追查迫害法輪功國際組織（追查國際）

World Organization to Investigate the Persecution of Falun Gong (WOIPFG)

To investigate the criminal conduct of all institutions, organizations, and individuals involved in the persecution of Falun Gong; to bring such investigation, no matter how long it takes, no matter how far and deep we have to search, to full closure; to exercise fundamental principles of humanity; and to restore and uphold justice in society

China's Organ Transplant Organizations are the Executing Entities for the Communist Party's State Crime of Live Organ Harvesting

Since 1999, led by its then-leader Jiang Zemin, the Chinese Communist Party (CCP) criminal group has been manipulating China's entire state apparatus, including the Party, government, military, armed police, judicial system, and medical institutions, through the Political and Legal Affairs Commission and the "610" system, to commit nationwide mass extermination of Falun Dafa practitioners by means of live organ harvesting for transplantation. The CCP's live organ harvesting of Falun Gong practitioners is a crime against humanity and a crime of genocide initiated on the orders of Jiang Zemin.

Since the CCP's live organ harvesting of Falun Gong practitioners is a state genocidal crime conducted as a political campaign, organ transplant institutions in all provinces, central government-controlled municipalities, and autonomous regions of mainland China, including all military, armed police, and local hospitals (medical centers) are suspected to have participated in this crime, even including a considerable number of hospitals unqualified to perform organ transplants, such as small and medium-sized hospitals and specialized hospitals. Similar to how all Chinese hospitals were involved in forced abortions during the CCP's implementation of the "one-child policy", all transplant facilities in China today have participated in live organ harvesting.

In view of the broader context of the CCP's state crime of live organ harvesting, those in charge of organ transplant hospitals/centers and similar institutions in China are suspected of having been involved in the crime of live organ harvesting from groups such as Falun Gong practitioners.

Evidence Collection Methods

1. Direct and indirect comprehensive telephone investigation and on-site investigation of the people suspected of involvement in the live organ harvesting

The subjects of our investigations include government officials, policemen, doctors and other medical personnel.

Geographical Distribution of the Subjects of Investigation, and the Duration of Investigations:

The WOIPFG's subjects of investigation are people in different positions, who are located across the entire country of China. Our investigations have been ongoing for nearly two decades, and our investigation results have always been consistent. The evidence gathered by us verifies that live organ harvesting is a systematic arrangement by the CCP.

- 1) Subjects of investigation: Presidents, directors, doctors, nurses, and security guards of organ transplant hospitals.
- 2) Hospitals involved: A considerable amount of recorded evidence has been obtained from many provincial, military, armed police, and local organ transplant hospitals (centers) across China.
- 3) Time span: Our investigations on the live organ harvesting started in 1999, and they're ongoing to this day.

2. Data investigation

追查迫害法輪功國際組織（追查國際）

World Organization to Investigate the Persecution of Falun Gong (WOIPFG)

To investigate the criminal conduct of all institutions, organizations, and individuals involved in the persecution of Falun Gong; to bring such investigation, no matter how long it takes, no matter how far and deep we have to search, to full closure; to exercise fundamental principles of humanity; and to restore and uphold justice in society

- 1) We have been collecting data from the hospitals' websites and press releases.
- 2) We have been searching for and analyzing medical papers on transplantation.
- 3) We have been using the website www.archive.org to view the hospitals' previously archived information.
- 4) We have been collecting reports from the official Chinese media outlets.
- 5) We have organized all the information obtained from our investigations to create a database of the hospitals.

All the facts have shown us that the CCP is by no means a rational or normal organization or political party; but instead, it is a supra-state criminal syndicate controlled by a group of criminals who have committed crimes against humanity. The CCP's logic of thinking and principles of action are anti-human, and the crimes it has committed are forms of evil that humanity had never seen previously.

WOIPFG's investigative report series contains nearly 70 investigation reports on the alleged organ harvesting of living Falun Gong Practitioners at major Chinese military and civilian hospitals and on their staff members suspected of participation in this crime. This volume contains five such investigation reports.

WOIPFG's Investigative Report on the Alleged Organ Harvesting of Living Falun Gong Practitioners at Shandong Provincial Qianfoshan Hospital and Its Staff Members Suspected of Participation

Address: No.16766, Jingshi Road, Jinan City, Shandong Province

Preface

Qianfoshan Hospital in Shandong Province is a comprehensive Grade III Level A general hospital. It has

追查迫害法輪功國際組織（追查國際）

World Organization to Investigate the Persecution of Falun Gong (WOIPFG)

To investigate the criminal conduct of all institutions, organizations, and individuals involved in the persecution of Falun Gong; to bring such investigation, no matter how long it takes, no matter how far and deep we have to search, to full closure; to exercise fundamental principles of humanity; and to restore and uphold justice in society

performed multi-organ transplants such as heart-kidney joint transplantation, liver-kidney joint transplantation, heart-lung joint transplantation, testis transplantation and corneal transplantation¹. It was the only hospital that can carry out bone marrow hematopoietic stem cell transplantation among provincial Grade III Level A hospitals, and it has been established as a designated hospital for hematopoietic stem cell collection in the China Marrow Bank. In addition, the doctors of the hospital admitted that there were transplanted organs coming from Falun Gong practitioners.

I. Hospital Profile

Qianfoshan Hospital of Shandong Province is a comprehensive Grade III Level A hospital with 95 clinical and medical science departments and 2880 open beds. At present, there are 3775 employees and more than 600 professional and technical personnel above associate senior level. Organ transplantation is the characteristic technology brand of the hospital. The hospital has obtained the qualifications to carry out heart, liver, and kidney transplants at the same time. It is the only unit in the province that has the qualifications for heart transplantation. It has successively carried out combined heart-kidney transplantation, combined liver-kidney transplantation, combined heart-lung transplantation, pediatric liver, testicular transplantation, and corneal transplantation².

II. Qianfoshan Hospital is the largest liver transplant center and base in Shandong Province.

Qianfoshan Hospital of Shandong Province, cooperating with Tianjin First Central Hospital and Oriental Organ Transplantation Institute, has the highest amount of liver transplantation in China, to establish the "Oriental Organ Transplantation Institute Shandong Liver Transplant Center". Shen Zhongyang was hired as the professor of the center and the diagnosis and treatment standards They are all implemented in accordance with the standards of Tianjin First Central Hospital and Oriental Organ Transplant Research Institute. It is the largest liver transplant center and base in Shandong Province. The hospital ranks first in the province in terms of the number of liver transplant operations³.

III. The hospital's transplantation department not only has a large number of beds, but also has a strong team of liver and kidney transplant doctors.

The General Surgery Center of Qianfoshan Hospital of Shandong Province has a liver transplantation department with more than 80 beds⁴. The Shandong Liver Transplant Center of the Eastern Organ Transplantation Research Institute was jointly established with Tianjin, and established the first specialized liver transplant department in Shandong Provincial Hospital⁵. In addition, there are 58 beds in the Urology Department of the hospital⁶.

Qianfoshan Hospital has a strong team of surgeons. The General Surgery Center has 7 professors and chief surgeons, 9 associate professors and deputy chief surgeons, and 10 attending surgeons, including 2 doctoral supervisors and 5 master student supervisors⁷. Urology Department is a clinical superior department of Qianfoshan Hospital. There are altogether 17 doctors and 14 doctors at all levels, including 3 senior titles, 4 deputy senior titles, 3 intermediate titles, and 4 junior titles. There are 6 with doctor degree and 6 with master's degree. The department undertakes the teaching tasks of Shandong University School of Medicine all year round. There are 2 Shandong University professors, 2 associate professors and 3 master tutors in the department⁸. Multiple liver and kidney transplant teams can be formed. The hospital also hired many transplant experts to provide technical guidance.

追查迫害法輪功國際組織（追查國際）

World Organization to Investigate the Persecution of Falun Gong (WOIPFG)

To investigate the criminal conduct of all institutions, organizations, and individuals involved in the persecution of Falun Gong; to bring such investigation, no matter how long it takes, no matter how far and deep we have to search, to full closure; to exercise fundamental principles of humanity; and to restore and uphold justice in society

Zang Yunjin, from September 1999 to December 2000, a visiting scholar at the University of Pittsburgh Medical Center (UPMC), Thomas E. Starzl Transplant Institute, Transplant Surgery, studied liver under Professor John J. Fung, Chairman of the World Association for Liver Transplantation, for 15 months. In December 2000, returned to China and established the Liver Transplantation Department of Qianfoshan Hospital in Shandong Province, and planned to establish the Shandong Liver Transplant Center of the Eastern Organ Transplantation Research Institute. In January 2005, Zang Yunjin joined the Institute of Liver Transplantation of the Armed Police General Hospital and was appointed as the deputy director, chief surgeon, and professor in April⁹. As of February 2021, he has performed more than 2,600 liver transplants.¹⁰

In 2008, Peng Zhihai, the dean of Shanghai First People's Hospital, was appointed as a distinguished expert on the post of Taishan Scholar of Shandong Province in Qianfoshan Hospital of Shandong Province¹¹.

IV. Multiple telephone surveys pointed out that the hospital was involved in live organ harvesting. Some donors were from Falun Gong practitioners, and the number of organ transplants was large

1. The doctors of the hospital admitted that the source of the organs was Falun Gong practitioners and gathered forces to quickly complete a large number of transplantations in April 2006

Respondents: Doctors of Liver Transplant Center of Qianfoshan Hospital, Shandong Province

Executive summary:

Question: There is a kind of liver that comes from the kind of Falun Gong. I just ask if there is that kind?
Doctor: Oh, just come here. Question: It means there is! Doctor: Let's do this, come here---um---Anyway, there will be more such donors in April. Now these donors are gradually increasing¹². (Recording 1 download: [MP3](#) , manuscript download: [pdf3](#))

2. Senior employees of Shandong Jinan Medical System disclosed that the hospital was involved in the removal of living organs.

According to an exclusive report by The Epoch Times, senior employees who have worked in the Jinan Medical System in Shandong Province for more than 20 years disclosed that many living donor organ transplants were carried out by "Shandong Qianfoshan Hospital", "Shandong Provincial Police General Hospital", "Shandong Provincial Prison" and "Shandong Province Women's Prisons" (both of them located on Gongye South Road, the women's prisons are located in the southwest corner of the men's prisons, and the external sign is "Shandong Xingye Development Co., Ltd.") , and colluded with more prisons and labor camps. What they form is a "large-scale streamlined" operation, from the placement of personnel for organ exchange, to the removal of living organs, organ transplantation, and lump-sum expenses¹³.

3. Telephone recordings show a large amount of kidney transplantation happened

Respondent: Duty officer of the Kidney Transplantation Office of Urology Surgery, Qianfoshan Hospital, Shandong Province

Investigation time: April 7, 2016 (+86+531_89238518)

Executive summary: Kidney transplantations have been done a lot; I am not sure about the specifics this year. Anyway, We have done a lot of them, keep doing¹⁴.

(Recording 2 Download [MP3](#), Manuscript download: [Attachment 19](#))

追查迫害法輪功國際組織（追查國際）

World Organization to Investigate the Persecution of Falun Gong (WOIPFG)

To investigate the criminal conduct of all institutions, organizations, and individuals involved in the persecution of Falun Gong; to bring such investigation, no matter how long it takes, no matter how far and deep we have to search, to full closure; to exercise fundamental principles of humanity; and to restore and uphold justice in society

V. List of responsible persons

SDQF001 Men Tongyi

Sex: male

Date of birth: March 1962¹⁵.

Personal profile: Director of Organ Transplantation Center and Director of Kidney Transplantation Center of Qianfoshan Hospital of Shandong Province. National Committee Member of Kidney Transplantation Branch of Urology Professional Committee, Chinese Medical Association. Chairman of the Organ Transplant Professional Committee of Shandong Medical Association. Leader of Shandong Organ Transplant Technology Innovation Alliance. Director of Shandong Provincial Key Laboratory of Medicine and Health-Organ Transplantation and Kidney Disease Laboratory. Vice Chairman of the Organ Transplant Professional Branch of Shandong Medical Association.

Successively studied at the Massachusetts General Hospital of Harvard University, the Affiliated Hospital of Tokyo Women's Medical University in Japan, and the Affiliated Hospital of Seoul University in South Korea.

Especially skilled at all kinds of minimally invasive urological surgery and kidney transplantation techniques¹⁶.

SDQF002 Zang Yunjin

Sex: male

Date of birth: October 29, 1964.

