp by the Chinese Communist Party, that supplies organs by living humans.

##### **2. Wang Jianli, a kidney transplant doctor at the Beijing Armed Police General Hospital, said that there are a lot of kidney transplants in the hospital, which is a systemic operation.**

Investigation subject: Surgeon in the Department of Organ Transplantation, Beijing General Hospital of the Armed Police Force

Investigation time: October 2006 (+86-139 1172 3417)

Investigation highlights:

Wang Jianli, Director of Kidney Transplantation at the Beijing Armed Police General Hospital, said that there are a lot of kidney transplants in the hospital, which is a systemic operation.

In 2005, the hospital formally established a special team for kidney transplantation to carry out kidney transplant operations, and the original liver transplant research institute was expanded into an organ transplant research institute<sup>132</sup>. After the Sujiatun scandal was exposed, the WOIPFG conducted a telephone investigation into the Institute of Organ Transplantation. Doctor Wang Jianli said, “The number (of kidney transplants) is very large! Of the last 1,000 transplants, there were more than 500 kidney transplants. Which country in the world can do that now? Regarding the process, it [the institute] has even established a step-by-step procedure for it!”

(Recording 1. Download: [MP3](#); Transcript Download: [pdf 1](#))

##### **3. The same Wang Jianli, more than 10 years later, admitted that Falun Gong donors were still being used<sup>133</sup>.**

**Subject(s):** Wang Jianli, doctor at deputy director level with the Institute of Organ Transplantation, General Hospital of Chinese People's Armed Police Forces in Beijing

([Live recording I](#) of WOIPFG investigation of CCP's live organ harvesting)

#### **4. Admitting in Acquiescence of Using Falun Gong Practitioner Organs**

**Subject(s):** **Chen Xinguo**, Director of Liver Transplant Program, General Hospital of Chinese People's Armed Police Forces<sup>136</sup>

**Date of investigation:** October 19, 2018 (+13701220662)

#### **Excerpts:**

Investigator: The end of the month should be fine, right? That's about more than a week's time. We don't want organs from those who've been tortured or who've gone on hunger strike. It is better to have those from people in their normal state. Those who do the practice (of Falun Gong) would be even better.

Chen Xinguo: Don't worry, we have done so many, I will check it for you!

**Personal profile:** Director of Surgery Department at the Institute of Organ Transplantation. Permanent member of the Committee of Organ Transplant Profession at China Research Hospital Society<sup>137</sup>

(Recording 3. Download: [MP3](#); Transcript Download: [pdf 22](#))

## **II. Organ transplant research suddenly spiked after 1999, and organ transplantation developed rapidly**

In 2001, the Liver Transplant Center of the General Hospital of Chinese People's Armed Police Forces was established<sup>138</sup>, which is the largest liver transplant center in Beijing. In April 2002, with the approval of the Armed Police Headquarters Logistics Department, the Liver Transplant Institute of the General Hospital of Chinese People's Armed Police Forces was established in association with the General Hospital of Chinese People's Armed Police Forces in Beijing and the Tianjin Oriental Organ Transplant Center, with Shen Zhongyang as the director<sup>139</sup>.

Within a short period of just over two years since the establishment of the Liver Transplant Center in May 2003, it became the leader in terms of the number of annual surgeries and the oldest and the youngest patients in the army and the country<sup>140</sup>.

On April 6, 2005, the Liver Transplant Center performed five liver transplants simultaneously<sup>141</sup>.

In 2005, the hospital formally established a special team for kidney transplantation to carry out kidney transplant operations, and the original liver transplant research institute was expanded into an organ transplant research institute<sup>142</sup>.

The General Hospital of Chinese People's Armed Police Forces received funds from the China Medical Board (CMB) of the United States to establish the “China Liver Transplant Training Center,” which has trained 55 doctoral and master students and 385 trainees, and sent out more than 1,000 people nationwide and overseas for liver transplantation observation and expertise sharing. The Hospital Research Institute has

To investigate the criminal conduct of all institutions, organizations, and individuals involved in the persecution of Falun Gong; to bring such investigation, no matter how long it takes, no matter how far and deep we have to search, to full closure; to exercise fundamental principles of humanity; and to restore and uphold justice in society

established the country's largest post-transplant follow-up center and started a medical file system for liver and kidney transplant patients<sup>143</sup>.

News released in August 2005 suggests that, since 2003, Niu Yujian has been engaged in organ transplantation<sup>144</sup>. He has conducted more than 30,000 liver, kidney, combined liver and kidney, combined pancreas-kidney and lung transplants each year<sup>145</sup>.

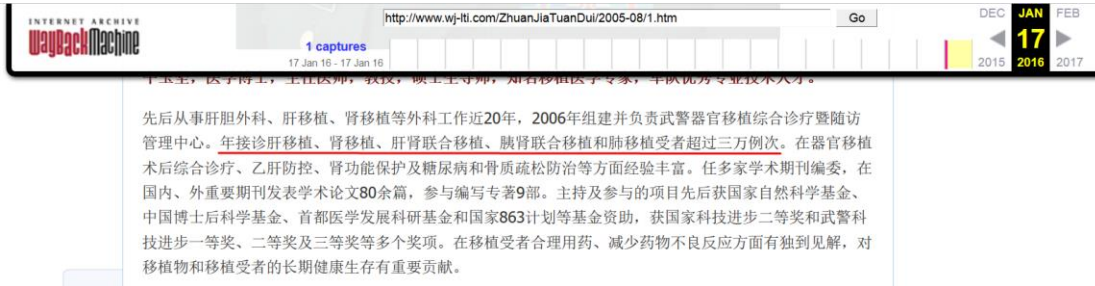

Figure 1 Snapshot of China Organ Transplantation Web page

According to “Baidu Baike,” the frequency of surgical follow-up: Patients are followed up once a month in the first half of year after transplantation. During the three to six months after surgery, patients need to take large doses of immunosuppressant and hormones. During that time, they often have weak immunity and are prone to infections. On the other hand, during this period, the patient's body has the strongest immune response to the liver transplanted into the body, and acute rejection is likely to occur. The three to six months after surgery is a critical period that affects the long-term survival of the transplanted liver and the patient's quality of life. Six months after transplantation, follow-ups are conducted every two months. In the second year after transplantation, follow-up is performed every three months; in the third year after transplantation, follow-up is one to two times a year. As of August 2005, the hospital had quite a large number of annual follow-ups. It can be assumed that the hospital has a huge number of liver transplants<sup>146</sup>.

Due to its outstanding transplant performance, in 2006, the Organ Transplant Institute of the General Hospital of Chinese People's Armed Police Forces passed as one of the first batch of liver transplant and kidney transplant accessible units of the Ministry of Health. In 2007, it was designated by the Beijing Municipal Medical Insurance Bureau as part of the first batch of “Beijing Medical Insurance Designated Units for Anti-Rejection Treatment of Liver Transplantation.”<sup>147</sup> Moreover, the Institute is carrying out seven scientific research projects of the National Natural Science Development Fund Project, the Armed Police Headquarters Project, and the General Hospital internal project. The scientific research projects related to organ transplantation won the second prize of the National Science and Technology Progress Award, and the first prize of the Armed Police Forces Science and Technology Progress Award. At the same time, the institute has undertaken a number of major scientific and technological projects of the National Eleventh Five-Year Plan and the 863 Project<sup>148</sup>.

During the period, Xu Caihou (now dead), then Vice Chairman of the Military Commission, Guo Boxiong (who is serving a life sentence in Qincheng Prison) and others went to the Organ Transplant Institute of the General Hospital of Chinese People's Armed Police Forces in recognition of the medical staff<sup>149</sup>.

### III. Multiple expert transplantation teams; the number of transplants leads in Beijing

Among the 2,098 medical personnel suspected of organ harvesting from living Falun Gong practitioners, as announce by the WOIPFG in 2014, 40 were liver transplant doctors from the Organ Transplant Institute of the General Hospital of Chinese People's Armed Police Forces, including 5 doctors at director level, 11 doctors at deputy director level, and 4 attending Surgeons. Among the 17 kidney transplant doctors, 5 are

### World Organization to Investigate the Persecution of Falun Gong (WOIPFG)

To investigate the criminal conduct of all institutions, organizations, and individuals involved in the persecution of Falun Gong; to bring such investigation, no matter how long it takes, no matter how far and deep we have to search, to full closure; to exercise fundamental principles of humanity; and to restore and uphold justice in society

doctors at director level, 6 at deputy director level, and 2 attending Surgeons. They can form more than 10 liver and kidney transplant teams.”<sup>150</sup>

Public data shows:

Zang Yunjin had been doing liver transplants under the guidance of Shen Zhongyang at the Tianjin Oriental Organ Transplant Center before he was transferred in 2005 to the Institute of Liver Transplantation of the General Hospital of Chinese People's Armed Police Forces and was appointed as the deputy director in April the same year. Since coming to the hospital up until June 2014, he had completed more than 1,570 liver transplants and 22 combined liver and kidney transplants, for up to 160 cases per year<sup>151</sup>.

Chen Xinguo studied liver transplantation under Shen Zhongyang. When Chen was deputy director of transplant surgery, he participated in more than 800 liver transplants in 6 years. Because he is proficient in liver donor harvesting and transplantation techniques, he independently completed more than 300 donor harvests and more than 300 liver transplant operations<sup>152</sup>.

