追查迫害法輪功國際組織

World Organization to Investigate the Persecution of Falun Gong

<https://www.upholdjustice.org/>

追查迫害法輪功國際組織 (追查國際)

World Organization to Investigate the Persecution of Falun Gong (WOIPFG)

To investigate the criminal conduct of all institutions, organizations, and individuals involved in the persecution of Falun Gong; to bring such investigation, no matter how long it takes, no matter how far and deep we have to search, to full closure; to exercise fundamental principles of humanity; and to restore and uphold justice in society

China's Organ Transplant Organizations are the Executing Entities for the Communist Party's State Crime of Live Organ Harvesting

Since 1999, led by its then-leader Jiang Zemin, the Chinese Communist Party (CCP) criminal group has been manipulating China's entire state apparatus, including the Party, government, military, armed police, judicial system, and medical institutions, through the Political and Legal Affairs Commission and the "610" system, to commit nationwide mass extermination of Falun Dafa practitioners by means of live organ harvesting for transplantation. The CCP's live organ harvesting of Falun Gong practitioners is a crime against humanity and a crime of genocide initiated on the orders of Jiang Zemin.

Since the CCP's live organ harvesting of Falun Gong practitioners is a state genocidal crime conducted as a political campaign, organ transplant institutions in all provinces, central government-controlled municipalities, and autonomous regions of mainland China, including all military, armed police, and local hospitals (medical centers) are suspected to have participated in this crime, even including a considerable number of hospitals unqualified to perform organ transplants, such as small and medium-sized hospitals and specialized hospitals. Similar to how all Chinese hospitals were involved in forced abortions during the CCP's implementation of the "one-child policy", all transplant facilities in China today have participated in live organ harvesting.

In view of the broader context of the CCP's state crime of live organ harvesting, those in charge of organ transplant hospitals/centers and similar institutions in China are suspected of having been involved in the crime of live organ harvesting from groups such as Falun Gong practitioners.

Evidence Collection Methods

1. Direct and indirect comprehensive telephone investigation and on-site investigation of the people suspected of involvement in the live organ harvesting

The subjects of our investigations include government officials, policemen, doctors and other medical personnel.

Geographical Distribution of the Subjects of Investigation, and the Duration of Investigations:

The WOIPFG's subjects of investigation are people in different positions, who are located across the entire country of China. Our investigations have been ongoing for nearly two decades, and our investigation results have always been consistent. The evidence gathered by us verifies that live organ harvesting is a systematic arrangement by the CCP.

- 1) Subjects of investigation: Presidents, directors, doctors, nurses, and security guards of organ transplant hospitals.
- 2) Hospitals involved: A considerable amount of recorded evidence has been obtained from many provincial, military, armed police, and local organ transplant hospitals (centers) across China.
- 3) Time span: Our investigations on the live organ harvesting started in 1999, and they're ongoing to this day.

2. Data investigation

- 1) We have been collecting data from the hospitals' websites and press releases.

追查迫害法輪功國際組織 (追查國際)

World Organization to Investigate the Persecution of Falun Gong (WOIPFG)

To investigate the criminal conduct of all institutions, organizations, and individuals involved in the persecution of Falun Gong; to bring such investigation, no matter how long it takes, no matter how far and deep we have to search, to full closure; to exercise fundamental principles of humanity; and to restore and uphold justice in society

- 2) We have been searching for and analyzing medical papers on transplantation.
- 3) We have been using the website www.archive.org to view the hospitals' previously archived information.
- 4) We have been collecting reports from the official Chinese media outlets.
- 5) We have organized all the information obtained from our investigations to create a database of the hospitals.

All the facts have shown us that the CCP is by no means a rational or normal organization or political party; but instead, it is a supra-state criminal syndicate controlled by a group of criminals who have committed crimes against humanity. The CCP's logic of thinking and principles of action are anti-human, and the crimes it has committed are forms of evil that humanity had never seen previously.

WOIPFG's investigative report series contains nearly 70 investigation reports on the alleged organ harvesting of living Falun Gong Practitioners at major Chinese military and civilian hospitals and on their staff members suspected of participation in this crime. This volume contains six such investigation reports.

WOIPFG's Investigative Report on the Alleged Organ Harvesting of Living Falun Gong Practitioners at the General Hospital of Northern Theater Command (Formerly the General Hospital of Shenyang Military Command) and Its Staff Members Suspected of Participation

Hospital: The General Hospital of Northern Theater Command (formerly the General Hospital of Shenyang Military Command, People's Liberation Army)

Address: 83 Wenhua Road, Jinlang-Shangquan, Shenhe District, Shenyang City, Liaoning Province

Preface

The General Hospital of Northern Theater Command (formerly the General Hospital of Shenyang Military Command, PLA) established the first eye bank in the Northeast region and the entire army, having performed huge number of corneal transplants. Kidney transplants and other large organ transplants are also increased rapidly. Audio and video evidence show that the hospital has a large number of kidney transplants and intensive operations. In 2009, police officers armed with guns at the live harvesting scene witnessed the whole process of organ harvesting from live Falun Gong practitioners in the hospital's operating room. Given the nation-wide crime background of the CCP's live organ harvest, the hospital is suspected of participating in the crime of organ harvesting from groups of Falun Gong practitioners.

Hospital overview

The General Hospital of Shenyang Military Command was established in November 1948 as a comprehensive tertiary level-A hospital.¹ There is a regiment-level hospital and a clinical department under it. There are more than 50 clinical medical technical departments and more than 1,200 beds in the headquarters.²

I. Witness testimony of an armed guard at the scene: organ harvesting of Falun Gong practitioners

On December 12, 2009, an armed police officer in Jinzhou City, Liaoning Province, who had served as a gun guard at the scene of organ harvesting from live Falun Gong practitioners, called WOIPFG to prove that he witnessed the entire process of organ harvesting from live Falun Gong practitioners. On April 9, 2002, in an operating room on the 15th floor of the General Hospital of Shenyang Military Command, the witness served as a gun guard. In-person, he saw that a female middle school teacher in her 30s who was practicing Falun Gong had her heart, liver, and kidney organs taken alive by two military doctors (one of whom had an officer's certificate number 0106069), without anesthetics. Before that, the female teacher had been tortured, humiliated, and raped for a month.³

Aside from exposing live organ harvesting, the witness also disclosed more unknown crimes. For example, the Jinzhou Public Security Bureau persecuted and killed many Falun Gong practitioners, but claimed these practitioners suicide or accident; they even sucked out Falun Gong practitioners' brain pulp, etc. Besides, there were even eviler things had been done...

The witness testimony includes:

Operation start time: 5 pm on April 9, 2002

Operation time: 3 hours

Operation location: An operating room on the 15th floor of the General Hospital of Shenyang Military Command. It is verified that the 15th to 17th floors of the hospital is all used for surgical.⁴

追查迫害法輪功國際組織 (追查國際)

World Organization to Investigate the Persecution of Falun Gong (WOIPFG)

To investigate the criminal conduct of all institutions, organizations, and individuals involved in the persecution of Falun Gong; to bring such investigation, no matter how long it takes, no matter how far and deep we have to search, to full closure; to exercise fundamental principles of humanity; and to restore and uphold justice in society

Doctors involved in the operation: Two military doctors sent by an office of the Public Security Department of Liaoning Province: One is a military doctor from the General Hospital of Shenyang Military Command, and the other is a military doctor graduated from the Second Military Medical University. One of them came with an officers' ID number of 0106069.

Total number of people present at the operation: 5 people (witnesses would not be included)

Organs removed during the operation: heart, liver, kidney, cornea.

Other testimony details:

Eyewitness: The scalpel, the scalpel was aimed on the chest. When the knife goes down, the blood was spouted out, and the blood was spouted out, instead of...

Investigator: What you saw was male or female?

Eyewitness: Female

Investigator: Was she young?

Eyewitness: A little over 30 years old.

Investigator: Was she still shouting "Falun Dafa is good?"

Eyewitness: She was still shouting, still shouting that.

Investigator: "Can you tell me how she said it."

Eyewitness: At that time, we had been interrogating her for a week. She was tortured and had numerous scars on her body. We also used electric batons and electricity. She is already delirious... delirious, and she has been beaten demented. Because she did not eat, we forcibly filled her with milk directly into her stomach and forcibly filled her without needing her to drink. You should know that people would instinctly drink it down if you get your nose pinched. So, she maintained it like this; she lost nearly 7.5 kilos in 7 days. At this time, as we don't know it, it may be an office of the Public Security Department of Liaoning Province, or anyway, a very confidential department sent two people over here. One is a military doctor from the General Hospital of Shenyang Military Command of the People's Liberation Army, and the other is a graduate of the Second Military Medical University. Specifically, anyway, one is older, and the other is younger. They sent her to an operating room in the mental hospital and then performed a set of operations. They didn't use any anesthetic. The knife was set on her chest. And their hands even didn't tremble at all. I must shake if I were to get on it. Although I worked as armed police and have held a gun, conducted live ammunition exercises, and have seen many dead bodies, I still awed by these military doctors. They didn't shake their hands at all and pulled the lady out, wearing masks. At that time, we were standing guard next to each other with a pistol. At this time, we heard her yelling, and the woman yelled that "Falun Dafa is good."

Investigator: When the scalpel cut into her chest, she shouted "Falun Dafa is good?"

Eyewitness: (She) screamed and said, "Falun Dafa is good!" (She) said, 'You can kill me...' Basically, she meant, 'you can kill me, but can you kill hundreds of millions of us, the people who are being persecuted for believing in a true faith?' At that moment, the doctors, the military doctors, hesitated. Then they took a look at me, then took another look at our leader, and the officer nodded. He continued with the blood vessels... First was the extraction of the heart, and then the kidneys' extraction. When the scissors cut into a blood vessel in the heart, she began convulsing; it was terrifying. I'm trying to imitate the voice for you, but I am afraid I can't do it well. Her screams were like something was tearing up, tearing up, and then, ah, ah.... her mouth kept gaping, her eyes popping, mouth gaping. Oh dear... I can't go on talking about this.

Investigator: I understand. Do you know her name?

Eyewitness: Her name is... I can't disclose that, I can't tell you that, because there were only a few of us in that operating room.

To investigate the criminal conduct of all institutions, organizations, and individuals involved in the persecution of Falun Gong; to bring such investigation, no matter how long it takes, no matter how far and deep we have to search, to full closure; to exercise fundamental principles of humanity; and to restore and uphold justice in society

Eyewitness: How about this, I'm giving her a pseudonym, how about 'Xue Mei Gui' ('Snow Rose'). Because her name relates to a kind of flower, so we will call her 'Xue Mei Gui.'

Investigator: Let's call her 'Xue Mei,' 'Mei' as in 'Mei Gui' ('Rose').

Eyewitness: You could also use 'Mei' as in 'Mei Hua' ('Plum Blossom').

Investigator: Okay, Xue Mei it is then.

Eyewitness: At the time, she was a teacher, a teacher at a middle school. I think her son should be 12 years old this year. Her husband is not someone with powers or an incompetent one. I think he's a factory worker. Before her death, she had been through unspeakable molestation. Many policemen are very sexually perverted, by using pliers, vaginal speculum. I don't know where they got that equipment—these things I witnessed firsthand. I only regret that I did not take any photographs of what they did. The policemen sexually violated her. She was good looking, pretty. They raped her... they did so many such things (to her).

Investigator: That is to say you witnessed this at the Public Security Bureau you were working at...

(Recording 1: [MP3](#); Transcript Download: [pdf34](#))

II The Profile of Transplantation Department Growing of the Hospital

1. The ophthalmology department has the largest eye bank with an immense capacity for surgery

In 2010, the public official hospital website presented that, "The Ophthalmology Department of the General Hospital of Shenyang Military Command, has the largest eye bank in the army and the Northeast region. The Ophthalmology Department of the General Hospital of Shenyang Military Command has decades of history in corneal transplantation. The source of donors is quite abundant.⁵ The number of corneal transplants of the hospital ranks among the top ones in Northeast China. It is the only hospital in Shenyang that can provide corneal materials for corneal transplant patients at any given time and a leading organization for corneal transplants in Northeast China. It is also currently considered as the unit with the largest number of corneal transplants in the Shenyang region." "Over 1,000 cases of corneal transplants have been implemented."⁶

2. The Kidney Transplant Department performed a large number of operations. The growing of other large organ transplant departments

The hospital's historical data has shown that the Department of Urology of the General Hospital of Shenyang Military Command is a crucial department and kidney transplant center in the Shenyang Military Region, with 36 beds. In recent years, the annual number of kidney transplants has exceeded 100. As of 2005, more than 1,500 kidney transplants have been completed.⁷

On August 24, 2007, the Ministry of Health announced the first batch of 89 hospitals approved for organ transplantation in the country, 27 of which are military hospitals, including the kidney transplantation project of the General Hospital of Shenyang Military Command; Among the 95 designated hospitals to carry out organ transplants the, 23 are military hospitals, including the heart/lung transplant program of the General Hospital of Shenyang Military Command.⁸

According to the website information in 2014, the hospital introduced that "large organ transplantation technology has also taken amazing steps in the past two years based on years of experience in kidney transplantation, and has successively carried out heart, liver, and lung large organ transplants."⁹

III. The clues by media: Organ transplants in the General Hospital of Shenyang Military Command are matched quickly

追查迫害法輪功國際組織 (追查國際)

World Organization to Investigate the Persecution of Falun Gong (WOIPFG)

To investigate the criminal conduct of all institutions, organizations, and individuals involved in the persecution of Falun Gong; to bring such investigation, no matter how long it takes, no matter how far and deep we have to search, to full closure; to exercise fundamental principles of humanity; and to restore and uphold justice in society

According to a report by Minghui.com on February 7, 2007: The sister of a Falun Gong practitioner, who is not a practitioner by herself, was admitted to the Shenyang Army General Hospital (the General Hospital of Shenyang Military Command) due to tumor surgery. During the medical treatment, it was discovered that the matching of organ transplantation was rather rapid, and the operation could be scheduled within a few days without waiting or registering. Many patients undergoing organ replacement were in and out of the hospital during this time. It is said that a batch of 19 cases was performed just a few days ago.¹⁰

IV. Video evidence shows the kidney transplant operations in this hospital were frequent¹¹

Yu Ming is a Falun Gong practitioner from Shenyang City, Liaoning Province, Mainland China. One day in 2018, he went to the General Hospital of Shenyang Military Command for an unannounced visit and came into contact with a patient who had undergone kidney transplantation in the hospital. The patient told him that "I've been hospitalized for two weeks. The cost of hospitalization with surgery so far is 300,000."