Personal profile: Chief surgeon, associate professor, director of Shandong Liver Transplant Center, Oriental Organ Research Institute (Tianjin).

Graduated from the Medical Department of Changwei Medical College in July 1985. In 1998, studied for an on-the-job master's degree in General Surgery of Shandong Medical University.

From September 1999 to December 2000, as a visiting scholar at the University of Pittsburgh Medical Center (UPMC), the Transplant Surgeon Department of Thomas E. Starzl Transplant Institute, studied liver transplantation techniques from Professor John J. Fung, Chairman of the World Association for Liver Transplantation. Recommended by Professor John J. Fung, he was accepted as a surgeon member by the International Liver Transplant Society (ILTS) in June 2000.

Established the Liver Transplantation Department of Qianfoshan Hospital in Shandong Province; prepared for the establishment of the Shandong Transplantation Center of the Oriental Organ Research Institute; completed the first modified piggyback liver transplantation and classic non-bypass orthotopic liver transplantation surgery in Shandong Province; the project leader of Fundamental and Clinical Research Project of Allogeneic Orthotopic Liver Transplantation, a major scientific and technological research project of Digital Shandong 2002¹⁷.

As of February 2021, he has performed more than 2,600 liver transplants. In the early morning of February 26, 2021, he committed suicide by jumping off a building.¹⁸

To investigate the criminal conduct of all institutions, organizations, and individuals involved in the persecution of Falun Gong; to bring such investigation, no matter how long it takes, no matter how far and deep we have to search, to full closure; to exercise fundamental principles of humanity; and to restore and uphold justice in society

SDQF003 Wang Jianning

Sex: male.

Personal profile: Deputy Chief Surgeon, Deputy Director of Urology Surgical Department. Vice Chairman of the Youth Committee of Organ Transplantation, Chinese Medical Doctor Association. Member of the Organ Transplantation Committee of Shandong Medical Association

Visiting scholar at the Urology Surgical Department of the University of California School of Medicine (UCLA) and Cleveland Medical Center.

Specializes in kidney transplantation¹⁹.

SDQF004 Wei Xuebin

Sex: male.

Personal profile: Chief surgeon of the First Department of Urology, Deputy Director of Urology

Good at the diagnosis and treatment of kidney transplantation²⁰.

SDQF005 Wang Zhensheng

Sex: male.

Personal profile: Chief Surgeon and Professor of Urology Surgical Department

Focus on kidney transplantation²¹.

SDQF006 Huang Shiming

Sex: male.

Personal profile: Deputy Chief Surgeon and Associate Professor of Urology Surgery Department

Has clinical experience in kidney transplantation²².

SDQF007 Liu Qingyong

追查迫害法輪功國際組織（追查國際）

World Organization to Investigate the Persecution of Falun Gong (WOIPFG)

To investigate the criminal conduct of all institutions, organizations, and individuals involved in the persecution of Falun Gong; to bring such investigation, no matter how long it takes, no matter how far and deep we have to search, to full closure; to exercise fundamental principles of humanity; and to restore and uphold justice in society

Sex: male

Personal profile: Chief surgeon of the First Department of Urology.

Served as Deputy Director of Urology Department, Director of Urology Department, Director of Nephrology/Transplantation Department (city-level leader of key discipline), and Deputy Director of General Surgery Department of Jinan Central Hospital.

Focuses on kidney transplantation²³.

SDQF008 Teng Mujian

Sex: male

Personal profile: Chief surgeon of Hepatobiliary Surgery department, Professor of Shandong University, Director of the First Department of Hepatobiliary Surgery. Vice Chairman of Shandong Organ Transplantation Association, Vice Chairman of Shandong Organ Transplant Surgeon Association, Vice Chairman of Organ Transplant Expert Group of Shandong Red Cross Society.

Specializes in liver transplantation²⁴.

SDQF009 Guo Yuan

Sex: male

Personal profile: Deputy Chief Surgeon, Deputy Director of the First Department of Hepatobiliary Surgery.

Graduated from the Department of Clinical Medicine of Shandong Medical University in 1995, and receives a doctoral degree from the Department of Medicine of Peking University in 2000. In the same year, he entered the Department of General Surgery of Shandong Qianfoshan Hospital.

In 2003, studied for one year in the Department of Liver Transplantation, Kyoto University, Japan, the largest living donor liver transplant center in the world. In 2011, he studied at the UCLA Medical Center in the United States for half a year.

In 2002, he participated in the establishment of the Liver Transplant Center. Liver transplantation was started in 2002. Liver transplantation was performed for patients with end-stage cirrhosis, ascites, upper gastrointestinal bleeding, jaundice, liver coma, liver cancer and other serious complications²⁵.

SDQF010 Li Zhiqiang

Sex: male.

Personal profile: Deputy Chief Surgeon of Hepatobiliary Surgery.

He graduated from the Department of Medicine of Shandong Medical University in 1986, engaged in clinical anesthesia, and established an Intensive Care Center in 1998. In 2001, he established the Department of Liver Transplantation, responsible for postoperative monitoring and preoperative and postoperative management of liver transplant patients, and

追查迫害法輪功國際組織（追查國際）

World Organization to Investigate the Persecution of Falun Gong (WOIPFG)

To investigate the criminal conduct of all institutions, organizations, and individuals involved in the persecution of Falun Gong; to bring such investigation, no matter how long it takes, no matter how far and deep we have to search, to full closure; to exercise fundamental principles of humanity; and to restore and uphold justice in society

successfully completed 18 liver transplant operations. Skilled at liver transplantation, monitoring and management after liver transplantation²⁶.

SDQF011 Li Jie

Sex: male

Personal profile: Chief surgeon, professor, director of the Second Hepatobiliary Surgery Department²⁷.

He has been engaged in clinical work for nearly 20 years and has experience in the diagnosis and treatment of hepatobiliary and pancreatic diseases, especially liver transplantation.

SDQF012 Tian Hu

Sex: male.

Personal profile: Chief surgeon, deputy director of the Second Hepatobiliary Surgery Department

Good at endoscopic diagnosis and treatment of biliary complications after liver transplantation²⁸.

SDQF013 Liu Tianqi

Sex: male.

Personal profile: Chief surgeon, professor, and deputy director of surgery.

Graduated from Shandong Medical College in 1984 and has been engaged in cardiovascular surgery since graduation. From 1991 to 1992, studied in the Department of Cardiac Surgery at the General Hospital of Shenyang Military Region. He studied under Professor Wang Zengwei, a famous domestic cardiologist, for one year, and had systematically studied the surgical treatment of various complicated congenital heart diseases.

From April 2002 to October 2003, he was sent abroad to study cardiology at St. Michael's Hospital of the University of Toronto, Canada for one and a half years. He studied with Professor Lee Errett, a well-known cardiologist, focusing on coronary artery bypass surgery, aortic aneurysm surgery and heart valves Surgery etc.

He currently is mainly responsible for heart transplantation and has completed 10 heart transplant operations, all of which have been successful, reaching the advanced level in China and the province. In addition, he completed the first heart-kidney transplantation operation in the province. Good at heart transplantation²⁹.

SDQF014 Wang Dong

Sex: male

Personal profile: Deputy Chief Surgeon, Associate Professor, Deputy Director of Cardiac Surgery, Member of Organ Transplant Branch of Shandong Medical Association.

追查迫害法輪功國際組織（追查國際）

World Organization to Investigate the Persecution of Falun Gong (WOIPFG)

To investigate the criminal conduct of all institutions, organizations, and individuals involved in the persecution of Falun Gong; to bring such investigation, no matter how long it takes, no matter how far and deep we have to search, to full closure; to exercise fundamental principles of humanity; and to restore and uphold justice in society

From December 2005 to February 2006, went to Houston for the second time to study at the famous Michael E. DeBakey Heart Center and Texas Heart Institute, studied aortic aneurysm surgery, heart transplantation and artificial heart surgery, under Professor Joseph Coselli, a well-known macrovascular surgery expert and Professor George Noon, a heart transplant expert.

Specializes in heart transplantation³⁰.

SDQF015 Li Jun

Sex: male.

Personal profile: Deputy Chief Surgeon of Cardiac Surgery

Visiting scholar at the German Heart Center (Berlin).

Professional expertise: heart transplantation³¹.

SDQF016 Liu Luqi

Sex: male

Personal profile: Director of Cardiac Surgery, Chief Surgeon and Professor. Member of Shandong Branch of Chinese Society of Organ Transplantation.

Graduated from Shandong University School of Medicine. Engaged in cardiovascular surgery for 29 years. He went to Beijing Fuwai Hospital, the country's largest cardiovascular hospital, to study cardiovascular surgery for 1 year³².

SDQF017 Jiang Zhongmin

Sex: male

Personal profile: Chief surgeon, professor, deputy dean of Thoracic Surgery Department

Went to the United States to study Cardio Surgery at HARRISBURG Asia Medical Center for 1 year. The Houston Medical Center in the United States studied surgical treatment of macrovascular diseases for 3 months.

While carrying out routine surgery, completed the first successful lung transplantation in Shandong Province. Skilled at lung transplantation³³.

SDQF018 Zang Qi

Sex: male

Personal profile: Chief surgeon, director of thoracic surgery.

Member of Shandong Society of Organ Transplantation. Member of the Organ Transplant Surgeon Branch of Shandong Medical Association³⁴.

SDQF019 Wang Xu

追查迫害法輪功國際組織（追查國際）

World Organization to Investigate the Persecution of Falun Gong (WOIPFG)

To investigate the criminal conduct of all institutions, organizations, and individuals involved in the persecution of Falun Gong; to bring such investigation, no matter how long it takes, no matter how far and deep we have to search, to full closure; to exercise fundamental principles of humanity; and to restore and uphold justice in society

Sex: male.

Personal profile: Deputy Chief Surgeon of Ophthalmology Department. Member of the Transplantation Branch of Shandong Medical Association.

Studied under Professor Xie Lixin, an academican of the Chinese Academy of Engineering, a well-known expert on corneal diseases in China.

Has made technical improvements on the operating procedures of various types of keratoplasty, such as penetrating keratoplasty, lamellar keratoplasty, amniotic membrane transplantation, anterior segment reconstruction, corneal perforation treatment, corneal suture methods, treatment methods for ocular anterior chamber empyema, etc.. Performed corneal transplantation for nearly a thousand patients with corneal diseases³⁵.

SDQF020 Dang Guangfu

Sex: male

Personal profile: chief surgeon, professor, director of Ophthalmology Department

Specialized in corneal transplant surgery³⁶.

WOIPFG's Investigative Report on the Alleged Organ Harvesting of Living Falun Gong Practitioners at the People's Hospital of Wuxi City and Its Staff Members Suspected of Participation

Hospital Address: 299, Qingyang Road, Wuxi City (at southeast corner of the junction of Jincheng Road and Qingyang Road)

Evidence shows that The People's Hospital of Wuxi City is suspected of long-term organ harvesting from living donors, including in the double lung transplant surgery for the first Covid-19 patient. Chen Jingyu, vice president of The People's Hospital of Wuxi City, said in an interview after completing the "world's first double-lung transplantation for a case of CCP pneumonia (COVID-19)" in February 2020, that lung transplantation is a routine operation, and one is done every two or three days. More than 1,000 cases of lung transplantation have been performed.³⁷ Lung transplantation at The People's Hospital of Wuxi City began in the third year after the CCP persecuted Falun Gong, that is, in 2002, the first lung transplant was performed. As of October 13, 2022, The Lung Transplantation Center of The People's Hospital of Wuxi City, led by Professor Chen Jingyu, had completed over 1500 lung transplant surgeries.³⁸

I. Hospital Overview

The People's Hospital of Wuxi City is the largest public hospital in the Wuxi area and a tertiary class A

追查迫害法輪功國際組織（追查國際）

World Organization to Investigate the Persecution of Falun Gong (WOIPFG)

To investigate the criminal conduct of all institutions, organizations, and individuals involved in the persecution of Falun Gong; to bring such investigation, no matter how long it takes, no matter how far and deep we have to search, to full closure; to exercise fundamental principles of humanity; and to restore and uphold justice in society

hospital, formed by the combination of the former Wuxi No.1 Hospital, Children's Hospital and Municipal No.5 Hospital in 2007. The hospital, with 1,800 beds, has medical, teaching, research, health care and rehabilitation programs. In July 2020, the hospital was officially incorporated into the management system of the directly affiliated hospital of Nanjing Medical University, becoming the first directly affiliated hospital of Nanjing Medical University outside of Nanjing. By the end of 2019, the hospital has 145 doctors, 734 masters, 7 doctoral supervisors, 83 master's supervisors, 650 health technicians with senior titles, etc.³⁹

The hospital's lung transplant technology is in the leading position in China, and the National Commission of Public Health's Lung Transplant Quality Control Center, the Lung Transplant Data Center, the National Drug Clinical Trial Institute, and the first residency training bases are all located in the hospital.⁴⁰

II. The hospital's Lung Transplant Operations Account for half of the total in China

As of October 2022, the Lung Transplantation Center of The People's Hospital of Wuxi City, under the leadership of academic leader Professor Chen Jingyu, has specialized in lung transplantation for 20 years, and has completed more than 1,500 cases of lung transplantation, accounting for half of the total number of lung transplant operations in the country, and has become the largest in Asia, and one of the world's top three lung transplant diagnosis and treatment centers.⁴¹

According to relevant information, the Lung Transplantation Center of the People's Hospital of Wuxi City, under the management of the lung transplant team headed by Professor Chen Jingyu, has become a key clinical discipline in Jiangsu Province, a lung transplant treatment center in Jiangsu Province, and a national lung transplant data registration management unit, and it has the key laboratory for human organ transplantation in Jiangsu Province.

