追查迫害法輪功國際組織 (追查國際)

World Organization to Investigate the Persecution of Falun Gong (WOIPFG)

To investigate the criminal conduct of all institutions, organizations, and individuals involved in the persecution of Falun Gong; to bring such investigation, no matter how long it takes, no matter how far and deep we have to search, to full closure; to exercise fundamental principles of humanity; and to restore and uphold justice in society

China's Organ Transplant Organizations are the Executing Entities for the Communist Party's State Crime of Live Organ Harvesting

Since 1999, led by its then-leader Jiang Zemin, the Chinese Communist Party (CCP) criminal group has been manipulating China's entire state apparatus, including the Party, government, military, armed police, judicial system, and medical institutions, through the Political and Legal Affairs Commission and the "610" system, to commit nationwide mass extermination of Falun Dafa practitioners by means of live organ harvesting for transplantation. The CCP's live organ harvesting of Falun Gong practitioners is a crime against humanity and a crime of genocide initiated on the orders of Jiang Zemin.

Since the CCP's live organ harvesting of Falun Gong practitioners is a state genocidal crime conducted as a political campaign, organ transplant institutions in all provinces, central government-controlled municipalities, and autonomous regions of mainland China, including all military, armed police, and local hospitals (medical centers) are suspected to have participated in this crime, even including a considerable number of hospitals unqualified to perform organ transplants, such as small and medium-sized hospitals and specialized hospitals. Similar to how all Chinese hospitals were involved in forced abortions during the CCP's implementation of the "one-child policy", all transplant facilities in China today have participated in live organ harvesting.

In view of the broader context of the CCP's state crime of live organ harvesting, those in charge of organ transplant hospitals/centers and similar institutions in China are suspected of having been involved in the crime of live organ harvesting from groups such as Falun Gong practitioners.

Evidence Collection Methods

1. Direct and indirect comprehensive telephone investigation and on-site investigation of the people suspected of involvement in the live organ harvesting

The subjects of our investigations include government officials, policemen, doctors and other medical personnel.

Geographical Distribution of the Subjects of Investigation, and the Duration of Investigations:

The WOIPFG's subjects of investigation are people in different positions, who are located across the entire country of China. Our investigations have been ongoing for nearly two decades, and our investigation results have always been consistent. The evidence gathered by us verifies that live organ harvesting is a systematic arrangement by the CCP.

- 1) Subjects of investigation: Presidents, directors, doctors, nurses, and security guards of organ transplant hospitals.
- 2) Hospitals involved: A considerable amount of recorded evidence has been obtained from many provincial, military, armed police, and local organ transplant hospitals (centers) across China.
- 3) Time span: Our investigations on the live organ harvesting started in 1999, and they're ongoing to this day.

追查迫害法輪功國際組織 (追查國際)

World Organization to Investigate the Persecution of Falun Gong (WOIPFG)

To investigate the criminal conduct of all institutions, organizations, and individuals involved in the persecution of Falun Gong; to bring such investigation, no matter how long it takes, no matter how far and deep we have to search, to full closure; to exercise fundamental principles of humanity; and to restore and uphold justice in society

2. Data investigation

- 1) We have been collecting data from the hospitals' websites and press releases.
- 2) We have been searching for and analyzing medical papers on transplantation.
- 3) We have been using the website www.archive.org to view the hospitals' previously archived information.
- 4) We have been collecting reports from the official Chinese media outlets.
- 5) We have organized all the information obtained from our investigations to create a database of the hospitals.

All the facts have shown us that the CCP is by no means a rational or normal organization or political party; but instead, it is a supra-state criminal syndicate controlled by a group of criminals who have committed crimes against humanity. The CCP's logic of thinking and principles of action are anti-human, and the crimes it has committed are forms of evil that humanity had never seen previously.

WOIPFG's investigative report series contains nearly 70 investigation reports on the alleged organ harvesting of living Falun Gong Practitioners at major Chinese military and civilian hospitals and on their staff members suspected of participation in this crime. This volume contains five such investigation reports.

World Organization to Investigate the Persecution of Falun Gong (WOIPFG)

To investigate the criminal conduct of all institutions, organizations, and individuals involved in the persecution of Falun Gong; to bring such investigation, no matter how long it takes, no matter how far and deep we have to search, to full closure; to exercise fundamental principles of humanity; and to restore and uphold justice in society

Preface

In 2015, the CCP announced that organs from executed prisoners would be banned, but since then, the number of liver and kidney transplants at The First People's Hospital of Kunming has grown rapidly. The hospital has formulated a discipline construction strategy centered on organ transplantation and established three national-level organ transplant centers (liver transplant, kidney transplant, and heart transplant).

¹Telephone investigations show that the hospital performs 400-500 kidney transplants and more than 300 liver transplants annually. The wait time for organs is generally two to three weeks or even as short as one day. The number of organ donations in this province is far less than the number of transplants in this hospital, and the source of organs is suspicious. A nurse in the kidney transplant ward of the Department of Urology said in a telephone investigation in 2016 that (organs from Falun Gong) had been banned since the previous year. Given the background of the CCP's national crime of organ harvesting, the hospital is suspected of participating in the crime of live organ harvesting from Falun Gong practitioners and other groups.

I. Hospital Overview

Kunming No.1 People's Hospital is a large Grade-A Tertiary General Hospital. The hospital has more than thirty departments, among which the Organ Transplant Center, composed of departments such as hepatobiliary surgery and kidney transplantation, is the key department of the hospital. The hospital has 1,100 ward beds and advanced medical equipment such as magnetic resonance imaging system (MRI), whole-body CT, color Doppler ultrasound, artificial kidney machine, and C-arm X-ray machine. The hospital's Hepatobiliary Surgery Department is divided into two departments: the First Hepatopancreatobiliary Surgery Department and the Second Hepatopancreatobiliary Surgery Department. They are located in the hospital's main campus and Ganmei International Hospital respectively and President Li Li is in charge of both².

The official website of the Hospital stated that the Hospital had formulated a discipline construction strategy centered on organ transplantation and established three national organ transplant centers (liver transplant, kidney transplant, and heart transplant). With this strategy, the Hospital will be built into an internationalized hospital, leading in the province and advanced in China, with the transplant specialty as its leading discipline.³

II. The hospital's Hepatopancreatobiliary Surgery Department is the only state-level Liver Transplantation Research Center in Yunnan Province.

The hospital's Hepatopancreatobiliary Surgery Department is the only state-level Liver Transplantation Research Center in Yunnan Province. The team currently has three chief surgeons, eighteen associate chief surgeons, seven attending surgeons, fifteen employees with doctoral degrees, and eighteen graduate students. The center is the only liver transplant center in Yunnan that has obtained the qualification issued by the National Health and Family Planning Commission. The liver transplant team is centered on President Li Li.⁴

III. Telephone Investigation Recordings

Summary: The Hospital has done a large number of liver and kidney transplants. The wait time for organs is usually two to three weeks or even as short as one day. Hospital beds are in tight supply, and added beds are available.

1. President Li Li and two vice presidents all perform liver transplants. The use of organs from Falun Gong practitioners has been banned since last year.

Investigation Subject: Ran Jianghua, Vice President of Kunming No.1 People's Hospital, liver transplantation

Investigation Time: February 27, 2016 (+86-18987162566)

Summary:

追查迫害法輪功國際組織 (追查國際)

World Organization to Investigate the Persecution of Falun Gong (WOIPFG)

To investigate the criminal conduct of all institutions, organizations, and individuals involved in the persecution of Falun Gong; to bring such investigation, no matter how long it takes, no matter how far and deep we have to search, to full closure; to exercise fundamental principles of humanity; and to restore and uphold justice in society

1. We have been doing liver transplants.
2. We have performed eight liver transplants in 2016. (No break during the Chinese New Year.)
3. In Yunnan, a part of (transplant expenses) can be reimbursed as subsistence allowances.
4. The total cost is 300,000 to 400,000 yuan. The Yunnan Provincial Development and Reform Commission specifically mentioned the cost price of a donor organ, which is 120,000 yuan.
5. We applied for government support for patients in Yunnan Province, and the state can subsidize 100,000 yuan.
6. We obtained more than ten (livers) on Chinese New Year's Eve, all with type B blood. We not only performed transplants for our own patients, but also transferred patients from Hangzhou to our hospital to do (transplants). Now the patients are doing well.
7. Even if it is a holiday, we will still do it. It waits for no one!

(Recording 1. Download: [MP3](#); Transcript Download: [pdf 49](#))

Investigation Subject: Zhao Yongheng, Vice President of Kunming No.1 People's Hospital, liver transplantation

Investigation Time: May 6, 2016 (+86-15877990896)

Summary:

1. We have been doing liver transplants. Today we perform one liver transplant and two kidney transplants.
2. Including local hospitals, we have conducted price assessments through the Development and Reform Commission. The total charge for liver acquisition and preservation is 120,000 yuan.

(Recording 2. Download: [MP3](#); Transcript Download: [pdf2](#))

Investigation Subject: A nurse in the kidney transplant ward of the Department of Urology of Kunming No.1 People's Hospital

Investigation Time: May 7, 2016 (+86-87167390509)

Summary:

1. I called yesterday, yet you had one liver transplant and two kidney transplants and the doctors were too busy to pick up the phone!
2. Vice President Ran Jianghua and Zhao Yongheng both do liver transplants.
3. Those directors in our department. Director Sun, Director Hu, and Director Zhou. Our director is Sun Xun.
4. There is a doctor in charge of the kidney source, Dr. Ma Yunrui.
5. Investigator: **Doesn't your hospital harvest (organs) yourself? Some hospitals harvest (organs) themselves. They said that those Falun Gong practitioners detained in prisons can no longer be used now?**

Nurse: No. It's not like it used to be. In the past, kidneys were surely harvested on the spot!

Investigator: **You did a lot last year. (Organs from Falun Gong practitioners) could still be used last year, right?**

Nurse: **It should be the year before last. It didn't seem to be allowed last year.**

(Recording 3. Download: [MP3](#); Transcript Download: [pdf3](#))

2. **The number of kidney transplants reached four to five hundred. The number of liver transplants reached more than three hundred.**

Investigation Subject: A nurse in Kunming No.1 People's Hospital, liver transplant, 8th floor, Ward B⁵

Investigation Time: July 20, 2017 (+86+ 87167390507)

Summary: We did more than three hundred liver transplants last year. This year till now we have definitely done more than one hundred liver transplants. We also do kidney transplants. So long as we put forward an application, if there's a liver source, the liver will be shipped here.

Investigation Time: October 23, 2019 (+86-871-68261904)

Summary: The ward beds are in short supply. We can add extra beds on the aisle. If you're lucky, a liver transplant can be done within two to three weeks.

(Recording 13. Download: [MP3](#); Translation Download: [pdf 137](#))

5. The number of organ donations are far less than the number of organ transplants, and the source of organs is unknown

Investigation Subject: Mr. Chen, the Organ Donation Office at the Red Cross Society of China, Yunnan Branch

Investigation Time: December 1, 2016

Summary: According to Mr. Chen's statistics, two days before the phone investigation, the number of organs donated was nearly 70 for the entire year of 2016. An Organ Donation Office at the Provincial Red Cross Society should be able to oversee the sources of all organs donated in the entire province¹⁴.

(Recording 14. Download: [MP3](#); Transcript Download: [pdf 233](#))

Investigation Subject: Staff-on-duty, the Organ Donation Office at Red Cross Society of China, Yunnan Branch

Investigation Time: June 5, 2018

Summary: In 2017, there were 60 to 70 cases of organ donation in Yunnan Province, but not all of these organs could be used for transplants¹⁵.

(Recording 15. Download: [MP3](#); Transcript Download: [pdf 234](#))

IV. List of Responsible Persons:

KMDYRMYY001 Li Li

Position and Title: Professor of hepatopancreatobiliary surgery, President, Deputy Secretary of the Party Committee, Member of the Organ Transplantation Group of the Chinese Medical Association.

Personal Profile: He obtained his PhD in Hepatopancreatobiliary Surgery from West China Medical University in 1991. From 1995 to 1998, he was a postdoctoral researcher at the University of Cincinnati School of Medicine in Ohio, USA. He is currently mainly engaged in experimental and clinical research on organ transplantation.

追查迫害法輪功國際組織 (追查國際)

World Organization to Investigate the Persecution of Falun Gong (WOIPFG)

To investigate the criminal conduct of all institutions, organizations, and individuals involved in the persecution of Falun Gong; to bring such investigation, no matter how long it takes, no matter how far and deep we have to search, to full closure; to exercise fundamental principles of humanity; and to restore and uphold justice in society

He presided over and successfully performed the first liver transplant in Yunnan Province in 1999. In 2003 and 2005, he presided over and successfully performed the first living-related partial liver transplant and the first combined liver-kidney transplant in Yunnan Province. In May 2006, he presided over and successfully performed the first liver transplant in Kunming No.1 People's Hospital. In July of the same year, he successfully did the first living-related partial liver transplant between adults in Yunnan Province. He has successfully performed 149 liver transplants (including seventeen living-related partial liver transplants and three combined liver-kidney transplants). He specializes in liver transplantation.¹⁶

KMDYRMYY002 Ran Jianghua

Position and Title: Vice President, Director of Hepatopancreatobiliary Research Center and Hepatopancreatobiliary Surgery Center. Core member of Yunnan Liver Transplant Center and Kunming Organ Transplant Center.