During the unannounced visit, the patient also revealed the hospital's operation: "They performed two operations at a time, one (kidney donor) was used by two people, i.e., a pair of kidneys were given to two people." According to the analysis, these critical details indicating that the donor cannot be the kind of kidney seller. Because if you sell one kidney and keep the other, you can still be alive. It is also impossible the case that a kidney donated by a relative, because if both kidneys are both taken out, then this person will die.

Kidney transplant operations in this hospital are quite frequent. The patient said: "They would have a pair of operations every one or two days during the few days I was hospitalized."

V. Telephone recordings show that the hospital has a large number of transplants

Investigation Subject: Kidney Transplant Nurse, the General Hospital of Shenyang Military Command¹²

Investigating Recording: August 23, 2017, Phone Number: +86 024 2885 1211

Nurse: We definitely do a lot of cases (of kidney transplantation). (This year) we did about 100 cases. Director Yang Hongwei is taking the charge. He is not available at the moment. He should be in the operation room now."

(Recording 2 Download: [MP3](#); Transcript Download: [pdf2](#))

Investigation Subject: Kidney Transplant Nurse of the General Hospital of Shenyang Military Command¹³

Investigating Date: Jul 11, 2019

Summary: Director Yang Kunwei is responsible for our kidney transplantation. You could register an expert appointment with the clinic on the second floor on Thursday morning. Director Yang will be there.

(Recording 3. Download: [MP3](#); Translation Download: [pdf 070](#))

Investigation Subject: Nurse in Urology Ward, General Hospital of Shenyang Military Command¹⁴

Investigating Date: Dec. 11, 2019. Phone Number: +86-2428851211

Summary: Kidney transplantation is being done all the time. You can go to the matching room on the ninth floor of Building 6 to find technician Jiang Pingjiang for matching. Director Yang Hongwei is still there.

Question: Have you done it recently? Did you do it this week or two?

Answer: We have done it recently!

VI. List of responsible persons

BBZQ-Z001 Zhou Wenping

Personal profile: Currently the director and chief surgeon of Hepatobiliary Surgery Department of the General Hospital of Shenyang Military Command.

Graduated from the Second Military Medical University in 1986 with a bachelor's degree. In 1989, he graduated from Shanghai Ruijin Hospital with a master's degree in general surgery. In 2008, he graduated from the Department of Hepatobiliary Surgery, Southwest Hospital Affiliated to the Third Military Medical University with a PhD degree.

From 1996 to 1997, he studied liver transplantation in the Transplantation Department of Hudding Hospital in Sweden for one year.

In October 2002, he successfully performed the first liver transplant in the Shenyang Military Region. ¹⁵

BBZQ-Z002 Liu Long

Personal Profile: Chief surgeon and professor of the Department of Urology, the General Hospital of Shenyang Military Command. Member of the Chinese Society of Organ Transplantation, Member of the Standing Committee of the Professional Committee of Organ Transplantation, Member of the Liaoning Provincial Society of Organ Transplantation, National Committee of the Chinese Society of Dialysis and Transplantation.

Good at kidney transplantation. ¹⁶

BBZQ-Z003 Wang Dequan

Personal profile: Chief Surgeon of Department of Urology, Heping Hospital of The General Hospital of Northern Theater Command.

Good at kidney transplantation. ¹⁷

BBZQ-Z004 Qiu Shi

Personal Profile: Deputy Chief Surgeon of Department of Urology, the General Hospital of Shenyang Military Command.

Good at kidney transplantation. ¹⁸

BBZQ-Z005 Yang Hongwei. Male. Date of Birth: Nov. 18, 1964. ¹⁹

Personal Profile: Deputy Director and Deputy Chief Surgeon of Department of Urology, the General Hospital of Shenyang Military Command.

Graduated from the Second Military Medical University. Engaged in the profession for more than ten years, focusing on the diagnosis and treatment of urological diseases.

Good at kidney transplantation. ²⁰

追查迫害法輪功國際組織 (追查國際)

To investigate the criminal conduct of all institutions, organizations, and individuals involved in the persecution of Falun Gong; to bring such investigation, no matter how long it takes, no matter how far and deep we have to search, to full closure; to exercise fundamental principles of humanity; and to restore and uphold justice in society

BBZQ-Z006 Guo Shiyong

Personal Profile: Deputy Chief Surgeon of Department of Urology, the General Hospital of Shenyang Military Command.

Engaged in this field for nearly 30 years. Studied in Japan.

Able to complete surgical kidney transplantation and accurately perform personalized prevention and treatment of chronic rejection and renal failure of the transplanted kidney.²¹

BBZQ-Z007 Wang Huishan. Male. Date of Birth: 1965. Native of Shenyang city of Liaoning province.²²

Personal Profile: Director, Chief Surgeon, and Professor of Cardiovascular Surgery, the General Hospital of Shenyang Military Command.

Enlisted in the army in 1984. He graduated from the Medical Department of the Second Military Medical University in 1990 with a bachelor's degree and graduated from the Fourth Military Medical University in 1998 with a doctorate degree.

In 2000, he went to Australia MONASH Medical Center to engage in clinical work in adult cardiology surgery and obtained a certificate from the Royal Australian College of

Surgeons.

Engaged in heart transplantation.²³

BBZQ-Z008 Wu Haibo

Personal Profile: Deputy Chief Surgeon of Surgery, Institute of Cardiovascular Diseases, the General Hospital of Shenyang Military Command

Good at heart transplantation.²⁴

BBZQ-Z009 Qu Jiaqi. Male. Date of Birth: December 1943. Native of Xiuyan of Liaoning province.²⁵

Personal profile: Chief Surgeon of Thoracic Surgery, the General Hospital of Shenyang Military Command.

In August 1969, he graduated from the Medical Department of China Medical University, with a bachelor's degree, technical level 4, and a civilian major general.

Good at lung transplant surgery.²⁶

BBZQ-Z010 Gao Xin

Personal Profile: Deputy Chief Surgeon and Associate Professor of Thoracic Surgery, the General Hospital of Shenyang Military Command, Deputy Director of Thoracic Surgery and Thoracic Minimally Invasive Surgery Center.

A member of the Chinese Communist Party. Graduated from China Medical University.

WOIPFG's Investigative Report on the Alleged Organ Harvesting of Living Falun Gong Practitioners at the No. 923 Hospital of the PLA's Joint Logistics Support Force (Formerly the PLA No. 303 Hospital) and Its Staff Members Suspected of Participation

Address: 52, Zhiwu Road, Nanning, Guangxi Zhuang Autonomous Region

Tel: +86-771-2870194

Official website: <http://www.No.303yy.com/>

Preface

The No. 923 Hospital of the Chinese People's Liberation Army Joint Security Force (formerly the No. 303 Hospital of the People's Liberation Army) is a key organ transplantation research base for the entire military, capable of doing various organ transplants in large quantities, with living organs provided by the state on a regular basis. In order to circumvent the ban on organ transplantation in military and police hospitals, the main transplantation team of the No. 303 Hospital led by Sun Hsu-yong, the vice president and director of the transplantation center has moved to the Second Affiliated Hospital of Guangxi Medical University to continue to do transplants. At present the team is able to do three to four hundred kidney transplants per year; thirty to forty liver transplants per month. Given the general background of the Chinese Communist Party's state crime of live organ harvesting, the hospital is suspected of participating in the crime of live organ harvesting from Falun Gong practitioners and other groups.

I. Hospital Overview.

The No. 923 Hospital of the PLA Joint Services and Security Forces (formerly the No. 303 Hospital of the PLA) was established in 1945, and is now a modern comprehensive tertiary hospital integrating medical treatment, scientific research and teaching, and is the teaching hospital of the Third Military Medical University, Southern Medical University (formerly the First Military Medical University), Guangxi Medical University and other universities, with complete medical equipment. Organ transplantation is an advantageous department among the 56 clinical and medical technology departments in the hospital. The hospital has more than 1,200 professional and technical personnel, including 112 senior title personnel, 208 post-doctoral, doctoral, master and other highly educated talents.³⁴

II. The transplantation center is a major organ transplantation research base in the military, and "we pick the ones with good quality first" in organ allocation.

In 2004, the hospital completed the first liver transplant and established its independent transplantation system. In 2005, it performed the first combined liver and kidney transplant. In 2006, the organ transplant building was opened. In 2009, the first heart transplant was performed. In 2010, the Institute of Transplantation Medicine and the regional key laboratory of transplantation medicine were founded.³⁵ The transplant center is a member of the scientific registry system of liver transplantation of the Ministry of Health, a member of the Management Committee of the Scientific Registry System of Kidney Transplantation of the Ministry of Health of Guangzhou Military Region and It is the only member of the Scientific Registry of Kidney Transplantation (CSRKT) of the Ministry of Health in Guangzhou Military

追查迫害法輪功國際組織 (追查國際)

World Organization to Investigate the Persecution of Falun Gong (WOIPFG)

To investigate the criminal conduct of all institutions, organizations, and individuals involved in the persecution of Falun Gong; to bring such investigation, no matter how long it takes, no matter how far and deep we have to search, to full closure; to exercise fundamental principles of humanity; and to restore and uphold justice in society

Region and Guangxi Zhuang Autonomous Region, and is a research institute of transplantation medicine integrating clinical, teaching and scientific research.³⁶

The transplantation team has "more than 20 scientific researchers with high titles, 3 post-docs, more than 30 with doctorate degree, and more than 80% of the scientific research team with master's or above degrees".³⁷

III Telephone Investigation

Summary:

Regarding the allocation of organs, "we first select good quality organs for our own use." The transplant team is very strong. The wait time is one or two days to one or two weeks. Abundant donors are always available. Many donated livers are assigned elsewhere. Three to four hundred kidney transplants are performed every year.

1. Regarding the allocation of organs, "we first select good quality organs for our own use."

On May 30, 2017, Liao Jixiang, a liver transplant surgeon and organ coordinator at No. 303 Hospital, said that the transplant department is actually the "Institute of Transplant Medicine" and is a fairly large transplant center that does kidney, liver, heart, lung and pancreas transplants. The center has an ICU and anesthesia section. There is Ackema which is famous in the country. Organ allocation starts at No. 303 Hospital, and we pick the good quality ones. Our advantages: first, the quality of the donor liver is definitely better than others, and second, it is definitely faster.³⁸

(For recording 1 download [MP3](#), and please see [pdf 92](#) for the full transcript)

On June 11, 2017, Liao Jixiang said: the source of organs is not the Red Cross, it is allocated by the state. The national organ allocation system network has access passwords, and its data are managed by designated personnel.³⁹

(For recording 2 download [MP3](#), and please see [pdf 98](#) for the full transcript)

2. The transplant team is very strong.

Summary: Any type of transplant operation can be done. For each transplant operation, one person must die.

Subject of investigation: ICU On-duty doctor, Director Huang Pinghua, Transplantation Department, Nanning No. 303 Hospital⁴⁰

Time of Investigation: January 24, 2017 (+86-771_2870029)

Content Summary: We have been doing it for 8 to 10 years, we do transplants of all organs, including heart, liver, kidney, pancreas, and everything. We are very strong, and can do any kinds of surgery.

(Recording 3 download [MP3](#), please see [Addendum 39](#) for the complete recording transcript)

Subject of Investigation: Liao Jixiang, liver transplant surgeon and organ coordinator of No. 303 Hospital⁴¹

Date of Investigation: May 30, 2017 (+86-18275731616)

Content Summary.

1) So far this year, we have done almost 100 cases, and it's only May now! We usually have 15 to 20 donors per month.

2) We do almost 300 kidney transplants per year. We are among the top three in the number of kidney transplants done in the country.