The lung transplant team of the hospital has 3 chief surgeons, 2 associate chief surgeons, 1 with medical doctor's degree, 7 with master's degree, 1 doctoral supervisor and 3 master's supervisors. There are 26 general hospital beds and 6 ICU beds. At present, the total number of surgeries accounts for more than half of the national total, and the annual volume of surgeries is 50 plus cases, and it has become the top 8 lung transplantation centers in the world. In 2010, it's lung transplantation won the second prize of Chinese Medical Science and Technology Award and the third prize of Science and Technology Progress Award in Jiangsu Province.

Data show that the hospital's Lung Transplantation Center has always led the way in lung transplantation in China, having hosted six conferences for national continuing education programs for national heart and lung transplantation and providing guidance to more than 30 tertiary hospitals across China in recent years, in Beijing, Guangzhou, Hangzhou, Fuzhou and Wuhan, in their lung transplantation⁴². Chen Jingyu has led the team to complete more than 1,000 lung transplant surgeries.⁴³

In 2021, Wuxi City established the Jiangsu Lung Transplant Center, Wuxi Organ Transplant Rehabilitation Hospital, and Wuxi Organ Transplant Research Institute, and the Municipal People's Hospital became the only unit in the province with the qualifications for transplantation of the three major organs (lung, liver, and kidney).⁴⁴

In February 2022, Chen Jingyu said that during the 20 years of clinical lung transplantation work, he performed more than 1,500 lung transplants, and in 2021 he performed more than 200 lung transplants.⁴⁵

追查迫害法輪功國際組織（追查國際）

To investigate the criminal conduct of all institutions, organizations, and individuals involved in the persecution of Falun Gong; to bring such investigation, no matter how long it takes, no matter how far and deep we have to search, to full closure; to exercise fundamental principles of humanity; and to restore and uphold justice in society

In December 2022, Chen Jingyu, who is known as "NO.1 in lung transplantation in China" and is currently the vice president of the Second Affiliated Hospital of Zhejiang University School of Medicine, posted on her Sina Weibo, showing off her "achievement" in lung transplantation, saying that he performed two double lung transplants a day, and completed 213 lung transplants in 2021. On December 13, 2022, Chen Jingyu also provided a picture, which is the organ receipt confirmation letter from the transplant center, showing that the lung source comes from the distribution system of the national network distribution system. He also said that "today is the 147th case of lung transplantation in our hospital in 2022".⁴⁶ On January 8, 2023, the team in Wuxi completed the first double-lung transplant surgery for a patient with respiratory failure caused by emphysema, who had previously recovered from the COVID-19 infection.⁴⁷

陈静瑜肺腑之言

11-13 05:47 来自 iPhone客户端

器官移植因为不知道什么时候有爱心捐献，所以医生一般都是24小时待命，急诊手术为主，本周对我来说也是繁忙的一周，周一在无锡门诊，接下来周二开始自己也被移植了，不知不觉6天内在各地主刀了9台肺移植，肺移植成了常规的普胸手术。2021年我自己上台主刀完成了213例肺移植，今年不知道会做多少？

Figure 2 The organ receipt confirmation letter from the Transplantation Center of Wuxi City Hospital. (Weibo photo)

III. The hospital has a strong lung transplant team

From the first lung transplant operation in 2002 to 2021, the Lung Transplant Center of The People's Hospital of Wuxi City has established three teams, capable of performing three operations at the same time and completing six lung transplants within 24 hours. With the establishment of the Lung Transplantation Department of the China-Japan Hospital, Chen Jingyu will lead a team at the China-Japan Hospital.⁴⁸

In 2022, the lung transplant team of The People's Hospital of Wuxi City can perform 4 lung transplants at the same time, setting a record of completing 6 lung transplants within 24 hours. It has assisted more than 30 tertiary hospitals in China in developing lung transplantation technology. The Lung Transplantation Data

追查迫害法輪功國際組織（追查國際）

World Organization to Investigate the Persecution of Falun Gong (WOIPFG)

To investigate the criminal conduct of all institutions, organizations, and individuals involved in the persecution of Falun Gong; to bring such investigation, no matter how long it takes, no matter how far and deep we have to search, to full closure; to exercise fundamental principles of humanity; and to restore and uphold justice in society

Management Center of the National Health Commission, the National Quality Control Center for Lung Transplantation, the Executive Chairman Unit of the China Lung Transplantation Alliance, the Leader Unit of the Lung Transplantation Group of the Chinese Organ Transplantation Society, and the Jiangsu Provincial Lung Transplantation Center have all settled in The People's Hospital of Wuxi City.⁴⁹

On November 7, 2019, Zheng Mingfeng, director of the Department of Thoracic Surgery of The People's Hospital of Wuxi City, told the reporter of "Yangtze Evening News" that the development of thoracic surgery focuses on the training of talent echelons. At present, in addition to four doctors in the Department of Thoracic Surgery who can independently perform lung transplantation and guide operations all over the country, there are also three talented doctors who can be fully responsible for the operations, and the construction of a talent echelon has achieved initial results.⁵⁰

IV. The large numbers of surgery show sufficient source of organs

The hospital's lung transplant team can perform 4 lung transplants at the same time, and once set a record of completing 6 lung transplants within 24 hours.

From the third day of the Lunar New Year on February 3, 2022 to the early morning of February 4, the Wuxi and Zhejiang Second lung transplant teams led by Chen Jingyu completed a total of 4 lung transplant operations.⁵¹

In the past 6 years, the lung transplant team of The People's Hospital of Wuxi City has completed more than 100 lung transplants every year, ranking first in Asia and top three in the world. The lung transplant team of The People's Hospital of Wuxi City can perform 4 lung transplants at the same time, and once completed 6 lung transplants within 24 hours.⁵²

According to mainland China's media reports, Chen Jingyu is the director of the lung transplantation departments of The People's Hospital of Wuxi City and China-Japan Friendship Hospital, the only such case in China. On April 15, 2021, within one day, Director Chen Jingyu led the lung transplant team of the China-Japan Hospital, which was established less than two months ago, to successfully complete two difficult lung transplant operations, which is the first time in Beijing. Two days before coming to China-Japan Hospital on April 14, 2021, Chen Jingyu had just completed 4 lung transplants within 24 hours, 3 of which were in The People's Hospital of Wuxi City, and then rushed to Hefei to have one done. After completing two surgeries at the China-Japan Hospital on the 15th, he rushed to Kunming on the 17th to perform an emergency double lung transplant. On the 19th, Chen Jingyu appeared again at the China-Japan Hospital and completed a transplant operation.⁵³

In 2020, "the most done in one day, 5 double lung transplants were performed within 20 hours." ⁵⁴

V. First Double Lung Transplant in Covid-19 Pneumonia Case Suspected to Be Live Organ Harvesting

Based on the records of WOIPFG's investigation of Chen Jingyu, Vice President of the People's Hospital of Wuxi City, and in the context of the evidence of the massive organ harvesting of living Falun Gong practitioners by the Chinese Communist Party for more than a decade and the establishment of organ donor banks for living people in various places, the source of the donor used in the double lung transplantation of the Covid-19 pneumonia case by Chen Jingyu's team is suspected to be live organ harvesting.

The donor lungs were obtained in less than 5 days, unlikely from citizen donations, and suspected to have come from a living organ donor bank

追查迫害法輪功國際組織 (追查國際)

World Organization to Investigate the Persecution of Falun Gong (WOIPFG)

To investigate the criminal conduct of all institutions, organizations, and individuals involved in the persecution of Falun Gong; to bring such investigation, no matter how long it takes, no matter how far and deep we have to search, to full closure; to exercise fundamental principles of humanity; and to restore and uphold justice in society

The lung transplants at Wuxi People's Hospital of Nanjing Medical University, both of which were highly publicized by the Communist Party media on February 29 and March 1, 2020, took less than 5 days to obtain both lungs.

1) Brief Description of the Case

According to *The Beijing Youth Daily*, a 59-year-old male developed Covid-19 pneumonia on January 23, was extubated on February 7, received ECMO on February 22, was transferred to the Infectious Disease Hospital of Wuxi City on February 24 and scheduled to have a lung transplant. On February 29, the team headed by Chen Jingyu, vice president of the People's Hospital of Wixi City affiliated with Nanjing Medical University, completed a double lung transplant.⁵⁵

It took less than 5 days to obtain both lungs, from the diagnosis of Covid-19 pneumonia to hospital rescue, to nucleic acid test for viral negativity conversion, to the decision on lung transplantation, to searching for donor lungs, organ excision and transfer, to systematic testing before transplantation, mating, other preparations before surgery, etc., and finally to receiving the double lung transplantation.

This is only the time needed for transplant surgery for the recipient patient. Also, not to be overlooked is the search for the donor, screening, tissue matching, etc., which takes more time. Therefore, in this case, the preparation of both recipient and donor organs was completed in less than 5 days, which was not possible with normal donor organs, which means that the organs came from a known available donor, the data was tested and ready beforehand, and the operation was only determined by the selection of the recipient patient.

2) Introduction to Organ Transplantation Matching Rates

Under normal circumstances, the matching rate for large allogeneic organ transplants is very low, with the International Kidney Association's data showing a 6.5% matching rate for leukocyte histocompatibility antigen (HLA) between non-relatives. In other words, to find a kidney organ with the right match for a particular patient to complete a kidney transplant, instead of looking for it in the normal population, one must find 15 people who have just died (finishing cutting out the heart and lungs within 6 minutes of blood supply cut off), or brain dead donors (donor who can provide the organ at that time), from which it is possible to get a suitable organ. This is very hard to come by, which is why in many advanced countries (e.g., the United States), patients wait for organs (i.e., positive matches) and the waiting time is typically as long as 2-3 years.

3) A Brief Comparison of Organ Donation in China and the United States

In mainland China, however, after the persecution of Falun Gong in July 1999, there were organs waiting for patients (i.e., reverse matching), and the waiting time was as short as 1-2 weeks or even a few hours. That is, they stockpiled enough living human organ donors whose organs could be taken at any time.

On March 24, 2012, *Xinhua News Network* reported that former U.S. Vice President Dick Cheney had been on the heart transplant list for nearly two years (20 months) before he received a donor organ and completed the surgery.

In the United States there are 120 million people registered to donate organs, and in 2016, only 15,951 people donated organs (an annual donation rate of 1.34 per 10,000.) For a major organ transplant such as liver or kidney, one needs to wait for 2 to 3 years on average.

追查迫害法輪功國際組織（追查國際）

World Organization to Investigate the Persecution of Falun Gong (WOIPFG)

To investigate the criminal conduct of all institutions, organizations, and individuals involved in the persecution of Falun Gong; to bring such investigation, no matter how long it takes, no matter how far and deep we have to search, to full closure; to exercise fundamental principles of humanity; and to restore and uphold justice in society

On May 5, 2018, Huang Jiefu, chairman of China Human Organ Donation and Transplantation Committee, introduced "Give to Receive" as China's first online organ donation volunteer registration system, and the number of volunteers registered online exceeded 300,000, meaning that 300,000 people have indicated their intention to donate organs⁵⁶. Huang Jiefu claimed that "China has 4,080 cases of donated organs in 2016⁵⁷" (an annual donation ratio of 136/10,000, more than 100 times that of the United States), and that "in 2017, China has 5,148 cases of donated organs (an annual donation ratio of 171.6/10,000) and completed 16,000 large organ donations.⁵⁸" The average wait for organ transplantation in China is between 2 and 4 weeks, the fastest being 4 hours, and emergency liver transplantation within 72 hours accounts for 26.6%.⁵⁹

According to international figures, the normal mortality rate of donor registrants is 7/1000, and only 1 % to 2 % of registered deceased persons end up being eligible to provide organs for transplantation due to illness, unhealthy lifestyles, age, and the time lag between death and organ harvesting.

