## 追查迫害法輪功國際組織 ( 追查國際 )

### World Organization to Investigate the Persecution of Falun Gong (WOIPFG)

To investigate the criminal conduct of all institutions, organizations, and individuals involved in the persecution of Falun Gong; to bring such investigation, no matter how long it takes, no matter how far and deep we have to search, to full closure; to exercise fundamental principles of humanity; and to restore and uphold justice in society

## China's Organ Transplant Organizations are the Executing Entities for the Communist Party's State Crime of Live Organ Harvesting

Since 1999, led by its then-leader Jiang Zemin, the Chinese Communist Party (CCP) criminal group has been manipulating China's entire state apparatus, including the Party, government, military, armed police, judicial system, and medical institutions, through the Political and Legal Affairs Commission and the "610" system, to commit nationwide mass extermination of Falun Dafa practitioners by means of live organ harvesting for transplantation. The CCP's live organ harvesting of Falun Gong practitioners is a crime against humanity and a crime of genocide initiated on the orders of Jiang Zemin.

Since the CCP's live organ harvesting of Falun Gong practitioners is a state genocidal crime conducted as a political campaign, organ transplant institutions in all provinces, central government-controlled municipalities, and autonomous regions of mainland China, including all military, armed police, and local hospitals (medical centers) are suspected to have participated in this crime, even including a considerable number of hospitals unqualified to perform organ transplants, such as small and medium-sized hospitals and specialized hospitals. Similar to how all Chinese hospitals were involved in forced abortions during the CCP's implementation of the "one-child policy", all transplant facilities in China today have participated in live organ harvesting.

In view of the broader context of the CCP's state crime of live organ harvesting, those in charge of organ transplant hospitals/centers and similar institutions in China are suspected of having been involved in the crime of live organ harvesting from groups such as Falun Gong practitioners.

### Evidence Collection Methods

#### 1. Direct and indirect comprehensive telephone investigation and on-site investigation of the people suspected of involvement in the live organ harvesting

The subjects of our investigations include government officials, policemen, doctors and other medical personnel.

#### Geographical Distribution of the Subjects of Investigation, and the Duration of Investigations:

The WOIPFG's subjects of investigation are people in different positions, who are located across the entire country of China. Our investigations have been ongoing for nearly two decades, and our investigation results have always been consistent. The evidence gathered by us verifies that live organ harvesting is a systematic arrangement by the CCP.

- 1) Subjects of investigation: Presidents, directors, doctors, nurses, and security guards of organ transplant hospitals.
- 2) Hospitals involved: A considerable amount of recorded evidence has been obtained from many provincial, military, armed police, and local organ transplant hospitals (centers) across China.
- 3) Time span: Our investigations on the live organ harvesting started in 1999, and they're ongoing to this day.

### 2. Data investigation

- 1) We have been collecting data from the hospitals' websites and press releases.

# 追查迫害法輪功國際組織 ( 追查國際 )

## World Organization to Investigate the Persecution of Falun Gong (WOIPFG)

To investigate the criminal conduct of all institutions, organizations, and individuals involved in the persecution of Falun Gong; to bring such investigation, no matter how long it takes, no matter how far and deep we have to search, to full closure; to exercise fundamental principles of humanity; and to restore and uphold justice in society

- 2) We have been searching for and analyzing medical papers on transplantation.
- 3) We have been using the website [www.archive.org](http://www.archive.org) to view the hospitals' previously archived information.
- 4) We have been collecting reports from the official Chinese media outlets.
- 5) We have organized all the information obtained from our investigations to create a database of the hospitals.

All the facts have shown us that the CCP is by no means a rational or normal organization or political party; but instead, it is a supra-state criminal syndicate controlled by a group of criminals who have committed crimes against humanity. The CCP's logic of thinking and principles of action are anti-human, and the crimes it has committed are forms of evil that humanity had never seen previously.

WOIPFG's investigative report series contains nearly 70 investigation reports on the alleged organ harvesting of living Falun Gong Practitioners at major Chinese military and civilian hospitals and on their staff members suspected of participation in this crime. This volume contains six such investigation reports.