Personal Profile: In July 1989, he graduated from the six-year program of the Department of Pediatrics of Shanghai Second Medical University with a bachelor's degree in clinical medicine. From September 1997 to July 2000, he studied in and graduated from the on-the-job postgraduate class of Kunming Medical College. In September 2003, he was admitted to the Hepatobiliary Surgery Department of Kunming Medical College for a Ph.D. in medicine and obtained his Ph.D. in general surgery in July 2006. He was exceptionally promoted to associate chief surgeon and associate professor in 1999 and to chief surgeon and professor in 2003.

He is mainly engaged in general surgery, hepatopancreatobiliary surgery and organ transplantation research. Since 1995, he has participated in animal liver transplantation experiments, and is one of the earliest members of Yunnan Province to study liver transplantation technology. As the main staff, he participated in and successfully completed the first liver transplant in Yunnan Province on October 22, 1999, the first combined liver-kidney transplant in Yunnan on April 3, 2001, and the first living donor liver transplant in Yunnan in December 2003. From March 2002 to January 2003, he studied liver transplant techniques at the Organ Transplant Center of West China Medical University. In April 2006, he was recruited by Kunming No.1 People's Hospital as a talent for hepatopancreatobiliary surgery and liver transplantation, and was appointed as the Director of Hepatopancreatobiliary Surgery Department at Kunming No.1 People's Hospital.

From November 2008 to June 2009, he successively studied at the University of Arkansas School of Medicine (UAMS) and OKLAHOMA INTEGRIS Nazih Zuhdi Transplant Institute in the US, conducting his postdoctoral research on liver transplantation and multi-organ combined transplantation.

He is the key member of the liver transplant team of President Li Li of Kunming No.1 People's Hospital. On May 11, 2006, he completed the first liver transplant in Kunming No.1 People's Hospital. He has participated in more than 270 liver transplants so far. In July 2003, he and Professor Li Li went to the Second Affiliated Hospital of Chongqing Medical University to do a liver transplant. In August 2006, he was invited to the Kunming General Hospital of Chengdu Military Region to assist the hospital in performing a liver transplant. On January 17, 2007, he was invited to Yuxi People's Hospital to do a liver transplant. In 2007, he cured GVHD, a rare liver transplant complication. In 2009, he performed a liver transplant for the youngest patient (20 months old) in Yunnan and the first liver transplant with mismatched donor-recipient blood types in Yunnan. He participates in more than 30 liver transplants (including living donor liver transplants) every year. Since 1998, he has been engaged in research on organ resection technology and procedure optimization for organ transplantation.¹⁷

KMDYRMYY003 Li Xiaoyan

Position and Title: Chief surgeon of hepatopancreatobiliary surgery, Vice President

Personal Profile: He graduated from the Department of Medicine of Kunming Medical College in 1984 with a bachelor's degree in medicine and obtained a master's degree in hepatobiliary surgery from Kunming Medical College in 2001. In 2003, he became a doctoral student of hepatobiliary surgery at Kunming Medical College and also served as a master student supervisor of general surgery at the college. In 1999, as

追查迫害法輪功國際組織 (追查國際)

a key member, he participated in the first liver transplant in Yunnan Province. In July 2006, he participated in the first living-related partial liver transplant in Yunnan. In August 2006, he participated in the first living-related double-donor transplant in Yunnan. So far, he has successfully performed a total of 173 liver transplants.¹⁸

KMDYRMYY004 Chen Gang

Position and Title: Associate chief surgeon of hepatopancreatobiliary surgery, associate professor. He is expert in liver transplants.¹⁹

KMDYRMYY005 Zhang Shengning

Position and Title: Doctor of Medicine, associate chief surgeon, Director of the First Hepatopancreatobiliary Department, Secretary of the Organ Transplantation Branch of the Yunnan Medical Association, and Youth Member of the Organ Transplantation Branch of the Chinese Medical Association.

Personal Profile: In February 2010, he went to South Korea ASAN Medical Center to study living donor partial liver transplantation. From March 2010 to January 2011, he studied liver transplantation and hepatopancreatobiliary surgery at UAMS, University of Arkansas School of Medicine in the US.²⁰

KMDYRMYY006 Wang Lei

Position and Title: Associate chief surgeon of urology

Personal Profile: He has been specializing in urology since 1998. He studied at the People's Liberation Army General Hospital in Beijing twice. He's also been to the Second Affiliated Hospital of Kunming Medical College to study minimally invasive urology. He specializes in kidney transplantation.²¹

KMDYRMYY007 Li Kegong

Position and Title: Chief surgeon of urology

Personal Profile: He graduated from Kunming Medical College in 1985 and has been engaged in clinical work in urology for nearly 20 years. He has extensive clinical experience in kidney transplantation and postoperative recovery treatment and guidance.²²

WOIPFG's Investigative Report on the Alleged Organ Harvesting of Living Falun Gong Practitioners at the Jiangsu Provincial People's Hospital and Its Staff Members Suspected of Participation

Preface

The hospital has setup a key laboratory for liver transplantation sponsored by the Ministry of Health and Jiangsu Province. The laboratory is provided with sophisticated equipment and strong transplantation team and has performed a large number of liver transplantations. The source of the organs is unknown. According to the response from a doctor of the kidney transplant medical office, "Organs were taken from the brain death center. No one can guarantee that the kidney source must be donated." The director of the liver transplant center, Wang Xuehao, did not deny that the organs used were those of Falun Gong practitioners.

追查迫害法輪功國際組織 (追查國際)

World Organization to Investigate the Persecution of Falun Gong (WOIPFG)

To investigate the criminal conduct of all institutions, organizations, and individuals involved in the persecution of Falun Gong; to bring such investigation, no matter how long it takes, no matter how far and deep we have to search, to full closure; to exercise fundamental principles of humanity; and to restore and uphold justice in society

Given, the general context of the CCP's state crime of live organ harvesting, the hospital is suspected to be one of the criminal bases for live organ harvesting of Falun Gong practitioners and other groups.

I. Hospital Overview

Jiangsu Provincial People's Hospital (the First Affiliated Hospital of Nanjing Medical University, Jiangsu Clinical Medicine Research Institute, and Jiangsu Red Cross Hospital) is the largest first-class grade three general hospital in Jiangsu Province²³. It has a construction area of 410,000 square meters, 4,600 actual beds and 6,500 employees²⁴.

II. The hospital has a key laboratory of liver transplantation sponsored by the Ministry of Health

The Key Laboratory of Living-donor Liver Transplantation of the Ministry of Health was built based on Jiangsu Liver Transplant Center, Liver Cancer Research Center of Nanjing Medical University and Transplantation Immunology Laboratory. It was the first domestic liver transplantation and liver surgery institute featuring living partial liver transplantation. It had a clinical liver transplant center with 2 in-patient areas and the center has a transplant immunology laboratory, liver cancer laboratory and dendritic cell workshop. The institute had 8 professionals with senior professional titles, more than 30 surgeons with postdoctoral and doctor degrees²⁵.

III. Based on the number of beds and turnover rate of the center, estimated number of liver and kidney transplants was huge

The Institute of Liver Surgery of Jiangsu People's Hospital contains more than 110 beds in 2 in-patient areas with a Key laboratory of the Ministry of Health. The Institute of Liver Surgery specializes in liver transplantation, living-donor liver transplantation and the evaluation, decision making and management of various problems pre and post operation²⁶. There are 94 beds in the main department and 18 beds in the branch²⁷.

IV. The actual number of transplants far exceeds the announced number of cases

1. Very strong team of transplantation surgeons

The Institute of Liver Surgery is led by Professor Wang Xuehao, a fellow of the Chinese Academy of Engineering. The transplantation teams included 9 members with a professor title, 12 with an associate professor title. The total number of medical professionals was 62 and among them 90% held a doctorate degree²⁸. Wang had promoted his living-donor liver transplant techniques in more than 20 provinces and cities around the nation²⁹. Urology Surgery has 26 surgeons including 6 with senior professional titles, 6 with associate senior professional titles and 7 with medium-level professional titles³⁰. They can be formed into several liver and kidney transplant teams.

2. The quantity of liver transplantation is among the highest in China

Wang Xuehao can spend average 3-4 hours performing a liver transplantation surgery, and the quality and quantity of surgeries rank at the forefront of the country.³¹ The liver transplant center led by Wang can be regarded as a quasi-military organization and the surgeons have no holidays, regardless day time or night.

追查迫害法轮功国际组织 (追查国际)

World Organization to Investigate the Persecution of Falun Gong (WOIPFG)

To investigate the criminal conduct of all institutions, organizations, and individuals involved in the persecution of Falun Gong; to bring such investigation, no matter how long it takes, no matter how far and deep we have to search, to full closure; to exercise fundamental principles of humanity; and to restore and uphold justice in society

When others are resting, Wang was still leading his team working on experiments and surgeries. The surgeries often lasted more than 10 even 20 hours, and the doctors' legs were so swollen after the surgery that they could not feel a thing³².

团结协作创建优秀团队

活体肝移植在外科界被比喻成“火车头项目”，因为它需要麻醉科、重症监护、检验、心脏、呼吸、肾脏、传染以及血库甚至后勤等多个科室的密切协调配合，是医院综合能力的体现。因此，王学浩非常注重团队建设和协调好各方面的关系。

王学浩一方面对学生严格要求，另一方面又对他们的工作、学习、生活十分关心。他领导的肝移植中心可以说是一个半军事化的组织，医生们没有节假日，甚至没有白天和黑夜。别人休息的时候，王学浩还在带领他的团队紧张地做实验、做手术。手术往往要持续十几个、甚至二十几个小时，医生们手术后两条腿肿胀得没有一点知觉。虽然辛苦，但大家最常说的一句话却是：“不管什么手术，只要王主任在，大家就定心。”在肝移植中心有一条“不公平”的制度——“学科带头人负责制”，即所有的肝移植手术，只要王学浩在场，不管他是否亲自上台手术，医疗责任都由他来扛着。而事实上，几乎每一个稍有难度的手术，王学浩主任都会出现在现场。“放心大胆地去做，出了事，我负责。”王主任总是尽量放手让科室中的每一个医生能够有机会接触各类手术，默默地把关扶持，并不断地培养出新人。他的博士生都说是被王教授的人格魅力和这个团队的良好氛围吸引来的。还有的评论王主任虽然年过花甲，但心态很年轻，不保守，很容易和他沟通。科里的护士也反映，王主任经常询问护士工作有什么困难，还拿出个人获奖的钱奖励大家。

Figure 1 Snapshot of Special Topics on the Construction of Academic Style in Colleges and Universities

Within 3-4 hours to perform a surgery, often doing for more than 10 or 20 hours, and with the whole team, what does the fact tell us? That is to say that he regularly does a large number of transplantation surgeries and experiments, much more than the number he announced.

V. The Hospital performs the largest number and most complete types of kidney transplant operations in Jiangsu Province.

The Hospital's official website states that it was among the first batch of hospitals approved by the Ministry of Health for kidney transplantation. In 1998, the Hospital established a Kidney Transplant Center. As of July 2014, a total of more than 1,900 cases of kidney transplants, combined liver-kidney transplants, and combined pancreas-kidney transplants had been performed. It has done the largest number and most complete types of kidney transplants in Jiangsu Province³³.

VI. Telephone investigation shows that the use of Falun Gong practitioners' organs was not denied, the wait time for organs is short, and the number of liver and kidney transplants is large.

1. Organ source: The use of Falun Gong practitioners' organs was not denied. The organs were taken from brain death centers. There is no guarantee that the kidneys were donated.

Investigation Subject: Wang Xuehao, Director of Liver Transplantation Center, The First Affiliated Hospital of Nanjing Medical University

Investigation time: November 8, 2018 (Phone number 13305178713)

(Recording 1. Download: [MP3](#); Transcript Download: [pdf20](#))

Summary

Wang Xuehao: It usually takes no more than two weeks to schedule a surgery. Most organs come from outside of the hospital, obtained from the brain death centers.

Investigator: Ah, that's the normal organ of Falun Gong, right?

追查迫害法輪功國際組織 (追查國際)

World Organization to Investigate the Persecution of Falun Gong (WOIPFG)

To investigate the criminal conduct of all institutions, organizations, and individuals involved in the persecution of Falun Gong; to bring such investigation, no matter how long it takes, no matter how far and deep we have to search, to full closure; to exercise fundamental principles of humanity; and to restore and uphold justice in society

Wang Xuehao: Well, this is a donated organ.