If the above reasoning is used to analyze the 300,000 Chinese organ donors, the result is: "In 2016, 7/1,000 of these 300,000 people passed away, roughly that's 2,100 people. Of these, 1-2% could provide organs for transplantation, which equates to only 21-42 organ donors⁶⁰. However, the CCP claims that "In 2016 it reached 4,080 cases."⁶¹ "In 2017, China has 5,148 cases of donated organs".⁶² This suggests that the CCP's organs come from other sources.

Normal citizen donations are random and cannot be planned. Unless there is a rather huge number of special incarcerated people ready to be killed for their organs, it would be impossible to meet such a huge number of emergency transplants and that ultra-short wait for organ acquisition.

Therefore, it is unlikely that this case of ultra-short wait for donor lung acquisition came from a citizen donation and is suspected to have come from a living human organ donor bank.

VI. The 100 cases of lung excision in Wuxi City is suspected of killing living people, Chen Jingyu is a participant and one of the authors of the relevant papers.

Chen Jingyu, known as the first Chinese Lung Transplant surgeon, and Wang Zhenxing, Zheng Mingfeng, Ye Shugao, Liu Feng, Chen Ruo, Lu Rongguo, and Wei Dong wrote the paper "100 cases of lung transplant donor lung acquisition: the effect of cold ischemia time >6 h and lung decompensation on prognosis." ⁶³The paper documented the circumstances of the alleged killing of 100 people by live organ harvesting.

1 对象和方法

设计: 病例分析。

时间及地点: 于2002-09/2011-01在无锡
市人民医院肺移植中心完成。

对象: 纳入供肺获取的100例供者和101例
受者, 双肺移植29例, 单肺移植72例, 男性79
例, 女性22例, 年龄15~74岁, 平均(57.26±10.8)
岁, 原发疾病包括: 特发性肺间质纤维化48例,
慢性阻塞性肺疾病33例, 职业性尘肺5例, 支气
管扩张5例, 先天性心脏病室间隔缺损合并艾森
曼格综合征4例, 肺结核2例, 特发性肺动脉高
压2例, 肺淋巴管平滑肌瘤病1例、原发性肺泡
细胞癌1例。

受者诊断标准: 肺气肿和慢性阻塞性肺病、
特发性肺间质纤维化、囊性纤维化、原发性肺
动脉高压、支气管扩张症等是主要的肺移植适
应症。在选择肺移植受者时, 要综合衡量患者
做与不做肺移植的预期寿命以及肺移植后患者
生活质量改善的程度, 来决定患者是否进入移

龄、吸烟史、革兰染色(+)等都可适度放宽, 但
放宽的尺度主要依赖于研究者的临床经验, 这就
导致一些成功经验不能在其他中心得到重复。

受者排除标准: ①2年内发生过恶性肿瘤(皮
肤鳞状细胞癌和基底细胞癌例外), 但有少数中
心把支气管肺泡癌无远处转移者列为适应证,
这一做法仍有争议。②无法治愈的另一器官系
统功能障碍。③无法治愈的慢性肺外感染, 严
重的胸廓或脊柱畸形。④对治疗或随访依从性
差, 无法治愈的心理或精神疾患。⑤缺乏稳固
可靠的社会支持系统^[6]。

方法:

无锡5年多成功完成29例器官捐献

【字号 大 中 小】 2017年01月10日 11:03:06

来源：无锡日报

8日晚9时，锡城16岁少年晨晨（化名）的生命停止了。他的家属深明大义，决定无偿捐献出儿子的多个器官，用于救治需要器官移植的重症患者。昨日凌晨6时，他的心、肺、肝、肾6个大器官被摘取下来，争分夺秒送往各地医院，至昨天下午，他捐献出的器官成功移植进5位患者体内。这是今年无锡市成功的第一例器官捐献案例。

一个月前，晨晨因头痛、恶心、呕吐，到医院检查发现患上了脑部疾病。孩子的病情和巨额的医药费压得这个不幸的家庭喘不过气来，手术治疗后，晨晨的病情并没有好转。尽管自己很不幸，但他们的心很善良，在得知可以捐献器官救他人时，晨晨的父母同意了。昨天凌晨3时30分，脑死亡的晨晨被推入手术室，接受了器官摘取。他捐出了所有可用的大器官，包括心脏、双肺、双肾和肝脏，分别挽救无锡、南京、苏州和常州的5位器官衰竭患者的生命。

据了解，2011年7月无锡市被列入全国人体器官捐献试点城市，批准开展心脏死亡器官捐献移植工作，至今5年多来，全市已完成器官捐献29例，捐出大器官94个，让89名器官衰竭患者重获新生。（杨明洁）

Figure 4 In July 2011, Wuxi City began organ donation pilot program. The total donations: 29 cases by 2017.

The analysis of the above case:

1) The donor is not a voluntary one.

Time of the 100 cases of experimental lung excision described in the paper: September 2002 to January 2011
The pilot organ donation in Wuxi City: It started only in July 2011, and had a total of only 29 donations by 2017.

2) The donor is not a death row inmate.

The location of these 100 lung removals: the operating room of the Lung Transplantation Center of the People's Hospital of Wuxi City.

In China, executions of death row inmates are strictly regulated and are carried out according to the time and place decided by the Supreme Court of the Communist Party of China, and the executions must be carried out in the presence of the court, the prosecutor's office, and other relevant personnel, so the removal of organs from death row inmates cannot be carried out in the operating room. Therefore, it is not possible for the donor to be a death row inmate.

According to the above analysis, it is unlikely that the organs described in this report came from donated organs or organs from death row inmates, but most likely they came from organs of Falun Gong practitioners or other people in the secret "Chinese Communist Party's organ bank for living donors", and thus live organ harvesting is highly suspected.

VII. The hospital has an abundance of organ donors and provides emergency transplants with suspicious organ sources.

On August 13, 2015, Chen Jingyu, vice president of the People's Hospital of Wuxi City and the CCP's No.1 surgeon in lung transplants, publicly stated, "I had thought that there would be fewer lung donor sources as donors from death row inmates have been canceled this year, but now there's one lung transplant every three days and we are even busier than last year."⁶⁴

Figure 5 Chen Jingyu's Sina Weibo @Chen Jingyu's words from heart, Screenshot on August 13, 2015

Figure 6 Chen Jingyu's Sina Weibo screenshot: "Have been doing it from October 1 to Oct 31, creating a new monthly high."

On November 13, 2022, Chen Jingyu, the vice president of the hospital, posted on his Sina Weibo, "This week is a busy week for me. I performed 9 lung transplants in various places within 6 days, and lung transplantation has become a routine general chest surgery. In 2021, I performed 213 lung transplants on my own, and I don't know how many I will do this year?"⁶⁵

To investigate the criminal conduct of all institutions, organizations, and individuals involved in the persecution of Falun Gong; to bring such investigation, no matter how long it takes, no matter how far and deep we have to search, to full closure; to exercise fundamental principles of humanity; and to restore and uphold justice in society

VIII. Organ transplants in this hospital are generally emergency transplants

On November 13, 2022, Chen Jingyu, the vice president of the hospital, posted on his Sina Weibo, saying that "organ transplants are usually emergency operations".⁶⁶

According to the "Yangtze Evening News" report, Zheng Mingfeng, director of the thoracic surgery department of the hospital, told reporters: On November 7, 2019, the X6 ward completed 7 general chest surgeries and two transplants. Zheng Mingfeng said that the X6 ward is the center of lung cancer and lung transplantation operations. More than 2,000 cases of general chest surgery and more than 100 cases of lung transplantation are performed a year. What often happens is, general chest operations are done in the day and emergency lung transplants at night.⁶⁷

According to mainland China's media reports, on April 17, 2021, Chen Jingyu went to Kunming to perform an emergency double lung transplant.⁶⁸

In addition, the hospital's chief hepatobiliary surgeon, Dr. Cai Bing, was the first in Wuxi to carry out emergency liver transplantation and the first in the province to carry out high-technology projects such as combined hepatopancreatic islet cell transplantation⁶⁹. The so-called emergency liver transplantation is an emergency liver replacement surgery performed on patients with acute heavy liver disease whose survival time does not exceed 72 hours. Emergency liver transplantation is very rare abroad because of the difficulty of emergency matching and long donor waiting time.

IX. List of Responsible Persons

WXS-RMY001

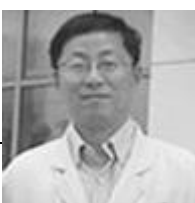

Chen Jingyu

Title : Chief Surgeon of Thoracic Surgery, Vice President. Director of Wuxi Lung Transplant Center. Member of Chinese Society of Organ Transplantation, Editorial Board of Chinese Journal of Organ Transplantation.

From October 2001 to April 2002 and from September 2004 to November 2004, Chen Jingyu twice went to Toronto General Hospital in Canada to study basic research and clinical applications of lung transplantation.

Chen Jingyu has long been engaged in clinical work in general thoracic surgery, and in recent years, he started to engage in basic and clinical research of lung transplantation. In September 2002, he performed the first lung transplantation for emphysema in China, and has completed 78 single and double lung transplants from December 2008. In the past six years, he has led lung transplantation teams to major tertiary hospitals and medical school hospitals in Jiangsu Province, Shandong Province, Liaoning Province, Fujian Province, Xinjiang Uygur Autonomous Region, Hebei Province, Guangdong Province, and Yunnan Province to promote lung transplantation. Chen has led his team to successfully complete more than 1000 lung transplant surgeries⁷⁰. Chen Jingyu has led the team to successfully complete more than 1,500 cases of lung transplantation.⁷¹

WOIPFG's Investigation Report on the Alleged Organ Harvesting of Living Falun Gong Practitioners at Wuhan Union Hospital (aka. Union Hospital Affiliated to Tongji Medical College of Huazhong University of Science and Technology) and Its Staff Members Suspected of Participation

Hospital: Affiliated Union Hospital of Tongji Medical College, Huazhong University of Science and Technology (the "Wuhan Union Hospital")

Address: 1277 Jiefang Ave, Wuhan, China

Preface

Wuhan Union Hospital is one of the largest kidney transplant centers in South Central China and a national heart transplant center with a large scale of transplants. As of January 30, 2022, Wuhan Union Hospital had performed more than 900 heart transplants, including more than 100 pediatric heart transplants⁸⁸, ranking first in the country for many years. (These numbers are only the ones officially announced. The actual transplant numbers are much larger). In 2022, the hospital established a Liver Transplant Center⁸⁹. The hospital can perform four heart transplants simultaneously⁹⁰. The wait time for organs in this hospital is extremely short. In June 2020, its transplant center provided a patient with four donor hearts within 13 days⁹¹. In May 2022, the center obtained a heart in four days⁹². Given the background of the CCP's national crime of live organ harvesting, this hospital is suspected of participating in the crime of live organ harvesting from Falun Gong practitioners and other groups.

I. Hospital Profile

Wuhan Union Hospital is a tertiary level-A hospital. The hospital houses 5,800 licensed beds and consists of four campuses: the Main Campus, the West Campus, the Tumor Center and the Jinyinhu International Hospital. Its cardiac transplants were ranked first in China for five years in a row. It hires over 8000 employees, including over 600 professionals with senior medical titles. Besides, it has one key laboratory of the Ministry of Education, one key laboratory of the Ministry of Health and two provincial key laboratories. It also got more than 100 grants from the National Natural Science Foundation of China for five consecutive years⁹³.

II. The hospital has one of the largest kidney transplant centers in South Central China and established a Liver Transplant Center in 2022.

Wuhan Union Hospital obtained the kidney transplant qualification in 2007. Before being officially approved to carry out kidney transplant, the hospital had carried out various human organ transplants. Now it is home to one of the largest kidney transplant centers in South Central China⁹⁴.