In January 2015, “Tonight Media Group” stated, “Under the guidance of Shen Zhongyang, the former young doctors independently completed nearly a thousand liver transplant operations.”<sup>153</sup>

#### IV. The Institute of Organ Transplantation said that the source of donors is sufficient

On October 18, 2005, the official website of the General Hospital of Chinese People's Armed Police Forces reported, “the Organ Transplant Institute of the Armed Police General Hospital has now formally established an expert team to carry out kidney transplant operations. The establishment of an expert team means strong staff and *sufficient donor sources*, and it is under the direct guidance of Prof. Shen Zhongyang. Operations are done by experts who have performed thousands of transplants. Welcome to come for consultation. At the same time, online consultation before kidney transplantation is available.”<sup>154</sup>

Figure 2. Web page snapshot of the General Hospital of Chinese People's Armed Police Forces

#### V. Recordings of telephone investigation show: there are many transplant teams, and a large amount of transplants; abundant sources of donors, and short waiting times for transplants

#### Examples of investigation recordings:

**Subject(s):** A doctor of Liver Transplant Office, General Hospital of the Chinese People's Armed Police Forces<sup>155</sup>

**Date of investigation:** June 14, 2016 (+86-1057976858)

**Excerpts:**

Doctor: We do (liver transplants) every month. Our (surgery) team alone did 6 transplants last month. We have 4 or 5 group teams. Recently, as long as you want to stay..., in fast cases, "it may be done immediately." "In general, if it is a slow case, it will only take a little more than a month."<sup>156</sup>

(Recording 4. Download: [MP3](#) ; Transcript Download: [pdf 133](#))

**Subject(s):** A doctor on duty at the Kidney Transplant Office of the General Hospital of the Chinese People's Armed Police Forces

**Date of investigation:** March 29, 2017 (+86-1057976857)

**Excerpts:**

Doctor: Kidney transplantation division has two teams. One team can do more than 200 cases a year, and two teams can do more than 500 cases in total. More have done this year than last year. The liver transplantation team has several directors in charge, and they have done even more cases<sup>157</sup>.

(Recording 5. Download: [MP3](#); Transcript Download: [pdf 81-3](#))

**Subject(s):** A nurse of the Liver Transplant Inpatient Service (8th floor), General Hospital of the Chinese People's Armed Police Forces<sup>158</sup>.

**Date of investigation:** February 8, 2018 (+86-1057976180)

**Excerpts:**

Nurse: There are many liver transplant surgeries. This (liver transplant) operation is being done every day.

(Recording 6. Download: [MP3](#); Transcript Download: [pdf 81-1](#))

**Subject(s):** Wang Zhaohui, Director of the Organ Donation Preparation Office at Beijing Red Cross

**Date of investigation:** September 6, 2018, (+18910670191)<sup>159</sup>

**Excerpts:**

When Wang Zhaohui recommended to the investigator that his patient relative should go to the General Hospital of the Armed Police in Beijing for organ transplantation, the investigator asked if the armed police hospital has better organ sources. In reply Wang Zhaohui said, "It's not that they have better sources. As a military hospital, the Armed Police Hospital does the most in Beijing. The armed police hospital is one belonging to the military, so the armed police hospital, like the military ones, does the most."

To investigate the criminal conduct of all institutions, organizations, and individuals involved in the persecution of Falun Gong; to bring such investigation, no matter how long it takes, no matter how far and deep we have to search, to full closure; to exercise fundamental principles of humanity; and to restore and uphold justice in society

Zang Yunjin left Beijing General Hospital of the Chinese People's Armed Police Forces for the Affiliated Hospital of Qingdao University in 2014 to help set up the Organ Transplant Center at Qingdao University. He's now Deputy Dean of Qingdao University Medical Group, Director of Surgery at the Affiliated Hospital of Qingdao University, Director of Organ Transplant Center, and Director of Transplant Research Institute.

**Subject(s):** Liu Yu, doctor at deputy director level with Liver Transplant Program, Beijing Chaoyang Hospital <sup>172</sup>

**Date of investigation:** July 16, 2020 (+86-13911062788)

#### **Excerpts:**

Investigator: Are you Dr. Liu from the General Hospital of the Chinese People's Armed Police Forces?

Doctor Yu Liu: I have left the General Hospital of the Chinese People's Armed Police Forces ..... you should come to the hospital as soon as possible, can you do it tomorrow morning?.....See me in Beijing Chaoyang Hospital, it's around the East Bridge at the Chaoyang District. We are not shutdown during the pandemic; we have been doing it all along, just yesterday, actually we did four cases in the last three days.

Investigator: Can it be done within one month, if everything goes well?

Doctor Yu Liu: It should. I think it should.

Liu Yu, transferred to the Institute of Liver Transplantation at the General Hospital of the Chinese People's Armed Police Forces in 2003, studied under Shen Zhongyang. He was the leader of the medical team in 2004, appointed as the assistant to the director of the institute in August 2005, and created Rainbow Club in August of the same year. In 2008 Liu went to study in The University of Hong Kong Queen Mary Hospital, returned to the General Hospital of the Chinese People's Armed Police Forces in 2009, and became Deputy Director at the Institute of Liver Transplantation. He was the Youth Member of the Society of Organ Transplantation of PLA.

Liu Yu is currently the doctor at deputy level of Hepatobiliary Surgery at Beijing Chaoyang Hospital. He's also an editor for Practical Journal of Organ Transplantation, an electronic magazine; member of the liver transplant branch of China International Society for Medical Healthcare; and member of Transplant Pathology Committee of Organ Transplant Branch, Chinese Medical Doctor Association<sup>173</sup>.

## VI. List of People Involved (32)

**BJWZ001. Shen Zhongyang**, male, DOB: November 1962. Place of birth: ShenYang City, Liaoning Province.

**Personal Profile:** Director of the Institute of Organ Transplantation, the General Hospital of the Chinese People's Armed Police Forces; Dean of TianJing First Central Hospital, Director of Dongfang Organ Transplant Center; doctor at director level; and professor<sup>174</sup>.

In 2001, he started creating the Institute of Organ Transplantation and Liver Transplant Center at Armed Police Beijing Headquarters Hospital, and later the Institute of Liver Transplantation at Armed Police Jinan Headwaters Hospital and the Liver Transplant Center at Shangdong Qianfoshan Hospital.

## 追查迫害法輪功國際組織 ( 追查國際 )

### World Organization to Investigate the Persecution of Falun Gong (WOIPFG)

To investigate the criminal conduct of all institutions, organizations, and individuals involved in the persecution of Falun Gong; to bring such investigation, no matter how long it takes, no matter how far and deep we have to search, to full closure; to exercise fundamental principles of humanity; and to restore and uphold justice in society

Under the guise of teaching and providing clinical guidance, Shen Zhongyang often went to 66 military and civilian hospitals in 22 Chinese districts to promote and initiate organ transplant businesses, trained large number of transplant doctors.

He completed nearly 10 thousand cases of organ transplants by the end of 2014<sup>175</sup>. Shen is the chief specialist of the Organ Transplant Essential Technique Group in biological medical technology field under the National 863 Plan, chief specialist in organ transplant of the Healthcare Team of the Central Committee of Chinese Communist Party.

Shen Zhongyang has been engaged in clinical and research work in liver transplantation for 30 years. In 1998 he founded China's first professional transplant team at the First Central Hospital in the City of Tianjin and developed it into the largest organ transplant center in Asia – Dongfang Organ Transplant. It has maintained its lead in the number of liver transplant surgeries since 1998<sup>176</sup>. In the meantime, he served as the director of the largest organ transplant center he founded in the military and in Beijing at Beijing General Hospital of the Chinese People's Armed Police Forces.

**BJWZ002. Zang Yunjin**, Male, DOB: October 29, 1964.

**Personal Profile:** he is currently Vice President of Qingdao University Medical Group, Director of Surgery, The Affiliated Hospital of Qingdao University, Director of Organ Transplant Center, Director, Doctor at director level and professor at the Institute of Transplant Medicine<sup>177</sup>.

He joined the Institute of Liver Transplantation of General Hospital of the Chinese People's Armed Police Forces in Jan. 2005<sup>178</sup>. In April he was hired on as Deputy Director of the institute, doctor at director level and professor. According to the report in 2009 by Tianjing Medical Journal, he has been the attending surgeon for 1570 liver transplants, 22 combined liver and kidney transplants, and over 110 live right-side liver transplants since he joined the hospital<sup>179</sup>.

After returning from studying abroad in Sept. 2001 he joined the Organ Transplant Program of the First Central Hospital in the City of Tianjin and Dongfang Organ Transplant Center, and provided guidance to multiple hospitals in the provinces of Hebei, Henan, and Shangdong in over 100 liver transplant surgeries. The positions he holds concurrently include: Director of Liver Transplant Program at Shandong Provincial Qianfoshan Hospital of the School of Clinical Medicine of Shangdong University; Director of Shangdong branch of Dongfang Organ Transplant Center; doctor at director level of Dongfang Organ Transplant Center at the First Central Hospital in the City of Tianjin; doctor member off International Liver Transplant Society (ILTS); standing member of the Special Committee of Military Organ Transplantation under the Chinese Medical Association (CMA); member at deputy director level of the Special Committee of Organ Transplantation in Shandong Province.