Personal profile: Wang Xuehao is an academician of the Chinese Academy of Engineering. He is the current director of the Institute of Liver Surgery at the First Affiliated Hospital of Nanjing Medical University, Director of the Liver Transplantation Center of Jiangsu Province, Director of the Key Laboratory of Living-donor Liver Transplantation of the Ministry of Health and director of the Academic Committee, member of the Human Organ Transplantation Expert Group of the Ministry of Health, and deputy chairman of the Jiangsu Medical Association.³⁴

Investigation Subject: A doctor from kidney transplant medical office³⁵

Investigation Time: February 19, 2017 (Phone number +86-25-68136851)

Summary: There are many kidney transplants done. When it was more there were four or five surgeries per week, when it was less there were two or three surgeries per week. Should be the most within the province, although not as much if compared with Shanghai. The donors have various channels. If someone from the prison agrees to donate, I can take it out when he is not dead, just dead yet, once it's taken then it's donated, donated. Once the kidney source is taken over, who can guarantee that it must be donated, that is, death row inmates, who knows what the kidney source was taken from.

(Download Recording 2 [MP3](#); please see [Addendum 25](#))

2. Short waiting time: two weeks for the fast ones, two months for the slow ones.

Investigation Subject: Wang Ping, director of liver transplantation³⁶

Investigation Time: July 24, 2016 (Phone Number +86-13951873090)

Summary: No problem if you want to change your liver, just come to see me directly. We do it very often. This is one of our routine jobs. Patients of blood Type B can obtain a liver after waiting for one month.

(Recording 3. Download: [MP3](#); Transcript Download: [pdf 197](#))

Investigation Subject: liver transplant doctor

Investigation Time: October 31, 2017 (Phone number: +86-2568136052)

Summary: To register you have to pay 180,000 yuan first; compared with Gulou (hospital), it will definitely be more; in general, the waiting time is about a month; two weeks for fast ones, two months for slow ones.³⁷

(Recording 4. Download: [MP3](#); Transcript Download: [pdf 4](#))

3. Large amount of transplantation

Investigation Subject: A nurse in the liver transplantation

Investigation time: October 26, 2017 (Phone number: +86-2568136514)

Summary: A lot of liver transplants were done this year, but the specific numbers are certainly not convenient to tell you! We have quite a lot of directors doing liver transplants, you can make an appointment with Academician Wang (Wang Xuehao)³⁸.

(Recording 5. Download: [MP3](#); Transcript Download: [pdf 5](#))

Investigation Subject: A nurse at liver transplant center, Jiangsu Provincial People's Hospital³⁹

VII. Establishment of the Key Laboratory of Xenotransplantation of Jiangsu Province

The Key Laboratory of Xenotransplantation of Jiangsu Province was formally established on August 11, 2012, after the validation through the Provincial Key Laboratory Validation Meeting organized by the Department of Science and Technology of Jiangsu Province, which was jointly built by Nanjing Medical University and the First and Second Affiliated Hospitals of Nanjing Medical University. It is the first provincial key laboratory with xenotransplantation as the main research focus in China. The laboratory has an area of more than 4000 square meters, with a GLP laboratory dedicated to isolate islets. Among them, the liver transplantation laboratory, led by Academician Wang Xuehao of the First Affiliated Hospital of Nanjing Medical University, is a key laboratory of the Ministry of Health and one of the top ten clinical medical centers in Jiangsu Province. The laboratory has more than 30 full-time staff members, and its main members were awarded the title of "Innovation Team" in Jiangsu Province in 2011, staffed by one Academician, two Changjiang Scholars from the Ministry of Education, one National Outstanding Youth, and two specially appointed professors from Jiangsu Province⁴⁰.

VIII. The hospital was involved in the legal case of illegal organ harvesting and medical shady scenes.

According to mainland media reports, from 2017 to 2018, Lu Sen, chief surgeon of Jiangsu Province Hospital, conducted human organ donation across regions without approval. Without the joint signature and confirmation of the deceased's spouse, adult children, and parents, he performed one case of organ harvesting from a corpse in Huaiyuan County against the wishes of the deceased or their close relatives. Huang Xinli, a chief surgeon of Nanjing Drum Tower Hospital, performed eleven cases of organ harvesting from corpses illegally⁴¹. Lu Sen is a member of the OPO (Organ Procurement Organization) of Jiangsu Province Hospital, mainly engaged in the extraction of human organs⁴². Huang Xinli is a member of the Organ Donation and Management Group of the Organ Transplantation Branch of the Jiangsu Medical Association. In January 2018, Huang Xinli was transferred from the Hepatobiliary Center of Jiangsu Province Hospital to Nanjing Drum Tower Hospital through talent introduction. Huang Xinli was a co-worker of Lu Sen at Jiangsu Province Hospital. Before the incident, Lu Sen was the chief surgeon of the Department of Hepatobiliary Surgery of Jiangsu Province Hospital. Huang Xinli and Lu Sen, the defendants in the Huaiyuan illegal organ harvesting case, both used to work in the Hepatobiliary Center of Jiangsu Province Hospital⁴³.

In June 2017, Sun Beicheng, Director of the Liver Surgery Department of Jiangsu Province Hospital, was stabbed and seriously injured. This incident had inside stories⁴⁴. Sun Beicheng is the Deputy Director of the Liver Transplant Center of Jiangsu Province Hospital, mainly engaged in basic and clinical research on liver surgery and liver transplantation. In 2005, he began to perform liver transplantation, including living donor liver transplantation and has completed 250 liver transplants so far⁴⁵.

According to netizens' postings, in early 2008, after the patient was admitted to Jiangsu Province Hospital, the doctor forced the patient by various means to have a heart transplant. In desperation, the patient's family had to agree. But then the hospital raised the operation fee from 150,000 to 200,000 RMB. The doctor

concealed the fact that the hospital's medical equipment was not perfect and performed the operation hastily when the patient's lungs were infected, which eventually led to the death of the patient⁴⁶.

IX. List of responsible persons

JSRM001 Wang, Xuehao.

Male. Date of birth: January 29, 1942. Place of birth: Jianhu, Jiangsu⁴⁷.

Personal Profile: Academician of Chinese Academy of Engineering, chief surgeon, professor, and doctoral supervisor. A renowned expert in hepatobiliary surgery and liver transplantation. Currently served as the Director of the Institute of Liver Surgery of the First Affiliated Hospital of Nanjing Medical University, Director of Liver Transplantation Center of Jiangsu Province, Director of the Key Laboratory of Living-donor Liver Transplantation and Academic Committee of the Ministry of Health, Member of the Expert Group of Human Organ Transplantation of the Ministry of Health, Vice President of Jiangsu Medical Association, etc⁴⁸. His living-donor liver transplantation technology has been promoted to more than 20 provinces and cities in China.

He played a leading role in more than 660 cases of liver transplantation with various surgical methods, including 112 cases of living donor liver transplantation⁴⁹.

JSRM002 Li, Xiangcheng. Male.

Personal Profile: Deputy Director of Liver Transplantation Center of Jiangsu Province, Chief Surgeon, Professor and Doctoral Supervisor.

Visiting scholar at the Starzl Transplant Center of the University of Pittsburgh, USA in 2001, acquired a lot of advanced experience in perioperative management of liver transplantation. Visiting scholar at the Hepatobiliary and Pancreatic Surgery Department and Liver Transplantation Center of the Queen Mary Hospital of the University of Hong Kong in 2003, specializing in adult human living-donor liver transplantation techniques. Visiting scholar at Charite Medical Center, Humboldt University, Germany⁵⁰.

He was the first to report the application of microsurgical techniques in hepatic artery reconstruction in living donor liver transplantation, hepatic vein formation in living donor liver transplantation, and biliary tract reconstruction in living donor liver transplantation in China. So far, he has completed more than 150 cases of liver transplantation of various surgical methods.

JSRM003 Luo, Kai. Male.

Personal Profile: Associate Chief Surgeon of Breast Surgery

Awarded as Associate Professor of Nanjing University Medical School in 2000. Engaged in general surgery for more than 20 years with rich experience in the diagnosis and treatment of general surgery diseases. Graduated from the Southwest Hepatobiliary Surgery Hospital of the Third Military Medical University of the People's Liberation Army in 1991 with a master's degree, and graduated from the Second Military Medical University of the People's Liberation Army in 1996 with a doctorate degree, under the supervision of academician Li Jieshou, a famous general surgeon in China. After graduation, he worked as an associate chief surgeon, associate professor and master's supervisor in Nanjing Military General Hospital. Currently in the General Surgery Department of Jiangsu People's Hospital, mainly engaged in the treatment and research of breast surgical diseases⁵¹. Participated in the clinical work of the first case of small bowel transplantation and combined liver and small bowel transplantation in China.

To investigate the criminal conduct of all institutions, organizations, and individuals involved in the persecution of Falun Gong; to bring such investigation, no matter how long it takes, no matter how far and deep we have to search, to full closure; to exercise fundamental principles of humanity; and to restore and uphold justice in society

JSRM004 Zhang, Feng. Male.

Personal Profile: Chief surgeon, professor, doctoral supervisor, currently deputy director of Liver Surgery, deputy director of the Key Laboratory of living-donor liver transplantation of the Ministry of Health.

From 1992 to 1998, went to Kyoto University in Japan for three times to study living-donor liver transplantation technology, and won several National and Provincial Scientific and Technological Progress Awards.

He participated in the clinical work of the first small intestine transplantation and combined liver and small intestine transplantation in China⁵².

As the principal investigator, he has promoted living-donor liver transplantation technology in various forms to many large hospitals in China. As the main researcher, he has promoted living donor liver transplantation techniques to many large hospitals across the country in various forms.

JSRM005 Yang, Tao. Male.

Personal Profile: Professor of Jiangsu Province Key Laboratory of Xenotransplantation⁵³.

JSRM006 Zhang, Mei. Female.

Personal Profile: Associate Professor and Associate Chief Surgeon of Jiangsu Province Key Laboratory of Xenotransplantation.

Visiting scholar at King's Medical College of London University, British, in 2008 and at the Human Islet Cell Transplantation Center of the University of Alberta in Edmonton, Canada in 2011⁵⁴.

JSRM007 Kong, Lianbao. Male.

Personal Profile: Chief Surgeon, Associate Professor, Deputy Director of General Surgery, Secretary of Liver Surgery Institute.

Received his undergraduate degree from Nantong Medical College in 1987 and his PhD degree from Tongji Medical College of Huazhong University of Science and Technology in 2005.

Visiting scholar at Starzl Organ Transplant Center, University of Pittsburgh, USA in 2001⁵⁵.

He worked in Jiangsu Provincial People's Hospital for 25 years since 1987, and was the first in the province to apply vena cavoplasty in modified piggyback liver transplantation and living donor liver transplantation, and ultrasonic scalpel technology in liver tumor resection and living donor liver transplantation. Played a leading role in completing more than 150 cases of liver transplantation.

JSRM008 Sun, Beicheng. Male. Date of birth: February 1970⁵⁶.

Personal Profile: Professor of General Surgery (Liver Surgery), Chief Surgeon. Deputy Director of Liver Surgery Institute. Youth member of the Organ Transplantation Branch of the Chinese Medical Association.

Received his PhD degree in Surgery from Nanjing Medical University in 2001.

A postdoctoral fellow at the Transplant Center, Health Science Center of University of

Texas at San Antonio from October 2001 to August 2004⁵⁷.

In 2004, he was introduced as a talent to work in the Liver Transplantation Center of Jiangsu Provincial People's Hospital. So far, he has completed more than 120 cases of liver transplantation by various surgical methods.

JSRM009 Lu, Sen. Male.

Personal Profile: Associate Professor, Associate Chief Surgeon of General Surgery and Liver Surgery⁵⁸.

Engaged in general surgery for 21 years, mastered the diagnosis and treatment of common diseases in general surgery, especially liver transplantation.

JSRM010 Cheng, Feng. Male.

Personal Profile: Associate Chief Surgeon, Associate Professor. of General Surgery (Liver Surgery) ⁵⁹.

Good at liver transplantation for end-stage liver disease.

JSRM011 Li, Guoqiang. Male.

Personal Profile: Associate Chief Surgeon, Associate Professor of General Surgery (Liver Surgery)

Visiting scholar at liver transplantation and hepatobiliary and pancreatic surgery at The University of Texas, USA, from July to December 2010⁶⁰.

Professional expertise: liver transplantation for end-stage liver disease.

JSRM012 Wang, Ping. Male.

Personal Profile: Associate Chief Surgeon of General Surgery and Liver Surgery

Engaged in clinical, research and teaching work in general surgery since 1990⁶¹.

Professional expertise: liver transplantation for end-stage liver disease.

JSRM013 Wang, Ke. Male.

Personal Profile: Associate Chief Surgeon of General Surgery (Liver Surgery)

Visiting Scholar at Department of Hepatobiliary Surgery, Queen Mary Hospital, University of Hong Kong⁶².

Good at liver transplantation for end-stage liver disease.

JSRM014 Qian, Xiaofeng. Male.

追查迫害法輪功國際組織 (追查國際)

World Organization to Investigate the Persecution of Falun Gong (WOIPFG)

To investigate the criminal conduct of all institutions, organizations, and individuals involved in the persecution of Falun Gong; to bring such investigation, no matter how long it takes, no matter how far and deep we have to search, to full closure; to exercise fundamental principles of humanity; and to restore and uphold justice in society

Personal Profile: Associate Chief Surgeon of General Surgery (Liver Surgery) ⁶³.

Good at liver transplantation for end-stage liver disease.

JSRM015 Pu, Liyong. Male.

Personal Profile: Associate Chief Surgeon of General Surgery and Liver Surgery, Doctor of Surgery.