### Table of Contents

Anting Campus: 700 Moyu North Road, Anting Town, Jiading District  
Shanghai campus: 225 Changhai Road, Yangpu District

### **Foreword**

Since March 9, 2006, when the first witness exposed to the international community the CCP's crime of harvesting organs from living Falun Gong practitioners, after more than 10 years of investigation and evidence collection, WOIPFG obtained a large amount of investigative audio evidence, collected and sorted out the data and documents on organ transplantation published by the CCP in the early stage, etc., confirmed that since the end of 1999, the CCP has harvested organs from living Falun Gong practitioners on a large scale, and that this crime of national genocide has spread throughout China's provinces, municipalities, autonomous regions and central government directly controlled municipalities, involving organ transplant facilities of all military, armed police and local hospitals (medical centers). Even a considerable number of small and medium-sized hospitals and specialized hospitals that are not qualified for transplant surgery are suspected of being involved. It can be said that due to the CCP's persecution of Falun Gong, all organ transplant institutions in China today are involved in the evil of harvesting living Falun Gong practitioners' organs. In particular, the hospitals affiliated with the military medical universities are the main hospitals for the execution of this crime of genocide. <sup>1</sup>

The Third Affiliated Hospital to the PLA Navy Military Medical University (Oriental Hepatobiliary Surgery Hospital, Oriental Institute of Hepatobiliary Surgery) is no exception and in line with the CCP's persecution of Falun Gong, and there has been an explosive development. The hospital's president, Wu Mengchao said, "The number of liver transplants we are doing now is the largest in the world".<sup>2</sup>

### **I. Hospital Overview**

The Third Affiliated Hospital of the PLA Navy Military Medical University (Oriental Hepatobiliary Surgery Hospital, Oriental Institute of Hepatobiliary Surgery) is a tertiary level-A general hospital featuring hepatobiliary surgery, which is the center of scientific research, medicine and teaching of the CCP's military. It cooperates closely with the organ transplantation center of Changzheng Hospital, the first organ transplantation institute of the CCP military, and is good at liver transplantation. The hospital's building area is 200,000 square meters, and there are 1500 patient beds.<sup>3</sup>

### **II. It is one of the main hospitals for the CCP military to harvest organs from living Falun Gong practitioners.**

According to a recording of a telephone investigation of Bai Shuzhong, health director of the General Logistics Department of the People's Liberation Army, the hospital is also one of the main hospitals for the CCP military to harvest organs from living Falun Gong practitioners.

Bai Shuzhong, who served as director of health in the General Logistics Department of the People's Liberation Army from 1998 to 2004, admitted in a WOIPFG telephone investigation that during his tenure, former CCP leader Jiang Zemin personally ordered the organ harvesting of living Falun Gong practitioners,

## 追查迫害法輪功國際組織 ( 追查國際 )

### World Organization to Investigate the Persecution of Falun Gong (WOIPFG)

To investigate the criminal conduct of all institutions, organizations, and individuals involved in the persecution of Falun Gong; to bring such investigation, no matter how long it takes, no matter how far and deep we have to search, to full closure; to exercise fundamental principles of humanity; and to restore and uphold justice in society

and that hospitals affiliated to military medical universities were the main hospitals in the military system to implement Jiang Zemin's order.<sup>4</sup>

(Recording 1 download: [MP3](#), Transcript download: [pdf16](#))

"It was Chairman Jiang at that time," "there was an instruction...there was an instruction that said," "To carry out these things, that is organ transplantation," and he said, "The few military medical universities that we have can handle it, and the military medical universities directly under our General Logistics Department have repeatedly requested (doing it), because at that time Jiang paid great attention to this issue and attached great importance to this issue."

Bai Shuzhong: From 1998 to 2004, he served as the head of the Health Department of the General Logistics Department of the CPC Army, which was the peak period for the CCP's persecution of Falun Gong and organ harvesting of living Falun Gong practitioners, with the army as the main body for such organ harvesting. As the highest medical administrative leader of the military health system, Bai should be one of the people who know the situation the best.

