

Organ Transplantation Ward, Changhai Hospital, Shanghai

Date: May 5th, 2018 (Phone# +862131162866)

Summary

1. A lot of kidney transplants are performed, with an average of 1 to 2 surgeries every day.
2. More than 100 cases of liver transplants were also performed this year.
3. Zhu Youhua is doing it.

Contents of the recording

Nurse: Hello!

Investigator: Hello, are you the Shanghai Changhai Hospital?

Nurse: Yes, who is calling?

Investigator: A friend of mine introduced me that your Changhai Hospital has a director named Zhu Youhua who does a very good job in kidney transplantation, and your hospital does a lot. My family members are interested, so I am calling to ask, how long it will take to wait to get it done. What's the quickest time?

Nurse: Well, I'm not sure about this either. It's hard to tell.

Investigator: May I ask, is this hospital still doing a lot of kidney transplants right now?

Nurse: Yes.

Investigator: Is it still doing?

Nurse: That's right.

Investigator: Does Zhu Youhua do it himself?

Nurse: Right, Zhu Youhua does it himself.

Investigator: Zhu Youhua is doing it in-person, right?

Nurse: That's right.

Investigator: That's to say you do it every day, every day, right? Like this kidney transplants, right?

Nurse: That's right.

Investigator: Does that mean, the waiting time, if you do it a lot and do it every day, the waiting time should not be too long, right?

Nurse: We, I'm not sure about this. There must be a lot of people waiting. It's impossible to just come in and let you do it just because you want to do it.

Survey: Does the ward have spaces? Are beds available? I mean people to be hospitalized.

Nurse: In short of availability.

追查迫害法轮功国际组织

World Organization to Investigate the Persecution of Falun Gong

To investigate the criminal conduct of all institutions, organizations, and individuals involved in the persecution of Falun Gong; to bring such investigation, no matter how long it takes, no matter how far and deep we have to search, to full closure; to exercise fundamental principles of humanity; and to restore and uphold justice in society

Investigator: In short, that means you don't have many beds, right?

Nurse: Right.

Investigator: Do you have only one ward for kidney transplantation, or a few wards are there?

Nurse: Right.

Investigator: Just one ward, wow, that's too few. How many beds are there in a ward? Not many. Are there a hundred?

Nurse: What should I say? We do not only kidney transplants but also liver transplants.

Investigator: I just want to ask how many surgeries your hospital can perform every day?

Nurse: How many surgeries can be done every day? If all counts, we can do one or two surgeries every day.

Investigator: This kidney transplant, you can perform one to two kidney transplants every day, right?

Nurse: Right. It also depends on the situation.

Investigator: Then let's say the kidney source, the donors are healthy ones, right? In general.

Nurse: Huh?

Investigator: Donors, are donors all healthy?

Nurse: How do I know this?

Investigator: Got to ask a doctor, ask a doctor. Dr. Zhu Youhua opens clinic, a specialist clinic.

Nurse: Right, he seems to open on Wednesdays.

Investigator: How about that, do people in the army have any priority? Can donors like those from Falun Gong or prisoners used in the past still be available?

Nurse: What kind of donor? How do I know? Got to ask the doctor specifically about this. How do I know where that kidney came from?

Investigator: So, if I have to call the doctor, which number should I call?

Nurse: You want a doctor's number. We don't have a doctor's number here. You can only get it when you come to the outpatient clinic here.

Investigator: Oh, okay, okay, thank you then.