Engaged in the clinical, research and teaching work of general surgery since 1995, specialized in the treatment of common and frequently occurring diseases in general surgery.

Visiting scholar at Ronald Reagan Medical Center of UCLA in Los Angeles, USA in 2013⁶⁴.

After 2003, he mainly engaged in clinical and basic research of liver surgery/liver transplantation. Clinical research: Liver transplantation for end-stage liver disease.

JSRM016 Zhang, Chuanyong. Male.

Personal Profile: MD, Associate Chief Surgeon of General Surgery, Liver Surgery

Engaged in the clinical, research and teaching work of general surgery for many years; specialized in the diagnosis and treatment of common and frequently occurring diseases in general surgery⁶⁵.

Good at liver transplantation for end-stage liver disease.

JSRM017 Zhang, Wei. Male.

Personal Profile: Chief surgeon of urology, professor, doctoral supervisor⁶⁶.

In 2001, he took the lead in independently carrying out laparoscopic living donor kidney resection and allogeneic kidney transplantation in China, and carried out basic and clinical research on multi-organ combined transplantation and living relative donor kidney transplantation earlier in China.

JSRM018 Gu, Min. Male.

Personal Profile: Chief Surgeon and Professor of Urology, currently Vice President of Jiangsu People's Hospital (The First Affiliated Hospital of Nanjing Medical University). Vice President of Jiangsu Provincial People's Hospital and Director of the Institute of Forensic Medicine. Member of the Transplantation Immunology Group of the Society of Microbiology and Immunology of the Chinese Medical Association, and the deputy head of the Renal Transplantation Group.

Engaged in clinical work of urology for 20 years⁶⁷.

The main research direction is organ transplantation.

JSRM019 Xu, Zhengquan. Male.

追查迫害法輪功國際組織 (追查國際)

Personal Profile: Chief surgeon and professor of Urology.

A member of the surgical expert group of Jiangsu Provincial People's Hospital and former Director of the Department of Urology. Engaged in clinical medical, teaching and research work in urology for nearly 50 years⁶⁸.

Good at kidney transplantation.

JSRM020 Lyu, Qiang. Male.

Personal Profile: Associate Chief Surgeon of Urology, Associate Professor.

Postdoctoral Fellow, Johns Hopkins University, USA⁶⁹.

Able to perform kidney transplant.

JSRM021 You, Guocai. Male.

Personal Profile: Chief Surgeon of Urology⁷⁰.

Able to perform kidney transplant, etc.

JSRM022 Zhang, Shijiang. Male.

Personal Profile: Chief Surgeon of Thoracic Surgery, Professor.

Received advanced training in cardiac surgery at Shenyang Military Region General Hospital and master's degree in cardiovascular surgery at Xinhua Hospital of Shanghai Second Medical University.

Visiting scholar at the Cardiovascular surgery at the affiliated Hospital of University of Massachusetts Medical School, and BWH Hospital of Harvard Medical School, Boston, USA for advanced training and study of cardiovascular surgery and lung transplantation⁷¹.

Completed several most difficult lung transplants, and has in-depth research, especially in the lung transplantation treatment.

JSRM023 Shao, Yongfeng. Male.

Personal Profile: Chief Surgeon of Thoracic Surgery⁷².

He specializes in the diagnosis and treatment of cardiopulmonary diseases, such as lung transplantation for end-stage lung disease, heart transplantation for end-stage heart disease, and combined heart-lung transplantation.

JSRM024 Zhao, Sheng. Male.

追查迫害法輪功國際組織 (追查國際)

World Organization to Investigate the Persecution of Falun Gong (WOIPFG)

Personal Profile: Associate Chief Surgeon of Thoracic Surgery⁷³.

Good at heart transplantation, etc.

JSRM025 Wang, Yadong. Female.

Personal Profile: Chief Surgeon, Professor of Ophthalmology⁷⁴.

Able to perform surgeries such as corneal transplantation.

JSRM026 Yuan, Zhilan, Female. Born on June 26, 1955, native of Rushan, Shandong Province. Member of the Chinese Communist Party⁷⁵.

Personal Profile: Professor of Ophthalmology, Chief Surgeon⁷⁶.

Routinely carry out various types of surgeries including corneal transplantation.

JSRM027 Wu, Hongfei. Male.

Personal Profile: Chief Surgeon and Professor of Urology⁷⁷.

Has an in-depth research on kidney transplantation.

JSRM028 Dai, Yifan. Male.

Personal Profile: Director of Jiangsu Province Key Laboratory of Xenotransplantation, Deputy Director of Metabolic Disease Research Center of Nanjing Medical University, Distinguished Professor of Nanjing Medical University, Doctoral Supervisor. Member of International Society for Organ Transplantation, Member of International Xenotransplantation Society.

Received his medical bachelor's degree from Zhejiang Medical University in 1983, his medical master's degree from the Department of Pathophysiology in 1986, and his Ph.D. in Molecular Genetics from the Institute of Genetics, Fudan University in 1989.

Postdoctoral Fellow at the Salk Institute, California, USA, from 1991-1995; Research Fellow at the Baxter Healthcare, USA, from 1995-1998; Senior Research Fellow, Director of Molecular Biology Laboratory, at Revivicor Inc. from 1998-2004; Associate Professor, Starzl Institute for Organ Transplantation, Department of Surgery, University of Pittsburgh School of Medicine, USA, from 2004-2008⁷⁸.

JSRM029 Li, Rongfeng. Male.

Personal Profile: Professor of Jiangsu Province Key Laboratory of Xenotransplantation.

Graduated from the Department of Biology of Inner Mongolia University in 1992 and stayed in the Experimental Animal Research Center of Inner Mongolia University in the same year. Received his Master and Ph.D. degrees in 1997 and 2003, respectively, under the supervision of Academician Bou Shorgan.

Went to Japan to conduct international cooperative research at the Ministry of Agriculture, Forestry and Fisheries from 1995 to 1996. Postdoctoral fellow at the University of Missouri, USA, from 2005 to 2007⁷⁹.

JSRM030 Deng, Guomin. Male.

Personal Profile: Director of Department of Microbiology and Immunology, Distinguished Professor of Jiangsu Province Key Laboratory of Xenotransplantation, Director of Key Laboratory of Antibody Technology, Ministry of Health.

Received his medical degree from Tongji Medical College of Huazhong University of Science and Technology in 1988, and studied and received his master degree in immunology from Peking Union Medical College from 1991-1994.

Received his PhD in Immunology from Goethe University, Sweden in 1997-2001, and after that was a postdoctoral fellow in Immunology of the National Institutes of Health USA. A lecturer and assistant professor at Harvard Medical School from 2006 to 2012⁸⁰.

JSRM031 Yao, Aihua. Female.

Personal Profile: Associate Chief Surgeon of Liver Surgery and Liver Transplantation Center. Member of International Liver Transplantation Association, Branch member of Surgical Society, Chinese Medical Association, Committee member of Gastrointestinal Surgery of Chinese Association of Research Hospitals, member of Biliary Medicine Group of Digital Medicine Committee.

Doctor of Surgery. Engaged in clinical, research and teaching work in general surgery since 1999, and mainly engaged in clinical and basic research in liver surgery/liver transplantation after 2002.

Visiting scholar at the Ronald Reagan Medical Center of UCLA in Los Angeles, California, USA, from 2014 to 2015, focusing on liver transplantation and minimally invasive ablation of liver cancer⁸¹.

WOIPFG's Investigative Report on the Alleged Organ Harvesting of Living Falun Gong Practitioners at Xiangya Hospital of Central South University and Its Staff Members Suspected of Participation

Preface

Xiangya Hospital Central South University is home to the Hepatobiliary and Intestinal Surgery Research Center of the Ministry of Health and the Institute of Nephrology and Blood Purification of Central South University. It is a state-level organ transplantation diagnosis, treatment and research center. The hospital's Organ Transplant Center can carry out emergency liver transplants. The sources of donors are abundant, the wait time for organs is short, and patients can even choose young and healthy donors. The number of transplants in a single day is staggering. The hospital once performed up to seventeen transplant surgeries in one day, which shows that the actual transplant volume of the hospital is huge. In view of the background of

追查迫害法輪功國際組織 (追查國際)

World Organization to Investigate the Persecution of Falun Gong (WOIPFG)

To investigate the criminal conduct of all institutions, organizations, and individuals involved in the persecution of Falun Gong; to bring such investigation, no matter how long it takes, no matter how far and deep we have to search, to full closure; to exercise fundamental principles of humanity; and to restore and uphold justice in society

the CCP's national crime of organ harvesting, the hospital is suspected of participating in the crime of live organ harvesting from Falun Gong practitioners and other groups.

Hospital Overview: Xiangya Hospital Central South University is a Grade-A Tertiary General Hospital directly under the Ministry of Education. It is under the direct supervision of the Ministry of Health. It has fifty-one medical laboratories and 3,500 ward beds.⁸² The hospital has three research centers and training bases directly affiliated with the Ministry of Health and two ministerial-level key laboratories.⁸³

Address: No.87, Xiangya Road, Kaifu District, Changsha City, Hunan Province

I. Xiangya Hospital Central South University is home to the Hepatobiliary and Intestinal Surgery Research Center of the Ministry of Health and the Institute of Nephrology and Blood Purification of Central South University. It is also a state-level organ transplantation diagnosis, treatment and research center.

The Hepatobiliary and Intestinal Surgery Research Center of the Ministry of Health is the key clinical base of hepatobiliary and intestinal surgery of the Ministry of Health. The center consists of an organ transplant center with five research laboratories: liver surgery, organ transplantation, biliary surgery, anorectal surgery, and biomedicine. The center's clinical treatment carries out piggyback liver transplantation.⁸⁴

The Research Center has established several bases: the Xiaolan Base of the Hepatobiliary and Intestinal Surgery Research Center of the Ministry of Health,⁸⁵ the Inner Mongolia Hepatobiliary Surgery Institute of the Hepatobiliary and Intestinal Surgery Research Center of the Ministry of Health,⁸⁶ and the Ruikang Hospital Clinical Base of the Hepatobiliary and Intestinal Surgery Research Center of the Ministry of Health.⁸⁷ The Research Center instructs these hospitals in performing liver transplants.

In July 2003, Xiaolan People's Hospital of Zhongshan and the Hepatobiliary and Intestinal Surgery Research Center of the Ministry of Health established the Xiaolan Base of the Hepatobiliary and Intestinal Surgery Research Center of the Ministry of Health in Xiaolan People's Hospital to solve the research topics related to liver transplantation, which laid a solid foundation for the execution of liver transplants in the hospital.⁸⁸

"Health News" published an article in June 2011: "Inner Mongolia Hepatobiliary Surgery Institute of the Hepatobiliary and Intestinal Surgery Research Center of the Ministry of Health was established in Baogang Hospital." The article pointed out that the establishment of the Inner Mongolia Hepatobiliary Surgery Institute of the Hepatobiliary and Intestinal Surgery Research Center of the Ministry of Health will strengthen the cooperation between Baogang Hospital and the Hepatobiliary and Intestinal Surgery Research Center of the Ministry of Health in scientific research, teaching and medical training. The General Surgery Department of Baogang Hospital is an Inner Mongolia liver transplant center, and liver transplantation has become its feature and advantage.⁸⁹

In September 2004, the hospital established an Organ Transplant Center. Liver transplantation has become routine surgeries in this hospital.⁹⁰

The Institute of Nephrology and Blood Purification of Central South University can carry out kidney transplantation. Academicians Li Leishi and Liu Zhihong from the Kidney Transplant Center of Nanjing General Hospital of Nanjing Military Command were hired as chief scientists of the Institute of Nephrology and Blood Purification of Central South University.⁹¹

追查迫害法輪功國際組織 (追查國際)

World Organization to Investigate the Persecution of Falun Gong (WOIPFG)

To investigate the criminal conduct of all institutions, organizations, and individuals involved in the persecution of Falun Gong; to bring such investigation, no matter how long it takes, no matter how far and deep we have to search, to full closure; to exercise fundamental principles of humanity; and to restore and uphold justice in society

II. The number of transplants in a single day is staggering. The hospital once performed up to seventeen transplant surgeries in one day, which shows that the actual transplant volume of the hospital is huge.

According to the website of Xiangya Hospital, on May 26, 2005, one liver transplant, six kidney transplants, and eight corneal transplants were performed;⁹² on September 3, 2005, seven heart, liver and kidney transplants were completed.⁹³ In early February 2006, two liver transplants were completed within seventy-two hours.⁹⁴ On April 28, 2006, seventeen transplants were performed in one day, including two liver transplants, seven kidney transplants, and eight corneal transplants.⁹⁵ It can be seen that the hospital has a strong transplant team and advanced hardware facilities.

III. The hospital's Organ Transplant Center can carry out emergency liver transplants and the sources of donors are abundant.

The hospital claims to have completed thirty-eight liver transplants for patients with severe hepatitis and acute liver failure since 2002.⁹⁶ The average survival time of patients with severe hepatitis after entering the hospital is three days, and "can only be treated by emergency liver transplantation".⁹⁷

IV. The hospital has a strong team of liver and kidney transplant surgeons. It can be seen that the actual number of transplants in this hospital is huge.