### **III. The hospital has a key laboratory of the whole army, which is the "top priority" construction discipline of the army**

Shanghai Oriental Hepatobiliary Surgery Hospital stated in its introduction that the hospital is a national key discipline, a national continuing medical education base, a specialized center for hepatobiliary surgery in the whole army, a hepatobiliary surgery institute of the whole army, a key laboratory of the National Ministry of Education and the whole army, a "top priority" construction discipline of the army, a key discipline of leading medical specialties in Shanghai, and a top priority clinical medical center in Shanghai.<sup>5</sup>

The Oriental Institute of Hepatobiliary Surgery was officially put into operation in May 1993, as the first hepatobiliary surgery institute at home and abroad that integrates clinical treatment and basic research, with 250 beds. Jiang Zemin wrote the names for both the Oriental Institute of Hepatobiliary Surgery and the Oriental Hospital of Hepatobiliary Surgery. The Department of Hepatobiliary Surgery led by Wu Mengchao has always been the scientific research, medical treatment and teaching center of hepatobiliary surgery in China, and was approved as the first batch of academic venue for granting master's and doctoral degrees after the restoration of China's postgraduate system in 1979, was approved as a key discipline of China and an open laboratory of the army in 1989, and was approved as a key laboratory of the army and a postdoctoral mobile station of clinical medicine in 1991.<sup>6</sup>

### **IV. Hospital presiden Wu Mengchao said,"The number of liver transplants we are doing now is the largest in the world."**

Wu Mengchao, president of Shanghai Oriental Hepatobiliary Surgery Hospital, was the chief consultant of the CCP's all-army organ transplantation conference, academician of the Chinese Academy of Sciences, and the "father of hepatobiliary surgery in China, as called by the CCP". He is the deputy head of the expert group of the General Logistics Department of the PLA and the member at vice chairman level of the Medical Science and Technology Committee of the PLA.<sup>7</sup> Jiang Zemin, former CCP leader, received Wu Mengchao five times<sup>8</sup> and personally signed an order that the CPC Central Military Commission held a special meeting to award him the title of "model medical expert", the so-called first-class heroic model medal, and China's highest technology award for 2006.

On May 11, 2011, Wu Mengchao and his student Wang Hongyang said in an interview with Sina that the number of liver transplants was the largest in the world.

Host Yin Jun: "What is the current level of liver transplantation in our country?"

## 追查迫害法輪功國際組織 ( 追查國際 )

### World Organization to Investigate the Persecution of Falun Gong (WOIPFG)

To investigate the criminal conduct of all institutions, organizations, and individuals involved in the persecution of Falun Gong; to bring such investigation, no matter how long it takes, no matter how far and deep we have to search, to full closure; to exercise fundamental principles of humanity; and to restore and uphold justice in society

Wu Mengchao: "The number of liver transplants we are doing now is the largest in the world, and the quality and results are also good, and we have caught up with the international level."<sup>9</sup>