According to the official website of the hospital, the Liver Transplant Center of Wuhan Union Hospital is a national key discipline, a national clinical specialty, the first batch of liver transplantation qualification centers of the National Health Commission, a doctor's and master's degree awarding unit in surgery, and a postdoctoral research station. Due to the rapid development of liver transplantation, the party committee of the hospital has made major strategic decisions and deployments based on the need for high-quality development of the hospital. In August 2022, a Liver Transplant Center was established on the West Campus of Wuhan Union Hospital⁹⁵.

III. The hospital has a National Heart Transplant Center with the largest number of heart transplants in China.

追查迫害法輪功國際組織（追查國際）

World Organization to Investigate the Persecution of Falun Gong (WOIPFG)

To investigate the criminal conduct of all institutions, organizations, and individuals involved in the persecution of Falun Gong; to bring such investigation, no matter how long it takes, no matter how far and deep we have to search, to full closure; to exercise fundamental principles of humanity; and to restore and uphold justice in society

The hospital claimed its heart transplant volume ranked first in the country (2014)⁹⁶. According to people.com.cn, The Department of Cardiac Surgery of Wuhan Union Hospital completed 102 heart transplants in 2015, fully demonstrating the leading position of Wuhan's heart transplantation technique in China⁹⁷.

Heart transplantation at Wuhan Union Hospital developed rapidly after 2008. It completed 428 heart transplants from September 2008 to April 30, 2017. In 2016 and 2017, the number of heart transplants exceeded 100 in a single year⁹⁸.

According to an article on www.cjn.cn by Huang Jin and Wu Wei on December 15, 2015, the total number of heart transplants at Wuhan Union Hospital ranked first in China. Dong Nianguo, Director of Cardiac Surgery at Wuhan Union Hospital, said Wuhan had been the national heart transplant center⁹⁹.

In 2021, the Department of Cardiac and Great Vessels of Wuhan Union Hospital completed 97 heart transplants. As of January 30, 2022, Wuhan Union Hospital had performed more than 900 heart transplants, ranking first in China for many years in a row; it has completed more than 100 pediatric heart transplants¹⁰⁰.

IV. Three pediatric heart transplants were performed on the same day.

On November 11, 2022, the Wuhan Municipal Government issued a press release stating that Wuhan Union Hospital completed three pediatric heart transplants on the same day, which is the first time in the world. According to the report, three children from different provinces suffered from heart disease and "invariably" chose to come to Wuhan Union Hospital. They were 12, 11, and 4 years old. The hospital completed three heart transplants in just 7 hours. According to the report, three hearts from three other provinces in China landed at Wuhan on November 7; the average cold ischemia time during transport was 330 minutes. This means that three children died almost at the same time, and their hearts happened to be matched with the recipients' hearts. However, the report didn't mention how the matching was done.¹⁰¹

According to Sohu.com, on November 7, 2022, Wuhan Union Hospital completed three pediatric heart transplants on the same day. The three donor hearts came from Beijing, Guangzhou, and Nanning. The transplant team led by Prof. Dong Nianguo, Prof. Xia Jiahong, Prof. Su Wei, and Associate Prof. Wang Guohua led more than 20 medical staff to complete these transplant surgeries. According to the ranking of heart transplant centers worldwide in the past five years, Wuhan Union Hospital ranks fourth. It is the first time in the world that three pediatric heart transplants were done consecutively at the same hospital on the same day¹⁰².

V. Four heart transplants were performed simultaneously.

Four heart transplants were performed simultaneously (2013)¹⁰³. On June 21, 2013, the expert team headed by Prof. Dong Nianguo, Director of Cardiac Surgery, was divided into four groups to simultaneously perform four heart transplant surgeries, each led by a doctoral supervisor¹⁰⁴.

Within 14 hours, from 10:00 to 24:00 on August 6, 2020, four heart transplants were performed by a medical team of more than 200 people led by Dong Nianguo, Director of Cardiac Surgery of Wuhan Union Hospital, and Professor Xia Jiahong¹⁰⁵.

VI. The wait time for an organ is very short. The hospital provided a patient with four donor hearts within 13 days

追查迫害法輪功國際組織（追查國際）

World Organization to Investigate the Persecution of Falun Gong (WOIPFG)

To investigate the criminal conduct of all institutions, organizations, and individuals involved in the persecution of Falun Gong; to bring such investigation, no matter how long it takes, no matter how far and deep we have to search, to full closure; to exercise fundamental principles of humanity; and to restore and uphold justice in society

The wait times for two organ transplants at Wuhan Union Hospital were extremely short. In one case, in May 2022, a patient obtained a heart within four days. In another case, within 13 days in June 2020, four suitable donor hearts were obtained and the heart transplant was completed.¹⁰⁶

1. A donor heart was obtained for a heart transplant within four days.

On April 8, 2022, Mu Jiangang, a teacher at Lanzhou University, had a sudden myocardial infarction. After being sent to hospital for emergency treatment, his heart was found to have a large area of infarction and needed a heart transplant.¹⁰⁷

On May 6, 2022, Mu Jiangang was transferred to Wuhan Union Hospital. At the same time, he was placed on the waiting list for a heart transplant. Four days later, Mu Jiangang obtained a suitable donor heart and had a heart transplant.

2. Even stranger is that a patient obtained four suitable donor hearts within 13 days.

On June 12, 2020, a 24-year-old female patient, Sun Lingling, was admitted to Wuhan Union Hospital. Within 13 days, the hospital obtained four suitable hearts for her to choose.¹⁰⁸

The first heart arrived at the hospital on June 16. But the responsible surgeon thought its coronary arteries were in poor condition and abandoned it.

The second heart was ready on June 19 but was also abandoned because the patient (Sun Lingling) had a fever, making her physical condition unsuitable for a heart transplant.

The third and fourth hearts were both available on June 25. At this time, Sun Lingling's condition improved significantly, and the surgeon finally chose the heart of a 33-year-old male from hundreds of kilometers away. Another backup heart belonged to a local woman, but was abandoned because the surgeon feared it wasn't strong enough.

The patient recovered well after a 7-hour surgery.

The above two cases were first reported by the Chinese media, including the CCP's official media. The two patients used their real names and real identities.

3. Investigation Recording

Investigation Recording 1

Investigation Subject: A nurse in Cardiac Surgery Ward, Wuhan Union Hospital

Investigation Date: June 30, 2020 (+86-2785351610)

Summary:

1. Investigator: Hello! I want to ask if Director Dong Nianguo is here? Nurse: Um...
2. (Sun Lingling) She's got the surgery done, but she's not in our ward. She's in the ICU.
3. She has been in the ICU all the way. She was not sent from our ward to the operating room and then back to the ICU.

(Recording 1. Download [MP3](#); Transcript Download: [pdf1](#))

Investigation Recording 2

Investigation Subject: Director Dong Nianguo of the Heart Transplant Center of Wuhan Union Hospital

Investigation Date: February 9, 2016 (+86-13971181551)

Summary:

1. Now should be a good opportunity because we've basically finished the transplants for all our recipients.
2. This year we've done about a dozen (heart transplants).... Tomorrow, we have one more transplant to do.
3. Last year we did more than one hundred (heart transplants).

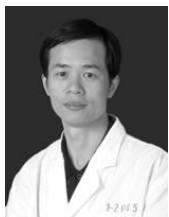

(Recording 2. Download [MP3](#); Transcript Download: [pdf2](#))

VII. Investigative leads from Minghui.org: Wuhan Union Hospital still harvesting organs from living “death-row inmates”

According to Minghui.org, an elderly man from Mainland China complained that his relative spent around 400,000 to 500,000 yuan to get a kidney transplant at Wuhan Union Hospital in September 2016. The hospital didn't disclose the specific information of the donor, but only mentioned the “death-row-inmate” was about 20 to 30 years old, emphasizing that the donor was in good health and had a very good kidney source. The patient was discharged from the hospital but didn't recover well.¹⁰⁹

VIII. List of Responsible People

HZKJ-XH001 Dong Nianguo, male, DOB: September 1963, Place of birth: Ezhou, Hubei¹¹⁰

Personal Profile: Director of Cardiovascular Surgery and Director of Organ Transplant Center, Wuhan Union Hospital; Chief Surgeon; Vice Chairman, Organ Transplant sub-association and Cardiac Lung Transplant sub-association, Chinese Medical Association (CMA); Vice Chairman, Provincial Society of Organ Transplant, Hubei Medical Association; Studied in the US and Switzerland.

Performed the first heart-liver combined transplant and the heart transplants for the youngest (3 month old) and the oldest (76 years old) patients in China. Once performed four heart transplants on the same day¹¹¹. As of January 30, 2022, the Organ Transplant Center he led had performed more than 900 heart transplant surgeries, ranking first in the country for many years. He has performed more than 100 pediatric heart transplants.¹¹²

HZKJ-XH002 Zeng Fuqing, male

Personal Profile: Professor of Urologic surgery, Chief Surgeon, doctoral instructor, Director of Urologic Surgery Institute.

Engaged in the clinical and research of Urologic surgery for almost 40 years; Performed kidney transplants;¹¹³

HZKJ-XH003 Li Heng, male

Personal Profile: Chief Surgeon, Associate Professor, master instructor, Associate Director of Organ Transplant Center; Member of the Chinese Society of Organ Transplantation; Member of the Hubei Provincial Society of Organ Transplantation.

Graduated from Tongji Medical College in 1990; PhD of Medicine, 1996; worked in his alma mater since graduation.

Main field: kidney transplant. ¹¹⁴

HZKJ-XH004 Wang Zhendi, male

Personal Profile: Attending Surgeon of Urologic Surgery, Lecturer

Engaged in Urologic Surgery, the clinical work of kidney transplant and diagnosis and treatment of complications after renal transplantation. ¹¹⁵

HZKJ-XH005 Wang Jing, male

Personal Profile: Associate Professor of Kidney Transplant Center, Associate Chief Surgeon

Graduated from Tongji Medical University in 1992; have engaged in Urologic Surgery and clinical work of kidney transplant since graduation. ¹¹⁶

HZKJ-XH006 Zhang Shilong, male

Personal Profile: Attending Surgeon of Kidney Transplant Center

Engaged in kidney transplant and clinical work of Urologic Surgery for years. ¹¹⁷

HZKJ-XH007 Xia Wei, male

Personal Profile: Surgical Resident of Kidney Transplant Center

Engaged in kidney transplant, clinical work of Urologic Surgery and treatment of complications after renal transplantation for years. ¹¹⁸

HZKJ-XH008 Wu Yu, male

Personal Profile: Surgical Resident of Kidney Transplant Center

Engaged in kidney transplant, clinical work of Urologic Surgery and treatment of complications after renal transplantation for years. ¹¹⁹

HZKJ-XH009 Bai Yang, male

Personal Profile: Surgical Resident, Kidney Transplant Center

Engaged in kidney transplant, clinical work of Urologic Surgery and treatment of complications after renal transplantation for years. ¹²⁰

HZKJ-XH010 Zhang Runqing, male

Personal Profile: Professor of Urologic Surgery, Chief Surgeon

Research focused on kidney transplant on the basis of general urology. ¹²¹

HZKJ-XH011 Yang Jun, male

Personal Profile: Associate Professor of Urologic Surgery, Associate Chief Surgeon

Bachelor of Medicine, Tongji Medical University, 1995; PhD of Medicine, Tongji Medical College, Huazhong University of Science and Technology, 2001; helped to perform related surgeries in over 30 hospitals in and around Hubei province, and the prognosis was good; postdoctoral research of obstructive nephropathy and study of organ transplant at Department of Medicine-Nephrology, Baylor College of Medicine, Huston, Texas from April 2011.¹²²

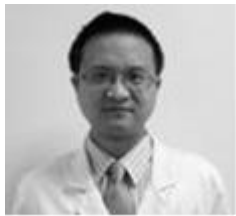

HZKJ-XH012 Zheng Qichang, male

Personal Profile: Chief Surgeon, Professor, Director of Hepatobiliary Surgery Center

Committed to the basic and clinical research of biomaterials in organ transplant in recent years, specialized in liver transplant.¹²³

HZKJ-XH013 Xiong Jun, male

Personal Profile: Associate Chief Surgeon of Hepatobiliary Surgery, Associate Professor

Graduated from Department of Medicine, Tongji Medical University, 1994; engaged in clinical work of Hepatobiliary Surgery; PhD, 2005; postdoctoral research for 2 years at Organ Transplant Center, The First Affiliated Hospital, Sun Yat-sen University, Guangzhou.