The Hepatobiliary and Intestinal Surgery Research Center of the Ministry of Health currently has 129 medical, teaching, and research personnel, including twelve professors and personnel with corresponding titles and twenty-six associate professors and personnel with corresponding titles.⁹⁸

The name list to be further investigated released by WOIPFG in 2014 included members of the hospital's transplant surgeon team⁹⁹: There are seven chief surgeons, two associate chief surgeons, three attending surgeons, and four others engaged in kidney transplants. They completed seven kidney transplants in one day.¹⁰⁰ They can form up to seven kidney transplant teams. There are five chief surgeons, four associate chief surgeons, and one attending surgeon engaged in liver transplants, and they can form multiple liver transplant teams.

V. The hospital's liver transplant center has a large number of hardware facilities and ward beds.

In April 2006, the construction of the building for Hepatobiliary and Intestinal Surgery Research Center of the Ministry of Health began in Xiangya Hospital, with Zhang Yangde as the director of the center.¹⁰¹

The No. 60 and No. 61 wards of the Hepatobiliary and Intestinal Surgery Research Center are located on the fourth and the fifth floors of the old surgical building of Xiangya Hospital with ninety beds.¹⁰²

The Ruikang Hospital Clinical Base of the Hepatobiliary and Intestinal Surgery Research Center of the Ministry of Health is located in Ruikang Hospital affiliated to Guangxi University of Chinese Medicine. The Guangxi base of the Hepatobiliary and Intestinal Surgery Research Center of the Ministry of Health has two outpatient clinics (3rd floor) and two wards (19th floor), namely hepatobiliary surgery and gastrointestinal surgery, with 100 beds.¹⁰³

追查迫害法輪功國際組織 (追查國際)

VI. Telephone Investigation: The wait time for organs is short, and patients can even choose young and healthy donors.

Investigation Subject: Xie Jinliang, Director of Kidney Transplant Center of Xiangya Hospital Central South University

Investigation Time: 2016-03-03 (+86-13908469057)

Summary: Twenty kidney transplants have been done this year. As long as there's suitable match, surgery can be arranged immediately.

(Recording 1 Download [MP3](#). Transcript Download: [pdf 1](#))¹⁰⁴

Investigation Subject: Dr. Tang Huihuan, liver transplant, Xiangya Hospital Central South University

Investigation Time: March 12, 2016 (+86-13808470091)

Summary:

Tang Huihuan: Now the price is at least 500,000 or more because the donor is getting expensive.

Investigator: I remember like it was in 2005 or 2006. He got an organ transplant within one week after being admitted to the hospital.

Tang Huihuan: Yes, yes.

Investigator: Is this the case?

Tang Huihuan: Yes. It depends on chance. Anyway, if there is a liver source, we will be able to do it soon!

(Recording 2. Download [MP3](#). Transcript Download: [pdf 2](#))

Investigation Subject: Dr. Zhu, Doctors' Office of kidney transplant, Xiangya Hospital Central South University¹⁰⁵

Investigation Time: September 24, 2019 (+86-73189753702)

Summary: The surgery itself has risks. It's not only the surgery. Some of the subsequent treatments also have risks.

Q: Can I have someone who is younger and healthier?

A: You can ask for this. Just tell them when you register. No problem!

(Recording 3. Download: [MP3](#); Translation Download: [pdf 104](#))

VII. List of Responsible Persons:

ZSDX-XYYY001 Zhang Yangde

Position and Title: Professor of surgery and biomedical engineering and first-class chief surgeon of Central South University. He used to be the Director and Party Secretary of the Hepatobiliary and Intestinal Surgery Research Center of the Ministry of Health and the Director of the Organ Transplant Center of Xiangya Hospital Central South University.¹⁰⁶

In December 2014, Zhang Yangde, former Director of the Hepatobiliary and Intestinal Surgery Research Center of the Ministry of Health and Director of the Hepatobiliary and Intestinal Surgery Research Center of Central South University, was suspected of corruption and bribery and was put on file for investigation¹⁰⁷.

ZSDX-XYYY002 Xie Jinliang

Position and Title: Executive Deputy Director of Organ Transplant Center, Professor
Personal Profile: After graduating from Hunan Medical University in 1988, he was assigned to the Department of Urology of Xiangya Hospital. He received his medical Ph.D. in 1995 and became an associate professor in 1999 and a professor in 2005. He began to

追查迫害法輪功國際組織 (追查國際)

To investigate the criminal conduct of all institutions, organizations, and individuals involved in the persecution of Falun Gong; to bring such investigation, no matter how long it takes, no matter how far and deep we have to search, to full closure; to exercise fundamental principles of humanity; and to restore and uphold justice in society

participate in organ transplants in 1990 and has extensive clinical experience in organ transplantation. He specializes in kidney transplantation, and has performed more than 500 kidney transplants. For more than twenty years, he has been the Executive Deputy Director of the Organ Transplant Center and has presided over the daily work of the Center.¹⁰⁸

ZSDX-XXXX003 Qi Fan

Position and Title: Professor of Urology, member of Hunan Provincial Organ Transplantation Society, member of Hunan Provincial Organ Transplant Quality Control Center

Personal Profile: In 1968, he graduated from the Seventh Military Medical University of the Chinese People's Liberation Army (now Army Medical University). He has been working in urology since 1978. From 1992 to 2004, he served as the Director of the Department of Urology and the Deputy Director of the Organ Transplant Center of Xiangya Hospital. He specializes in organ transplantation.¹⁰⁹

ZSDX-XXXX004 Wang Zhiming

Position and Title: Chief surgeon of general surgery, professor, Director of Surgery Department, Director of General Surgery Department, Deputy Director of the Organ Transplant Center

Personal Profile: He graduated from the Medical Department of Hunan Medical University in 1984 and obtained his medical Ph.D. in 1992. In 1994, he became an associate professor. Being a student of China's famous professors Han Ming and Lv Xinsheng, he's an academic leader and one of the surgeons promoted to associate professors and professors at the earliest stage in the hospital. In 1999, he went to Japan for further study in the First Surgery Department of Kobe University School of Medicine and was promoted to professor in 2000. For over twenty years, he has been working on the front lines of medical treatment, teaching, and scientific research, specializing in liver transplantation. At present, liver transplants have become routine surgeries in Xiangya Hospital. Wang Zhiming has been engaged in scientific research and clinic work in liver transplantation for seventeen years. He can preside over liver transplantation work independently and has accumulated rich clinical experience. In April 2002, he performed a piggyback orthotopic liver transplant. Since 2002, he has presided over the liver transplantation work of the hospital. In particular, on February 10, 2007, he completed a living donor liver transplant with enlarged left-half liver between adults, which was the first case in the central and southern regions. He has performed seven living donor liver transplants so far. He specializes in liver transplantation.¹¹⁰

ZSDX-XXXX005 Tang Huihuan

Position and Title: Chief surgeon, professor of surgery, Director of General Surgery Department, member of the Standing Committee of the Hunan Provincial Political Consultative Conference

Personal Profile: He studied in Japan in 1996. He took the lead in carrying out spleen suture repair, spleen partial splenectomy, and splenic slice transplant in Hunan Province, which were all successful. He participated in experimental and clinical research on heterotopic and orthotopic liver transplantation and led and participated in the first living donor liver transplant in Hunan Province.¹¹¹

ZSDX-XXXX006 Zhou Ledu

追查迫害法輪功國際組織 (追查國際)

World Organization to Investigate the Persecution of Falun Gong (WOIPFG)

To investigate the criminal conduct of all institutions, organizations, and individuals involved in the persecution of Falun Gong; to bring such investigation, no matter how long it takes, no matter how far and deep we have to search, to full closure; to exercise fundamental principles of humanity; and to restore and uphold justice in society

Position and Title: Associate chief surgeon of general surgery, associate professor
Personal Profile: He started working at his alma mater, Hunan Medical University, in 1997 upon graduation. From 2007 to 2008, he studied at Kyoto University in Japan, the largest living donor liver transplant center worldwide. After returning to China, he devoted himself to the clinical research of living donor liver transplantation and precise liver resection to treat liver cancer. He specializes in liver transplantation.¹¹²

ZSDX-XYYY009 Han Ming

Position and Title: Chief surgeon of general surgery, professor of surgery

Personal Profile: He started working at his alma mater, Xiangya Medical College, in 1952 upon graduation. He used to be the Director of the Teaching and Research Office of the Department of Surgery of Xiangya Medical College, the Director of the Organ Transplantation Lab, and the Director of the General Surgery Department. He is currently a professor of surgery, a member of the National Committee of the Chinese People's Political Consultative Conference, and the Vice Chairman of the Hunan Provincial Committee of the Chinese People's Political Consultative Conference. He returned to China in 1948 after graduating from Andrews University's pre-medical program in the US. He has participated in four international academic conferences on liver and organ transplantation. In 1994, he successfully performed the first heterotopic liver transplant in Asia.¹¹³

ZSDX-XYYY010 Huang Yun

Position and Title: Attending surgeon of hepatobiliary surgery. Specializes in liver transplantation.¹¹⁴

ZSDX-XYYY011 Lv Xinsheng

Position and Title: Professor of general surgery

Personal Profile: He has worked at his alma mater, Hunan Medical College, since 1958 upon graduation till now. He used to be the Director of the Organ Transplantation Institute, the Director of the Teaching and Research Office of the Department of Surgery, and the Director of the General Surgery Department. He studied at Yale University in the US in 1981 and at the University of Cambridge and the University of Birmingham in the UK in 1986. He has carried out whole pancreas transplantation with duodenal ampulla for insulin-dependent diabetes mellitus, thyroid/parathyroid transplantation with blood vessels for hypoparathyroidism, and intraperitoneal infusion and transplantation of human fetal hepatocytes to treat severe hepatitis and advanced tumors. In 1993, he performed the first partial heterotopic liver transplant in Asia.¹¹⁵

ZSDX-XYYY012 Li Xinying

Position and Title: Associate professor of liver and thyroid surgery of general surgery, associate chief surgeon. He's a student of Professor Lv Xinsheng and Professor Wang Zhiming, two famous surgical experts in China. As a key member of the liver transplantation team led by Professor Wang Zhiming, he assisted in performing orthotopic liver transplants and living donor liver transplants. He specializes in liver transplantation.¹¹⁶

ZSDX-XYYY013 Li Jindong

追查迫害法輪功國際組織 (追查國際)

Position and Title: Associate professor of General Surgery Department, Deputy Director
Personal Profile: He graduated from the former Hunan Medical University in 1993. His research direction is liver transplantation surgery. As a key member, he has completed above seventy allogeneic orthotopic liver transplants and seven living donor liver transplants between adults.¹¹⁷

ZSDX-XXXX014 Luo Wanjun

Position and Title: Chief surgeon and professor of cardiothoracic surgery, Director of Cardiothoracic Surgery Department and cardiac surgery specialty, Deputy Director of the Organ Transplant Center of Xiangya Hospital

Personal Profile: He graduated from Central South University (formerly Hunan Medical University) in 1982. From 2000 to 2001, he studied cardiac surgery and robotic surgery at the Minneapolis Heart Institute and Abbott Northwestern Hospital, one of the top 100 hospitals in the US, under the tutelage of well-known surgeons such as Emery. In 2007, he studied at the internationally renowned Mayo Clinic medical center. He performed a heart transplant in 2005.¹¹⁸

ZSDX-XXXX015 Xu Liaomei

Position and Title: Associate chief technician and associate professor of cardiothoracic surgery

Personal Profile: She has been engaged in cardiopulmonary bypass since 1980. She is one of the academic leaders of cardiopulmonary bypass in Hunan Province. She has been to Beijing Fuwai Hospital, Shanghai Children's Medical Center, etc., to learn new cardiopulmonary bypass techniques for heart transplants, lung transplants, and liver transplants.¹¹⁹

ZSDX-XXXX016 Chen Shengxi

Position and Title: Professor of cardiothoracic surgery

Personal Profile: He graduated from Hunan Medical University in 1969. He presided over and performed the first orthotopic heart transplant in central and southern China and the first single lung transplant under cardiopulmonary bypass in China.¹²⁰

ZSDX-XXXX017 Xia Xiaobo

Position and Title: Chief surgeon and professor of ophthalmology, Director of Ophthalmology Department and Ophthalmology Teaching and Research Office

Personal Profile: In 1998, he received training in the diagnosis and treatment of glaucoma in New Orland, the US with the support of the Glaucoma Research Foundation of the US. From 1999 to 2002, he worked as a postdoctoral researcher in ophthalmology at the University of Texas-Hemann Hospital and Baylor College of Medicine. He specializes in penetrating keratoplasty combined with trabeculectomy and corneal transplantation combined with phacoemulsification.¹²¹

ZSDX-XXXX018 Wang Pingbao

Position and Title: Chief surgeon of ophthalmology, professor

Personal Profile: He graduated from Hengyang Medical College in 1985 and has been engaged in ophthalmology for more than 20 years. He studied for master and doctoral degrees at Shanghai Second Medical University and Hunan Medical University. He's

proficient in corneal transplantation.¹²²

WOIPFG's Investigative Report on the Alleged Organ Harvesting of Living Falun Gong Practitioners at Beijing YouAn Hospital, Capital Medical University and Its Staff Members Suspected of Participation

Hospital: Beijing You An Hospital, Capital Medical University
Address: No.8, Xi Tou Tiao, You Anmen wai, Fengtai District, Beijing

Foreword

The hepatobiliary surgery clinic has developed into the largest liver transplant center in Beijing, and the actual number of liver transplants should be much higher than the one officially announced. The wait time for organs is ultra-short, and the physicians in the telephone survey answered, "They may be able to do it as soon as you come, there are five liver transplant groups, they can operate two or three hundred cases a year, and the beds are full". Given, the general context of the CCP's state crime of organ harvesting, the hospital is suspected of participating in the crime of organ harvesting of living Falun Gong practitioners.