Training experience abroad: September 1999 through December 2000, he was a visiting scholar to Thomas E. Starzl Transplantation Institute of US Pittsburg University Medical Center (UPMC), studying liver transplant techniques with Professor John J. Fung, Chairman of the International Liver Transplant Association. He was admitted into International Liver Transplantation Society as a doctor member in June 2000.

### World Organization to Investigate the Persecution of Falun Gong (WOIPFG)

To investigate the criminal conduct of all institutions, organizations, and individuals involved in the persecution of Falun Gong; to bring such investigation, no matter how long it takes, no matter how far and deep we have to search, to full closure; to exercise fundamental principles of humanity; and to restore and uphold justice in society

He joined The Affiliated Hospital of Qingdao University in 2014, established Organ Transplant Center and was its director. He led in the number of liver transplant surgeries among major centers for organ transplantation in China for the same period. For two consecutive years, his numbers ranked first in Shandong and top ten nationwide<sup>180</sup>. By 2019, more than 1,800 liver transplants had been completed. <sup>181</sup>In the early morning of February 26, 2021, he committed suicide by jumping off the building. <sup>182</sup>

**BJWZ003. Chen Xinguo, Male, DOB: 1964.**

**Personal Profile:** He is Deputy Director, Doctor at director level of Transplant Surgery, Institute of Organ Transplantation, General Hospital of the Chinese People's Armed Police Forces. He has a Master's degree in medicine and is tutor for Master's degree students. He is also the standing member for the Special Committee of Organ Transplantation of Beijing Medical Association, member of the Committee of Organ Transplant Experts under Beijing Medical Doctor Association, and standing member of the Committee of Organ Transplant Experts under the Society for Chinese Research Hospitals.

Since college graduation in 1987 he'd been working in general surgery. In February 2002 he started working under organ transplant expert Professor Shen Zhongyang, specializing in clinical work in liver transplantation.

Within 13 years, he was involved in nearly 2000 liver transplant surgeries and completed over 600 cases on his own. He also assisted more than 10 medical agencies with liver transplant surgeries in and outside Beijing<sup>183</sup>. He independently completed more than 300 donor organ cutting and more than 300 liver transplants<sup>184</sup>.

**BJWZ004. Wang Jianli, Male, DOB: 1967.**

**Personal Profile:** Wang, doctor at deputy director level, PhD. in medicine and a post-doctoral student, is the head of liver transplant and kidney transplant team at the Institute of Liver Transplantation. After graduating from Weifang Medical College, he worked in general surgery, liver and gallbladder transplants. In 2004 he joined General Hospital of the Chinese People's Armed Police Forces to do clinical work in liver transplants with Professor Shen Zhongyang as his tutor.

Training experience abroad: April 2012 through April 2013, he was a visiting scholar to University of Pittsburgh Medical Center and the Cleveland Clinics Hospital, studying liver, kidney, pancreatic, small intestine transplant techniques, especially good at live kidney transplant. He participated in over 400 liver transplants, over 300 kidney transplants, among them 40 live liver transplants. He was responsible for the early formation stage of the kidney transplant program at the Institute of Organ Transplantation, General Hospital of the Chinese People's Armed Police Forces<sup>185</sup>.

**BJWZ005. Liu Hang, male.**

**Personal Profile:** Doctor at deputy director level with the Institute of Organ Transplantation

### World Organization to Investigate the Persecution of Falun Gong (WOIPFG)

To investigate the criminal conduct of all institutions, organizations, and individuals involved in the persecution of Falun Gong; to bring such investigation, no matter how long it takes, no matter how far and deep we have to search, to full closure; to exercise fundamental principles of humanity; and to restore and uphold justice in society

He graduated from Tianjin Medical University in July 1989 and has since been at Urology Surgery for 12 years.

Training experience abroad: He studied in Dehi College of New York University and Columbia University 1996.

In October 2005, he transferred from Dongfang Organ Transplant Center to the Institute of Organ Transplantation of the General Hospital of the Chinese People's Armed Police Forces, being responsible for the Kidney Transplant Program's formation. Up until July 2010, the number of kidney transplant surgeries had been among the top in the areas of Beijing and Tianjin. He performed combined kidney-pancreas transplant and combined liver-kidney transplant, etc<sup>186</sup>.

He transferred to Transplant Surgery in December 2001, focusing on kidney transplants, completing about 450 kidney transplants, among which about 250 cases as attending surgeon, and he participated in over 20 combined liver-kidney transplants. Since 2005, he had completed 18 cases of living donor kidney transplants and more than 400 cases of liver and kidney extractions<sup>187</sup>.

**BJWZ006. Wang Zifa**, male, DOB: March 18, 1963.

**Personal Profile:** Doctor at director level.

He graduated from Xinxiang Medical College in 1982 and stayed on to become resident physician in Surgery at the First Affiliated Hospital of Xinxiang Medical College. In 1987 he enrolled in Xian Jiaotong University (formally Xian Medical University) and graduated with Master's degree in 1990. He was promoted to the position of doctor at deputy director level in 1995. He got his Ph.D in hepatological surgery in 1998. In July 2004 he returned from overseas to join Dongfang Organ Transplant Center of the First Central Hospital in the City of Tianjin and got promoted to the position of doctor at director level in November the same year. In September 2006 he was transferred to the Institute of Liver Transplantation of General Hospital of the Chinese People's Armed Police Forces in Beijing, primarily doing clinical work in liver transplant. He went back to the United States in 2008 and passed United States Medical Licensing Examination (USMLE) and obtained certificate for foreign doctors granted by Education Commission For Foreign Medical Graduates (ECFMG)<sup>188</sup>.

**BJWZ007. Xu Guangxun**, male.

**Personal Profile:** PhD in medicine and doctor at deputy director level, he's been engaged in hepatological surgery and the clinical and research work in liver transplantation for over 20 years.

Education Experience:

2007.09-2008.09: Studied in Asan Medical Center, Ulsan University, South Korea

2003.01-2003.04: Studied in Liver Transplant Center, West China Hospital, Sichuan University

2002.03-2002.06: Studied in Liver Transplant Center, Zhongshan Hospital Affiliated to Fudan University, Shanghai

1997.09-2000.07: Studied for Doctor's degree in Hepatological Surgery at The First Affiliated Hospital of Xi'an Jiaotong University

1992.09-1995.07: Studied for Master's degree at Medical University.

### World Organization to Investigate the Persecution of Falun Gong (WOIPFG)

To investigate the criminal conduct of all institutions, organizations, and individuals involved in the persecution of Falun Gong; to bring such investigation, no matter how long it takes, no matter how far and deep we have to search, to full closure; to exercise fundamental principles of humanity; and to restore and uphold justice in society

1985.09-1990.07: Studied for Bachelor's degree at Norman Bethune University of Medical Science

#### Work Experience:

2005.07 –present: Institute of Liver Transplantation, the Third Medical Center, the 301 Hospital, Beijing

2001.06-2005.06: Director of Sino-US Liver Transplant Collaboration Center / Liver Transplant Center of Beijing Youan Hospital

2000.09-2001.06: Deputy Director of Hepatological Surgery Program, Beijing Youan Hospital

1995.07-2000.08: Attending Surgeon of General Surgery, Affiliated Hospital of WeiFang Medical College, Shandong

1992.09-1995.06: Resident Surgeon of General Surgery. The Second Affiliated Hospital of Norman Bethune University of Medical Science

He participated in and completed over 100 liver transplant surgeries every year<sup>189</sup>.

**BJWZ008. Li Wei**, male, DOB: November 1968.

**Personal Profile:** Doctor at deputy director level at the Institute of Organ Transplantation. He graduated from Shandong Medical University with PhD in medicine in 1999. Between 2000 and 2002 he worked as a postdoc at the Capital Medical University post rotating station and obtained post-doctoral certificate (Certificate No.: 9208). He studied under renowned surgical experts Professor Chen Yuli and Professor Liu Renji during graduate studies. He joined the Institute of Liver Transplantation, General Hospital of the Chinese People's Armed Police Forces after completing postdoc studies in September 2002.

**Overseas Training Experience:** In 2003 and 2006 he went to Japan and Hong Kong respectively to study liver transplant surgery using organs from living donors. June 2010 through June 2011 he went to the Transplant Center of Chicago University in the US for research and training and, under the guidance of internationally renowned liver transplant expert Professor Millis, studied liver transplantation with organs from family members and combined implantation of multi-organs.

After finishing his postdoc work in September 2002, he started working at the Institute of Liver Transplantation, General Hospital of the Chinese People's Armed Police Forces and, under the guidance of Professor Shen Zhongyang, engaged in clinical work in liver transplantation, involved in over a thousand liver transplants, capable of completing the whole process of liver transplant, including the extraction, trimming, diseased liver elimination, blood vessel and biliary tract reconstruction and liver transplant patients' post-surgery recovery. He has now independently completed nearly 100 liver transplants. He was involved in all the over 100 liver transplant surgeries using organs from family members in the General Hospital of the Chinese People's Armed Police Forces. He was mainly responsible for donor organ modification, artery and biliary track reconstruction, and post-surgery visits. He was also responsible for online inquiries on liver transplant website for General Hospital of the Chinese People's Armed Police Forces. After returning from abroad in 2011 he began to work under the guidance of Professor Shen Zhongyang cooperated with the Huaxia Organ Transplantation Aid Foundation and Angel Mom Charity Foundation, responsible primarily for children's liver transplants using organs from family members. He is the only doctor in Beijing who has certificates for both organ transplantation (No. : 0378249) and pediatric surgery (No.: 1020B044606)<sup>190</sup>.