Engaged in organ extraction for liver transplant and perioperative management of recipients after operation; major participant to complete the first national combined heart-liver transplant, which was also the third case in Asia.¹²⁴

HZKJ-XH014 Wan Chidan

Personal Profile: Director of Hepatobiliary Surgery, Deputy Director of Organ Transplant Center. Member of the Living Organ Transplant Professional Committee of the Organ Transplant Surgeon Branch of the Chinese Medical Doctor Association. Member of the Organ Transplant Branch of Hubei Medical Association. Engaged in hepatobiliary surgery clinical and research work for nearly 30 years. He had been a postdoctoral researcher at the University of Mississippi Medical Center and the Organ Transplant Center of the Medical University of South Carolina. He routinely carries out various liver transplants, including

DCD whole liver transplants, pediatric liver transplants, relative living donor liver transplants, split liver transplants, multi-organ combined transplants, etc.¹²⁵.

HZKJ-XH015 Gu Jinyang

Personal Profile: Director of Hepatobiliary Surgery/Liver Transplant Center, Deputy Director of Organ Transplant Center.

Engaged in clinical work of liver transplantation for a long time. He has successively worked at or presided over many famous hepatobiliary surgery/liver transplant centers in China (Drum Tower Hospital Affiliated to Nanjing University School of Medicine, Renji

Hospital Affiliated to Shanghai Jiaotong University School of Medicine, and Xinhua Hospital Affiliated to Shanghai Jiaotong University School of Medicine). In August 2022, he was introduced to Wuhan Union Hospital as a high-level talent¹²⁶.

HZKJ-XH016 Wang Chunyou, male

Personal Profile: Chief Surgeon, Professor, Director of Pancreatic Surgery, Director of General Surgery

Engaged in clinical work and research of General Surgery over 20 years.

Studied in UMC, USA, 1992 ~ 1995.

Engaged in Pancreatic Program in recent 10 years; established the Pancreatic Surgery Research and Treatment Center and Pancreatic Surgery ICU in 1997; Conducted research on pancreas transplant and islet stem cell transplant.¹²⁷

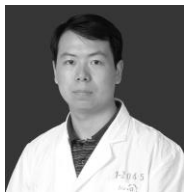

HZKJ-XH017 Zhang Kailun, male

Personal Profile: Chief Surgeon and Professor of Cardiovascular Surgery

Visiting Doctor and Senior Visiting Scholar at German Heart Center Munich as well as Heart and Diabetes Center, Bad Oeynhausen, University Hospitals of the Ruhr-University of Bochum, Germany; outstanding in heart transplant.¹²⁸

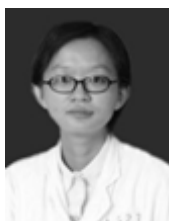

HZKJ-XH018 Liu Jinping, male

Personal Profile: Associate Professor and Associate Chief Surgeon of Cardiovascular Surgery, Director of Organ Transplant Program, Wuhan Union Hospital; Member of Wuhan Society of Cardiothoracic Surgery and Organ Transplantation, Secretary of Hubei Society of Cardiothoracic Surgery, winner of the "Erbaken Award" of the Chinese Society of Thoracic and Cardiovascular Surgery.

Graduated from Tongji Medical University, 1997; studied in Australia, 2004; studied in University of Pennsylvania and Children's Hospital of Philadelphia, 2008~2010; performs heart transplants; major participant of heart transplants.¹²⁹

HZKJ-XH019 Shi Jiawei, female

Personal Profile: Associate Professor of Cardiovascular Surgery, Associate Chief Surgeon

Graduated from Tongji Medical University in 1999; PhD of Medicine, 2006;

Studied in Massachusetts General Hospital, 2008; studied in Northwestern University Feinberg School of Medicine, 2014; conducted in-depth research in heart and lung transplantation; engaged in clinical work of cardiac surgery over 10 years.¹³⁰

HZKJ-XH020 Xiao Shiliang, male

Personal Profile: Professor, Chief Surgeon, Associate Director of Cardiovascular Surgery Committed to clinical work and basic research of cardiac surgery; outstanding in heart transplant.¹³¹

WOIPFG's Investigative Report on the Alleged Organ Harvesting of Living Falun Gong Practitioners at the First Hospital of Jilin University and Its Staff Members Suspected of Participation

Hospital: The First Hospital of Jilin University
Address: 71 Xinmin Blvd, Changchun City, Jilin Province
Telephone: 086+ 431-88782222

Preface

The First Hospital of Jilin University has done many organ transplants. The wait time for organs is short, the source of donors is unknown, and there is a surplus of organ donors. In 2017, there was even a promotion for free liver transplants. In the general context of the Chinese Communist Party(CCP)'s state crime of living-donor organ harvesting, the hospital is clearly suspected of being involved in the crime of organ harvesting of living Falun Gong practitioners and members of other groups.

I. Hospital Overview

The First Hospital of Jilin University, also known as the First Bethune Hospital of Jilin University, was founded in 1949. It is a large-scale comprehensive Grade-A Tertiary Hospital integrating medical treatment, scientific research, teaching, disease prevention, health care, and rehabilitation. It has two campuses. The main campus is located at No. 71 Xinmin Street, Chaoyang District, Changchun City, Jilin Province, with a total construction area of 549,500 square meters, more than 5,900 beds, and more than 9,600 employees.¹³⁷

II. Large Scale Kidney Transplants

1. The number of kidney transplants ranks among the top three in China.

Fu Yaowen, director of Urology II of the hospital, started the center for kidney transplantation and blood purification. Its number of transplants are among the top 10 of more than 300 kidney transplantation units in China, and its number of kidney transplantation cases ranks among the top 3 in the country.¹³⁸

2. Doctors perform a large number of transplants.

As of April 2009, Fu had completed nearly 3,000 allogeneic kidney transplants.¹³⁹ With 3,000 transplants completed by Fu alone, there is high possibility of a significant number of transplants performed by multiple kidney transplant surgeons in the hospital.

傅耀文，男，泌尿二科主任，教授，主任医师，博士生导师。

1983年毕业于原白求恩医科大学医疗系，1986年获医学硕士学位（白求恩医科大学三系泌尿外科专业）。1986年以来，在原白求恩医大二院泌尿外科从事泌尿外科专业与临床器官移植 - 肾移植，历任主治医师、副主任医师、主任医师、教授。主攻方向：泌尿外科与器官移植免疫学和肾移植免疫耐受诱导培养硕士生12名，博士生5名。完成科研论著70余篇，SCI检索1篇，省部级科技进步二等奖3项、三等奖2项；吉林大学医疗成果二、三等奖各1项。对器官移植和泌尿外科常见疾病、疑难疾病的诊治积累了丰富的临床经验。共完成同种异体肾移植近3000例次，完成普通泌尿外科手术5000余例次。主持了肾移植排斥反应免疫监测的研究、免疫耐受诱导研究和肾移植手术学的改进，使我省肾移植水平达到国内一流和接近国际先进水平。创建了肾脏移植和血液净化中心，主持了一系列创新和实用的科研工作，大幅提高了肾移植的人/肾存活率，移植数量和质量均进入国内300余家肾移植单位的前10名，肾移植例数已经排在全国前3名之列。承担省部级科研项目7项，获科研经费60余万元。任中华器官移植学会肾移植学组副组长，省高级专家、长春市五一劳动奖章和白求恩名医。

Figure 1 Snapshot of Jilin Fame Web

3. There is a strong kidney transplant team.

The Urology of the First Hospital of Jilin University consists of Urology I and Urology II. Wang Chunxi, the head of Urology I, is a member of the Standing Committee of the Organ Transplantation Branch of the Jilin Provincial Medical Association. All the young and middle-aged doctors in the program have Master's degree in medicine, six have doctoral degree in medicine (3 of them have work experience at postdoctoral mobile station), and three are studying for doctoral degree.¹⁴⁰

Urology II of the First Hospital of Jilin University has sub-specialties such as kidney transplantation. There are 66 people in the program, including 23 doctors, 39 nurses and 3 technicians; 8 professors, 5 associate professors, 1 deputy chief technician, 1 chief nurse, 7 attending surgeons, 4 supervising nurses, 2 surgeons and 2 technicians; 1 doctoral supervisor and 8 Master's supervisors; 15 doctoral degree holders and 12 Master's degree holders; 13 people have experience of studying abroad. Every year, 2 to 3 doctoral students and 5 to 7 master's students are enrolled.¹⁴¹

4. The kidney transplant department has a large number of beds.

There are 47 beds in the main hospital and 24 beds in the branch.¹⁴² Urology II of the First Hospital of Jilin University, a key clinical specialty of the Ministry of Health, is the first and the only one in Jilin Province to be approved by the Clinical Application Committee of Human Organ Transplantation Technology of the Ministry of Health to carry out kidney transplantation. There are 79 beds in the program.¹⁴³

III. Large Scale Liver Transplant Center

Hepatobiliary and Pancreatic Surgery has been officially divided into two independent medical groups since April 26, 2013. Hepatobiliary and Pancreatic Surgery, now a national key clinical specialty, is the liver transplantation center of Jilin University. At Hepatobiliary and Pancreatic Surgery I, there are 20 doctors, 3 professors and 3 associate professors; 3 doctoral supervisors, 5 Master's supervisors, 6 with doctoral degrees and 4 doctoral students.¹⁴⁴

追查迫害法輪功國際組織 (追查國際)

World Organization to Investigate the Persecution of Falun Gong (WOIPFG)

To investigate the criminal conduct of all institutions, organizations, and individuals involved in the persecution of Falun Gong; to bring such investigation, no matter how long it takes, no matter how far and deep we have to search, to full closure; to exercise fundamental principles of humanity; and to restore and uphold justice in society

Hepatobiliary and Pancreatic Surgery (Group II) has 12 doctors, 3 professors and 1 associate professor; among them, there are 1 doctoral supervisor, 3 master's supervisors and 5 with doctoral degrees.¹⁴⁵ Several liver and kidney transplantation teams can be formed.

Hepatobiliary and Pancreatic Surgery I now has 90 beds.¹⁴⁶ Hepatobiliary and Pancreatic Surgery (Group II) now has 88 beds.¹⁴⁷

IV. Donor Surplus and Again Promotion for Free Liver Transplant

Jilin Travel Radio and the Liver Transplant Center of the First Hospital of Jilin University, jointly launched a one-month free liver transplant campaign for the first 10 children (June 1 to 30, 2017).¹⁴⁸

On June 13, 2017, WOIPFG investigators conducted an investigation of the Travel Radio "Green Path for Darling Babies" free liver transplant enrollment program and confirmed that liver sources are plentiful and transplantation can be arranged at any time.

(Recording 1. Download: [MP3](#); Transcript Download: [pdf 56](#))

On June 13, 2017, WOIPFG investigators called President Hua Shucheng of the First Hospital of Jilin University to ask about the free liver transplant campaign for 10 children. President Hua admitted that the campaign was true.

(Recording 2. Download: [MP3](#); Transcript Download: [pdf 57](#))

On June 14, 2017, Zhang Haiyu, director of Pediatric Surgery, First Hospital of Jilin University, said, "The first ten are free...our hospital has many sources of donors."

(Recording 3. Download: [MP3](#); Transcript Download: [pdf 58-1](#))

On June 14, 2017, in an investigation into the Travel Radio "Green Path for Darling Babies" free liver transplant enrollment program, the subject mentioned that the liver source is confidential. The subject said, "The liver source is confidential, you won't know it even if you would spend 2 million yuan!"

(Recording 4. Download: [MP3](#); Transcript Download: [pdf 58-2](#))

On June 15, 2017, an investigation was conducted with Mr. Liu from the organ donation office of the Jilin Red Cross, and he mentioned that "The liver source is not provided by our Red Cross" for the free liver transplant campaign at Jilin University.¹⁴⁹

(Recording 5. Download: [MP3](#); Transcript Download: [pdf 59](#))

V. Media: 15-day Wait Time for a Liver Transplant and 200,000 yuan for Donor Liver

According to a report by Minghui.com on August 21, 2019, a person familiar with the case reported that his friend had a liver transplant at the First Hospital of Jilin University in 2018. He waited for 15 days and spent 200,000 plus yuan on the donor's liver, and between 20,000 and 100,000 yuan as favor expenses.