I. Hospital Overview

Beijing You An Hospital is the affiliated hospital of Capital Medical University and the ninth clinical medical school, is a tertiary level-A hospital of the Ministry of Health, and is a large general specialty hospital serving the population with infectious and contagious diseases. The hospital located in an area of more than 50,000 square meters, with a construction area of more than 40,000 square meters. There are 550 beds available (750 beds available after renovation). Hospital technical support is strong, and eighty percent of the staff members are professional and technicians, more than 100 people have senior titles, and there are more than 100 graduate students and nearly 30 doctoral / master's degree supervisors.¹²³

II. The Department of Hepatobiliary Surgery has developed into the largest liver transplant center among Beijing municipal medical institutions.

Beijing You An Hospital is the largest clinical specialty hospital for hepatobiliary diseases in China.¹²⁴ The liver transplant center was established in 2003, including Liver Transplant Collaboration Center with the Starzl Organ Transplant Center of the University of Pittsburgh. Professor Zhu Yue and Professor Yan Lunan of the Liver Transplant Center of West China Hospital are the honorary directors.¹²⁵ The collaborative relationships with more than ten renowned liver transplant centers in China were established as well. The number of liver transplant cases completed each year has reached the leading level in China.¹²⁶

III. Higher than the one officially announced many liver transplant surgeons and the actual number of liver transplants completed should be much

The Center established collaborative relationships with more than a dozen well-known domestic and liver transplant Centers¹²⁷ with 22 doctors, 44 nurses, (including three senior titles, four deputy senior titles, six intermediate grade).

In June 2014, Zang Yunjin, the Director of Armed Police General Hospital, added the You'an medical team, and Zang Yunjin was tapped to build a first-class liver transplant center in Beijing.¹²⁸ Zang Yunjin is a member of the Communist Party of China, chief surgeon, professor, and returned scholar from the United States. He is the academic leader of the General Surgery Center of Beijing You An Hospital, Capital

追查迫害法輪功國際組織 (追查國際)

World Organization to Investigate the Persecution of Falun Gong (WOIPFG)

To investigate the criminal conduct of all institutions, organizations, and individuals involved in the persecution of Falun Gong; to bring such investigation, no matter how long it takes, no matter how far and deep we have to search, to full closure; to exercise fundamental principles of humanity; and to restore and uphold justice in society

Medical University, the Vice President of Qingdao University Hospital Group, and the Director of its Institute of Transplantation Medicine.¹²⁹ As of February 2021, he has performed more than 2,600 liver transplants¹³⁰.

Li Ning, the President of You'an Hospital, claimed the hospital had reached the highest success rate of liver transplant surgery in Beijing.¹³¹ The hospital website said that he hosted more than 200 cases of liver transplantation in ten years (obviously these are tampered figures). Other sources show that he "hosted more than 500 cases of liver transplants, Chinese doctors Prize winner, Li Ning" which may more accurately reflect the real number.¹³²

The hospital's official website states that more than 500 large and medium-sized routine hepatobiliary, pancreatic and splenic surgeries were completed each year, including 60-80 liver transplants.¹³³ Wang Menglong, deputy director of the liver transplant center, who is the one of the lead surgeons among the five transplant teams. The hospital's official website currently shows that Wang Menglong personally performed about 200 cases of various large and medium-sized surgeries, including liver resection each year, and has completed more than 800 cases of liver transplants across the entire country.¹³⁴

As of November 2022, Professor Li Guangming, Director and academic leader of the Organ Transplant Center of You An Hospital, has completed more than 1,500 cases of various liver transplants¹³⁵.

IV. The Hospital can perform emergency liver transplants.

In July 2016, the liver transplant team of Beijing You An Hospital completed an emergency liver transplant¹³⁶.

V. The Hospital expanded the new transplant operation room and completed two liver transplants on the day it opened.

According to the Weibo of Beijing You An Hospital, "You An's new operating room opened, two liver transplants completed on the eve of National Day," the expansion and renovation of the new operating room on the 10th floor of Building B of Beijing You An Hospital had been completed. Led by Director Chi Ping and head nurse Li Xuening, the Department of Surgical Anesthesiology was relocated on September 29, 2022. On the day after the relocation, that is, on the eve of National Day on September 30, the Department of Surgical Anesthesiology and the General Surgery Center cooperated to complete two liver transplants in the new operating room¹³⁷.

VI. Telephone Investigation:

Summary: Maybe you can have (a transplant) as soon as you come. There are five liver transplant teams, which can do 200 to 300 liver transplants a year. The beds are fully occupied.

Investigation Recording 1

Date: October 9, 2015

Subject(s): Doctor on duty, Liver Transplant, You An Hospital, Beijing

Summary: "When waiting for liver donors, if it is quick, the operation can be done as soon as the patient arrives. If it is slow, it may take one or two weeks. It wouldn't take very long."¹³⁸ "During October 1st holiday season, we did 5 liver transplants. The quality of the donor is not a problem, as we extracted them all ourselves.

To investigate the criminal conduct of all institutions, organizations, and individuals involved in the persecution of Falun Gong; to bring such investigation, no matter how long it takes, no matter how far and deep we have to search, to full closure; to exercise fundamental principles of humanity; and to restore and uphold justice in society

Investigation Recording 2

Date: September 10, 2017

Subject(s): A Doctor in patient services at Liver Transplant, You An Hospital, Beijing

Summary: "To wait for a liver transplant, if it is fast, it could be done in one or two weeks. About one hundred operations can be done each year."¹³⁹

(Recording 2. Download: [MP3](#); Translation Download: [pdf2](#))

Investigation Recording 3

Date: June 24, 2019 (+86-13693686031)

Subject(s): Li Chuanyun, Associate Chief Physician, Liver Transplant, Beijing You An Hospital, Capital Medical University

Summary: If you get registered on the waiting list tomorrow, you may obtain a liver source as soon as tomorrow if lucky, or you may get nothing even in the next several days, perhaps if you get registered tomorrow, you'll get the surgery done the day after.¹⁴⁰

(Recording 3. Download: [MP3](#); Translation Download: [pdf 058](#))

Investigation Recording 4

Date: June 24, 2019 (+86-13911567814)

Subject(s): Doctor Zhang Zhen, Liver Transplant Center, Beijing You An Hospital, Capital Medical University

Summary: Generally, it can be done in one month, and in some cases, it can be done in just a few days!¹⁴¹

(Recording 4. Download: [MP3](#); Translation Download: [pdf 059](#))

Investigation Recording 5

Date: December 16, 2019 (+86-1083997175)

Subject(s): Nurse, Liver Transplant Inpatient Service, Beijing You An Hospital, Capital Medical University

Summary: In the liver transplant center, there is not just one, but a few directors. How many we have done this year; I do not have that number. What I can tell you is that we can do the surgery.¹⁴²

(Recording 5. Download: [MP3](#); Translation Download: [pdf 183](#))

Investigation Recording 6

Date: April 17, 2019 (+86-10-839971770)

Subject(s): Nurse, Hepatobiliary Surgery Inpatient Service, Beijing You An Hospital

Summary: Director Wang Menglong is from the Second Laboratory of Hepatobiliary Surgery. He does liver transplants as the lead surgeon. Inpatient service is currently full. You have to ask for him.¹⁴³

(Recording 6. Download: [MP3](#); Translation Download: [pdf 042](#))

Investigation Recording 7

Date: June 24, 2019 (+86-13693686031)

Subject(s): Li Chuanyun, Associate Chief Physician, Liver Transplant, Beijing You An Hospital, Capital Medical University¹⁴⁴

Summary: I'm the lead surgeon and the director. Wang Menglong is in another team of our division. He has one team; I have another team. We have a total of five teams.

(Recording 7. Download: [MP3](#); Translation Download: [pdf 058](#))

VII. Key Responsible Persons

BJYA001 Lu Shichun, male. Date of Birth: 1962.¹⁴⁵

追查迫害法輪功國際組織 (追查國際)

World Organization to Investigate the Persecution of Falun Gong (WOIPFG)

To investigate the criminal conduct of all institutions, organizations, and individuals involved in the persecution of Falun Gong; to bring such investigation, no matter how long it takes, no matter how far and deep we have to search, to full closure; to exercise fundamental principles of humanity; and to restore and uphold justice in society

Personal Profile: Prof. Lu Shichun of Hepatobiliary Surgery, Director of Liver Transplantation Center. A member of the International Society of Liver Transplantation, the International Society of Gastroenterology and Surgery, the Liver Transplantation Branch of the Chinese Medical Association, and a member of the editorial board of eight journals including the Chinese Journal of Organ Transplantation, the Chinese Journal of Gastroenterology and Surgery, and the Chinese Journal of Hepatobiliary Surgery.

He graduated from Chongqing Medical University in 1984 and received his master's degree in Surgery from West China Medical University in 1987. In April 2004, he was transferred to Beijing You An Hospital, where he established the Liver Transplantation Center of Beijing You An Hospital of Capital Medical University/China-US Liver Transplantation Collaboration Center, and at the end of 2013, he was transferred to Beijing 301 Hospital as the Director of Hepatobiliary Hospital.

He studied in Germany from 1992 to 1995 and received his PhD in abdominal surgery and organ transplantation from the Federal University of Freiburg, Germany. In 2002, he went to the University of Pittsburgh, USA to study clinical liver transplantation at the Institute of Organ Transplantation.

During the past 10 years since its establishment, he performed more than 700 liver transplants (including living liver transplants).¹⁴⁶

BJYA002 Li Ning, male.

Personal Profile: Chief Physician, Professor and Director of Hepatobiliary Surgery. He is a member of the Sixth Committee of the Chinese Medical Association's Organ Transplantation Branch; the Fifth Committee of the Beijing Medical Branch's Organ Transplantation Branch.

He graduated from the Medical Department of Capital Medical University in 1982 and was assigned to the Department of General Surgery of Beijing Chaoyang Hospital, Capital Medical University in the same year, where he served as a resident, attending physician, deputy chief physician, chief physician, professor, and supervisor of graduate students. He focuses on clinical and basic research in hepatic, biliary and pancreatic surgery, surgical critical care, and liver transplantation. In May 2006, he joined Beijing You An Hospital of Capital Medical University.

From 1998 to 1999, he went to the University of Chicago School of Medicine, University of Denver School of Medicine and Austin Hospital National Liver Transplant Center in Melbourne, Australia to study and learn clinical liver transplantation.

In 1999, as the director of the Liver Transplantation Center of Beijing Chaoyang Hospital, he was the first one to carry out systematic clinical and basic research and practice of liver transplantation in the Beijing area. He has performed more than 500 clinical liver transplantation cases last decade.¹⁴⁷

BJYA003 Wang Menglong, male.

Place of birth: Wuhan.¹⁴⁸

He is currently the Deputy Director of Hepatobiliary Surgery and Liver Transplantation Center of Beijing You An Hospital, Capital Medical University, and the Deputy Director of China-US Liver Transplantation Collaboration Center.

He studied and worked at the Third Military Medical University in Chongqing, the Second Military Medical University in Shanghai, the First Military Medical University in Guangzhou and the 200th Hospital of Guangxi Military Region. In November 2004, he transferred to You An Hospital from the Southern Hospital of the First Military Medical University in Guangzhou, China.¹⁴⁹

In 2004, he studied at the Thomas E Starzl Transplantation Institute at Pittsburgh for three months. He has been engaged in basic and clinical hepatobiliary surgery for 25 years and basic and clinical practice of liver transplantation for 16 years. He has performed more than 250 liver transplants throughout China.¹⁵⁰

追查迫害法輪功國際組織 (追查國際)

World Organization to Investigate the Persecution of Falun Gong (WOIPFG)

To investigate the criminal conduct of all institutions, organizations, and individuals involved in the persecution of Falun Gong; to bring such investigation, no matter how long it takes, no matter how far and deep we have to search, to full closure; to exercise fundamental principles of humanity; and to restore and uphold justice in society

Expertise in Liver transplantation: classical and backpack liver transplantation for various end-stage liver diseases or fulminant liver failure, living liver transplantation, secondary liver transplantation and complex liver transplantation for high-risk patients or difficult liver transplantation, donor liver resection, perioperative management, and postoperative follow-up.

BJYA004 Wu Jushan, male.

Personal Profile: Deputy Chief Physician of Hepatobiliary Surgery

He graduated from Hebei Medical University in 1996 with a major in clinical medicine and received his master's degree in surgery from Capital Medical University in 2006.