## 追查迫害法輪功國際組織 ( 追查國際 )

### World Organization to Investigate the Persecution of Falun Gong (WOIPFG)

To investigate the criminal conduct of all institutions, organizations, and individuals involved in the persecution of Falun Gong; to bring such investigation, no matter how long it takes, no matter how far and deep we have to search, to full closure; to exercise fundamental principles of humanity; and to restore and uphold justice in society

#### BJWZ009. Niu Yujian, male.

**Personal Profile:** Doctor at director level, tutor for Master's degree students, and head of the Center for Transplant Follow-up Visits.

He completed his postdoc research work under the guidance of organ transplant expert Professor Shen Zhongyang. After working at Hepatological Surgery Program for over 10 years, he started specializing in organ transplantation from 2003, and formed the Center for Transplant Followup Visit at General Hospital of the Chinese People's Armed Police Force in 2006, for which he was put in charge. He has been working in liver and kidney transplants for nearly 20 years. He treats over 30,000 liver and kidney transplant patients every year<sup>191</sup>.

#### BJWZ010. Wu Fengdong, male, DOB: 1969.

**Personal Profile:** Doctor at director level: head of the treatment group of Liver Transplant and Hepatological Surgery Program in the Institute of Liver Transplantation at General Hospital of the Chinese People's Armed Police Force.

Upon graduation from Hebei Medical University in 1992, he worked in the fields of Hepatological Surgery and Vascular Surgery. He is skillful in diagnosis and surgical treatment of liver, gallbladder, intestine, pancreas, and blood vessel diseases. In 2003 he started doing clinical work in liver transplantation under the guidance of Professor Shen Zhongyang at the General Hospital of the Chinese People's Armed Police Force. By the end of 2010 he had managed over 600 cases of liver transplant patients, participated in over 500 liver transplant surgeries, among them over 40 were cases using organs from family members<sup>192</sup>.

#### BJWZ011. Chen Hong, female

**Personal profile:** Doctor at director level

She graduated from the Department of Medicine, Guiyang Medical College in 1983, and got her PhD in medicine at West China University of Medical Sciences in 2002.

She's now primarily engaged in postoperative management, follow-up treatment and health education for patients after liver transplant operation<sup>193</sup>.

#### BJWZ012. Zhu Xiaodan, male

**Personal profile:** Doctor at deputy director level

In 2000 he was studying vascular surgery techniques with vascular surgery specialist, Academician of Chinese Academy of Sciences Wang Zhonggao. In 2002 he was studying liver transplant techniques with Professor Shen Zhongyang. In 2002 he participated in the preparatory work for the establishment of the Center for Liver Transplantation as one of the

first members from the Liver Transplant Program in General Hospital of Chinese People's Armed Police Forces. In 2004 he started working toward his Master of Surgery degree at Capital Medical University and he now has had that degree. He treated near 1,000 liver transplant patients from Japan, South Korea, Indonesia, Pakistan and Taiwan. He participated in over 400 cases of clinical management and surgeries of liver transplantation<sup>194</sup>.

Member of the Special Committee of Transplant Immunity, Organ Transplant Surgeons Branch of Chinese Medical Doctor Association (CMDA); member of Perioperative Management Committee of Organ Transplant Surgeons Branch of Chinese Medical Doctor Association (CMDA); member of Hepatobiliary and Pancreatic Committee of Cancer Rehabilitation Society of the Chinese Anti-Cancer Association (CACA); member of Organ Transplant Branch of Qingdao Medical Society; Editor for Journal of Organ Transplantation (electronic version); Editor of China Journal of Tissue Engineering and Clinical Rehabilitation; medical malpractice assessment expert of Beijing Haidian Medical Society.

**BJWZ013. Liu Yu**, male, DOB: November, 1970. Place of Birth: Changchun City, Jilin Province

**Personal profile:** Doctor at deputy director level; Youth member of the Special Committee for Organ Transplantation in the military; Assistant to Director of the Institute of Organ Transplantation, General Hospital of Chinese People's Armed Police Forces.

He graduated from the Medical College of Jilin University (previously known as Norman Bethune University of Medical Science) in 1993; he had ten years' experience in general surgery. He started getting involved in liver transplantation in 2002 and was transferred to the Institute of Liver Transplantation in 2003, working under the guidance of Professor Shen Zhongyang. He became head of a medical team in 2004 and started performing liver transplant surgeries independently in January 2005. He was appointed as Assistant to Director in August 2005 and founded Rainbow Club for liver transplant recipients in November the same year.

Overseas training experience: He was sent to Queen Mary Hospital, Hong Kong in 2008 for further study and came back to the Institute of Organ Transplantation in 2009.

He's performed over 160 liver transplant surgeries independently and assisted the completion of over 600 such surgeries since he started in the field<sup>195</sup>.

**BJWZ014. Wang Yi**, male, DOB: 1964.

**Personal profile:** Doctor at deputy director level

He enrolled at the Department of Medicine, Henan University of Medical Science in 1981. Upon graduation in 1986, he starting working at General Surgery at 150 Central Hospital of People's Liberation Army, and started working at Hepatobiliary Surgery in 1994. In 1998 he studied hepatobiliary surgery techniques with Wu Mengchao, a Hepatobiliary Surgery specialist and academician at the Chinese Academy of Sciences. In 2005 he was transferred to the Institute of Organ Transplantation, General Hospital of Chinese People's Armed Police Forces. He graduated from Xi'an University of Medical Science in 1993 and got his PhD in Medicine at the Fourth Military Medical University in 2006.

### World Organization to Investigate the Persecution of Falun Gong (WOIPFG)

To investigate the criminal conduct of all institutions, organizations, and individuals involved in the persecution of Falun Gong; to bring such investigation, no matter how long it takes, no matter how far and deep we have to search, to full closure; to exercise fundamental principles of humanity; and to restore and uphold justice in society

He was involved in multiple surgeries in liver transplantation, liver transplantation using organs from family members, liver transplantation using organs from two family members, liver transplantation for women in mid-term pregnancy, and liver transplantation for children using organs from family members, etc<sup>196</sup>.

**BJWZ015. Yue Yang**, male, DOB: 1997, Place of Birth: Tianjin City

**Personal profile:** Attending Doctor at the Institute of Organ Transplantation, General Hospital of Chinese People's Armed Police Forces.

He graduated from Luzhou Medical School in July 2004 and got his Master's degree in vascular surgery. He started working at the Institute of Organ Transplantation, General Hospital of Chinese People's Armed Police Forces in December 2003, engaged in clinical liver transplantation. He treated and managed over 80 liver transplant patients<sup>197</sup>.

**BJWZ016. Zou Weilong**, male, DOB: 1969

**Personal profile:** Doctor at deputy director level at General Surgery and Hepatological Surgery

Upon graduation from Tongji Medical College of Huazhong University of Science and Technology with a PhD, in 2005, he'd been engaged in general surgery and hepatological surgery. Starting from 2004 he studied with Professor Shen Zhongyang and focused on clinical work and theoretical research on liver transplant and kidney transplant at the

Institute of Organ Transplantation of the General Hospital of Chinese People's Armed Police Forces.

He supervised 1000 cases of liver transplant patients over 20 cases of kidney transplant patients<sup>198</sup>. He was involved in over 500 cases of donor liver extractions, donor liver trimmings and liver transplant surgeries<sup>199</sup>.

**BJWZ017. Guan Zhaojie**, male, DOB: 1975

**Personal profile:** Attending Doctor, PhD

He graduated from the seven-year program of clinical medicine of Harbin Medical University with a Master's degree in 2000 and got his PhD from the Medical College of Shantou University in 2003. He has been working at the Organ Transplant Program of General Hospital of Chinese People's Armed Police Forces since graduation, during which time he worked for a half year at the care unit of the transplantation section. He was involved in over 100 cases of liver transplant surgeries, postoperative patients care and management<sup>200</sup>.

**BJWZ018 Zhu Xiongwei**, male, DOB: October 1972

**Personal profile:** Doctor at deputy director level, PhD in clinical surgery

### WOIPFG's Investigative Report on the Alleged Organ Harvesting of Living Falun Gong Practitioners at the Eighth Medical Center of the PLA General Hospital (Formerly the PLA No. 309 Hospital) and Its Staff Members Suspected of Participation

**Hospital:** The 8<sup>th</sup> Medical Center of the General Hospital of the People's Liberation Army of China (former the 309th Hospital of PLA)

**Address:** 17 Heishanhu Road, Haidian District, Beijing, China

**TEL:** Main line: +86-10-66775114

#### Preface

The Chinese Communist Party (CCP) has a massive military health system including the PLA General Hospital, the affiliated hospitals of all Military Medical Universities, general hospitals of all military regions and various branches of the military. Organ transplantation has been one of the most active fields at the CCP's military hospitals since 1999.