The First Hospital of Jilin University and Sino-Japanese Friendship Hospital are competing for patients, so it is clear that they are not short of organ donors, but recipients (patients). The receipts issued by the hospitals to the patients are all left blank, and the income is not recorded in the books.¹⁵⁰

VI. List of Responsible Persons.

追查迫害法輪功國際組織（追查國際）

World Organization to Investigate the Persecution of Falun Gong (WOIPFG)

To investigate the criminal conduct of all institutions, organizations, and individuals involved in the persecution of Falun Gong; to bring such investigation, no matter how long it takes, no matter how far and deep we have to search, to full closure; to exercise fundamental principles of humanity; and to restore and uphold justice in society

JLDX001 Fu Yaowen, male. Han nationality, born in August 1957, graduate degree, participated in work in August 1986, joined the Chinese Communist Party in June 1986¹⁵¹.

Personal Profile: Director of Urology II, professor, chief surgeon, and doctoral advisor. Vice chairman of Kidney Transplantation Group of Chinese Society of Organ Transplantation

He graduated from the Medical Department of the former Bethune Medical University in 1983 and received his Master's degree in Urology in 1986. He has been practicing urology and clinical organ transplantation--kidney transplantation in Urology of the former Bethune Medical University since 1986.

As of April 2009, Fu Yaowen had completed nearly 3,000 allogeneic kidney transplants. He founded the Kidney Transplantation and Blood Purification Center, and led a series of innovative and practical scientific researches, which significantly improved the human/kidney survival rate of kidney transplantation. Both the quantity and quality of their work ranked among the top 10 of more than 300 kidney transplantation units in China, and among the top 3 kidney transplantation cases in China¹⁵².

JLDX002 Honglan Zhou, Male.

Personal Profile: Deputy director of Department of Urology II, deputy director of Jilin Provincial Organ Transplantation Quality Control Center. Professor, chief surgeon. Member of Kidney Transplantation Branch of China Association for the Promotion of International Exchange in Health Care, youth member of Chinese Medical Association, youth member of Chinese Surgeons Association, member at deputy-director level of Organ Transplantation Branch of the Jilin Provincial Medical Association

He graduated from college in 1994. He was promoted to attending surgeon and lecturer in 1999, to associate professor and associate chief surgeon in 2004. In April 2006, he was transferred from China-Japan Friendship Hospital of Jilin University to the First Hospital of Jilin University, where he has since been working. He was promoted to professor and chief surgeon in 2009, and was appointed as supervisor of doctoral students of Jilin University in 2016.

He has completed more than 1500 cadaveric kidney transplants, assisted in more than 1000 allogeneic kidney transplants and more than 500 living-donor kidney transplants. He was the first to carry out laparoscopic living-donor kidney excision in the northeast region of China in 2009.¹⁵³

JLDX003 Wang Gang, Male.

Personal Profile: Associate professor and deputy chief surgeon of Urology II. Secretary of Jilin Organ Transplantation Branch of Chinese Medical Association.

He graduated from the former Bethune Medical University in 1996.

He studied at Massachusetts General Hospital, Harvard Medical School, USA, and Toronto General Hospital, Canada.

He has been engaged in kidney transplantation for more than 10 years, specializing in preoperative evaluation of kidney transplantation, perioperative monitoring of kidney transplantation and postoperative follow up work.¹⁵⁴

He is currently involved in the pre- and post-operative management, registration and follow-up of kidney transplant patients and DCD coordination.¹⁵⁵

To investigate the criminal conduct of all institutions, organizations, and individuals involved in the persecution of Falun Gong; to bring such investigation, no matter how long it takes, no matter how far and deep we have to search, to full closure; to exercise fundamental principles of humanity; and to restore and uphold justice in society

JLDX004 Wang Jinguo, Male.

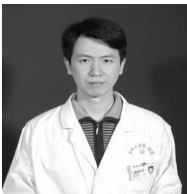

Personal Profile: Associate professor and deputy chief surgeon of Urology II. Member of Organ Transplantation Branch of Jilin Provincial Medical Association

He graduated from Jilin University (formerly Bethune Medical University) in 1999 and received his doctorate in medicine in 2004. He went to Sendai, Japan in 2004 to study early diagnosis and treatment of prostate cancer, went to Seoul, Korea in 2007 to study minimally invasive treatment techniques such as laparoscopy, and went to UCLA, the US in 2013 for one year of systematic clinical training.

He specializes in kidney transplantation.¹⁵⁶

JLDX005 Wang Weigang, Male.

Personal Profile: Professor and chief surgeon of Urology II. Member of Organ Transplantation Branch of Jilin Provincial Medical Association.

He graduated from the former Bethune Medical University in 1998.

From 2006 to 2007, he spent one year at the Transplant Center, University of Washington, USA.

He has been engaged in clinical and research work in organ transplantation and urology.¹⁵⁷ He specializes in kidney transplantation.¹⁵⁸

JLDX006 Song Zhiyu, Male.

Personal Profile: Deputy chief surgeon, associate professor of Organ Transplantation Center

He has done research on the prevention and treatment of rejection after kidney transplantation.¹⁵⁹

JLDX007 Yuantao Wang, Male.

Personal Profile: Deputy chief surgeon of Urology II, Master's degree student Supervisor, doctorate in medicine

He graduated from Bethune Medical College of Jilin University in 2006.

He was sent to study at Harvard Medical School for 2 years.

He has been engaged in clinical and scientific research of urology and organ transplantation and kidney transplantation, etc.¹⁶⁰

JLDX008 Guangjun Xing, Male.

Personal Profile: Professor of Organ Transplantation Center
Specialized in organ transplantation.¹⁶¹

追查迫害法輪功國際組織（追查國際）

World Organization to Investigate the Persecution of Falun Gong (WOIPFG)

To investigate the criminal conduct of all institutions, organizations, and individuals involved in the persecution of Falun Gong; to bring such investigation, no matter how long it takes, no matter how far and deep we have to search, to full closure; to exercise fundamental principles of humanity; and to restore and uphold justice in society

JLDX009 Zheng Guozhou, Male.

Personal Profile: Professor of Urology, member of Organ Transplantation Branch, Jilin Medical Association

He performed the first case of "allogeneic kidney transplantation" and "allogeneic testicular transplantation" in Jilin Province.¹⁶²

JLDX010 Gao Jia-Lin, Male.

Personal Profile: Attending surgeon of Urology II

He graduated from Bethune Medical College of Jilin University in 2007.

He has mastered the principles of diagnosis and treatment of kidney transplant patients in the perioperative period and the principles of diagnosis and treatment of diseases related to patients after kidney transplantation.¹⁶³

JLDX011 Lian Xin, Male.

Personal Profile: Attending surgeon of Urology II

He graduated from Bethune Medical College of Jilin University in 2010.

He has been engaged in clinical and scientific research work of organ transplantation.¹⁶⁴

JLDX012 Liu Si, Male.

Personal Profile: Attending surgeon of Urology

He graduated from the seven-year clinical medicine program of Bethune Medical College of Jilin University in 2011.

He is mainly engaged in the preoperative evaluation, postoperative treatment and follow-up of kidney transplant patients, and specializes in the preoperative, perioperative, postoperative treatments of kidney transplant patients, as well as critical patients.¹⁶⁵

JLDX013 Gao Baoshan, Male.

Personal Profile: Associate professor, deputy chief surgeon, and Master's degree student Supervisor of Urology II

He graduated from Bethune Medical College of Jilin University in 2004.

He studied at Massachusetts General Hospital of Harvard Medical School for 2 years.

He has been engaged in clinical and scientific research of organ transplantation and kidney transplantation, etc.¹⁶⁶

JLDX014 Lv Guoyue, Male; date of birth: 1977. (Mobile: 86+13689825113)

Personal Profile: Deputy director of the hospital, chief surgeon, professor, doctorate in medicine, and advisor for doctoral students; member of the Transplantation Group, Branch of Surgery, the Chinese Medical Association; member of the Scientific Committee of the China Liver Transplantation Registry (CLTR); national member of the Organ Transplantation Surgeons Branch of the Chinese Medical Association; and member of the Standing Committee of the Organ Transplantation Branch.

He studied at Alberta University in Canada and Emory University in the United States.

追查迫害法輪功國際組織（追查國際）

World Organization to Investigate the Persecution of Falun Gong (WOIPFG)

To investigate the criminal conduct of all institutions, organizations, and individuals involved in the persecution of Falun Gong; to bring such investigation, no matter how long it takes, no matter how far and deep we have to search, to full closure; to exercise fundamental principles of humanity; and to restore and uphold justice in society

After returning to the hospital, he started to set up the liver transplantation team. In October 2012, the Ministry of Health reviewed the implementation of DCD pilot work and it became the third qualified unit by DCD for liver transplantation after Guangdong Foshan Hospital and Central South University Hospital.

On July 27, 2013, the first liver transplantation in Jilin Province was done. In August, the Liver Transplantation Center of Jilin University was established. Up to now, the hospital independently completed more than 100 cases of DCD liver transplantation, and assisted the Second Hospital of Harbin Medical University to complete the first inter-provincial liver transplantation in Jilin Province in October 2015. ¹⁶⁷

JLDX015 Wang Guangyi, male; date of birth: 1956. (Mobile: +86-13756661292)

Personal Profile: Director of General Surgery, director of Hepatobiliary and Pancreatic Surgery, director of the Department of Surgery, Doctoral Supervisor; member at director level of General Surgery Branch of Jilin Medical Association, member at deputy director level of Organ Transplantation Branch

In 1988, 1997 and 2005, he went to St. George's School of Medicine, University of London, Liver Transplant Surgery, the University of Pittsburgh Medical Center and Hepatobiliary Surgery, the University of Tokyo, Japan for further training.

In 1997, he went to the University of Pittsburgh Medical Center to study liver transplantation for one year. After returning to China, he undertook a scientific research project on liver transplantation for the provincial science committee, and won the major project of new clinical medical technology and new therapy of Jilin University, with a funding of one million yuan. Since the end of 2002, he has successfully completed 2 clinical liver transplants in the province in the past 20 years. ¹⁶⁸

JLDX016 Zhang Ping, male; date of birth: 1964. (Mobile: +86-15843079600)

Personal Profile: Deputy director of Hepatobiliary and Pancreatic Surgery, chief surgeon, professor

He studied at the Cancer Research Center of Aichi Medical University and the Organ Transplantation Center of the University of Tokyo Medical School from 1996 to 2001.

In 2001, he went to Japan to study liver transplantation at the Transplantation Center of the University of Tokyo Medical School for one year. After returning to China, he participated in the completion of the scientific research projects related to liver transplantation by the provincial science committee.

Since the end of 2002, he has participated in the completion of two clinical liver transplantation cases in the past 20 years in the province. ¹⁶⁹

JLDX017 Zhang Xuechun, male; date of birth: 1962.

Personal Profile: Chief surgeon of Hepatobiliary and Pancreatic Surgery, professor, Master's supervisor

He graduated from the Department of Medicine of former Bethune Medical University in 1978 and has been practicing general surgery since then. He has served as a resident, chief resident, attending surgeon and associate professor. In 1987, he went to the University of Zurich, Switzerland to continue his research in pancreatic surgery and received his doctoral degree from the University of Zurich in 1989.

WOIPFG's Investigative Report on the Alleged Organ Harvesting of Living Falun Gong Practitioners at Yan'an Hospital in Kunming and Its Staff Members Suspected of Participation

Address: Kunming Yanan Hospital, 245 Renming Dong Lu, Kunming

Introduction

From the descriptions in the medical papers published by Wu Jian et al. of the hospital, the process of they cutting out the heart and lungs of the donors is suspected of being a record of 2 homicide cases. In view of the background of the CCP (Chinese Communist Party) 's national crime of organ harvesting, the hospital is suspected of participating in the crime of organ harvesting from Falun Gong practitioners and other groups.