He has participated in performing more than nine hundred cases of liver transplant donor and recipient surgery.¹⁵¹

Liver transplantation treatment for acute and chronic liver failure.

BJYA005 Guo Qingliang, male. Date of birth: 1971.

Personal Profile: Deputy Chief Physician of Hepatobiliary Surgery

He graduated from Hebei Medical University in 1995 with a major in clinical medicine and received his master's degree in surgery from Capital Medical University in 2006. He is now working in the General Surgery Center of Beijing You An Hospital, Capital Medical University.

He has been engaged in clinical hepatobiliary surgery and liver transplants for 16 years. Since 2003, she has participated in performing liver transplants and perioperative management of more than 300 cases.¹⁵²

BJYA006 Zeng Daobing, male.

Profile: Associate Chief Physician, Doctor of General Surgery

He studied and conducted research under Professor Lu Shichun. He has engaged in clinical general surgery and hepatobiliary surgery, specializing in the diagnosis and treatment of liver transplantation.

He participated in more than 200 liver transplantation cases, independently completed more than 150 cases of donor liver extraction and more than 200 cases of donor liver revision.¹⁵³

He specializes in the diagnosis and treatment of liver transplantation.

BJYA007 Li Chuan Yun, male.

Date of birth: 1970.

Personal Profile: Chief physician of hepatobiliary surgery

He participated in performing more than 500 cases of various liver transplants.¹⁵⁴

He specializes in liver transplantation.

BJYA008 Duan Binwei, male.

Personal Profile: Attending physician of hepatobiliary surgery, lecturer

From 2007 to 2010, he served as a resident in the Department of Hepatobiliary Surgery at Beijing University Cancer Hospital, where he mastered the comprehensive treatment of hepatobiliary and pancreatic tumors.

At the beginning of 2010, he was engaged in clinical and basic research in hepatic, biliary and pancreatic surgery under Professor Lu Shichun.

He specializes in the diagnosis and comprehensive treatment of hepatobiliary and pancreatic diseases mainly by surgical treatment. He independently performed and participated in more than 150 large and medium-sized surgeries every year.¹⁵⁵ He also performed liver transplantation for various end-stage liver diseases.

BJYA009 Wang Lu, male.

Personal profile: Deputy Chief Physician of Hepatobiliary Surgery, a member of Beijing Medical Association Organ Transplantation Committee, Secretary of Beijing Physicians Association Organ Transplantation Expert Committee.

He graduated from Capital Medical University.

追查迫害法輪功國際組織 (追查國際)

World Organization to Investigate the Persecution of Falun Gong (WOIPFG)

To investigate the criminal conduct of all institutions, organizations, and individuals involved in the persecution of Falun Gong; to bring such investigation, no matter how long it takes, no matter how far and deep we have to search, to full closure; to exercise fundamental principles of humanity; and to restore and uphold justice in society

He has been engaged in perioperative treatment of liver transplantation since 2005, and is mainly responsible for perioperative and postoperative follow-up treatment of liver transplantation with the focus on anti-rejection.¹⁵⁶

BJYA010 Ma Chao, male.

Personal profile: A resident of Liver Transplantation Center
Specialized in liver transplantation disease treatment.¹⁵⁷

BJYA011 Zhu Yue, male.

Personal profile: Professor of Hepatobiliary Surgery, Director of China-US Liver Transplant Collaboration Center (US), Beijing You An Hospital, Capital Medical University, and a member of International Society for Organ Transplantation.

He graduated from Fudan University School of Medicine (formerly Shanghai Medical University, Ministry of Health) in 1970 and received his M.S. degree from Xi'an Jiaotong University (formerly Xi'an Medical University, Ministry of Health) in 1982.

From 1987 to 1988, he was a clinical instructor of surgery at the University of California Davis School of Medicine, and from 1988 to 2005, he was an assistant professor of surgery and director of the Large Animal Research Center at the University of Pittsburgh Organ Transplantation Institute. He has long been involved in clinical and basic research in liver transplantation.¹⁵⁸

BJYA012 Xia Ren Pin, male.

Personal profile: Chief physician of hepatobiliary surgery

He obtained medical doctor degree from West China University of Medical Sciences in 1998.

From March of 1999 to July of 2003, he studied at Hokkaido University in Japan and Harvard University in the United States, where he systematically mastered the diagnosis and treatment of hepatobiliary diseases and transplantation techniques.

He participated in more than 200 cadaveric liver transplants and more than 30 live liver transplants.¹⁵⁹

BJYA013 Liu Yuan, male.

Personal profile: Attending Physician, Hepatobiliary Surgery
Specialized in liver transplants.¹⁶⁰

BJYA014 Lai Wei, male.

Date of birth: 1972.

Personal profile: Deputy Chief Physician of Hepatobiliary Surgery

He graduated from West China Medical University in 1997 with a Bachelor of Medicine degree and worked at the Second People's Hospital of Chengdu from 1997 to 2001. He graduated from West China Clinical Medical College/ West China Hospital of Sichuan University with a Master's degree in Surgery in 2004. He graduated from West China Clinical Medical College/ West China Hospital of Sichuan University with a Doctorate degree in Surgery in 2007. From 2007 to present, he has worked at the Hepatobiliary Surgery and Liver Transplantation Center of Capital Medical University He has been working in the Hepatobiliary Surgery and Liver Transplantation Center of You An Hospital, and served as a resident, chief resident, attending physician and deputy chief physician.

He has been engaged in clinical and research work in hepatobiliary surgery and liver transplantation.¹⁶¹

BJYA015 Zhang Jinguang, male.

Personal profile: Chief physician of hepatobiliary surgery, chief physician of liver transplantation center.
Chief physician of Sino-US Liver Transplantation Collaborative Center

追查迫害法輪功國際組織 (追查國際)

World Organization to Investigate the Persecution of Falun Gong (WOIPFG)

To investigate the criminal conduct of all institutions, organizations, and individuals involved in the persecution of Falun Gong; to bring such investigation, no matter how long it takes, no matter how far and deep we have to search, to full closure; to exercise fundamental principles of humanity; and to restore and uphold justice in society

He has been engaged in clinical, teaching and research work of hepatobiliary surgery, general surgery, oncology surgery and transplantation in the large tertiary level-A hospitals. He has obtained the following titles: resident, attending physician, deputy chief physician, and chief physician.

For nearly 30 years, he has been engaged in clinical, teaching and research work in transplantation.¹⁶²

BJYA016 Liu Jing, female.

Personal Profile: Chief Urologist

She Engaged in preoperative diagnosis and treatment of allogeneic and blood related kidney transplantation, combined pancreas-kidney transplantation, islet transplantation preoperative diagnosis and treatment; liver programmed pathology and clinical correlation study; Post-operative management of liver and kidney transplantation. She is dedicated providing long-term survival of patients after organ transplantation.¹⁶³

BJYA017 Lin Dongdong, male.

Date of birth: December 1971.

He joined the CCP in June 2005.¹⁶⁴

Personal profile: Associate Chief Physician of Hepatobiliary Surgery, Associate Professor, Administrative Deputy Director of Hepatobiliary Surgery and Liver Transplantation Center, Beijing You An Hospital, Capital Medical University.

He graduated from Shandong Medical University in 1994 with a bachelor's degree and from Capital Medical University in 2003 with a doctorate degree in surgery, was promoted to chief physician in November 2011, and was awarded a master's degree in general surgery

from Capital Medical University in December 2011.

From July 2010 to January 2011, he was a visiting scholar at Starzl Research Institute of Organ Transplantation in United States.

He has participated in more than 300 clinical liver transplants, more than 200 donor liver revisions, more than 50 diseased liver resections, and more than 50 liver transplants as the first assistant.¹⁶⁵

He specializes in liver transplantation.

BJYA018 Li Guangming

Personal Profile: Director of Organ Transplant Center, Chief Surgeon, Professor¹⁶⁶

As of November 2022, he has performed more than 1,500 liver transplants of various types¹⁶⁷.

WOIPFG's Investigative Report on the Alleged Organ Harvesting of Living Falun Gong Practitioners at Nanjing Drum Tower Hospital and Its Staff Members Suspected of Participation

Hospital: Nanjing Drum Tower Hospital

Address: No. 321 Zhongshan Road, Nanjing, Jiangsu Province, China

Preface

Nanjing Drum Tower Hospital was the first hospital to carry out combined liver and kidney transplantation in Jiangsu Province in year 2001. It has a strong team of liver and kidney transplant surgeons and a large quantity of hospital beds. According to the telephone investigations conducted by World Organization to Investigate the Persecution of Falun Gong (WOIPFG), the organ wait times for organ transplantation at this

追查迫害法輪功國際組織 (追查國際)

World Organization to Investigate the Persecution of Falun Gong (WOIPFG)

To investigate the criminal conduct of all institutions, organizations, and individuals involved in the persecution of Falun Gong; to bring such investigation, no matter how long it takes, no matter how far and deep we have to search, to full closure; to exercise fundamental principles of humanity; and to restore and uphold justice in society

hospital are short, and the hospital's self-reported sources of donated organs are inconsistent. Given the general context of the Chinese Communist Party's (CCP) state crime of live organ harvesting, the hospital is clearly suspected of participating in the crime of live organ harvesting from Falun Gong practitioners and other groups.

Hospital Overview

Nanjing Drum Tower Hospital was founded in 1892. It is a large comprehensive Class A tertiary hospital and one of the earliest Western medicine hospitals in China. The hospital has 3,325 approved ward beds and 4,869 employees.¹⁶⁸

I. The hospital was the first to carry out combined liver and kidney transplantation in Jiangsu Province, and the director of its organ transplant center was also the former president of the hospital

Nanjing Drum Tower Hospital was the first in Jiangsu Province to carry out a combined liver and kidney transplant in 2001.¹⁶⁹ On May 23, 2007, the hospital was designated by the Ministry of Health as qualified to perform kidney and liver transplants.¹⁷⁰

Ding Yitao had studied at the Institute of Liver Surgery of the People's Liberation Army and the Australian National Liver Transplantation Unit. From May 1996 to August 2014, he was the director of Nanjing Drum Tower Hospital, which is affiliated with Nanjing University School of Medicine. Currently, he is the director of the Organ Transplantation Center of Nanjing Drum Tower Hospital, Standing Committee member of the Chinese Society of Organ Transplantation and honorary director of the Jiangsu Provincial Society of Organ Transplantation.¹⁷¹

II. The hospital's organ transplant surgery teams, bed availability and surgery volume

1. A large number of hospital beds

The Departments of Urinary Surgery, General Surgery and Hepatobiliary Surgery all offer organ transplantation services. The Department of Urinary Surgery is one of the key medical disciplines of Jiangsu Province's "135 Project". It is also a key clinical specialty of Jiangsu Province and a key medical discipline of the City of Nanjing. **It has 120 ward beds and is an organ transplant unit designated by the Ministry of Health.**¹⁷² **The General Surgery Department has an organ transplantation center with 164 beds.**¹⁷³ The Hepatological Surgery Department is consisted of Organ Transplant, Hepatic Surgery and Biliopancreatic Surgery Departments, as well as the Hepatobiliary Research Institute of Nanjing University. There are currently 180 ward beds.¹⁷⁴

2. The liver and kidney transplant surgery teams are very strong

The Department of Urinary Surgery currently has more than 100 medical and nursing staff, including four chief surgeons and professors, two doctoral student supervisors, eight postgraduate student supervisors, eight associate chief surgeons and associate professors. It is an organ transplant unit approved (accredited) by the Ministry of Health.¹⁷⁵

The general surgery department also has an organ transplantation center. They have 76 medical and nursing staff, including nine chief surgeons, 20 associate chief surgeons and 10 attending surgeons.¹⁷⁶ They are able to form multiple liver and kidney transplant surgical teams.

3. The hospital's organ transplant volume

The hospital's official website and published hospital papers claimed:

追查迫害法輪功國際組織 (追查國際)

World Organization to Investigate the Persecution of Falun Gong (WOIPFG)

To investigate the criminal conduct of all institutions, organizations, and individuals involved in the persecution of Falun Gong; to bring such investigation, no matter how long it takes, no matter how far and deep we have to search, to full closure; to exercise fundamental principles of humanity; and to restore and uphold justice in society

Kidney transplantation: The Department of Urinary Surgery has performed kidney transplantation and combined liver-kidney transplantation. The hospital claims to have completed more than 50 kidney transplants every year¹⁷⁷.

Liver transplantation: As of March 2008, 314 liver transplants had been performed at the hospital.¹⁷⁸

Combined organ transplantation: From October 2000 to December 2002, four cases of combined liver and kidney transplantation were performed.¹⁷⁹

Corneal transplantation: From January 2001 to December 2005, the hospital performed 12 cases (13 eyes) of penetrating keratoplasty with donors aged around 20 years old.¹⁸⁰

III. Telephone Investigation: suspicious origins of organs and short organ wait times

1. The hospital is unable to explain the organ sources and it admits to having used organs of Falun Gong practitioners in the past

The hospital claims that the transplanted organs are “all donated”, but the number of donated organs from the Red Cross Society’s Human Organ Donation Offices and the number of organs donated directly to the hospital are both very small and do not match the actual number of transplants at all.