追查迫害法輪功國際組織 (追查國際)

World Organization to Investigate the Persecution of Falun Gong (WOIPFG)

To investigate the criminal conduct of all institutions, organizations, and individuals involved in the persecution of Falun Gong; to bring such investigation, no matter how long it takes, no matter how far and deep we have to search, to full closure; to exercise fundamental principles of humanity; and to restore and uphold justice in society

- 3) Of 100 donor livers obtained, our center may keep 20, and the rest of 60, 70, or 80 are allocated out. (There are no enough recipients, so the donor organs can't be all used)
- 4) "Because if you want to have a surgery, one person will have to be gone." (harvesting organ from living donor)
- 5) Liver transplant for O blood type can be done within a month.
- 6) The state does not allow you to know donor's information.
- 7) I guarantee to you that the quality of the donor organ, for sure, is very good. Because for so many years...that, that, that is to say, in the past there were such...we used to have a lot, we used teenagers or people 20 plus years old, or kid.
- 8) The quality of organs from the judiciary is not necessarily better than the quality of those from brain-dead donor. The organs from the judiciary at least have to be holstered and have to be in cardiac arrest for a few minutes, twenty minutes. And with brain-dead donation, that part of the time is now gone.
- 9) we now do transplants using organs from brain-dead donors, according to the state policy, and for the time being we have more than enough than we need.
- 10) Dong Jianhui is now in charge of this donation, and he is also leading a team.
- 11) The president of the hospital himself does the transplant.
(Recording 4 download [MP3](#), please see [pdf 92](#) for the complete recording transcript)

3. Waiting time is one or two days, or one or two weeks; the donor is available at any time, many liver donors are channeled out

Investigation Subject: Doctor Huang Xiaochun, Liver Transplantation of Transplantation Department, Nanning No. 303 Hospital ⁴²

Investigation Time: January 11, 2017 (+86+ 771_2870635)

Investigation Content: Waiting for a donor generally may take ten days or even a month. Two or three hundred kidney transplants are done per year, and for liver transplant it's 30 or 50 per year. There are also many such centers in Guangzhou, but there are not as many (organs) as we have here. (Recording 5 download [MP3](#), and please see [Addendum 38](#) for the full transcript)

Investigation Subject: Director Huang Pinghua, Outpatient ICU, Transplantation Department of Nanning No. 303 Hospital⁴³

Investigation Time: January 24, 2017 (+86-771_2870029)

Investigation Content: Liver transplant can be done, waiting time is fast, maybe a few days, a lot of opportunities, will be very fast, hurry over, and there will be donors by the end of the year, and there will be transplant surgeries done.. (Recording 6 download [MP3](#), and please see [Addendum 39](#) for the full transcript)

追查迫害法輪功國際組織 (追查國際)

World Organization to Investigate the Persecution of Falun Gong (WOIPFG)

To investigate the criminal conduct of all institutions, organizations, and individuals involved in the persecution of Falun Gong; to bring such investigation, no matter how long it takes, no matter how far and deep we have to search, to full closure; to exercise fundamental principles of humanity; and to restore and uphold justice in society

Investigation Subject: Dr. Nie Feng, Liver Transplant, Nanning No. 303 Hospital⁴⁴

Investigation time: June 2, 2017 (+86-13907867158)

Subject of investigation: Donors are all brain dead. The quality of these organs can be guaranteed. Waiting time for donors will be very fast, very fast, very fast! Donation volume last year was more than one hundred cases, an average of one in every three days. More than two hundred cases of kidney transplants were done. This year, there should be more than last year. In less than six months, there are more than eighty cases. There are more than 100 kidney transplants now. There are more than 30 liver transplants. Many (liver donors) have been channeled out.

(Recording 7 download [MP3](#), and please see [Addendum 40](#) for the complete recording)

Investigation Subject: Nurse on duty, Kidney Transplant of Transplantation Department, Nanning No. 303 Hospital⁴⁵

Investigation Time: June 30, 2017 (+86-771_4978171)

Investigation Content.

Q: There are four kidney transplants today?

A: Yes, yes, he (Dr. Gao Zhao) is now doing the surgery and not finished yet!

Q: Did the four patients wait for a long time in your hospital?

A: Not long.

(Recording 8 download [MP3](#), and please see [Addendum 41](#) for the full transcript)

Investigation Subject: Director Huang Pinghua, Kidney Transplantation of PLA No. 303 Hospital⁴⁶

Investigation Time: April 22, 2019 (+86-7712870No. 303)

Content Summary: This liver source is available at any time; becomes available as fast as a few days; we basically do two to three or four surgeries every week.

(Recording 9 download: [MP3](#), manuscript download: [pdf 045](#))

Investigation Subject: Dr. Li, Nephrology Room, Department of Organ Transplantation, No. 303 Hospital⁴⁷

Investigation Time: October 9, 2019 (+86-771-2870No. 303)

Content Summary:

Q: If there are three or four hundred surgeries ahead, the wait won't be long, and the probability is fairly good, right?

A: Yes.

Q: My classmate's father got a match in just a few days, that is why I found it here!

A: Well, you can... you can come first! Okay, I've talked too much to you.

(Recording 10 download: [MP3](#), and manuscript download: [pdf 118](#))

4. "We have more than 100 beds, abundant donors, and three to four hundred kidney transplants per year"

Investigation Subject: Nurse Office of Liver and Kidney Transplantation, No. 303 Hospital⁴⁸

追查迫害法輪功國際組織 (追查國際)

World Organization to Investigate the Persecution of Falun Gong (WOIPFG)

To investigate the criminal conduct of all institutions, organizations, and individuals involved in the persecution of Falun Gong; to bring such investigation, no matter how long it takes, no matter how far and deep we have to search, to full closure; to exercise fundamental principles of humanity; and to restore and uphold justice in society

Investigation Time: January 12, 2017 (+86-7712870605)

Content Summary: Last year there were about three hundred kidney transplants. We now have about one hundred patients in the hospital. There is a shortage of patient beds at the transplant center, and you will have to stay in the corridor first when you come. There are ten floors in Building One, and nine of them belong to our transplant center.

(Recording 11 download [MP3](#), and please see [Addendum 37](#) for the full transcript)

Investigation Subject: Director Huang Pinghua, Liver Transplant Clinic, No. 303 Hospital of Guangzhou Military Region⁴⁹

Investigation Time: April 22, 2019 (+86-7712870No. 303)

Content Summary: Three hundred cases are done a year, and last year over three hundred and ten cases were done. But liver transplant cases accounted for thirty to fifty cases, and kidney transplantation took up the rest of two hundred seventy or eighty case. In addition, there were pancreas and lung transplants. We are doing them all.

(Recording 12 download: [MP3](#), and manuscript download: [pdf 045](#))

Investigation Subject: Director Wu Fengfu, Medical Department, PLA No. 303 Hospital⁵⁰

Investigation Time: June 6, 2019 (+86-13321717853)

Content Summary: We do relatively more cases, and there are more surgical cases.

Q: Are you basically doing it every day?

A: Well, it's a little bit less these days.

(Recording 13 download: [MP3](#), and manuscript download: [pdf 051-2](#))

Investigation Subject: Dr. Li, Nephrology Ward, Department of Organ Transplantation, No. 303 Hospital⁵¹

Investigation Time: October 9, 2019 (+49-7712870No. 303)

Content Summary:

Q: You have abundant kidney sources here!

A: Ah, yes. We have over a hundred beds. We have three or four hundred kidney transplants per year.

..... I'm involved, but not the chief surgeon. The chief surgeon, for sure, is the director or deputy director.

You go directly to the outpatient clinic for registration, and doctors on duty there are all directors. The

surname of the director of our department is Dong, his full name is Dong Jianhui.

(Recording 14 download: [MP3](#), and manuscript download: [pdf 123](#))

Investigation Subject: Nurse with Transplantation Department of No. 303 hospital

Investigation Time: April 26, 2020 (+86-7712870No. 303)

Investigation Content:

1. Hospitalized patients are required to take nucleic acid test.

追查迫害法輪功國際組織 (追查國際)

World Organization to Investigate the Persecution of Falun Gong (WOIPFG)

To investigate the criminal conduct of all institutions, organizations, and individuals involved in the persecution of Falun Gong; to bring such investigation, no matter how long it takes, no matter how far and deep we have to search, to full closure; to exercise fundamental principles of humanity; and to restore and uphold justice in society

2. There are few liver transplants and many kidney transplants.
3. Our director is Dr.Dong Jianhui.
4. Director Dong has been doing it for many years; liver transplants are all done by him.
5. Matching can be done as fast as at first try; the matching organ may become available at registration.
7. We are open tomorrow as usual; you may call the doctor's office for information. Let me tell you their phone number: 2870635
(Recording 15 download: [MP3](#), manuscript download: [pdf055](#))

Investigation Subject: Nurses at the nursing station of the kidney transplantation ward, No. 303 Hospital

Investigation Time: July 7, 2020 (+86-7712870605)

Content Summary.

1. Here we do surgery as soon as possible.
2. No doctors answer the phone now, they all have gone to do surgery.
3. There is a kidney transplant today.
4. Q: Do you still have patients who need to kidney transplant in your hospital?
A: Yes, kidney transplant and liver transplant are available.
5. Good luck, there is a month to wait for.
(Recording 16 download: [MP3](#), manuscript download: [pdf96](#))

5. “The patient may make special request and come to the hospital for consultation”

Investigation Subject: Dr. Li, Nephrology Ward of Organ Transplantation Department, No. 303 Hospital⁵²

Investigation Time: October 9, 2019 (+49-771-2870No. 303)

Content Summary:

Dr. Li: Just this kidney alone, it'll be 120,000 yuan. The total cost will be about 300,000 yuan. (Another person's voice comes over the phone: Tell him to come over and talk!)

Investigator: I need to have a younger donor and better quality organ. Can I pick the one I like?

Dr. Li: If you have any special needs, you can talk to our leaders over here, I can't say too much to you on the phone. If you know some doctor at higher level, then you can go find that doctor at higher level; if you do not know such a doctor, you can go directly to our doctors' office.
(Recording 17 download: [MP3](#), manuscript download: [pdf 123](#))

6. The transplantation scale has been expanded, with a team of good surgeons sent to the Second Affiliated Hospital of Guangxi Medical University to open a transplantation center

In order to escape culpability and clear the name of the military and police hospitals, the Central Military Commission of the Communist Party of China last year placed another ban on the liver and kidney transplant business in military and police hospitals. In fact, the military and police hospitals continue their transplant business as usual; or they circumvent the ban by finding another way – transforming from military to civilian. The vice president of No. 303 Hospital in Nanning and director of the transplant center, Sun Xuyong in recent years led the main transplant team to the Second Affiliated Hospital of Guangxi Medical University to carry out transplants. They are now doing three to four hundred cases per year and thirty to forty cases per month.⁵³

追查迫害法輪功國際組織 (追查國際)

World Organization to Investigate the Persecution of Falun Gong (WOIPFG)

To investigate the criminal conduct of all institutions, organizations, and individuals involved in the persecution of Falun Gong; to bring such investigation, no matter how long it takes, no matter how far and deep we have to search, to full closure; to exercise fundamental principles of humanity; and to restore and uphold justice in society

Investigation Subject: Nurse with Kidney Transplantation at the Second Affiliated Hospital of Guangxi Medical University⁵⁴

Investigation Time: October 10, 2019 (+86-7713393712)

Content Summary: We do three to four hundred cases a year. All of the 35 beds are taken. If there are no beds, we have to use corridors.

Q: Are you the Second Affiliated Hospital or the First Affiliated Hospital?

A: This is the Second Affiliated Hospital of Guangxi Medical University. Our team came from the original No. 303 Hospital of the Chinese People's Liberation Army, and every doctor can do surgery. Our department just came from the No. 303 Hospital, it was opened last year, and there's no clinic yet. In fact, the name of our director (Sun Xuyong) is known to many hospitals throughout the country; transplantation departments all know it.

(Recording 18 download: [MP3](#), Manuscript download: [pdf 122](#))

Investigation Subject: Liver transplant surgeon at the Department of Organ Transplantation, No. 303 Hospital

Investigation Time: October 9, 2019 (+49 0771-2870635)

Content Summary: Sun Xuyong is at the level of hospital president. He has many young talents under him. You may contact Lan Liugen, Wu Jihua, and Wang Hongliang, all of whom are experts in liver transplantation.

(Recording 19 download: [MP3](#), manuscript download: [pdf 119](#))

IV. Medical papers show that the Hospital harvested organs from 76 children, and it is suspected of live organ harvesting.

A medical paper published in the 2016 No. 8 issue of "Chinese Journal of Hepatobiliary Surgery" showed that from August 2007 to December 2015, the Hospital performed combined abdominal organ resection on 76 children with the warm ischemia time as short as 3 minutes. ⁵⁵ These operations were suspected of live organ harvesting. A zero or ultra-short warm ischemia time means heartbeat and blood supply exist when an organ is removed, which equals harvesting organs from living people. Generally, this is only possible when harvesting organs from brain-dead or living people. The warm ischemia time of the cases described in the paper was only a few minutes, proving that the liver and kidney harvesting process was the process of live organ harvesting.

V. List of responsible persons

JFJL303-001 Sun Xuyong, Male.

Personal Profile: Vice President of No. 303 Hospital, Director of Transplantation Center of the Second Affiliated Hospital of Guangxi Medical University. Member of the National Army Organ Transplantation Society, member at Deputy Director level of Guangxi Organ Transplantation Society⁵⁶. President of the Institute of Transplantation Medicine, No. 303 Hospital of the Chinese People's Liberation Army, Director of Guangxi Key Laboratory of Transplantation Medicine, Director of Guangzhou Military Region Organ Transplantation Center. President of Guangxi Surgeons Association Organ Transplantation Committee, member at Vice Chairman level of Guangzhou Military Region Organ Transplantation Society, member at Vice Chairman level of Guangxi Medical Association Organ Transplantation Branch and member in waiting at Chairman level, Member of All Army Medical Association Organ Transplantation Branch, Standing Member of Chinese Research Hospital Society Transplantation Medicine Branch, Standing member of Editorial Board of Journal of Organ Donation and Transplantation.