I. Hospital Overview

Kunming Yan'an Hospital is a national tertiary first-class general hospital. The hospital is a national-level professional training base for coronary heart disease, structural heart disease, and arrhythmia intervention, and a national-level heart transplant center. It received heart transplant qualification in 2013.¹⁷⁴

追查迫害法輪功國際組織（追查國際）

World Organization to Investigate the Persecution of Falun Gong (WOIPFG)

To investigate the criminal conduct of all institutions, organizations, and individuals involved in the persecution of Falun Gong; to bring such investigation, no matter how long it takes, no matter how far and deep we have to search, to full closure; to exercise fundamental principles of humanity; and to restore and uphold justice in society

The hospital has 1,338 beds and advanced equipment such as 3.0T MRI (Magnetic Resonance Imaging) and 1.5T MRI system.¹⁷⁵

II. Kidney transplantation, heart transplantation, and combined heart-lung transplantation Overview

In 1983, the hospital was one of those that carried out allogeneic kidney transplantation early. And in 1987, kidney transplantation was routinely performed, treating nearly 200 people with renal failure.¹⁷⁶

The Department of Cardiovascular Surgery of Yan'an Hospital in Kunming took the lead in carrying out the first combined heart-lung transplant in Southwest China; the first heart transplant in Kunming; the first single-lung transplant + congenital heart defect repair operation¹⁷⁷ in Kunming. During 2003-2009, it completed 11 heart transplants.¹⁷⁸ As of 2008, it completed 2 cases of combined heart-lung transplantation.¹⁷⁹ As of 2006, it participated in performing 1 single lung transplantation.¹⁸⁰

III. Heart and lung extraction from 2 cases of combined heart-lung transplant donors suspected of murder¹⁸¹

From the description in the medical paper published by Wu Jian et al. of Yan'an Hospital in Kunming city, China, the process of cutting out the heart and lungs of the donor is suspected to be the record of 2 homicide cases.

2 例心肺联合移植术供体心肺摘取及保护

吴 剑, 陈智豫, 李亚雄, 杨应南, 王 悦, 周映辉

(昆明市延安医院 心胸外科, 云南 昆明 650051)

关键词: 心肺联合移植术; 供体心肺; 摘取及保护

中图分类号: R654 文献标识码: B 文章编号: 1006-4141 (2008) 05-0469-02

心肺联合移植术 (Combined Heart Lung Transplantation, CHLT) 现已公认是治疗终末期心肺疾病的有效方法^[1]。随着手术技术、器官保护及免疫抑制剂的有效应用, 目前全球 CHLT 手术量增加极为迅速, 据 1994 年国际心肺移植学会报道, 1981 年以来全球已完成 CHLT 1200 例以上^[2]。由于供体来源匮乏, CHLT 中供体心肺的获取及保护更加成为手术成功与否的主要环节^[3]。术中尽可能缩短心肺缺血时间、对供体心肺进行充分、彻底的灌洗以及完善的低温保护是手术应遵循的主要原则^[4]。我院迄今共施行 CHLT 两例, 现将手术过程中供体心肺摘取及保护体会总结如下。

资料与方法 受体患者 2 例, 1 例男性 30 岁, 1 例女性 33 岁。术前诊断均为先天性心脏病、室间隔缺损、重度肺动脉高压、艾森曼格综合征, 术前心功能 III-IV 级, 适合于心肺联合移植术, 选

择合适供体后择期手术。

手术操作: 供体入室后, 即按手术常规麻醉及插管, 静脉注射甲强龙 1g, 并肝素化 (3mg/kg)。麻醉生效后, 常规消毒铺巾, 取正中切口, 按常规手术方法快速进胸, 倒“T”形打开心包, 游离主动脉及肺动脉, 主动脉根部及肺动脉近分叉部以 4-0 prolene 线作荷包后插入 Sans 灌注针及大口径肺动脉灌注管 (14F)。随后由肺动脉灌注管按 $25 \mu\text{g} \cdot \text{kg}^{-1} \cdot \text{min}^{-1}$ 注入前列地尔 (PGE1), 用以对抗低温灌洗造成的血管收缩^[5], 同时因其扩张肺血管的作用, 使肺能得到均匀彻底的灌注^[6]。灌注维持 2min 后剂量加倍, 再维持 2min 后再次加倍。由胸骨后打开双侧胸膜, 完全打开两侧胸腔, 并切除心包。阻断主动脉, 主动脉根部灌注 4℃ HTK 心肌灌注液, 同时切断下腔静脉, 并切开左心耳, 以充分减压心腔。由肺灌注管灌注 HTK

Figure 1 Yunnan

Medicine, vol. 29, no. 5, 2008, pp. 469

The description of the surgical operation in the above paper: After the donor (the organ provider) entered the operating room, conventional anesthesia and tracheal intubation were administered; intravenous injection of methylprednisolone 1g, and heparinization (3mg/Kg). After the anesthesia took effect, routine disinfection

追查迫害法輪功國際組織（追查國際）

World Organization to Investigate the Persecution of Falun Gong (WOIPFG)

To investigate the criminal conduct of all institutions, organizations, and individuals involved in the persecution of Falun Gong; to bring such investigation, no matter how long it takes, no matter how far and deep we have to search, to full closure; to exercise fundamental principles of humanity; and to restore and uphold justice in society

and drape were performed; An incision was made in the center and into the chest swiftly using conventional surgical procedures.

Analysis:

The clinical judgment of brain death must include all three indicators: deep coma, loss of brainstem reflexes, and involuntary breathing. The involuntary breathing refers to the need to rely on a ventilator to maintain breathing, and the criterion must be verified by the spontaneous breathing challenge trial. The trial requires the temporary removal of ventilator support for 8-10 minutes with patient showing no sign of spontaneous breathing. The following conclusions can be drawn from the above paper:

- 1) The donor was alive, because generally people alive need anesthesia and tracheal intubation.
- 2) The donor was a conscious person. The surgical operation in the above paper says: "After the anesthesia took effect, routine disinfection and drape were performed," it shows this person was a living person with physiological signs (nerve sensation, nerve reflex) that can judge the effect of anesthesia.
- 3) The donor had spontaneous breathing, because the conventional anesthesia and tracheal intubation were performed after the donor entered the operating room, that is, the donor could breathe on his/her own without intubation before entering.
- 4) From the above analysis, this donor was conscious and had spontaneous breathing, so he/she was not brain dead or in a deep coma.

Based on the above analysis, the following conclusions can be drawn:

- 1) This paper is a report of 2 cases of taking heart and lungs, a report of harvesting heart and lungs from a living person, i.e., harvesting heart and lungs to kill for transplantation.
- 2) They can write the process of killing and publish it on the Internet, this is enough to show that killing has become a routine job, so they are unscrupulous.

IV. List of responsible persons

KMYA001 Li Jian, Male

Chief surgeon of urology, professor

Profile: Undertook the clinical work of urology for more than 20 years. Has extensive clinical experience in kidney transplantation. ¹⁸²

KMYA002 Li Tianhui, Male

Chief Surgeon, Professor, Director of Urology

Resume: Engaged in clinical work for more than 30 years, with rich clinical experience and professional skills in urological surgery. Specializes in kidney transplantation. ¹⁸³

KMYA003 Zhong Yiming, Male

Director of Urology, Chief Surgeon, Professor.

He graduated from the Medical Department of Kunming Medical College in 1984 with a bachelor's degree in medicine. From 1998 to 2000, he studied in the on-the-job postgraduate class of Kunming Medical College. Specializes in kidney transplant surgery, etc. ¹⁸⁴

追查迫害法輪功國際組織 (追查國際)

World Organization to Investigate the Persecution of Falun Gong (WOIPFG)

To investigate the criminal conduct of all institutions, organizations, and individuals involved in the persecution of Falun Gong; to bring such investigation, no matter how long it takes, no matter how far and deep we have to search, to full closure; to exercise fundamental principles of humanity; and to restore and uphold justice in society

KMYA004 Li Hui, Male

Deputy Chief Surgeon, Associate Professor of Urology

He has been engaged in the clinical work of urology for more than 20 years, and has rich clinical experience in kidney transplantation and the diagnosis and treatment of diseases following kidney kidney transplantation. Specializes in kidney transplantation and post-operative management of kidney transplantation, etc.¹⁸⁵

KMYA005 Zhang Tingsong, Male

Deputy Chief Surgeon, Associate Professor, Deputy Director of Urology.

Department of Urology, Yan'an Hospital of Kunming City

In 1981, he began to specialize in urology, and can complete various complicated urological operations, including kidney transplantation.¹⁸⁶

KMYA006 Li Yaxiong, Male

Date of birth 1962

Chief Surgeon and Professor of Cardiac and Great Vascular Surgery. Director of the Cardiothoracic Surgery Research Center.

Profile: Graduated from Kunming Medical College in 1986. In 2003, he went to Germany's Berlin Heart Center for further study; in 2008, he went to the Heart Center of the University of Pennsylvania Hospital to visit and study.

Main learning experience: September 1981-August 1986, studied medicine at a five-year program in Kunming Medical College. October 1993-October 1994, further study in Beijing Anzhen Hospital. October 2003-October 2004, further study at Berlin Heart Center, Germany. November 2008 -January 2009, visiting and studying at the Heart Center of the University of Pennsylvania Hospital.

Main work experience: September 1986-August 1993, resident surgeon in Yan'an Hospital of Kunming City. September 1993-August 1998, attending surgeon of Yan'an Hospital of Kunming City. From September 1998 to October 2003, Deputy Chief Surgeon and Administrative Deputy Director of Yan'an Hospital of Kunming City. May 2003-January 2011, Deputy Director of Yunnan Cardiothoracic Surgery Research Center. November 2003-, Chief Surgeon and Chief of Administration Department of Cardiothoracic Surgery, Yan'an Hospital, Kunming City. September 2007-, Vice President of Yunnan Cardiovascular Hospital. February 2011-, Director of Yunnan Cardiothoracic Surgery Research Center.

2003 through 2009, participated in the implementation of 11 cases of heart transplantation.¹⁸⁷ As of 2008, participated in performing 2 cases of heart-lung extraction from donors in combined heart-lung transplantation.¹⁸⁸

Main scientific research projects: Yunnan Provincial Science and Technology Project "Clinical application of organ transplantation in Eisenmenger syndrome and research on immune tolerance".

Main scientific and technological achievements: 1. Clinical application of single-lung transplantation in the treatment of ventricular septal defect with Eisenmenger syndrome (2007, the second prize of Kunming Science and Technology Progress Award) 2. "Application of combined heart-lung transplantation in the treatment of end-stage cardiopulmonary diseases Research" (2005, the third prize of Yunnan Province Science and Technology Progress Award and the second prize of Kunming City Science and Technology Progress Award).

追查迫害法輪功國際組織（追查國際）

World Organization to Investigate the Persecution of Falun Gong (WOIPFG)

To investigate the criminal conduct of all institutions, organizations, and individuals involved in the persecution of Falun Gong; to bring such investigation, no matter how long it takes, no matter how far and deep we have to search, to full closure; to exercise fundamental principles of humanity; and to restore and uphold justice in society

Mainly engaged in surgical treatment and clinical research of organ transplantation, especially in heart transplantation and combined heart-lung transplantation, he has achieved very satisfactory results.¹⁸⁹

KMYA007 Jiang Lihong, female, date of birth: July 1961¹⁹⁰

Personal profile: Director of Kunming Yan'an Hospital/Yunnan Cardiovascular Hospital. Department of Cardiovascular Surgery, Yan'an Hospital, Kunming City. During 2003-2009, participated in the implementation of 11 heart transplants.¹⁹¹

KMYA008 Chen Zhiyu, male

Personal profile: Chief surgeon and professor of Cardiovascular Surgery. Deputy Director of the Yunnan Provincial Cardiothoracic Surgery Research Center and Director of the First Ward of Cardiothoracic Surgery.¹⁹² Participated in performing 11 heart transplants during 2003-2009.¹⁹³ As of 2008, participated in performing 2 cases of heart-lung extraction from donors in combined heart-lung transplantation.¹⁹⁴

KMYA09 Wu Jian, male. Date of birth: July 1972

Personal profile: Currently the medical team leader of the Second Ward of Cardiovascular Surgery; the technical lead of the subspecialty group of surgical treatment of coronary heart disease. Engaged in clinical work in cardiac surgery for more than ten years. As of 2008, participated in 2 cases of heart-lung extraction from donors in combined heart-lung transplantation.¹⁹⁵

KMYA010 Yang Yingnan, male.

Personal profile: Director of the Second Ward of Cardiovascular Surgery. As of 2008, participated in performing 2 cases of heart-lung extraction from donors in combined heart-lung transplantation.¹⁹⁶

KMYA011 Wang Yue, male

Personal profile: Cardiovascular surgery clinical operations. As of 2008, participated in performing 2 cases of heart-lung extraction from donors in combined heart-lung transplantation.¹⁹⁷

KMYA012 Zhou Yinghui, male

Personal profile: Cardiovascular surgery clinical operations. As of 2008, participated in performing 2 cases of heart-lung extraction from donors in combined heart-lung transplantation.¹⁹⁸

KMYA013 Zou Honglin, male.