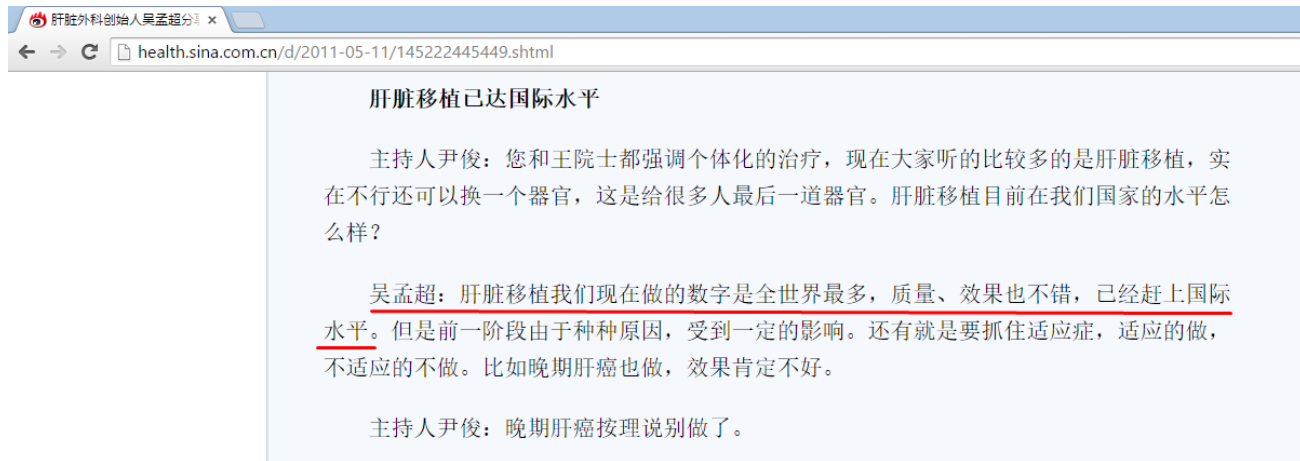

Figure 1 Snapshot of Sina Health's webpage in May 2011

## V. The rapidly growing number of beds and busyness show the scale of the transplant number

The Oriental Hepatobiliary Surgery hospital stated in its introduction that the hospital has 742 beds.<sup>10</sup> According to the department navigation on the website, at least 7 in 11 surgeries are mainly engaged in liver transplantation, and they are Special Needs Treatment Department I,<sup>11</sup> Liver Transplantation Department<sup>12</sup>, Liver Surgery I<sup>13</sup>, Biliary Tracts I<sup>14</sup>, Liver Surgery III<sup>15</sup>, Liver Surgery V<sup>16</sup>, Biliary Tract II<sup>17</sup>.

Due to busy business, the hospital opened a new site at the end of 2015, with 1,500 beds<sup>18</sup> doubling its number of beds. From the perspective of the number of hospital beds and busyness, the real transplant volume of this hospital is no less than that of Tianjin First Central Hospital. The transplant building of Tianjin First Central Hospital has 500 beds<sup>19</sup>.

## VI. The team of liver transplant doctors is strong

## 追查迫害法輪功國際組織 ( 追查國際 )

### World Organization to Investigate the Persecution of Falun Gong (WOIPFG)

To investigate the criminal conduct of all institutions, organizations, and individuals involved in the persecution of Falun Gong; to bring such investigation, no matter how long it takes, no matter how far and deep we have to search, to full closure; to exercise fundamental principles of humanity; and to restore and uphold justice in society

According to the hospital's introduction, Shanghai Oriental Hepatobiliary Surgery Hospital has 1 academican of the Chinese Academy of Sciences, 1 academican of the Chinese Academy of Engineering, 33 doctoral supervisors, 80 master's supervisors, and 90 senior professionals<sup>20</sup>. There are 8 chief surgeons, 7 deputy chief surgeons, 2 attending surgeons, and 32 others for a total of 49 members engaged in liver transplantation.

At present, the media information in China on the number of cases of Wu Mengchao's liver transplantation has been completely deleted. According to Minghui.com, by 2010, Wu Mengchao himself had completed more than 4,000 liver transplants. In addition, it is reported that Wu Mengchao used a scalpel to "save" the lives of more than 14,000 patients<sup>21</sup>.

As of 2010, Wu Mengchao alone has done more than 4,000 liver transplants, and there are 49 transplant doctors in Shanghai Oriental Hepatobiliary Surgery Hospital. Just imagine how large the volume of organ transplantation would be in that hospital.

### **VII. Prepare for the establishment of Mengchao Hepatobiliary Hospital of Fujian Medical University and carry out liver transplantation**

In 2011, Fujian Medical University and the Second Military Medical University (Changzheng Hospital) began to cooperate in the establishment of Mengchao Hepatobiliary Hospital of Fujian Medical University. In 2012, Liu Jingfeng became the president of Mengchao Hepatobiliary Hospital<sup>22</sup>. The hospital claimed that the Department of Hepatobiliary and Pancreatoscopic Surgery of Mengchao Hepatobiliary Hospital of Fujian Medical University is a local unit in the province approved by the Ministry of Health to carry out liver transplantation. At present, the department has 2 wards and 86 open beds. At present, there are 8 doctors with doctoral degrees and 8 with master's degrees, 3 chief surgeons (including 1 professor and 2 associate professors), 4 deputy chief surgeons, and 3 master's supervisors<sup>23</sup>.