WOIPFG's Investigative Report on the Alleged Organ Harvesting of Living Falun Gong Practitioners at the No. 924 Hospital of the PLA's Joint Logistics Support Force (Formerly the PLA's No. 181 Hospital) and Its Staff Members Suspected of Participation

Hospital: The No. 924 Hospital of the PLA Joint Logistics Support Force

Address: 1, Xinqiaoyuan Road, Xiangshan District, Guilin City, Guangxi Zhuang Autonomous Region, China

Preface

The No. 924 Hospital of the People's Liberation Army (PLA) Joint Logistics Support Force claims that its technology be at an advanced level in the entire military. The total number of kidney transplants has exceeded 2,200. In a telephone investigation by WOIPFG, the director of the hospital's transplant center admitted to using organs from Falun Gong practitioners, and when referring to organ donors, he said, "All of China depends on us here for them." In view of the background of the CCP's state crime of organ harvesting from living persons, the hospital is apparently suspected of participating in the crime of organ harvesting from living Falun Gong practitioners and persons from other groups.

追查迫害法輪功國際組織 (追查國際)

World Organization to Investigate the Persecution of Falun Gong (WOIPFG)

To investigate the criminal conduct of all institutions, organizations, and individuals involved in the persecution of Falun Gong; to bring such investigation, no matter how long it takes, no matter how far and deep we have to search, to full closure; to exercise fundamental principles of humanity; and to restore and uphold justice in society

I. Hospital Overview

Established in 1946, it is now a large-scale, comprehensive "tertiary level-A " hospital. The hospital covers an area of more than 90,000 square meters, with a construction area of more than 120,000 square meters and more than 1,000 beds⁷³. After the military reform, the hospital was renamed as the 924th Hospital of the Joint Logistics Support Force of PLA⁷⁴.

II. Overview of the Kidney Transplantation Center

1. The technology of All-Army Kidney Transplantation and Dialysis Treatment Center is at the advanced level of the whole army.

On May 23, 2007, the hospital was designated by the Ministry of Health to carry out kidney transplantation⁷⁵. It has an all-army kidney transplantation and dialysis treatment center and Guangzhou Military Region Organ Transplantation Center, and is the director-level branch unit of the Guangzhou Military Region Organ Transplantation Committee.

The All Army Kidney Transplantation and Dialysis Treatment Center was established by the Department of Nephrology of the hospital, and it is also the Institute of Kidney Diseases of Guangzhou Military Region and the Organ Transplantation Center of Guangzhou Military Region. It is the director-level branch unit of the Academic Committee of Organ Transplantation of Guangzhou Military Region and the director-level branch unit of the Organ Transplantation Branch of Guangxi Medical Association. It has the Department of Organ Transplantation, Department of Nephrology, Department of Blood Purification and Department of Basic Experimentation. Department of Organ Transplantation, Department of Nephrology, Department of Blood Purification and Department of Basic Experimentation⁷⁶.

2. The number of beds at kidney transplant unit

The hospital's All Army Kidney Transplantation and Dialysis Treatment Center has 150 beds⁷⁷.

3. The strong team of kidney transplant surgeons

The hospital's All Army Kidney Transplantation and Dialysis Treatment Center has 17 surgeons, 12 technicians, including 2 doctorate supervisors, 4 master's supervisors, 5 chief surgeons, 3 associate chief surgeons, 4 attending surgeons and 9 resident doctors.⁷⁸ They can form multiple kidney transplantation teams.

4. High transplant volume

According to publicly available data on the internet, the total number of kidney transplants done by the hospital's transplant team has exceeded 2,200, that of heart transplants has reached at least 70, and the liver transplants number at least 200⁷⁹. Since 2000, the ward has taken nearly 1,000 patients for treatment per year, and the annual volume of kidney transplants has reached more than 150 cases.⁸⁰

III. Many medical papers show that the warm ischemia times were short; live organ harvesting is suspected

The warm ischemia time is zero or ultra-short, indicating that there is heartbeat and blood supply when the organ is harvested. That is, the organ is harvested from living donors. Generally, it can be done only from a

追查迫害法輪功國際組織 (追查國際)

World Organization to Investigate the Persecution of Falun Gong (WOIPFG)

To investigate the criminal conduct of all institutions, organizations, and individuals involved in the persecution of Falun Gong; to bring such investigation, no matter how long it takes, no matter how far and deep we have to search, to full closure; to exercise fundamental principles of humanity; and to restore and uphold justice in society

brain-dead or living donor. However, China has never had any brain death legislation, diagnostic criteria for brain death and a sound organ donation system, so there are no “brain-dead organ donors” in China, voluntary or not. An Aug. 22, 2014 article on qq.com titled “No brain death regulation in China, 90% of doctors are not clear about the specifications either” says there are 80 countries in the world that have brain death regulations, but not China.⁸¹

A medical paper from the PLA 181st Hospital published in the “Journal of Cardiopulmonary Vascular Diseases” in January 2014 stated: From Oct 2006 to Dec 2012, the hospital conducted 29 orthotopic heart extractions and transplants. Brain dead male donors were aged 20 to 39, an average 24.9 ± 6.2 . Warm ischemia time was 5 to 8 minutes⁸². During most of these organ resection operations, the warm ischemia time was as short as a few minutes, which showed that the heart resection process was the process of live organ harvesting.

IV. Telephone investigation

Summary: Chen Huaizhou, Director of the center of the Hospital, admitted that they used the organs of Falun Gong practitioners. Donor organs are now harvested at the Hospital. The wait time for organs is short, the number of transplants is large, and the sources of donors are unknown.

1. The hospital admits to using the organs of Falun Gong practitioners

Subject of Investigation: Chen Huaizhou, Director of the Organ Transplant Center of the PLA No. 181 Hospital (Guilin, Guangxi)

Date of Investigation: November 16, 2018 (Phone #: 13087737632)

Investigator: “His family members hope that, they hope that the type of donor to be used is that of Falun Gong (practitioner). If that type of donor is available, he (i.e. the patient) will definitely come over very quickly.

Chen Huaizhou: Yes, yes! You come over to be hospitalized for a checkup, have an examination, get a checkup first, to see if it can be done.

(Recording 1. Download: [MP3](#); Transcript Download: [pdf 21](#))

2. The donor is now taken in the hospital

Subject of Investigation: Dr. Yang Zhijian, Hepatobiliary Surgeon, No. 181 Hospital in Guilin

Date of Investigation: September 1, 2016 (Phone #: 134 7135 6190)

The suspension in use of organs from death row inmates started on April 1st of this year. About 30 kidney transplants were conducted in July, and there were 15 livers that no one wanted and were sent away. The organs used to be taken in prison, but now they are taken in the hospital. The donor source is managed by the hospital. It has a set of special procedure.⁸³

(Recording 2. Download: [MP3](#); Transcript Download: [pdf 90](#))

3. The waiting time is short.

Subject of Investigation: Director Chen Huaizhou, Organ Transplant Center, PLA No. 181 Hospital in Guilin, Guangxi Province

Date of Investigation: January 18, 2017 (Phone #: +86 13087737632)

追查迫害法輪功國際組織 (追查國際)

World Organization to Investigate the Persecution of Falun Gong (WOIPFG)

To investigate the criminal conduct of all institutions, organizations, and individuals involved in the persecution of Falun Gong; to bring such investigation, no matter how long it takes, no matter how far and deep we have to search, to full closure; to exercise fundamental principles of humanity; and to restore and uphold justice in society

“You don’t have to worry about the donor. Sometimes [the organ] becomes available as soon as the patient comes. Very fast.”⁸⁴

(Recording 3. Download [MP3](#); Transcript Download [Addendum 43](#))

4. The number of transplants performed in the Hospital is large.

Subject of Investigation: Sui Weiguo, director of the Organ Transplantation Center of the PLA No. 181 Hospital in Guilin, Guangxi Province⁸⁵

Date of Investigation: January 31, 2017, Phone number: 86-13907735881

Sui Weiguo: We do more than 200 cases of kidney transplantation in a year, and about 30 to 40 cases of liver transplantation in a year. We have more than 100 organ donors every year. That is one or two [donors] every week. Having so many donated organs, that is because we started [doing organ donations] early in the country, [we are] advanced.

(Recording 4. Download [MP3](#), please see [Addendum 45](#))

5. The hospital had a large number of surgeries, claiming it had "many organ donors". However, the Guangxi Guilin Red Cross Organ Donation Office denied that the organs used in the hospital's surgeries were from the Red Cross.

1) Telephone investigation with Hospital:

Subject of Investigation: Yang Ming, Director of the No. 181 Hospital of PLA (Guilin, Guangxi)

Date of Investigation: January 21, 2017

Director Yang Ming: We are responsible for helping you with the donor problem, and the most important thing now is (for you) to come here first.... Don't worry too much about it. Investigator: How can there be so many donations?

Director Yang Ming: We sure have a lot! We supply [organs to] the entire China. We do quite a lot!”⁸⁶

(Recording 5. Download: [MP3](#); Transcript Download: [pdf 96](#))

2) Telephone investigation with the Red Cross:

Subject of Investigative: Staff on duty, Organ Donation Office of the Red Cross of Guilin, Guangxi

Date of Investigation: September 12, 2016

Investigator: Were the 165 donations all made this year?

Staff on duty: That’s impossible! It was since the work on organ donations started.

Investigator: How many donations were made this year?

Staff on duty: I cannot disclose the figure to you⁸⁷.

(Recording 6. Download [MP3](#); Transcript Download: [pdf 204](#))

Subject of Investigation: Staff on duty, Organ Donation Office of the Red Cross Society of Guilin, Guangxi

Date of Investigation: November 24, 2016

Investigator: The No. 181 Hospital did over 30 kidney transplants in July, and the organs were not from the Red Cross?

Staff on duty: They were not.⁸⁸

V. List of Responsible Persons

JFJ924-001 Wen Mingbo, Male.

Personal Profile: Associate Chief Surgeon, Director of Hepatobiliary Surgery Department; standing member of the Professional Committee of Organ Transplantation of Guangxi Medical Association, and standing member of the Professional Committee of Organ Transplantation of Guangzhou Military Region.

Graduated from Xiangya Medical College of Zhongnan University (formerly Hunan Medical University) in 1990 and engaged in the clinical and scientific research work of hepatobiliary surgery for nearly 20 years, studied at Zhujiang Hospital of the First Military Medical University and Southwest Hospital of the Third Military Medical University

Specializing in liver transplantation⁸⁹.

JFJ924-002 Chen Youjiang, Male.

Personal Profile: Chief Surgeon of General Surgery, Chief of Section; current member at deputy-director level of the Professional Committee of Organ Transplantation of the Guangzhou Military Region; and member at deputy-director level of the Professional Committee of Organ Transplantation of Guangxi Province; also member of the Professional Committee of hepatobiliary surgery of the PLA.

Graduated from the First Military Medical University in July 1984 and engaged in general surgery for 25 years. Studied in the Eastern Hepatobiliary Surgery Hospital of the Second Military Medical University, the General Surgery Department of Changhai Hospital, the Hepatobiliary Surgery Department of the Southwest Hospital of the Third Military Medical University, and the Laparoscopy Center of the First Affiliated Hospital of Zhongshan Medical University.

Was the first to conduct allogeneic liver transplantation. Completed more than 100 cases of liver transplants to date⁹⁰.

JFJ924-003 Huang Gao, Male.

Personal Profile: Hepatobiliary surgeon

Graduated from the School of Medicine of South China University in 2004 and from the postgraduate class of Guangxi Medical University in 2007. Engaged in clinical and research work related to liver transplantation for 5 years⁹¹.

JFJ924-004 Pan Yuchen, male.

Personal Profile: Attending Surgeon, Deputy Director of the Heart Center; member of the Professional Committee of Organ Transplantation of Guangzhou Military Region.

Graduated from Guangxi Medical University in 1996 and engaged in cardiothoracic and vascular surgery for more than 10 years. Further studied cardiovascular surgery in the Medical Center for Children of Xinhua Hospital of Shanghai and the PLA Cardiovascular Surgery Treatment Center at Xinqiao Hospital of the Third Military Medical University.

Especially good at heart transplantation⁹².

JFJ924-005 Xuan Yongbo, Male.

Personal Profile: Attending Surgeon at Heart Center

Specializing in heart transplantation for end-stage heart disease⁹³.

JFJ924-006 Sui Weiguo, Male. Date of Birth: June 1964⁹⁴.

Personal Profile: Chief Surgeon, Director of Renal Division, Director of the PLA Kidney Transplantation and Dialysis Treatment Center, member at director level of the Professional Committee of Organ Transplantation of Guangzhou Military Region, and member at director level of the Organ Transplantation Branch of Guangxi Medical Association, standing member of the PLA Organ Transplantation Society, and Editor-in-Chief of the Journal of Internal Medicine for Organ Transplantation.

Graduated from Huazhong University of Science and Technology. Visiting Scholar at the State University of New York.

In charge of the research project on the use of various blood purification methods to remove antibodies from kidney transplant patients with high allergenicity⁹⁵.

JFJ924-007 Liu Zuohai, Male. Date of Birth: November 1943. A native of Liaoning Province⁹⁶.

Personal Profile: Chief Surgeon of the PLA Kidney Transplantation and Dialysis Center.

Graduated from the Fourth Military Medical University in 1967. Studied in the General Hospital of Guangzhou Military Region, the Institute of Nephrology of Zhongshan Medical University in Guangzhou, and the Zhujiang Hospital of the First Military Medical University in Guangzhou in 1979, 1981 and 1986, respectively.

Specializing in perioperative and postoperative medical management of kidney transplantation⁹⁷.

JFJ924-008 Yan Qiang, Male.

Personal Profile: Associate Chief Surgeon of the PLA Kidney Transplantation and Dialysis Center, Currently standing member of the Professional Committee of the Organ Transplantation of Guangzhou Military Region, and standing member of the Branch of Organ Transplantation of Guangxi Medical Association.