In December 2008, Zhang Yanling, director of the Health Division of PLA's General Logistics Department, stated on Xinhua News Network, "In 1978, there were only three hospitals in the entire People's Liberation Army capable of performing kidney transplants. Now, there are forty hospitals capable of performing liver, kidney, heart, lung and multi-organ combined transplants, which is one quarter of national total."<sup>216</sup>

In September 2014, Bai Shuzhong, director of the Health Division PLA's General Logistics Department, told WOIPFG investigator, "Back then it was Chairman Jiang ...who gave an instruction, saying carrying out such things, namely organ transplant. ... Following Chairman Jiang's instruction, we all did a lot of anti-Falun Gong work."<sup>217</sup>

In 2002, the Organ Transplant Center was established in 2002. In 2006 and 2011, it was upgraded to All-Army Organ Transplant Center, All-Army Organ Transplant Institute, respectively<sup>218</sup>. The data center of the Scientific Registry for Kidney Transplantation (CSRKT, [www.csrkt.org](http://www.csrkt.org)), launched by the Ministry of Health in August 2008, is hosted by the All-Army Transplant Center of the PLA No.309 Hospital<sup>219</sup>. In

### World Organization to Investigate the Persecution of Falun Gong (WOIPFG)

To investigate the criminal conduct of all institutions, organizations, and individuals involved in the persecution of Falun Gong; to bring such investigation, no matter how long it takes, no matter how far and deep we have to search, to full closure; to exercise fundamental principles of humanity; and to restore and uphold justice in society

2012, the transplant center expanded by nearly 400 beds, with an estimated annual liver and kidney transplant volume of over 4,000 cases<sup>220</sup>. As of 2013, the hospital had grown from a small unit of a dozen people to a large transplant team of more than 300 people<sup>221</sup>.

## I . Hospital Overview

The 309th Hospital of People's Liberation Army of China was founded in 1958 and incorporated into PLA General Hospital in 2004. It was renamed as the General Hospital of PLA General Staff Department in 2009 and renamed again as the 8th Medical Center of the General Hospital of People's Liberation Army of China, an affiliate of PLA General Hospital<sup>222</sup>.

PLA No.309 Hospital was one of the first tertiary level-A general hospitals in the nation. It was also the hospital designated to carry out liver transplant, kidney transplant, heart transplant and lung transplant on the list of hospitals approved by the National Health Planning Commission to carry out human organ transplant programs. In fact the hospital had carried out various human organ transplants before its designation<sup>223</sup>.

## II . The Overview of the Organ Transplant Center

### 1. The Transplant Center was upgraded to the Organ Transplant Center of the Whole Army and the Organ Transplant Institute of the Whole Army in 2006 and 2011 respectively

The Organ Transplant Center of the 309th Hospital was established in April 2002 with Shi Bingyi as its director.

In March 2006, the Transplant Center of PLA No.309 Hospital was officially named the All-Army Organ Transplant Center by the Health Division of PLA's Department of General Logistics, with Shi Bingyi as its director. In 2011, it was upgraded to the All-Army Organ Transplantation Institute by the same Health Division.

According to official hospital website report in November 2010, at present, the center consists of 8 departments, 4 sections and 10 nursing units, including urology, hepatobiliary surgery, hematology, nephrology, cell therapy, transplantation research section, transplantation intensive care unit, hemodialysis unit and laminar flow ward. The Organ Transplant Center has independent ward buildings and research unit, with a total floor area of more than one thousand square meters. There are more than 140 pieces of various large medical and scientific research instruments and equipment, with a total value of 26.96 million yuan. There are 316 beds, 231 staff members, 48 on staff in the main series, including 39 with master's degree or above and 21 with senior titles.

The center, in cooperation with Yale University Cancer Center, hired the director of the center Richard L. Edelson as guest professor<sup>224</sup>.

According to another report on hospital website in 2013, the hospital performed liver, kidney, heart, lung, small intestine, pancreas, hematopoietic stem cells and multi-organ combined transplants, and set up the world's second largest kidney transplant database.

As of 2013, the hospital had grown from a small unit of a dozen people to a large transplant team of more than 300 people, with tens of thousands of organ transplants completed<sup>225</sup>.

## 追查迫害法輪功國際組織 ( 追查國際 )

### World Organization to Investigate the Persecution of Falun Gong (WOIPFG)

To investigate the criminal conduct of all institutions, organizations, and individuals involved in the persecution of Falun Gong; to bring such investigation, no matter how long it takes, no matter how far and deep we have to search, to full closure; to exercise fundamental principles of humanity; and to restore and uphold justice in society

## 2. Shi Bingyi disclosed two transplant numbers

On March 2, 2006, an article titled “High Threshold Needed for Organ Transplant” in the Health News, a newspaper run by the CCP’s health ministry, quoted Shi Bingyi as saying, “There have been over 90,000 various organ transplants so far (2005) in the nation.”<sup>226</sup>

In May 2007, Shi Bingyi told Science Times reporter, “The number of organ transplants in China reached an all-time high in 2006, when nearly 20,000 organ transplants were completed.”<sup>227</sup>

## III. Data Center of Management Committee of China Scientific Registration System for Kidney Transplantation (CSRKT)

The data center of the Scientific Registry for Kidney Transplantation (CSRKT, [www.csrkt.org](http://www.csrkt.org)), launched by the Ministry of Health in August 2008, is hosted by the All-Army Transplant Center of the PLA No.309 Hospital, headed by Shi Bingyi<sup>228</sup>. Shi Bingyi presided over the establishment of the Chinese Scientific Registry of Kidney Transplantation (CSRKT), which provides kidney transplant data analysis and annual reports for the Ministry of Health and 123 medical institutions nationwide.<sup>229</sup> As the head of this organ transplant organization, Shi Bingyi was very influential in the CCP’s organ transplant community. He was also the vice chairman of the military’s organ transplantation specialized committee, and he presided over several organ transplant conferences of the entire CCP military<sup>230</sup>. This shows the dominant role of military hospitals in the field of organ transplantation in mainland China, as evidenced by the influence of the 309th Hospital and Shi Bingyi.

Figure 1 Web snapshot of Chinese Scientific Registry of Kidney Transplantation

## IV. The scale of the Organ Transplant Center is huge

### 1. Kidney transplantation “ranked first by far in the country for the past three years”, gross income increased nearly eight times in five years

## 追查迫害法輪功國際組織 ( 追查國際 )

### World Organization to Investigate the Persecution of Falun Gong (WOIPFG)

To investigate the criminal conduct of all institutions, organizations, and individuals involved in the persecution of Falun Gong; to bring such investigation, no matter how long it takes, no matter how far and deep we have to search, to full closure; to exercise fundamental principles of humanity; and to restore and uphold justice in society

On November 17, 2010, the hospital's updated Organ Transplant Center Information web page stated that the hospital had "ranked first by far in the country for the past three years."<sup>231</sup>

The gross revenue of the center's medical account rose from \$30 million in 2006 to \$230 million in 2010, an increase of nearly eight times in five years<sup>232</sup>.

近年来,中心作为医院的重点效益科室医疗毛收入由2006年0.3亿元增至2010年2.3亿元,5年增长近8倍。中心各科室医疗数、质量指标均处于医院前列,年收容量及病床周转次数在军队同类学科处于领先地位,收治危重疑难病人比例高,危重病人抢救成功率在85%以上,居国内同类学科领先地位。中心具有较高的医疗市场影响力,外地住院患者占住院人数50%以上。

中心各科室积极支持、踊跃参加医院各项卫勤保障任务,2007年解放军总医院反台独应急作战卫勤演习、“3.19”卫勤综合演练,2008年汶川抗震救灾、奥运医疗保障,2009年“亮剑”卫勤综合演练、北京反恐维稳卫勤演习,2010年玉树抗震救灾、总参驻京单位师职干部健康体检等等,出色完成任务的同时,展示了移植中心特别能吃苦、特别能战斗的优良作风,多次受到医院及有关单位的高度肯定和赞扬。

Figure 2 Web Snapshot of PLA No.309 Hospital

### **2. In 2012, the transplant center expanded by nearly 400 beds, with an estimated annual liver and kidney transplant volume of over 4,000 cases.**

In 2012, the transplant center expanded by nearly 400 beds, with an estimated annual liver and kidney transplant volume of over 4,000 cases<sup>233</sup>.

Xinhua News Network reported on February 28, 2012 that the PLA No.309 Hospital's Organ Transplant Center had 393 beds.<sup>234</sup> This organ transplant center focused on kidney transplantation. Given that the transplant center "is a leader in the military in terms of annual capacity and bed turnaround times<sup>235</sup>, compared to the bed turnaround rate of Tianjin First Central Hospital in 2013, which exceeded 131.1<sup>236</sup>, assuming a 100% bed turnaround rate at PLA No.309 Hospital and an average length of stay of 30 days for both liver and kidney transplants, the liver and kidney transplant volume is at least 4781 (393×365×100%/30) cases/year.