### **VIII. Principal Responsible Persons**

#### **HJJYDXD3FYY001 Wu Mengchao**

Job title: Director of the Oriental Hepatobiliary Surgery Institute, academican of the Chinese Academy of Sciences.

Personal Profile: Deputy leader of the expert team of the PLA General Logistics Department, deputy director of the Medical Science and Technology Committee of the General Logistics Department, member of the Evaluation Committee of the Science and Technology Progress Award of the General Logistics Department, vice president of the Chinese Medical Association, vice chairman level member of the Surgical Association of the Chinese Medical Association, director of the Organ Transplantation Society of the Chinese Medical Association, and consultant of the Ethics Society of the Chinese Medical Association. Deputy to the Shanghai People's Congress, member of the All-China Federation of Returned Overseas Chinese, vice president of the Shanghai Red Cross Society, deputy editor of Huang Jiasi's Surgery (Sixth Edition), editor-in-chief, deputy editor and editorial board member of more than 20 journals such as Chinese Medicine (English Edition), Chinese Surgery, Chinese Organ Transplantation, PLA Medicine, Shanghai Medicine, and Journal of the Second Military Medical University.

In 1943, he was admitted to the Medical School of Tongji University and graduated with a bachelor's degree in medicine in July 1949. In August of the same year, he started working at Shanghai Second Military Medical University, and successively served as teaching assistant, resident surgeon, lecturer, attending

### World Organization to Investigate the Persecution of Falun Gong (WOIPFG)

To investigate the criminal conduct of all institutions, organizations, and individuals involved in the persecution of Falun Gong; to bring such investigation, no matter how long it takes, no matter how far and deep we have to search, to full closure; to exercise fundamental principles of humanity; and to restore and uphold justice in society

director of the Chinese Medical Association, director of the 32nd Shanghai Medical Association, member of the Organ Transplantation Society of the Chinese Medical Association, and member of the Novartis Liver Transplantation Expert Committee. He is a member of the editorial board of 16 journals, including Chinese Journal of Organ Transplantation, Chinese Journal of Abdominal Surgery, Journal of Hepatology, Chinese Journal of General Surgery, Chinese Journal of Clinical and Basic General Surgery, Chinese Journal of Practical Surgery, Journal of Hepatobiliary Surgery, Journal of Clinical Oncology, and Journal of the Second Military Medical University.

In 1993, he went to study at the Liver Transplantation Center of Naxi Medical College in Chicago, USA, and was responsible for the basic and clinical research of liver transplantation in China after returning to China.<sup>35</sup>

From 1996 to 1999, he was responsible for performing piggyback allograft for 5 patients with advanced liver disease.<sup>36</sup>

He is good at the diagnosis and treatment of various diseases in hepatobiliary surgery and liver transplantation.

#### HJJYDXD3FYY013 Yan Yiqun

Job Title: Department chief, Doctorate in medicine, chief surgeon, professor, doctoral supervisor.

Personal Profile: Member of the International Society of Transplantation and member of the Australian-New Zealand Society of Transplantation

He has served as a registered transplant surgeon at the National Liver Transplant Center of Australia and Royal Prince Alfred Hospital in Sydney, Australia for 3 years, and has completed more than 60 clinical liver transplants. In 1997, he began to cooperate with the Centenary Institute of the University of Sydney to conduct research on transplant immune tolerance, and more than 10 papers were published in international important journals such as Journal of Immunology, Immunology and Transplantation.<sup>37</sup>

### **WOIPFG's Investigative Report on the Alleged Organ Harvesting of Living Falun Gong Practitioners at the First Affiliated Hospital of the Naval Medical University of the People's Liberation Army (formerly Changhai Hospital of the Second Military Medical University) and Its Staff Members Suspected of Participation**