Graduated from the Medical Department of the Second Military Medical University in Shanghai in July 1991 and got his Master's degree from the First Military Medical University in 2002, majoring in kidney transplantation.

Conducted more than 300 kidney transplant operations independently⁹⁸.

Specializing in kidney transplantation.

JFJ924-009 Li Li, Male.

Personal Profile: Attending ophthalmologist, director of the Otorhinolaryngology and adjunct director of the Ophthalmology Center.

Graduated from the First Military Medical University with a Master's degree and engaged in ophthalmology clinic for 19 years.

Conducted 100 corneal transplant surgeries from January 18, 2003 to June 30, 2007⁹⁹.

Specializing in corneal transplant surgery.

JFJ924-010 Li Liangmao, Male.

Personal Profile: Associate Chief Ophthalmologist, director of Otorhinolaryngology and adjunct director of Ophthalmology Center.

Graduated from First Military Medical University with a Master's degree and engaged in ophthalmic clinical practice for 23 years.

Conducted 120 corneal transplant surgeries from January 18, 2003 to June 30, 2010¹⁰⁰.

Specializing in corneal transplant surgery.

WOIPFG's Investigative Report on the Alleged Organ Harvesting of Living Falun Gong Practitioners at the No. 960 Hospital of the PLA's Joint Logistics Support Force (Formerly Jinan Military General Hospital) and Its Staff Members Suspected of Participation

Foreword

The hospital's hepatobiliary and pancreatic organ transplantation surgery has achieved leaps and bounds of extraordinary development, with short waiting times and huge number of liver and kidney transplantation, once performed 16 consecutive kidney transplants in 24 hours, which is synchronized with the time when the CCP persecutes Falun Gong. Ni Jialian, the director of the hepatobiliary surgery, admitted that the original organs used were all from Falun Gong practitioners. Under the general background of the CCP's national crime of live organ harvesting, the hospital is suspected to have been involved in the crime of live organ harvesting from Falun Gong practitioners and other groups.

I. Overview of Former Jinan Military General Hospital

The 960th Hospital of the Joint Logistics Support Force of PLA is located in Tianqiao District, Jinan City, Shandong Province. On November 5, 2018, this hospital was established by merging the former Jinan Military General Hospital, the PLA 88th Hospital, the PLA 148th Hospital, and the PLA 456th Hospital.¹⁰¹ The former Jinan Military General Hospital is a modern comprehensive "third level first class hospital" integrating medicine, education, research, prevention and health care, with more than 2,000 beds and 58 clinical and medical-technical departments. The specialty technologies are orthopedic and trauma surgery, especially tissue and organ transplantation (kidney, liver, cornea, bone marrow transplantation), of which the kidney transplantation technology and the quantity are among the top ten in China.¹⁰² The hospital has many

追查迫害法輪功國際組織 (追查國際)

World Organization to Investigate the Persecution of Falun Gong (WOIPFG)

To investigate the criminal conduct of all institutions, organizations, and individuals involved in the persecution of Falun Gong; to bring such investigation, no matter how long it takes, no matter how far and deep we have to search, to full closure; to exercise fundamental principles of humanity; and to restore and uphold justice in society

medical equipment at the forefront of medical care, including the da Vinci surgical robot, intraoperative radiotherapy, radio wave knife, MRI3.0, 640-row CT, etc.¹⁰³

II. Kidney transplant quantity ranks among the top 10 in China and the top 5 in the military

The Department of Urology Surgery of the hospital was approved by the PLA General Logistics Department in 2005 as the military's Renal Transplantation and Dialysis Treatment Center, with 80 beds.¹⁰⁴ The number of kidney transplant ranked top 10 in China, and top 5 among PLA hospitals.¹⁰⁵

III. The Department of Hepatobiliary and Pancreatic Transplantation of the hospital accomplished "supernormal great-leap-forward" development

In Aug. 2003, the Hepatobiliary and Pancreatic Transplantation Department became an independent department. Since then, the department had conducted various types of liver transplantation and liver-kidney joint transplantation, accomplishing "supernormal great-leap-forward development".¹⁰⁶ The Hepatobiliary Surgical Department has established two development strategies, and focused on developing liver transplantation and Minimally Invasive Surgical Technology.¹⁰⁷

IV. Strong Liver and Kidney Transplantation Teams

At present, there are 32 staff members in the Urology Surgery Department of Jinan Military General Hospital, including 13 doctors, 4 technicians and 15 nurses. There were 4 doctoral-degree holders and 4 master-degree holders, also it had 5 chief surgeons, 4 associate chief surgeons and 1 chief nurse.¹⁰⁸

The Department of Hepatobiliary Surgery has 12 staff members, 2 professors and chief surgeons, 4 associate professors and associate chief surgeons, 4 attending surgeons, and 2 resident surgeons. There are 2 master's degree supervisors, 2 doctorate and 6 master's degree holders.¹⁰⁹ Multiple liver transplantation teams can be formed.

V. The actual number of liver and kidney transplants is huge, once performed 16 consecutive kidney transplants within 24 hours

According to a report published by *Qilu Evening News* on Mar. 21, 2005, the Director Li Xiangtie led a urology surgical team with strong expertise and technical skills. The department was capable of conducting 6 cases of kidney transplants simultaneously, and had made a national record of performing 16 cases of kidney transplants consecutively in 24 hours.¹¹⁰ They could be configured in multiple teams for kidney transplants.

http://paper.dzwww.com/qlwb/data/20081201/html/65/content_1.html

在自体肾移植、异体肾移植、亲属供肾移植、胰肾联合移植、膀胱肿瘤、前列腺疾病及腔内泌尿科微创治疗、体外震波碎石等方面，具有丰富经验。他领导的泌尿外科人才济济，技术力量雄厚，能同时开展6台肾移植手术，曾创造过24小时内连续实施16例肾移植手术的全国纪录。1500余例肾移植手术，成功率达99%，肾存活率达国际先进水平。年手术数量连续10年保持在130例以上，位居全国前十位。

追查迫害法輪功國際組織 (追查國際)

World Organization to Investigate the Persecution of Falun Gong (WOIPFG)

To investigate the criminal conduct of all institutions, organizations, and individuals involved in the persecution of Falun Gong; to bring such investigation, no matter how long it takes, no matter how far and deep we have to search, to full closure; to exercise fundamental principles of humanity; and to restore and uphold justice in society

In October 2002, an article published in *Journal of Research in Nursing*, claimed that the Jinan Military General Hospital had conducted 7 cases of organ transplants in one day and 32 cases of transplants in one week on 6 occasions.¹¹¹

VI. The Hospital has sufficient donor sources.

During the May 1 public holidays in 2001, Jiang Hua, from the ophthalmology department of Jinan Military Region General Hospital, led his entire department to continuously perform corneal transplants. During the day, they went to other places to collect corneas, and in the evenings, they performed surgeries. They worked around the clock every day for the entire week¹¹². This article published in 2009 says in the end, “Over the years, many holidays were spent in this way”. In “a lot of holidays”, they went to other places to collect corneas, and then they would immediately perform the transplants. This indicates that the corneas were freshly-cut, and they were not taken from any eye bank. Not to mention, “eye banks in China are basically in a state of zero inventory¹¹³”. Then, why during the “many holidays”, the donors would emerge? The hospital staff had to make a special trip to others places to collect corneas. This suggests that the whole process was premeditated. It is highly likely that a certain CCP department is in charge of coordinating the distribution of live “donors,” and it often arranges the hospitals, with which it has connections, to go and harvest organs during the holidays.

VII. Telephone investigation recordings showed that Ni Jialian, Director of the Hepatobiliary Surgery Department of the Hospital, admitted that the organs they used in the past were all those of Falun Gong practitioners. The number of transplants is large, and the wait time for organs is short.

1. Admitted that the original organs used were all from Falun Gong practitioners

Investigation Object: Ni Jialian, the former Director of the Hepatobiliary Surgery Department at Jinan Military General Hospital, Shandong Province

Investigation Date: January 19, 2017 (Phone number: +86-1192017134231)

Summary:

Ni Jialian: “It is hard to say. The previous donors were all prisoners.” Previously, all hospital were using mostly prisoners’ (organs).

Investigator: So, all the ones you used in the past were the organs from Falun Gong practitioners, right?”

Ni: “Yes.”¹¹⁴

(Recording 1. Download: [MP3](#); Transcript Download: [pdf 1](#))

2. Investigation recording: short waiting time and high transplant volume

Investigation Object: A doctor from the doctors’ office for kidney transplantation in the Urinary Surgery Department of Jinan Military General Hospital¹¹⁵

Investigation Date: April 8, 2017 (Phone number: +86-053151665311)

Summary: The hospital conducted 200 to 300 cases of kidney transplantation last year. The doctor said, “This kind of things are arranged by the hospital. We don’t know how long you’ll have to wait.”

Investigation Object: A nurse from the urology surgery, Jinan Military General Hospital¹¹⁶

Investigation Date: August 22, 2017 (Phone Number: +86-53151666223)

Summary: This year we did more than a hundred cases. All our doctors can do it, our director and deputy director can do it. Zhang Aimin is our director.

(Recording 3. Download: [MP3](#); Transcript Download: [pdf 3](#))

Investigation Object: A nurse from the Hepatobiliary Surgery Nurse Station of the Jinan Military General Hospital¹¹⁷

Investigation time: August 30, 2019 (Phone Number: + 86-531-51666221)

Summary:

Our director is now in the middle of surgery. You can register with Director Chen Zhong of the Hepatobiliary Surgery Clinic on Mondays. Director Ni has retired and Director Chen is now in charge. There were also cases with short waiting time! The past two cases were done the next day after patients arrived. We have been performing this procedure for more than 10 years.

(Recording 4. Download: [MP3](#), Manuscript Download: [pdf 090](#))

VIII. The data on the Hospital's official website had not been updated for at least ten years before the related webpage was deleted.

On May 24, 2006, dzrb.dzng.com reported that Jinan Military Region Urology Specialist Technology Center, led by Li Shenqin who performed the first kidney transplant in Jinan Military General Hospital and became a civilian general in September 2001, had completed more than 1,500 kidney transplants and the Center had maintained an annual record of more than 150 kidney transplants for five consecutive years.¹¹⁸

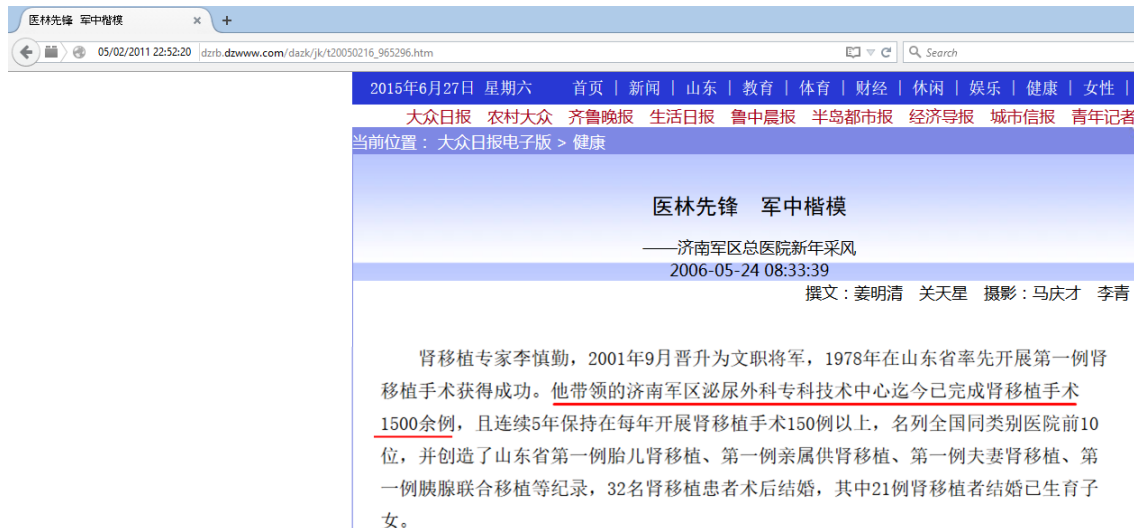

Figure 2 Snapshot of dzrb.dzng.com report on May 24, 2006

On August 21, 2016, the official website of Jinan Military General Hospital still stated: "The Department of Urology has completed more than 1,500 kidney transplants."¹¹⁹ The hospital had not updated the data for at least ten years. This webpage was then deleted.¹²⁰

IX. Primarily Responsible Persons

Personal Profile: Director of Hepatobiliary Surgery, Associate Chief Surgeon, Master's Supervisor, MD. Now he is a member of Chinese Medical Association, Shandong Province Organ Transplantation Committee, Shandong Province Anti-Cancer Association, editorial board member of Shandong University Journal, Shandong Medicine, Chinese Journal of Modern Surgery, and contributing editor of Chinese Journal of Clinical Surgeons.

He studied under Academician Wu Mengchao and Professor Yan Yiqun of Shanghai Oriental Hepatobiliary Surgery Hospital, also studied under Professor Hu Xiangui of Pancreatic Surgery, Shanghai Changhai Hospital.

He specializes in the surgical treatment of liver cancer and pancreatic tumors as well as liver transplantation.

121

JNJQ002 Li Xiangtie, Male.