### **3. In 2013, the transplant center grew to a transplant team of more than 300 people**

The following is WOIPFG's list of doctors suspected of living-donor organ harvesting. The table below lists the physicians on alleged live organ harvesting by WOIPFG.<sup>237</sup> The hospital has many interns, postgraduates, and trainees, and it helps guide many doctors from other hospitals. The hospital's website stated in 2013, "We have admitted and jointly trained 60 graduate students in various categories, and currently (2013) we have 15 PhD and postdoctoral students and 10 master's students. In the past five years, we admitted 60 trainees for advanced study." "The institutions we partner with and provide assistance to include: Wangjiajun General Hospital of Cambodia, PLA 307 Hospital, PLA 22 Hospital, Beijing 254 Hospital of Beijing Military Region, 281 Hospital of Beijing Military Region, and the Medical Brigade of Troop 95944 of the Air-born Force, etc."<sup>238</sup> This organ transplant center has been helping over 30 military and civilian with their clinical application of organ transplantation and other related technologies.<sup>239</sup> As of 2013, the hospital had grown from a small unit of a dozen people to a large transplant team of more than 300 people, with tens of thousands of organ transplants completed<sup>240</sup>.

**Table 1 Major Physicians on PLA No. 309 Hospital Kidney Transplant Team**

Teams	Doctors/Surgeons
Donor Extraction Group (12)	QianYeyong, Shi Bingyi, Cai Ming, Mo Chunbai, Wang Yawei, Li Zhouli, Chang Jingyuan, Bo Hongwei, Zhan Shengli, Du Guosheng, Song Jiyong, Jin Hailong
Director-level Physicians (4)	Shi Bingyi, Cai Ming, QianYeyong, Du Guosheng (on liver transplant team and good at extracting organs from donors)
Deputy director-level Physicians (12)	Jin Hailong, Bo Hongwei, Zhan Shengli, Li Zhouli, Yuan Ming, Li Xiang, Wang Qiang, Li Gang, Wang Zhen, Chang Jingyuan, Dai Xin ( on liver transplant team and good at extracting organs from donors), Song Jiyong (on liver transplant team and good at extracting organs from donors)
Attending Physicians (4)	Fan Yu, Mo Chunbai, Li Chao, Wei Xing
Attending Physicians and Resident Physicians (22)	Xie Junjie (resident doctor), Wang Ke, Wang Yawei, Li Pengcheng, Chen Liping, Ouyang Yun, Du Yuan, Wang Hongyang, Yuan Qing, Xu Liang, Cui Hanwen, Liu Dezhong, Liu Kuili, Zhou Wenqiang, Wu Ruojun, Liu Lupeng, Jia Jinfeng, Qi Baoyu, Zheng Huili, Han Mengxia, Li Kun, Zhang Chao

The hospital has at least 13 director-level physicians and deputy director-level physicians who can lead kidney transplant procedures.<sup>241</sup>

#### 4. More than a dozen transplants in one night

The center had once completed 12 kidney transplants in one night<sup>242</sup>. In 2017, it was reported that Cai Ming, deputy director of the Organ Transplant Institute of the Whole Army and director of the Department of Urology, once performed transplants on 14 patients in a row overnight, from the time the organs were taken to the completion of the surgery, without stopping for days and nights<sup>243</sup>.

#### V. Phone investigations show high transplant volume and short waiting time

**Date of Investigation: December 2, 2015 (+86-13501215502)**

**Subject of Investigation:** Song Jiyong, deputy director-level physician of Organ Transplant Institute, PLA No.309 Hospital

#### Transcript:

Song Jiyong: You know, we have been doing a relatively large number of liver transplants, but this year is special ...

Investigator: I know that you are doing a lot. [The] Armed Police [General Hospital] is also doing a lot. Someone I know waited for only 5 days before doing [the transplant].

**Transcript:**

Investigator: How is the hospital doing with organ transplants?

Jia Chiyu: It's doing pretty good. We're doing the most anywhere in the nation. That's all I know.

(Recording 3 Download: [MP3](#), Transcript Download: [6.3](#))

**Subject of Investigation:** A Surgeon at PLA No.309 Hospital<sup>244</sup>

**Date of Investigation:** June 29, 2015 (+86-13701234615)

**Summary:**

Surgeon: Shi Bingyi is still doing liver transplant. Shi has done a lot and made a fortune. Shi is applying for the membership of Chinese Academy of Sciences. Others could it only twice, but he did it three times because he has connections. Shi Bingyi is pretty bad at it, so he hires people outside to perform the transplant. There're many deaths from surgery. When there's death, the hospital compensates it. But when surgery succeeds, he takes credit for it. Shi Bingyi has connections with people in courts, and has access to liver, kidney, heart and lung sources. He's done less in past two years, he did a lot more a few years back.

Investigator: I searched PLA No.309 Hospital website, and it says he did over 1580 liver transplants himself.

Surgeon: Right. Where do you think these donated livers come from? It'll surely be exposed, and people involved will be thrown into jail. Huang Jiefu and Shi Bingyi schemed together and they are bound by personal gains. The organ transplant circle is all manipulated by these few guys who monopolize the techniques. Go after these guys, get to the bottom of their doings, expose Shi Bingyi, and uncover where these organs come from. Let the authorities investigate, and everything will be dug out. Expose it on the media, let people expose it, then he's done.

(Recording 4 Download: [MP3](#), Transcript Download: [Appendix 6.4](#))

**VI. Witness testimony: It's easy to find a doctor who has done more than 2,000 such surgeries.**

In November 2018, Falun Gong practitioner Yu Ming went to several organ transplant hospitals in Beijing to conduct secret investigation. About his investigation on PLA No.309 Hospital, Yu testified, "the hospital itself claimed it's easy to find a doctor who has done over 2,000 such surgeries. Several doctors have done over 2,000 such surgeries. We took pictures of doctors who have done hundreds of such surgeries at least."

(Videos are available that show doctors' names, profiles and photos)<sup>245</sup>

**VII. Evidence in the paper of organ harvesting from living donors and experiments on human bodies at PLA No. 309 Hospital**

1. Evidence of organ harvesting from living donors in Shi Bingyi's paper

## 追查迫害法轮功国际组织 (追查国际)

### World Organization to Investigate the Persecution of Falun Gong (WOIPFG)

To investigate the criminal conduct of all institutions, organizations, and individuals involved in the persecution of Falun Gong; to bring such investigation, no matter how long it takes, no matter how far and deep we have to search, to full closure; to exercise fundamental principles of humanity; and to restore and uphold justice in society

From Shi Binyi's paper, it can be seen that the organ extraction at PLA No.309 Hospital is a process to taking people's lives. The paper titled "The Practice of Donor Liver and Kidney Extraction and Trimming" was published in "Chinese Journal of Tissue Engineering Research and Clinical Rehabilitation", fifth issue, 2008<sup>246</sup>.

Shi Bingyi said in his paper, "the organ transplant center of the 2<sup>nd</sup> Affiliated Hospital of PLA general hospital (also known as PLA No.309 Hospital) completed a total of 100 liver and kidney extractions from donors without heartbeat January 2000 through December 2006. The procedures were performed in compliance with medical ethics." The following words in the paper cause suspicion of transplantation with organs from living donors: "The average thermal ischemia time for the whole group of donors was five minutes." The truth is, a donor after cardiac death cannot have such a short period of thermal ischemia. Such descriptions, with up to 100 cases of alleged donors, provide evidence of organ harvesting from living donors at the hospital.

#### 肝肾器官移植供体切取及修整实践

戴新 石炳毅 金海龙

**【摘要】**目的:供体切取技术是器官移植的重要步骤,拟在实践中总结出一套较为合理的供体切取及修整方法,以供参考。方法:①实验对象:2000-01/2006-12解放军总医院第二附属医院器官移植中心共完成无心跳肝肾供体切取100例,手术过程符合医学伦理学要求。采用原位肝肾分开切取24例,原位腹主动脉、门静脉双路灌注肝肾联合快速切取法切取供肝肾76例。②实验方法:对门静脉插管灌注方式进行改进,采用盆腔内引流,供肝修整顺序为下腔静脉、门静脉、肝动脉、胆道;供肾修整顺序为输尿管、肾动脉、肾静脉。③实验评估:术中观察器官色泽、张力及完整度,并记录手术操作时间。结果:①全组供体平均热缺血时间为5min;切取时间:肝肾分取平均为肝12min、肾5min,联合切取平均为15min;保存时间平均为8h。②全组供体均成功移植。结论:本组开展的肝肾切取与修整技术经过长期大量的实践,逐步改进,形成了在插管、引流、手术、灌注、修整等多方面具有特点的一套方法,其最大特点是快速、实用,在临床实际应用中取得了较为满意的效果。

## 2. Evidence of experiments on living human bodies in Shi Bingyi's paper

The PLA No.309 Hospital has done a large number of experiments with different organ excision methods by using living human bodies:

In "506 cases of combined thoracic and abdominal organ removal from volunteer cadavers" published by Shi Bingyi et al. in November 2003, it was mentioned that from December 1998 to April 2003, the hospital removed organs from 506 "volunteers" using multiple organ removal methods, among which, 10 cases of combined pancreatic and kidney removal, 9 cases were for technical training and 1 case was for clinical application; 10 cases of combined heart, liver and kidney removal, of which the liver and kidney removals were successfully used in clinical patients, and 7 cases of heart were for technical training.<sup>247</sup>

## 追查迫害法轮功国际组织 ( 追查国际 )

### World Organization to Investigate the Persecution of Falun Gong (WOIPFG)

To investigate the criminal conduct of all institutions, organizations, and individuals involved in the persecution of Falun Gong; to bring such investigation, no matter how long it takes, no matter how far and deep we have to search, to full closure; to exercise fundamental principles of humanity; and to restore and uphold justice in society

According to CCP official reports, the first living person to voluntarily donate organs if brain dead appeared in July 2006<sup>248</sup>. How is it possible that this hospital had over 500 "living persons to voluntarily donate organs if brain dead" before 2003?