The organ origins as claimed by the medical personnel vary, as well, including “(from) our own channels”, “not convenient to tell you” and “online assignment”. After further questioning, they would tell the WOIPFG investigators to “go ask our director. The director told me” or “We have our own channels”, “no comment”, etc.

Subject of Investigation: A liver transplant surgeon at Nanjing Drum Tower Hospital

Investigation Date: July 9, 2017 (Telephone number: 2583106666)

Excerpts:

Surgeon: “We do a lot, quite a lot (of organ transplants)! Nowadays there’re many channels (to obtain organs). That’s the government’s concern. We are only in charge of providing the technologies and the follow-up services.”

Investigator: “You said in the past those Falun Gong practitioners were used (as donors), why not now?”

Surgeon: People didn’t speak of human rights in the past!”¹⁸¹

(Recording 1. Download: [MP3](#); Transcript Download: [pdf 25](#))

2. Short organ wait times

Subject of Investigation: Nanjing Drum Tower Hospital liver transplant department

Investigation Date: June 25, 2018 (telephone number: +862583106666)

Excerpts:

Surgeon: “We have done 50 to 60 cases of liver transplantation this year. The wait time is short, around ten days or a half month.”¹⁸²

(Recording 2. Download: [MP3](#); Translation Download: [pdf2](#))

Subject of Investigation: A doctor from the liver transplant doctors’ office at Nanjing Drum Tower Hospital¹⁸³

Investigation Date: December 23, 2019 (telephone number: +86-25-83106666)

Excerpts:

“It (i.e. organ transplant) can usually be done in one month.”

(Recording 3. Download: [MP3](#); Translation Download: [pdf 194](#))

IV. Thirteen Organ Transplants Performed within Seven Days

追查迫害法輪功國際組織 (追查國際)

World Organization to Investigate the Persecution of Falun Gong (WOIPFG)

To investigate the criminal conduct of all institutions, organizations, and individuals involved in the persecution of Falun Gong; to bring such investigation, no matter how long it takes, no matter how far and deep we have to search, to full closure; to exercise fundamental principles of humanity; and to restore and uphold justice in society

During the “Golden Week” of October 2018 (i.e. the week of October 1, 2018), Nanjing Drum Tower Hospital completed 13 organ transplant operations, including seven kidney transplants, five liver transplants and one lung transplant, according to Chinese media reports.¹⁸⁴

V. Huang Xinli, Chief Surgeon of the Organ Transplantation Department, Involved in the Legal Case of Illegal Organ Harvesting

From 2017 to 2018, Huang Xinli, chief surgeon of Nanjing Drum Tower Hospital, conducted human organ donation across regions without approval. Without the joint signature and confirmation of the deceased's spouse, adult children, and parents, he performed 11 cases of organ harvesting in Huaiyuan County against the wishes of the deceased or their close relatives.¹⁸⁵ Huang Xinli is a member of the OPO (Organ Procurement Organization) of Nanjing Drum Tower Hospital, mainly engaged in the extraction of human organs.¹⁸⁶ According to the hospital's official website, he is a member of the Organ Donation and Management Group of the Organ Transplantation Branch of the Jiangsu Medical Association. In January 2018, Huang Xinli was transferred from the Hepatobiliary Center of Jiangsu Provincial People's Hospital to Nanjing Drum Tower Hospital through talent introduction.¹⁸⁷

VI. List of Key Individuals Responsible for Live Organ Harvesting at Nanjing Drum Tower Hospital

Name: Wu Yafu

Serial number: NJGL001

Gender: male

Date of birth: October 1960¹⁸⁸

Profile: Wu Yafu is chief surgeon of the General Surgery (Hepatobiliary Surgery) Department, professor, master's degree student supervisor and director of the General Surgery Department's Liver and Transplantation Ward. He is also a senior visiting scholar at Hong Kong's Queen Mary Hospital. He is skilled in liver transplantation.¹⁸⁹

Name: Yue Yang

Serial number: NJGL002

Gender: male

Date of birth: 1977

Place of birth: Tianjin, China¹⁹⁰

Profile: Yue Yang is deputy chief surgeon of hepatobiliary surgery.

He graduated from Luzhou Medical College in July 2004 with a master's degree in vascular surgery. After graduation, he joined the military and worked in the Organ Transplantation Institute of Beijing Armed Police General Hospital, where he was engaging in liver and

kidney transplantation for 15 years.

He has participated in more than 800 liver transplants and over 400 kidney transplants. He has also participated in complex transplants, such as pediatric living related liver transplantation, domino liver transplantation, split liver transplantation, tertiary liver transplantation, combined liver-kidney transplantation and combined pancreas-kidney transplantation. He is a member of the research group of the National 863 Project “Studies in the Strategies and Key Technologies for Expanding Donor Organ Sources”.¹⁹¹

Name: Qiu Yudong

Serial number: NJGL003

追查迫害法輪功國際組織 (追查國際)

World Organization to Investigate the Persecution of Falun Gong (WOIPFG)

To investigate the criminal conduct of all institutions, organizations, and individuals involved in the persecution of Falun Gong; to bring such investigation, no matter how long it takes, no matter how far and deep we have to search, to full closure; to exercise fundamental principles of humanity; and to restore and uphold justice in society

Gender: male

Date of birth: May 1967

Place of birth: Suzhou, Jiangsu Province¹⁹²

Profile: Qiu Yudong is deputy director of the Hepatobiliary Surgery and General Surgery Departments, professor, chief surgeon, and deputy director of the Hepatobiliary Research Institute of Nanjing University. He is also a junior committee member of the Organ Transplantation Branch of the Chinese Medical Association.

He specializes in liver transplantation.¹⁹³

Name: Jiang Chunping

Serial number: NJGL004

Gender: male

Profile: Jiang Chunping is a professor and chief surgeon of the General Surgery Department.

From 2001 to 2003, he was engaging in clinical research of digestive tumor and organ transplantation at the University of Pittsburgh Medical Center and Thomas E. Starzl Transplantation Institute, USA.

He mainly specializes in liver transplantation.¹⁹⁴

Name: Xu Qingxiang

Serial number: NJGL005

Gender: male

Profile: Xu Qingxiang is deputy chief surgeon of general surgery (hepatobiliary surgery), M.D. and associate professor.

He has studied hepatobiliary and pancreatic surgery techniques and living donor liver transplantation at the University of Tokyo Hospital in Japan.

He specializes in liver transplantation.¹⁹⁵

Name: Wu Xingyu

Serial number: NJGL006

Gender: male

Profile: Wu Xingyu is deputy chief surgeon of general surgery (hepatobiliary surgery).

He has studied hepatobiliary and pancreatic surgery and liver transplantation at the hospital affiliated with the University of South Carolina School of Medicine in the United States.

He specializes in liver transplantation.¹⁹⁶

Name: Shi Xiaolei

Serial number: NJGL007

Gender: male

Date of birth: April 1974

Place of birth: Nantong, Jiangsu Province¹⁹⁷

Profile: Shi Xiaolei is deputy administrative director of the General Surgery Department, M.D., chief surgeon and a doctoral student supervisor. He is the recipient of Wu Mengchao Medical Youth Award, Jiangsu Province's "Health Top Talent", one of the Jiangsu

Province's "Top Ten Young Science and Technology Stars", Jiangsu Province's "Medical Key Talent", Jiangsu Province's "Six Summit Talent", Jiangsu Province's "333 High-Level Talent, and one of Nanjing City's Outstanding Contribution Young and Middle-Aged Experts. He is also a member of the

追查迫害法輪功國際組織 (追查國際)

World Organization to Investigate the Persecution of Falun Gong (WOIPFG)

To investigate the criminal conduct of all institutions, organizations, and individuals involved in the persecution of Falun Gong; to bring such investigation, no matter how long it takes, no matter how far and deep we have to search, to full closure; to exercise fundamental principles of humanity; and to restore and uphold justice in society

Transplantation Infection Group of the Chinese Medical Association's Organ Transplantation Branch, a junior member of the Organ Transplantation Branch of the Chinese Medical Association, and a member of the Transplantation Management Group. And he is also a member of the Organ Transplantation Branch of the Jiangsu Medical Association.

From 1993 to 1998, he studied at Nanjing Railway Medical College and obtained a bachelor's degree. He received his master's degree and doctoral degree in surgery from Nanjing University Medical School. He has been engaging in clinical work of hepatobiliary surgery for more than 14 years.

He has studied hepatobiliary surgery and liver transplantation at the University Medical Center Hamburg-Eppendorf.

He specializes in liver transplantation.¹⁹⁸

Name: Guan Wenxian

Serial number: NJGL008

Gender: male

Date of birth: August 1963

Status: a member of the Chinese Communist Party¹⁹⁹

Profile: Guan Wenxian is administrative director of the General Surgery Department, professor and chief surgeon. He studied at the Fourth Military Medical University in 1982 and has been working in Xijing Hospital since graduation. He has also studied in Japan.

For many years, he has been conducting experimental research and clinical work about abdominal surgery. As a major team member, he was the first to successfully carry out the first living donor liver transplant, the first case of auxiliary partial orthotopic liver transplantation and the first case of pediatric living donor liver transplantation in China. He has participated in the management of various types of transplantation, such as heart transplantation, pancreas and kidney transplantation and face transplantation. He has cooperated with others in the development of organ preservation tables and other equipment. He is exceptionally good at performing transplantation surgery.²⁰⁰

Name: Sun Xitai

Serial number: NJGL009

Gender: male

Date of birth: February 1965

Profile: Sun Xitai is associate chief surgeon of general surgery (hepatobiliary surgery), M.D., associate professor and master's degree student supervisor. Presently, he is the director of the Minimally Invasive Laparoscopic Surgery Department in Nanjing Drum Tower Hospital. He is the secretary of Jiangsu Province Organ Transplantation Society of the Chinese Medical Association and a member of the Laparoscopic Surgery Group.²⁰¹

Name: Guo Hongqian

Serial number: NJGL010

Gender: male

Profile: Guo Hongqian is the administrative director of the Urinary Surgery Department, professor and chief surgeon. He is also member of the Jiangsu Medical Association's Organ Transplantation Branch.

He conducts research on kidney transplantation and specializes in organ transplantation.²⁰²

Name: Liu Tieshi

追查迫害法輪功國際組織 (追查國際)

World Organization to Investigate the Persecution of Falun Gong (WOIPFG)

To investigate the criminal conduct of all institutions, organizations, and individuals involved in the persecution of Falun Gong; to bring such investigation, no matter how long it takes, no matter how far and deep we have to search, to full closure; to exercise fundamental principles of humanity; and to restore and uphold justice in society

Serial number: NJGL011

Gender: male

Profile: Liu Tieshi is associate chief surgeon of the Urinary Surgery Department.

He graduated from Jilin University in 2003 with a master's degree and studied under the supervision of Professor Fu Yaowen, a famous urologist in China. He has been working since August 2003.

From August 2012 to August 2013, he studied at the Medical University of South Carolina and received his second master's degree (Master of Science in Clinical Research, MSCR).

He specializes in renal transplantation and perioperative management.²⁰³

Name: Li Xiaogong

Serial number: NJGL012

Gender: male

Profile: Li Xiaogong is chief surgeon of the Urinary Surgery Department, associate professor at Nanjing University of Chinese Medicine, secretary of the Communist Party Branch of the Urinary Surgery Department and master's degree student supervisor. He is a member of Jiangsu Urology Branch's Renal Transplantation Group.

He specializes in kidney transplant surgery.²⁰⁴

Name: Zhang Gutian

Serial number: NJGL013

Gender: male

Profile: Zhang Gutian is chief surgeon of the Urinary Surgery Department and associate professor.

He specializes in open, laparoscopic and minimally invasive endoscopic surgery related to urology and renal transplantation.²⁰⁵

Name: Zhao Xiaozhi

Serial number: NJGL014

Gender: male

Profile: Zhao Xiaozhi is attending surgeon of the Urinary Surgery Department.

He graduated from Nanjing University School of Medicine in 2006 under the tutelage of Professor Guo Hongqian of urinary surgery.

From 2008 to 2010, he was a visiting scholar at the Transplantation Research Center at Brigham and Women's Hospital, Harvard Medical School, where he conducted research on organ transplantation immunity and tumor immunity.

He specializes in kidney transplantation.²⁰⁶

Name: Liu Guangxiang

Serial number: NJGL015

Gender: female

Profile: Liu Guangxiang is attending surgeon of the Urinary Surgery Department.

She graduated from Nanjing University in 2007 and studied under the tutelage of Professor Guo Hongqian, a famous urologist in China. She studied at Brigham and Women's Hospital (BWH), Harvard Medical School, USA as a visiting scholar from June 2011 to June 2012.

She specializes in kidney transplantation.²⁰⁷

Name: Chen Ming

追查迫害法輪功國際組織 (追查國際)

追查迫害法輪功國際組織 (追查國際)

World Organization to Investigate the Persecution of Falun Gong (WOIPFG)

To investigate the criminal conduct of all institutions, organizations, and individuals involved in the persecution of Falun Gong; to bring such investigation, no matter how long it takes, no matter how far and deep we have to search, to full closure; to exercise fundamental principles of humanity; and to restore and uphold justice in society