Personal Profile: Director of Urology Department of Jinan Military General Hospital, chief surgeon, master's degree supervisor, now he is the director of Jinan Military Urology Professional Committee, director of Shandong Province Organ Transplantation Society, standing member of Chinese Medical Association Organ Transplantation Society Branch, member of Chinese Dialysis and Transplantation Society, standing member of PLA Organ Transplantation Professional Committee

The Department of Urology under his leadership is capable of performing 6 kidney transplant operations simultaneously, and has once performed 16 kidney transplant operations consecutively within 24 hours, with accumulated more than 1500 cases of kidney transplant operations. The number of annual surgeries has been maintained at over 130 cases for 10 consecutive years, ranked among the top 10 in China.

Specialized in autologous kidney transplantation, allogeneic kidney transplantation, relative donor kidney transplantation, combined pancreas-kidney transplantation, bladder tumor, prostate disease, and minimally invasive treatment of intracavitary urology, extracorporeal shock wave lithotripsy, etc. ¹²²

JNJQ003 Ni Jialian, Male.

Personal Profile: Director of Hepatobiliary Surgery of Jinan Military General Hospital, Chief Surgeon, Professor, Master's Degree Supervisor. He graduated from the Second Military Medical University in Shanghai, and studied under the Academician Wu Mengchao, a nationally renowned liver surgery expert. He is a member of the Chinese Medical Association, a standing member of the National Army Hepatobiliary Surgery Committee, a member of the Jinan Military District Medical Science and Technology Committee, a deputy director of the Jinan Military District General Surgery Committee, a member of the Jinan Military District Senior Technical Title Review Committee; a member of the Hepatobiliary and Pancreatic Group of the General Surgery Committee of the Shandong Branch of the Chinese Medical Association and a member of the Shandong Province Organ Transplantation Society; and a member of the editorial board of the "Practical Journal of Medicine & Pharmacy".

The department conducted the first case of liver transplantation in Jinan Military Region, the first case of living liver transplantation and combined liver and kidney transplantation in Jinan Military Region and Shandong Province. Clinical liver transplantation includes liver transplantation for end-stage cirrhosis, parental liver transplantation in children, liver transplantation of relatives between adults and combined liver and kidney transplantation. ¹²³

Personal Profile: Associate Chief Surgeon of Urology, Associate Professor

Specialized in diagnosis and treatment of kidney transplantation. ¹²⁴

JNJQ005 Zhang Aimin, Male.

Personal Profile: Chief surgeon of urology, professor, director of urology. Served as a youth member of Chinese Medical Association Organ Transplantation Branch and a member of Shandong Provincial Organ Transplantation Committee.

He specializes in the treatment of uremia with kidney transplantation and the management of immune hypersensitive patients to form a systematic treatment. He is also good at urological intracavitary treatment, such as nephrectomy, living kidney extraction, etc. ¹²⁵

JNJQ006 Hao Junwen, Male.

Personal Profile: Chief surgeon of urology, professor, deputy director of urology. Served as a member and secretary of Shandong Provincial Organ Transplantation Committee.

He has been engaged in clinical kidney transplantation for 20 years. ¹²⁶

He specializes in kidney transplantation.

JNJQ007 Liu Shaoge, Male.

Personal Profile: Associate Chief Surgeon of Urology, Associate Professor

He specializes pre-operative and post-operative management of kidney transplantation. ¹²⁷

JNJQ008 Xu Youhe, Male.

Personal Profile: Chief Surgeon of Urology, Professor.

Specializes in kidney transplantation. ¹²⁸

JNJQ009 Liu Yi, Male.

Personal Profile: Associate Chief Surgeon of Urology, Associate Professor

He has been engaged in clinical urology for nearly 15 years. ¹²⁹

Specializes in kidney transplantation.

JNJQ010 Yu, Nengwang, Male.

Personal Profile: Associate Chief Surgeon of Urology

He received the degree of Doctor of Medicine jointly from the Second Military Medical University and Northwestern University of USA. From 2000 to 2010, he studied in the Second Military Medical University continuously for the undergraduate, master's and doctoral degrees, during which, from 2008 to 2010, he was sent by the Ministry of Education to Northwestern University of USA to conduct his doctoral research. He specializes in diagnosis and treatment for kidney transplantation. ¹³⁰

JNJQ011 Shen Yizhen, Male.

Personal Profile: Attending Surgeon of Urology

He has been engaged in kidney transplantation clinical practice for more than 10 years and well experienced in the diagnosis and treatment of kidney transplantation.

He specializes in the treatment of uremia with kidney transplantation and the treatment of immunosensitive patients with systemic therapy. He is also good at urological intracavitary treatment, such as laparoscopic adrenalectomy, nephrectomy, living kidney extraction, etc. ¹³¹

JNJQ012 Chang Zheng, Male.

Personal Profile: Attending Surgeon of Urology

He has been engaged in the specialty of urology for more than 10 years.

He specializes in the diagnosis and treatment of kidney transplantation. Especially good at the treatment of uremic with kidney transplantation, the treatment of immune hypersensitive patients with systematic therapy. ¹³²

JNJQ013 Song Hua, Male.

Personal Profile: Attending surgeon of urology

Engaged in urology specialty for more than 10 years. He is skillful in the diagnosis and treatment of common and multi-morbidity urological diseases.

He specializes in the diagnosis and treatment of kidney transplantation. ¹³³

He is good at the work of kidney transplantation treatment for uremia and the treatment of immune hypersensitive patients with systematic therapy. He is also good at urological intracavitary treatment, such as laparoscopic adrenalectomy, nephrectomy, living kidney extraction, etc.

JNJQ014 Zhang Liqing, Male.

Personal Profile: Attending surgeon of urology

Kidney transplantation. ¹³⁴

Personal Profile: Director of Ophthalmology, Professor, Chief Surgeon of Ophthalmology, Doctoral Supervisor

In 2001, on May Day, he led the whole department to perform corneal transplantation continuously for a week, taking corneas out of the town during the day and conducting surgery at night. ¹⁴⁶

He specializes in keratoconus and corneal transplantation. ¹⁴⁷

JNJQ026 Yuan Ye, Male.

Personal Profile: Associate Chief Surgeon of Ophthalmology

Conduct corneal transplantation, research on eye bank technology. ¹⁴⁸

JNJQ027 Gao Hongrui, Male.

Personal Profile: Associate Chief Surgeon of Ophthalmology

Engaged in ophthalmology clinical and research work for 20 years, with rich experiences in the diagnosis and treatment of corneal transplantation and other diseases. ¹⁴⁹

Specializes in corneal transplantation.

JNJQ028 Wang Guangjie, Male.

Personal Profile: Associate Chief Surgeon of Ophthalmology, Associate Professor

Engaged in ophthalmology clinical work for nearly 17 years, performed corneal transplantation and other surgeries. ¹⁵⁰

WOIPFG's Investigative Report on the Alleged Organ Harvesting of Living Falun Gong Practitioners at the Second Affiliated Hospital of the PLA Army Medical University (formerly Xinqiao Hospital Affiliated to the Third Military Medical University) and Its Staff Members Suspected of Participation

追查迫害法輪功國際組織 (追查國際)

World Organization to Investigate the Persecution of Falun Gong (WOIPFG)

To investigate the criminal conduct of all institutions, organizations, and individuals involved in the persecution of Falun Gong; to bring such investigation, no matter how long it takes, no matter how far and deep we have to search, to full closure; to exercise fundamental principles of humanity; and to restore and uphold justice in society

Address: 83 Xinqiaozheng Street, Shapingba District, Chongqing City

In September 2014, WOIPFG conducted a telephone investigation of Bai Shuzhong, who used to serve as the Minister of Health of the PLA's General Logistics Department of the Chinese Communist Party from 1998 to 2004. In the telephone investigation, Bai Shuzhong claimed that during his tenure, Jiang Zemin personally ordered the organ harvesting of Falun Gong practitioners. The affiliated hospitals of various military medical universities are the main hospitals in the CCP military system that carry out Jiang Zemin's order. Xinqiao Hospital PLA Army Medical University (formerly Xinqiao Hospital Affiliated to Third Military Medical University) is one of the main hospitals carrying out this crime of genocide. While the CCP persecuted Falun Gong, the hospital's organ transplantation has also experienced tremendous development. The hospital has the military nephropathy center, and its number and types of kidney transplants ranked near the top in China with a shocking number of transplants in a single day, once up to 24 kidney transplants within a day. The hospital also has a strong team of liver and kidney transplant doctors, which indicates that the actual number of transplants in the hospital could be huge.

I. Overview of the Hospital

The Second Affiliated Hospital of the PLA Army Medical University (formerly Xinqiao Hospital Affiliated to the PLA Third Medical University, hereinafter referred to as Xinqiao Hospital) is a national "Third level First class Hospital" in China. It was among the first batch of "Designated Hospitals for Foreigners" in Chongqing city. The hospital engages in multiple aspects such as medical treatment, education, scientific research, prevention, health care, etc. The hospital has opened 2,860 beds¹⁵¹.

II. The hospital is the military nephropathy center, and it's number and types of kidney transplants ranked near the top in China

According to public information available on website, Xinqiao Hospital of the Third Military Medical University had two Urology Divisions. Since 2000, it had been approved as the military nephropathy center by the Ministry of Health of General Logistics.¹⁵² In addition, it was one of the military key disciplines, and the doctorate-granting discipline approved by State Council.¹⁵³ The Second Division of Urology was the Research Institute of Nephrology in Chongqing, one of the specialized disciplines of a National Clinical Drug Trial Institution.¹⁵⁴ The hospital claimed that "it had accumulated rich experience in the field of organ transplantation with unique clinical research in the field of renal transplantation".¹⁵⁵ And "The kidney transplant quantity and types ranked among the highest level in China. "¹⁵⁶, "it is the largest organ transplant center in Southwest China."

III. The hospital has a shocking number of transplants in a single day, once up to 24 kidney transplants within a day.

The document of the hospital, "The Brief History of Military Nephrology and Urology Specialties" described on page 157, "The hospital once performed 24 cases of kidney transplant surgeries within a day."

¹⁵⁷

全军肾脏病中心泌尿外科简史

一、基本情况

泌尿外科是三医六首批重点学科、全军肾脏病中心。始建于五十年代初。1986年被平为硕士授权学科。1997年12月被评为博士授权学科。1987年医院由该科和肾内科一区成立肾病中心，同年10月被批准为三医大首批重点学科。2000年批准为重庆市肾脏病研究所、全军专科中心。

2003年，该学科拥有医教研主系列人员26名，其中博士生导师1名、硕士生导师3名，正高4名、副高4名、中级6名、初级1名，平均年龄35岁，博士后2名、博士10名、硕士3名，主系列已实现硕士化。

二、临床医疗

该科包括肾脏病移植中心和普通泌尿各个病区，另设实验室、膀胱镜室、尿流动力学室、体外震波碎石室。科室编制床位83张，年门诊量9000余人次，年住院病人900人次，医院感染率0.31%，治愈好转率97.1%。

该科器官移植历史悠久，是我国最早开展器官移植的少数几个单位之一。通过对国外移植中心的学习和考察以及大量的动物实验研究后，于1978年1月首次在西南地区开展了肾脏移植手术。从此器官移植不断发展，人员来自国内各省、市、自治区。

该科器官移植病例数量、种类以及成功量在国内均名列前茅。截止2002年，已进行

肾移植2590例次，并且还先后开展了睾丸移植、肾上腺移植、胰十二指肠联合移植、肝脏移植等，最长带肾存活已逾24年(1979年2月27日手术)。1年带肾存活率98.7%，10年带肾存活率53.9%，器官移植水平在全国始终名列前茅。1998年始，年均移植逾180例，曾于一天内实施肾移植手术24例。

大规模的器官移植为临床研究提供了丰富的资料，1998年高危病人肾移植的临床研究获重庆市科技进步二等奖；2002年肾移植联合临床研究获军队医疗成果二等奖。

1983年始，国内许多单位如昆明军区总医院、白求恩国际和平医院、桂林181医院、深圳武警总医院、成都空军医院、原重庆空军医院、郑州空军医院、西藏军区总医院、新疆军区总医院、济南军区总医院、南充地区医院、武汉161医院、贵阳44医院等纷纷派人来该中心学习器官移植。同时，该中心也先后派人到广州南方医院、郑州空军医院、贵阳44医院、成都空军医院、大坪医院等单位开展器官移植。

普通泌尿外科病区也积极开展各项新技术、新业务。1984年先后在全军首家开展经尿道前列腺电切术及经皮膀胱颈悬吊术，1985年首次开展体外震波碎石术，1995年在全国首先开展保留尿道前列腺切除术，2000年先后于重庆市首次开展输尿管弹道碎石术和前列腺癌根治术，2002年开展腹腔镜后镜泌尿外科手术。这些处于国内、军内领先水平

157

Figure 1 Snapshot of "The Brief History of the Military Nephrology and Urology Specialties", page 157

IV. The hospital's transplantation department has a large number of beds

As a nephropathy center, and the key discipline of the CCP military, and a doctorate-granting discipline approved by the State Council, Xinqiao Hospital of the Third Military Medical University has 120 permanent beds in the ward of the First Division of Urology¹⁵⁸. Also, the number of beds in the Second Division of Urology should not be much different as it is also the military nephropathy center¹⁵⁹.

According to public data on the hospital's website, the hospital's hepatobiliary surgery currently has 60 beds¹⁶⁰, divided into a minimally invasive surgery center and a hepatobiliary ward. Large organ transplantation is the core project of hepatobiliary surgery. The data also shows that while continuing clinical work, the Department of Hepatobiliary Surgery of the hospital will further carry out joint pancreas-kidney transplantation and pancreas transplantation, actively carry out liver transplantation, and create conditions for small intestine transplantation¹⁶¹.

V. The hospital has a strong team of liver and kidney transplant doctors, which indicates that the actual number of transplants in the hospital could be huge.