These so called volunteers could not possibly be death-row-inmates either. In 2012, the hospital's Organ Transplant Center had "393 beds."<sup>249</sup>

Because the hospital's transplant center is "a leader in the military in terms of annual capacity and bed turnaround<sup>250</sup>", the annual transplant volume can reach thousands of cases, and the total number of death row inmates in the country is far less than the annual transplant volume of PLA No.309 Hospital, so it can not be explained by the organs of death row inmates.

解放军医学杂志 2003 年 11 月 第 28 卷 第 11 期 Med J Chin PLA Vol 28 No 11 November 2003

1039

肾者共 4 个, 占 8.0%; 肝肾整体取法, 肾脏灌注不良者 2 个, 占 3.3%; 肾血管损伤者 1 个, 占 1.7%, 无弃肾者。

**2.3 胰、肾联合摘取** 胰、肾联合摘取 10 例, 无胰肾血管损伤及其他脏器误伤。胰、肾灌注良好。其中 9 例为技术训练, 1 例为临床应用。

**2.4 心、肝、肾联合摘取** 心、肝、肾联合摘取 10 例。肝、肾全部成功应用于临床病人, 心脏有 7 例为技术训练, 3 例成功移植于病人, 移植后发挥了正常功能。

腹主动脉灌注管进行灌注和下腔静脉引流后, 应小心地游离结肠韧带, 仔细处理胰腺周围器官和组织, 尤其是以脾脏和十二指肠为标志的摘取范围, 尽量避免接触刺激胰腺, 保护好该区域, 注意剪断各大血管区域在预定范围内, 如果同时需要摘取肝脏, 一定要在肠系膜上静脉插管, 保护好门静脉; 酌情利用髂静脉搭桥技术使肝胰都能利用。曾有 1 例采用此法而充分利用了肝、肾和胰。

**3.4 心、肝、肾联合摘取** 行心、肝、肾联合摘取法, 必须

## VIII. List of Responsible People

### JFJZ-DB001

Name: Shi Bingyi  
Gender: male  
Date of Birth: May 1951  
Place of Birth: Jinzhou, Liaoning Province

**Personal Profile:** Shi Bingyi is director of the Organ Transplantation Center and director of Transplantation Surgery of the 309th Hospital of the PLA<sup>251</sup>. He is also head of the Data Center of the Management Committee of the Chinese Scientific Registry of Kidney Transplantation (CSRKT)<sup>252</sup> established by the Ministry of Health of the Communist Party of China and member at deputy director level of the All-Army Professional Committee on Organ Transplantation<sup>253</sup>.

The PLA No.309 Hospital Organ Transplantation Center was established in April 2002. In October 2005, PLA No.309 Hospital was upgraded to the All-Army Organ Transplantation Center by the Ministry of Health of the General Logistics Department, and in 2011 it was upgraded to the "All-Army Organ Transplantation Institute" by the Ministry of Health of the General Logistics Department. The data

center of the "Kidney Transplant Scientific Registration Management System", which was launched by the Ministry of Health in August 2008, is also located in PLA No. 309 Hospital, and headed by Shi Bingyi<sup>254</sup>. In 2010, the center officially reported that, the organ transplantation center, as the hospital's key revenue generator, saw an increase of its medical gross income from 0.3 billion yuan in 2006 to 230 million yuan in 2010, up nearly 8 times in 5 years. The center was also leading among military hospitals of the same category in terms of annual accommodation capacity and turnover rate of hospital beds<sup>255</sup>. In 2012, state-run media Xinhua News Net reported that the center had 393 beds<sup>256</sup>.

In 2013, the Sina military website claimed that in the past 18 years, Shi Bingyi had led the team to establish an organ transplantation advantageous discipline group consisting of "8 sections, 4 divisions and 9 nursing units", a development from a small group of a dozen people in the past to a 300-strong transplantation technology team, having carried out tens of thousands of transplants<sup>257</sup>.

#### JFJZ-DB002

Name: Cai Ming

Gender: Male

Date of Birth: June 1961

Place of Birth: Tiantai County, Zhejiang Province.

**Personal Profile:** Cai is Deputy Director of the All-Army Organ Transplantation Center of the 309 PLA Hospital, Director of the Department of Urology, M.D., Chief Physician, Doctoral Supervisor; recipient of the special government allowance of the State Council. He is also director level member of the All-Army Organ Transplantation Committee and deputy director level member of the Transplantation Immunology Branch of the Chinese Society of Immunology<sup>258</sup>.

As of 2004, he had participated in nearly 1000 kidney transplants and nearly 100 liver transplants and donor organ excisions<sup>259</sup>.

In 2017 it was reported that Cai Ming had performed thousands of organ transplants. He once performed transplants on 14 patients in a row overnight, from the time the organs were taken to the completion of the surgery, without stopping for days and nights. A record was set for 24 hours of continuous work on the operating table<sup>260</sup>.

#### JFJZ-DB003 Qian Yeyong, male

**Personal Profile:** Qian is a chief physician, master of medicine, supervisor of master's degree in Military Medical College, and director of transplantation surgery in the All-Army Organ Transplantation Center of 309 Clinical Department of PLA General Hospital. He is a middle-aged and young member of the Organ Transplantation Committee of Chinese Medical Association and Beijing Medical Association. He is also member of National Kidney Transplant Follow-up Management Committee.

He's developed several donor organ extraction techniques and technique of living donor kidney transplant by laparoscopy, done research of hematopoietic stem cells induced immune tolerance after living donor kidney transplant, and developed techniques for combined liver-kidney transplantation and combined kidney-pancreas transplantation<sup>261</sup>.

To investigate the criminal conduct of all institutions, organizations, and individuals involved in the persecution of Falun Gong; to bring such investigation, no matter how long it takes, no matter how far and deep we have to search, to full closure; to exercise fundamental principles of humanity; and to restore and uphold justice in society

#### JFJZ-DB04 Song Jiyong, male

**Personal Profile:** Song is Associate Chief Physician of Hepatological Surgery Program. His responsibilities include liver transplant and perioperative management, treatment of patients with severe liver disease, control of immunosuppressive agents after liver transplant, and treatment of general hepatobiliary diseases<sup>262</sup>.

#### JFJZ-DB005 Jin Hailong, male

**Personal Profile:** Jin is Associate Chief Physician, deputy director level member of Youth Committee, Chinese Society of Organ Transplantation, and Youth Member of All Army Society of Organ Transplantation .

He graduated from the Fourth Military Medical University in 1995, and has engaged in clinical work of organ transplant and urological surgery for over 10 years<sup>263</sup>.

#### JFJZ-DB006 Bo Hongwei, male

**Personal Profile:** Bo is Deputy Director and Deputy Chief Physician at Department of Urology II, All Army Transplantation Center.

He graduated from the Third Military Medical University in 1997, and got his master's degree at the PLA General Hospital (Military Medical Training Institute) in 2000. He later graduated from Beijing University Medical School with a clinical doctorate in 2006. He's engaged in kidney transplantation and urological surgery for over 10 years, and is specialized in kidney transplantation and comorbidity management<sup>264</sup>.

#### JFJZ-DB007 Du Guosheng, male, DOB: 1964

**Personal Profile:** Deputy Director of Administration of Hepatobiliary Surgery and Chief Physician of All Army Institute of Organ Transplantation, current member of the Liver Transplantation Group of the Chinese Medical Association's Organ Transplantation Branch; youth member of Beijing Organ Transplantation Branch of Chinese Medical Association; Member of the Colorectal Surgery Group of the General Surgery Committee of the Chinese People's Liberation Army; youth member of the Beijing Medical Association for General Surgery; member of the American Liver Transplant Association; member of the Medical Accident Technical Appraisal Expert Pool of the Beijing Medical Association; technical appraisal experts for medical accident in Haidian District, Beijing; managing editor of Chinese Tissue Engineering Research and Clinical Rehabilitation (English version); editorial board member of the Chinese Journal of Clinical Physicians; editor of the Electronic Journal of Practical Organ Transplantation; invited editor of Chinese Journal of General Surgery (electronic version); and Editor of the journal *Organ Transplantation*

In 1989, Du graduated from the Second Military Medical University of the People's Liberation Army with a bachelor's degree in clinical medicine and entered the general surgery department of the 309th Hospital of the People's Liberation Army in the same year; in 1994, he enrolled in the Military Medical College of the People's Liberation Army and studied under Professor Huang Zhiqiang, a famous expert in hepatobiliary surgery in China; he received his master's degree in 1997, was promoted to chief physician in December 2007 and received his doctorate in 2009; from 2009 to 2012, he was the director of the Second Department

of Hepatobiliary Surgery. He is currently the Deputy Director of Hepatobiliary Surgery at the All-Army Institute of Organ Transplantation of the 309th Hospital of the PLA.