In 2014, WOIPFG released a list of surgeons in this hospital who took part in organ transplants.¹⁶² From the official website and published papers, we can find 33 surgeons who actually performed liver and kidney transplantation, including 5 chief surgeons, 7 deputy chief surgeons and 6 primary surgeons and 15 other staff members. Together they can form several liver and kidney transplant teams.

Zhang Genfu, chief surgeon and professor at the Secondary Division of Urology, the Standing Committee member of Military Transplantation Society and vice chairman of Chongqing Municipal Organ Transplantation Association. By Sep. 30, 2008, he had performed more than 3,300 cases of kidney transplantation, and had taken part in liver, testis, adrenal gland transplant and combined pancreas-kidney-

duodenum transplant¹⁶³. While this was done by Zhang Genfu alone, with so many transplant doctors in the hospital, the number of liver and kidney transplants should be huge.

VI. The hospital made efforts to promote kidney transplantation technology to other medical institutes across the country

According to the hospital's document "A Brief History of Military Nephrology and Urology Specialties" on page 157, it described: "Many domestic medical institutes such as General Hospital of Kunming Military Region, Bethune International Peace Hospital, No. 181 Hospital of Guilin, General Hospital of Shenzhen Armed Police, Chengdu Air Force Hospital, former Chongqing Air Force hospital, Zhengzhou Air Force hospital, the General hospital of Tibet Military Region, General hospital of Xinjiang Military Region, General hospital of Jinan Military, Nanchong regional hospital, No. 161 Hospital of Wuhan, No. 44 hospital of Guizhou, have sent out medical staff to the center to learn the organ transplantation technology. Meanwhile, the center also successively sent specialists to Guangzhou Southern hospital, Zhengzhou Air Force hospital, No. 44 hospital of Guiyang, Chengdu Air Force hospital, Daping hospital and other institutes to launch organ transplants."¹⁶⁴

VII. The transplant doctor of the hospital mentioned the organ bank during the telephone investigation

Investigation Subject: Yi Shanhong: Urology of Xinqiao Hospital of the Third Military Medical University¹⁶⁵

Investigation time: 2017-08-12 Tel (+86+ 13996395466)

Yi Shanhong: I stopped doing kidney transplant a long time ago, I didn't do it! We are all doing that DCD now, this is what we need to do! As long as it is in our organ bank, we are still doing it. Director Zhang and Director Huang worked very hard. I am also afraid of leaking more secrets.

(Recording 1: [MP3](#); Transcript Download: [pdf 1](#))

VIII. It is one of the main hospitals for organ harvesting of Falun Gong practitioners in the CCP Military

According to the WOIPFG telephone investigation in September 2014 on Bai Shuzhong, who served as the Minister of Health of the PLA General Logistics Department from 1998 to 2004, it can be determined that the affiliated hospitals of the military medical universities of the CCP are generally involved in harvesting organs from live Falun Gong practitioners. The Second Affiliated Hospital of the PLA Naval Medical University (formerly Changzheng Hospital Affiliated to the Second Military Medical University) is no exception.

On September 30, 2014, a WOIPFG investigator called CCP Major General Bai Shuzhong, in the name of the Bo Xilai Special Investigation Team to collect evidence¹⁶⁶.

(Recording 2: [MP3](#); Transcript Download: [pdf16](#))

Bai Shuzhong: former director of the Health Division for the Chinese People's Liberation Army's (PLA) General Logistics Department from 1998 to 2004, which coincided with the peak time period for the CCP to persecute Falun Gong and harvest organs from Falun Gong practitioners. Military is the main body to conduct live organ harvesting, as the top medical administrative leader of the military health system, he should be one of the people who knew the situation best at that time.

追查迫害法輪功國際組織 (追查國際)

World Organization to Investigate the Persecution of Falun Gong (WOIPFG)

To investigate the criminal conduct of all institutions, organizations, and individuals involved in the persecution of Falun Gong; to bring such investigation, no matter how long it takes, no matter how far and deep we have to search, to full closure; to exercise fundamental principles of humanity; and to restore and uphold justice in society

Investigator: “When you were the director of the health division for the PLA General Logistics Department, regarding excising organs from captivated Falun Gong people for organ transplantation, was it an order from Wang Ke, the then director of the PLA General Logistics Department? Or did it directly come from the Central Military Commission?”

Bai Shuzhong: " Back then, it was Chairman Jiang. There was an instruction, that is, to start carrying out this thing, which is organ transplantation. I should say, it was not just the military that was doing kidney transplants."

Investigator: “We also obtained some information, that is, back then, the Joint Logistics Departments (of the Military Regions) were responsible for detaining a batch of Falun Gong people as organ donors, right?”

Bai Shuzhong: “At least this is how I remembered, back then, after President Jiang issued the instruction, we all did a lot of anti-Falun Gong work. Because at that time Jiang was paying a lot of attention on this issue and took this issue very seriously.”

The recording clearly indicates that the live organ harvesting of Falun Gong practitioners was directly ordered by Jiang Zemin, and the military was not the only system involved in organ transplant.

This telephone recording affirms the weight of the evidence WOIPFG has acquired from the military, armed police, regional government agencies and the judiciary and legal systems. All of these entities are suspected of direct responsibility for participating in the crime of live organ harvesting. It also expounds on the reasons behind this issue and confirms the judgment WOIPFG has made based on the collected evidence.

IX. List of responsible persons

JFJLJ001 Huang Chibing, Male. Date of birth: March 1963.

Personal profile: Chief Surgeon, Professor, and Director of the Second Division of Urology. Member of the Youth Committee of the Organ Transplant Branch of the Chinese Medical Association, member of the Chongqing Society of Organ Transplantation. Member of the Academic Committee of Chongqing Municipal Key Laboratory of Disease Proteomics.

September 1980 -July 1985, Department of Medicine, First Military Medical University, received a bachelor's degree.

September 1988 -July 1991, Department of Urology, Third Military Medical University, received a master's degree.

September 1998 -July 2001, Ph.D. candidate in Urology, Third Military Medical University, received a Ph.D.

Has completed more than 700 cases of kidney transplantation¹⁶⁷.

JFJLJ002 Feng Jiayu, Male.

Personal profile: Deputy Director, Lecturer and Attending Surgeon of the Second Division of Urology

September 1993 - July 1998, Department of Medicine, Third Military Medical University, received a bachelor's degree

追查迫害法輪功國際組織 (追查國際)

World Organization to Investigate the Persecution of Falun Gong (WOIPFG)

To investigate the criminal conduct of all institutions, organizations, and individuals involved in the persecution of Falun Gong; to bring such investigation, no matter how long it takes, no matter how far and deep we have to search, to full closure; to exercise fundamental principles of humanity; and to restore and uphold justice in society

August 1998 - August 2001, Department of Urology, Xinqiao Hospital, Third Military Medical University, Resident, Teaching Assistant

September 2001 - July 2004, Master's candidate, Urology, Third Military Medical University, received a master's degree

September 2004 - August 2005, Department of Urology, Xinqiao Hospital, Third Military Medical University, attending surgeon, lecturer

September 2005 - July 2008, Ph.D. candidate, Urology, Third Military Medical University, received a Ph.D.

August 2008 – June 2010, Department of Urology, Third Military Medical University, attending surgeon and lecturer.

July 2010 to present, Deputy Director of Urology, Third Military Medical University

Established and maintained a follow-up system for urological transplantation patients (TPMS), reaching 3000 follow-up visits per year. Participated in the hospital's "Combined Pancreas-Kidney Transplantation" research team (received training for one year and 2 months). Participated in the establishment and improvement of new surgical procedures for "reconstruction of accessory renal artery of transplanted kidney" and "new urethral drag" in urology department. Involved in many external transplant medical work, successively participated in more than 30 kidney harvesting operations in Yunnan, Guizhou, Sichuan, Hubei, Shaanxi and other places.

Specialized in allogeneic kidney transplantation¹⁶⁸.

JFJLJ003 Fan Mingqi, Male.

Personal profile: Associate Chief Surgeon, Associate Professor

September 1981 – July 1986, Undergraduate study, Department of Medicine, Third Military Medical University.

September 1992 – July 1995, Master's candidate, Surgery and Urology, Third Military Medical University.

September 1999 – July 2003, Doctorate candidate, Department of Surgery and Urology, Third Military Medical University.

August 2007 – November 2007, Visiting scholar at Department of Urology, Bayreuth Central Hospital, Germany

Good at kidney transplantation. Independent and can guide lower-level doctors to complete most of the operations in this discipline, such as complex kidney transplantation¹⁶⁹.

JFJLJ004 Zhang Genfu, Male. Date of birth: April, 1954¹⁷⁰.

Personal profile: Chief surgeon and professor of the Second Division of Urology. Member of the Standing Committee of the Military Organ Transplant Society, deputy chairman of the Chongqing Society of Organ Transplantation, member of the Standing Committee of the Kidney Transplantation Group of the Urology Branch of the Chinese Medical Association, member of the Chinese Organ Transplant Branch, and editorial board member of the Chinese Journal of Organ Transplantation

September 1975 – August 1979, Undergraduate study, Department of Medicine, Third Military Medical University.

July 1989 – June 1991, Master's candidate, Third Military Medical University.

追查迫害法輪功國際組織 (追查國際)

World Organization to Investigate the Persecution of Falun Gong (WOIPFG)

To investigate the criminal conduct of all institutions, organizations, and individuals involved in the persecution of Falun Gong; to bring such investigation, no matter how long it takes, no matter how far and deep we have to search, to full closure; to exercise fundamental principles of humanity; and to restore and uphold justice in society

September 1979 - December 1986, served as a resident of the Second Affiliated Hospital of the Third Military Medical University.

December 1986 - December 1992, served as an attending surgeon at the Second Affiliated Hospital of the Third Military Medical University.

December 1992 - December 1999, served as an associate chief surgeon of the Second Affiliated Hospital of the Third Military Medical University.

December 1999 to present, Chief Surgeon of the Second Affiliated Hospital of Third Military Medical University.

In January 1978, he was the first to start kidney transplant operation in the Southwest of China. As of September 30, 2008, he has performed more than 3,300 cases of kidney transplants and carried out successively liver transplants, testicular transplants, adrenal transplants, combined pancreas-kidney-duodenal transplants¹⁷¹.

JFJLJ005 Wang Pingxian, Male.

Personal Profile: Associate Chief Surgeon and Associate Professor of Urology

September 1980 – July 1985, Department of Medicine, Third Military Medical University, received a bachelor's degree.

September 1987 – July 1990, Master's student in Urology of the Third Military Medical University, received a master's degree.

September 1999 – July 2002, Doctorate candidate of Urology of the Third Military Medical University, received a doctorate degree.

He has visited and communicated with international transplant centers in the United States and the United Kingdom many times. Specialized in organ transplantation (including kidney transplantation, combined pancreas-kidney transplantation, liver transplantation, adrenal transplantation, etc.)¹⁷².

JFJLJ006 Xiao Ya, Male. Date of birth: May 1976.

Personal Profile: Lecturer, Attending surgeon

September 1994 - June 1999, Undergraduate study in Clinical Medicine of Third Military Medical University.

September 2002 - June 2006, Master's candidate of Surgery, Third Military Medical University.

June 1999 - September 2005, Resident in the Second Affiliated Hospital of Third Military Medical University.

July 2005 – present, Attending surgeon and lecturer at the Second Affiliated Hospital of Third Military Medical University.

Proficient in the diagnosis and treatment of urological diseases and performed kidney transplantation independently¹⁷³.

Specialized in allogeneic kidney transplantation.

JFJLJ007 Zhong Xiao, Male.

Personal profile: Surgeon, lecturer of Second Division of Urology

追查迫害法輪功國際組織 (追查國際)

To investigate the criminal conduct of all institutions, organizations, and individuals involved in the persecution of Falun Gong; to bring such investigation, no matter how long it takes, no matter how far and deep we have to search, to full closure; to exercise fundamental principles of humanity; and to restore and uphold justice in society

September 2000 - June 2005, Undergraduate study in Clinical Medicine of First Military Medical University.

September 2006 - June 2009, Master's candidate of Urology, Third Military Medical University.

September 2009 - July 2013, PhD candidate in Urology, Third Military Medical University.

July 2009 to present, Resident in second division of Urology, Second Affiliated Hospital of Third Military Medical University.

Engaged in clinical work in urology and kidney transplantation¹⁷⁴.

JFJLJ008 Ye Gang, Male.

Personal profile: Professor of the First Division of Urology, Chief Surgeon, and Doctoral Supervisor. Member of the Transplantation Group of the Chinese Urological Society; Member of the All-Army Urology Society; Reviewer of the International Journal of Transplantation and the American Journal of Urology. Currently serving as a special judge of Transplant International; a member of the Organ Transplant Committee of the Chinese Urological Society; a member of the Chongqing Society of Organ Transplantation.

Specialized in diagnosis and surgical treatment of various common, frequently-occurring and difficult diseases in urology and kidney transplantation, especially good at various open and minimally invasive surgery of kidney transplantation and urology¹⁷⁵.

JFJLJ009 Wang Xiangwei, Male. Date of birth: April, 1970¹⁷⁶.

Personal Profile: Former deputy chief surgeon, associate professor, deputy director of the first Division of urology, PhD.

September 1988 – July 1993, Undergraduate study of Clinical Medicine, Shandong Taishan Medical College.

September 1995 – July 1998, Master's candidate of Urology, Third Military Medical University.

September 1999 – July 2002, Doctorate candidate of Urology, Third Military Medical University.