Since 1992, he had been mainly engaged in hepatobiliary surgery. Since 1999, he has been devoted to clinical and basic research on key technologies of liver transplantation and combined liver and kidney transplantation. To date, he has led the department to complete nearly 600 liver transplants and 16 combined liver and kidney transplants<sup>265</sup>.

#### JFJZ-DB008 Dai Xin, male

**Personal Profile:** Deputy Director level physician of Hepatobiliary Surgery, Transplantation Center

In 1987, he graduated from Liaoning Medical College and was assigned to work in the general surgery department of 205 Hospital of the PLA. In 1995, he went to the General Hospital of the People's Liberation Army for advanced studies in hepatobiliary surgery. In 1998, he received a master's degree in surgery from the Fourth Military Medical University, and in 2000, he studied organ transplantation at the Tianjin Oriental Organ Transplant Center. In 2001, he became the academic leader at his work place in general surgery and a member of the regional expert committee. In 2003, he joined PLA No. 309 Hospital Organ Transplantation Center. He has been working in hepatobiliary surgery for nearly 20 years and has accumulated rich clinical experience. In 2000, he studied under Prof. Shen Zhongyang and carried out clinical liver transplantation work earlier in China, and has a deeper study of liver transplantation work, especially good at organ extractions<sup>266</sup>.

#### JFJZ-DB009 Zhu Zhidong, male

**Personal Profile:** Associate Professor, Deputy Chief Physician, All Army Transplant Center

He graduated from the Department of Clinical Medicine of the Third Military Medical University of the People's Liberation Army in 1990 and received his master's degree in 1996. After being promoted to associate chief physician in 2003, he specialized in the diagnosis and treatment of advanced liver disease and is quite knowledgeable about advanced liver cancer and liver transplantation.

Participated in hundreds of liver transplant operations and postoperative management<sup>267</sup>.

#### JFJZ-DB0010 Yuan Ming, male

**Personal Profile:** Deputy Chief Physician, All Army Organ Transplant Center, MD, Posdoc

He graduated from Beijing Xiehe Hospital affiliated with China Xiehe University of Medical Science, with a PhD degree in 2007, and then entered the Postdoctoral Station of the All-Army Organ Transplantation Center of the PLA No.309 Hospital, PLA Military Medical Training College, and then was recruited into the military. He is mainly engaged in urology and kidney transplantation<sup>268</sup>.

#### JFJZ-DB011 Wang Qiang, male

To investigate the criminal conduct of all institutions, organizations, and individuals involved in the persecution of Falun Gong; to bring such investigation, no matter how long it takes, no matter how far and deep we have to search, to full closure; to exercise fundamental principles of humanity; and to restore and uphold justice in society

**Personal Profile:** Wang, a graduate from the Academy for Advanced Military Medicine, is a deputy director level physician at the Organ Transplantation Center.

He has been engaged in kidney transplantation for many years and has rich clinical experience in medical and surgical procedures related to kidney transplantation, especially in the diagnosis and treatment of renal transplant refractory rejection and post-transplant infection<sup>269</sup>.

#### JFJZ-DB012 Chang Jingyuan, male

##### **Personal Profile: Deputy director level physician**

A graduate from the Fourth Military Medical University, he's been engaged in clinical work of urological surgery for 13 years. He has been engaged in kidney transplantation<sup>270</sup>.

#### JFJZ-DB013 Li Gang, male

##### **Personal Profile:** Deputy director level physician at the All-Army Organ Transplantation Center

Li graduated from the seven-year program of the Third Military Medical University with a master's degree in 2003, and from the PLA General Hospital (301 Hospital) with a medical doctorate in 2009. He worked in the Department of Urology at the PLA General Hospital (301 Hospital) as a physician and attending physician from 2003 to 2011. He worked in the Department of Urology II at the All-Army Organ Transplantation Center of the PLA General Staff Department General Hospital from 2011 to present<sup>271</sup>.

#### JFJZ-DB014 Wang Zhen, male

##### **Personal Profile:** Deputy director level physician at the All-Army Organ Transplantation Institute

He has been engaged in kidney transplantation<sup>272</sup>.

#### JFJZ-DB015 Li Weimin, male

**Personal Profile:** Chief Physician of Hepatological Surgery Program; Professor; Administrative Director of Hepatobiliary Program one.

He effectively treated a large number of patients with end-stage liver cirrhosis and portal hypertension with good results, using liver transplantation technique<sup>273</sup>.

#### JFJZ-DB016 Zheng Fang, male

**Personal Profile:** Deputy director level physician of Hepatological Surgery Program

He leads in the nation in the surgical treatment of liver transplantation, minimally invasive weight loss and minimally invasive diabetes<sup>274</sup>.

#### **JFJZ-DB017 Zhang Xianghua, male**

**Personal Profile:** Director of Sino-German Heart Center, General Hospital of the General Staff Department of the Chinese People's Liberation Army (PLA No.309 Hospital), director level physician, member of the Professional Committee of Thoracic and Cardiovascular Surgery of the Chinese People's Liberation Army, member of the Professional Committee of Cardiovascular Surgery of the Chinese Medical Association Beijing Branch

Studied heart and lung transplantation at the Heart Center, Berlin, Germany, 2003

Completed the first allogeneic in situ heart transplant in a military hospital in Beijing on November 11, 1999, and the second allogeneic double lung transplant in a military hospital in Beijing on April 11, 2006. He completed the first combined heart and kidney transplant in Beijing on May 28, 2008<sup>275</sup>.

#### **JFJZ-DB018 Guan Juan, female**

**Personal Profile:** Director level physician of Ophthalmology  
Engaged in corneal transplant for 15 years<sup>276</sup>.

#### **JFJZ-DB019 Li Xiang, male**

**Personal Profile:** Director level physician; Associate Professor

He graduated from Norman Bethune Medical University in 1989 and received his medical master's degree from Capital Medical University in Beijing and his medical doctorate degree from Lund University in Sweden. 1989 to present, he has been systematically engaged in urology clinical and technical work under the supervision of Wu Kerang, Gao Juzhong, Guan Delin and other famous specialists in China.

Doctor of Medicine, Lund University, Sweden. He has been engaged in kidney transplantation<sup>277</sup>.

#### **JFJZ-DB020 Fan Yu, male**

**Personal Profile:** director level physician at the All Army Organ Transplantation Institute

He specializes in kidney transplant surgery<sup>278</sup>.

#### **JFJZ-DB021 Li Hucheng, male**

**Personal Profile:** deputy director level physician at the All Army Organ Transplantation Institute; specialist and senior medical consultant for several hospitals and medical device companies; treated end-stage liver disease and liver tumors using liver transplantation techniques<sup>279</sup>.

#### **JFJZ-DB022 Li Chao, male**

**Personal Profile:** Attending Physician of Urological Surgery Program, Organ Transplant Institute; Instructor

To investigate the criminal conduct of all institutions, organizations, and individuals involved in the persecution of Falun Gong; to bring such investigation, no matter how long it takes, no matter how far and deep we have to search, to full closure; to exercise fundamental principles of humanity; and to restore and uphold justice in society

His specializations include kidney transplantation, perioperative management of kidney transplantation, post-transplantation review and medication adjustment, and diagnosis and treatment of various routine urological diseases<sup>280</sup>.

#### JFJZ-DB023 Li Zhouli, male

**Personal Profile:** Deputy director level physician at Urological Surgery Program; medical doctorate

Good at combined extraction of large organs and perioperative treatment of kidney transplant; contributed to cellular molecular immunology for organ transplantation<sup>281</sup>.

#### JFJZ-DB024 Li Yuanxin, male

**Personal Profile:** Director of Ward II at General Surgery; Deputy Director of General Surgery Program; Director-level Physician; Editor of *Organ Transplantation* and *Chinese Journal of Organ Transplantation*.

He was a student of Academician Li Jieshou, a leading general surgeon in China. He has studied and worked in Nanjing General Hospital of Nanjing Military Region under the leadership of Academician Li Jieshou for nearly 20 years, and has treated a large number of complex gastrointestinal surgery patients from all over China under the guidance of Academician Li.

He went to the Institute of Organ Transplantation at the University of Pittsburgh, USA, where he studied under Professor Abu-Elmagd, the world's most renowned expert in intestinal transplantation and abdominal multi-organ cluster transplantation and President of the International Society for Intestinal Transplantation, and after returning to China, he made significant improvements to the key techniques of intestinal transplantation, which led to a major breakthrough in intestinal transplantation in China.

During his long career as a surgeon, he chose the most difficult technique in abdominal surgery - intestinal transplantation and abdominal multi-organ cluster transplantation as his professional and technical research direction. He has authored a series of management and operation specifications, treatment guidelines, technical access and follow-up systems for intestinal transplantation in China. He is one of the few doctors in China who can perform small intestine transplantation independently, and is also the doctor who has performed the largest number of small intestine transplantation cases and the best quality of surgery in China<sup>282</sup>.