September 2002 – July 2004, Postdoctoral fellow, Institute of Urology, Peking University Medical Science Center.

July 2005 – February 2012, Associate Professor, the Second Affiliated Hospital of Third Military Medical University.

March 2012 – May 2013, Visiting Professor, Cancer Center of Georgia Medical University, USA.

May 2013 – May 2017, Deputy Director, Professor, the Second Affiliated Hospital of Third Military Medical University.

June 2017, Departmental Director, Professor, General Hospital of Shenzhen University.

Capable of performing kidney transplantation independently¹⁷⁷.

JFJLJ010 Yi Shanhong, Male. Date of birth: November 1970¹⁷⁸.

Personal profile: Deputy Director of Urology, Associate Professor, Associate Chief Surgeon, Master's Advisor

Allogeneic kidney transplantation, prevention and treatment of transplant rejection and immunosuppressive therapy¹⁷⁹.

JFJLJ011 Fang Zhenqiang, Male.

Personal profile: Associate Chief Surgeon of Urology, Associate Professor, PhD.

September 1996 - June 2003: Seven-year program of clinical medicine at the Third Military Medical University (continuous training of bachelor and master), received a master's degree in urology.

June 2005: Participated in pre-job training for college teachers in Southwest Normal University, received the certificate of qualified college teacher.

September 2005 - June 2008: doctorate study in Surgery of The Third Military Medical University and received a doctorate in medicine.

June 2003 - September 2005: Resident in the Second Affiliated Hospital of the Third Military Medical University.

December 2005 to present: Attending surgeon and lecturer at the Second Affiliated Hospital of the Third Military Medical University.

Since 2001, he has engaged in clinical work of kidney transplantation for a long time. He is specialized in allogeneic kidney transplantation, prevention and treatment of transplant rejection and immunosuppressive therapy¹⁸⁰.

JFJLJ012 Jia Weisheng, Male.

Personal profile: Attending surgeon and lecturer in the first division of urology.

September 1996 - June 2001, Undergraduate study of Clinical Medicine, the Third Military Medical University.

June 2001 - September 2003, Resident in the Second Affiliated Hospital of the Third Military Medical University.

September 2003 - June 2006, Master's study of Surgery, the Third Military Medical University.

June 2006 - July 2007, resident of the Second Affiliated Hospital of the Third Military Medical University.

July 2007 to present, attending surgeon and lecturer in the Second Affiliated Hospital of the Third Military Medical University.

Engaged in clinical medical work in kidney transplantation and participated in immune homeostasis intervention and mechanism research on chronic rejection of kidney transplantation¹⁸¹.

JFJLJ013 Zhang Yuanning, Male. Date of birth: May 1973¹⁸².

Personal Profile: Attending surgeon and Lecturer in the first division of urology.

WOIPFG's Investigative Report on the Alleged Organ Harvesting of Living Falun Gong Practitioners at the Fifth Medical Center of the PLA General Hospital (Formerly the PLA No. 302 Hospital) and Its Staff Members Suspected of Participation

The 302nd Hospital of the People's Liberation Army (PLA), is the only military and the largest tertiary level A infectious disease hospital in China. ¹⁹⁰ In May 2007, the hospital was designated by the Ministry of Health to carry out liver transplants. ¹⁹¹ It assisted thirty-four hospitals in Beijing and seventeen provinces and cities nationwide to carry out liver transplants ¹⁹² and promoted the routine clinical development of liver transplants throughout China. The hospital is under suspicion of participating in the crime of live organ harvesting from Falun Gong practitioners and other groups.

I. Hospital Overview

The 302nd Hospital of the People's Liberation Army (PLA) is the only military and the largest tertiary level A infectious disease hospital in China. ¹⁹³ On May 23, 2007, the hospital was designated by the Ministry of Health to carry out liver transplantation. ¹⁹⁴

II. The Liver Transplant Center has a large scale with hardware facilities to perform hundreds of transplants annually.

The Second Center of Hepatobiliary Surgery/Liver Transplantation Research Center of the 302nd Hospital of the PLA consists of two clinical departments of transplantation surgery and transplantation medicine, and one basic research laboratory, with the main focus on in situ liver transplantation for end-stage liver disease, adjuvant liver transplantation, living-donor liver transplantation, split liver transplantation, liver cell transplantation, pre- and post-transplantation medical treatment and follow-up, standardized treatment of patients with recurrent primary disease after transplantation, and the diagnosis, treatment and research on precision hepatectomy and minimally invasive radiofrequency for liver tumors. There are 50 beds in the transplantation surgery department and 45 beds in the transplantation medicine department, with specialist outpatient clinic, 29 consultation room surgery clinic, 27 consultation room internal medicine clinic, etc. ¹⁹⁵

Based on the number of ward beds, if there are 50 beds for liver transplants a year (the Transplant Surgery Department has 50 beds), and if the bed turnover rate is 100% (the average bed occupancy rate in the national Grade-A Tertiary Hospitals is as high as 103% ¹⁹⁶), and if the hospitalization time for liver transplant is 30 days, the hospital has the potential to perform more than 608 ($50 \times 365 \times 100\% / 30 = 608$) cases of liver transplants per year. (Calculation method: number of ward beds X number of days in a year X bed turnover rate/average hospitalization time for liver transplant = number of liver transplants performed per year)

科室简介

肝胆外科二中心/肝移植研究中心下设移植外科, 移植内科2个临床科室和1个基础研究室, 主攻方向为终末期肝病原位肝移植、辅助性肝移植、活体肝移植、劈离式肝移植、肝细胞移植、移植前后内科治疗和随访、移植术后原发性疾病复发病人的规范治疗, 以及肝脏肿瘤的精准肝切除、微创射频的诊断、治疗与研究。移植外科现有床位50张, 移植内科45张, 设有专家门诊、29诊室外科门诊、27诊室内科门诊等。中心设备先进, 技术力量雄厚, 拥有一支年富力强、团结向上、业务技术国内领先的医疗护理队伍, 医生22人, 其中40%具有医学博士学位, 50%为医学硕士, 护士中70%以上具有大专以上学历。科室秉承“团结、友爱、和谐、发展”的理念, 强调以人为本全心全意为病人服务的新理念, 综合诊治水平处于国内领先地位。

Figure 1 Snapshot of PLA 302 Hospital

III. The quantity and quality of the Liver Transplant Center rank among the top ten in the country, training other hospitals across the country to carry out liver transplants.

In 2005, the Liver Transplantation Center was established at the PLA No. 302 Hospital. For more than a decade, this center has played a significant role in the clinical and scientific research of liver transplantation throughout China, while for nearly six years, the Liver Transplantation Center of the PLA No. 302 Hospital has assisted in the development of liver transplantation in many hospitals in Beijing and in various provinces and cities throughout China.¹⁹⁷ In 2010, this transplantation center was ranked seventh in quality and ninth in quantity of data from liver transplantation centers in China.¹⁹⁸

IV. The hospital has a strong team of liver transplant doctors

The Hepatobiliary Surgery II Center/Liver Transplantation Research Center of the PLA No. 302 Hospital has two chief surgeons, five associate chief surgeons, six attending surgeons¹⁹⁹, and 22 surgeons, 40% of whom have medical doctorates and 50% are medical masters.²⁰⁰ Liu Zhenwen, director of the Hepatobiliary Surgery Department of the 302 Hospital, was reassigned here in 2005, and he has independently completed more than 1,000 liver transplants, assisting Beijing and thirty-four hospitals in seventeen provinces and cities across China in liver transplantation.²⁰¹

V. Telephone investigation shows that the wait time for organs is short and the liver transplants volume is large.

1. Short Wait Time for Organs

Investigation subject: the PLA No. 302 Hospital Liver Transplant Duty Doctor²⁰²

Investigation time: 2017-05-05 (+86+ 10_66933449)

The wait time for liver source is one or two weeks the fastest, and one or two months the slowest. We did over a hundred surgeries last year. We have surgeries every month anyway, we've been doing it all the time. (Download Recording 1 [MP3](#), please see [Addendum 13](#))

2. Large Liver Transplants Volume

So how about the actual transplantation, let us see WOIPFG investigators' phone records

In 2016, Ma Xiao, the organ coordinator of the Beijing 302 Hospital of the PLA, told investigators that Liu Zhenwen, who previously operated on Fu Biao, is very famous. He was specially hired from the Beijing

追查迫害法輪功國際組織 (追查國際)

General Hospital of the Armed Police Force and has been an expert in the 302 Hospital for many years. In the transplant circle, he is a "big boss, very powerful!"

(Recording 2. Download [MP3](#), text download: [pdf 2](#))

"We are still doing it now; we do a lot of them"

Investigation subject: the PLA No. 302 Hospital Liver Failure Diagnosis and Research Center (+86+13671113329)

Investigation time: 2016-04-06:

Doctor on duty Liu Hongling: "We are still doing it now, we do a lot of them. We have wards especially for the military, we can do it, and the medical treatment can be free"²⁰³...

(Recording 3. Download [MP3](#), text download: [pdf 3](#))

"We have been doing many recently, seven surgeries a week."

Investigation subject: the PLA No. 302 Hospital Liver Transplant Nurse (+86+ 1066933449)²⁰⁴

Investigation time: 2017-09-15

Nurse: Wait two to three months before it can be done. We have been doing many recently, seven surgeries a week.

(Recording 4 download [MP3](#); please see [pdf 4](#) for the full transcript)

"This year there will be more done than last year."

Investigation subject: the PLA No. 302 Hospital liver transplant doctor Wang

Investigation time: 2017-09-15

Last year almost 150 transplants were done, this year there will be more done than last year.

(Recording 5 download [MP3](#); please see [pdf 5](#) for the full transcript)

VI. List of persons primarily responsible

JFJZ-DW001 Liu Zhenwen, male.

Profile: Director of the Second Center of Hepatobiliary Surgery/Liver Transplantation Research Center of the PLA No. 302 Hospital, chief surgeon, currently a member of the Beijing Organ Transplantation Professional Committee and a member of the PLA Organ Transplantation Professional Committee.

In 1989, he started to work in the general surgery department of the First Central Hospital of Tianjin, and was able to perform all kinds of general surgery independently. In 1998, he started to specialize in liver transplantation, and in 2001, he became the deputy director of Tianjin Organ Transplantation Center, and in 2002, he was transferred to the General Hospital of the Armed Police, where he established the Liver Transplantation Center of the General Hospital of the Armed Police and served as the director of the Center. In 2005, he was transferred to become the director of the Department of Hepatobiliary Surgery at the PLA No. 302 Hospital and established the Liver Transplantation Center.

He has extensive experience in the perioperative treatment of liver transplantation and has independently performed more than 1,000 liver transplants and assisted 34 hospitals in Beijing and 17 provinces and cities across China in liver transplantation. He has devoted himself to the clinical and scientific research of liver transplantation in China for more than ten years, and has assisted in the development of liver transplantation in many hospitals in Beijing and various provinces and cities in China in the past six years.²⁰⁵

To investigate the criminal conduct of all institutions, organizations, and individuals involved in the persecution of Falun Gong; to bring such investigation, no matter how long it takes, no matter how far and deep we have to search, to full closure; to exercise fundamental principles of humanity; and to restore and uphold justice in society

JFJZ-DW002 Wang Hongbo, male.

Profile: Deputy Chief Surgeon, Department of Hepatobiliary Surgery, the PLA No. 302 Hospital. Deputy Director of Surgery, Liver Transplantation Research Center. He is now a young member of the PLA Organ Transplantation Professional Committee.

He graduated from the Medical Department of the Third Military Medical University in 1997 and is engaged in clinical work and related research in hepatobiliary surgery and liver transplantation.

He specializes in liver transplantation for end-stage liver disease.²⁰⁶

JFJZ-DW003 Sun Baijun, male.

Profile: Chief Surgeon and Professor of Hepatobiliary Surgery, the PLA No. 302 Hospital. Former Deputy Director of Liver Transplantation Research Center/Liver Tumor Surgery Treatment Center and Director of Transplantation Surgery.²⁰⁷

He specializes in liver transplantation.

FJZ-DW004 Hong-Yu He, male.

Profile: Deputy Chief Surgeon of Ophthalmology, PLA No. 302 Hospital

He specializes in lamellar corneal transplantation.²⁰⁸

JFJZ-DW005 Rui Jing'an, male, DOB: January 1936. Origin: Jiangsu Province.²⁰⁹

Profile: Chief Surgeon, Hepatobiliary Surgery Department, the PLA No. 302 Hospital. Distinguished Expert and Professor, Liver Transplantation Research Center, PLA No. 302 Hospital.²¹⁰

January 1982 - February 1983: Postdoctoral Fellowship in Surgery, Johns Hopkins University Hospital, USA,.

1983-1992: Institute of Oncology, Chinese Academy of Medical Sciences. Attending

Surgeon, Deputy Chief Surgeon and Deputy Director of Surgery, Master's Degree Supervisor, China Union Medical University.

1992: Chief Surgeon, Professor, Director and Vice President of Liver Cancer Institute, General Hospital of Posts and Telecommunications - Beijing Medical University 8th Clinical Medical College (now the Western Hospital of Peking Union Medical College).

He specializes in liver transplantation techniques.²¹¹

JFJZ-DW006 Zhang Shaogeng, male.

Profile: Professor and Chief Surgeon, Director of Hepatobiliary Surgery Center I, Hepatobiliary Surgery Center, the PLA No. 302 Hospital.

He graduated from the First and Second Military Medical Universities, and studied under the famous hepatobiliary surgery expert, academician Wu Mengchao.

He specializes in liver transplantation.²¹²