Address: 168 Changhai Road, Yangpu District, Shanghai, China

#### **Preface**

The hospital was one of the hospitals affiliated with the Military Medical Universities that followed Jiang Zemin's order to harvest organs from live Falun Gong practitioners. The hospital carried out kidney transplant quite early on the mainland China. After 1999, it claimed on the webpage of its urology

## 追查迫害法輪功國際組織 ( 追查國際 )

### World Organization to Investigate the Persecution of Falun Gong (WOIPFG)

To investigate the criminal conduct of all institutions, organizations, and individuals involved in the persecution of Falun Gong; to bring such investigation, no matter how long it takes, no matter how far and deep we have to search, to full closure; to exercise fundamental principles of humanity; and to restore and uphold justice in society

department that "1. The donor kidneys are in good quality, result in kidney function recovers quickly after surgery; 2. Having sufficient sources of donor kidneys, so the waiting time for transplant is short."

Given that, the general context of the CCP's national wide crime of live organ harvesting, the hospital is suspected of participating in the crime of harvesting organs of live Falun Gong practitioners and other groups.

### Hospital Overview

It is the affiliated Hospital of Military Medical University of the Chinese Communist Party, a third level first class comprehensive hospital. It covers an area of 234,000 square meters, with a construction area of 680,000 square meters. The hospital operates 57 divisions, with 2,100 beds<sup>38</sup>.

### **I. According to the testimony of Bai Shuzhong, Minister of Health of the General Logistics Department of the PLA, the hospital was the leading hospital for live organ harvesting in the military.**

Bai Shuzhong served as the Minister of Health of the PLA General Logistics Department from 1998 to 2004. In a telephone investigation conducted by WOIPFG, he directly admitted that during his tenure, Jiang Zemin personally ordered the live organ harvesting of Falun Gong practitioners, and that the hospitals affiliated with the Military Medical Universities were the main hospitals in the military system that carried out Jiang's order.<sup>39</sup>

### **II. Sufficient source of kidney donor with good quality and short waiting time**

It claims on its webpage of the urology department of the hospital: "1. The donor kidneys are in good quality, result in kidney function recovers quickly after surgery; 2. Having sufficient sources of donor kidneys, so the waiting time for transplant is short."<sup>40</sup>

### **III. The hospital's kidney transplantation was carried out early and the amount of transplantation is huge**

Since the first kidney transplant in 1978 and the first liver transplant in 1996, Changhai Hospital of the Second Military Medical University has always maintained a leading position in China in terms of transplantation technology<sup>41</sup>.

Professor Zeng Li, Director of the Department of Kidney Transplantation of Shanghai Changhai Hospital, is the chief expert. The team consists of six key doctors from the department. Established in 2001, the department has continuously improved the treatment of immunosuppressive therapy and difficult complications after uremia, kidney tumor, adrenal gland disease, pancreatic and kidney combined transplantation and kidney transplantation. Especially in recent years, the transplantation level of children's kidney transplantation has increased significantly. The department currently has 3 senior level doctors, 1 at intermediate level and 1 at junior level. In recent years, the department has made major breakthroughs in scientific research: as the project leader, Professor Li has been engaged in urology and kidney transplantation for nearly 16 years, and is good at kidney transplantation, urological tumor diagnosis and treatment and endourology. His main research interests include basic and clinical research on complications such as infection after kidney transplantation and delayed recovery of renal function. He is also engaged in genetic study of urological tumors. He is involved in the animal experiment and clinical application of HCA-II. novel multi-organ preservation solution<sup>42</sup>.

### **IV. In March 2016, the transplant center was established**

## 追查迫害法輪功國際組織 ( 追查國際 )

### World Organization to Investigate the Persecution of Falun Gong (WOIPFG)

To investigate the criminal conduct of all institutions, organizations, and individuals involved in the persecution of Falun Gong; to bring such investigation, no matter how long it takes, no matter how far and deep we have to search, to full closure; to exercise fundamental principles of humanity; and to restore and uphold justice in society

The Second Military Medical University Changhai Hospital established a transplant center in March 2016,<sup>43</sup> and by the end of 2017, nearly 1,000 cases of liver and kidney transplantation had been reported. On May 18, 2016, Changhai Hospital held the establishment and unveiling ceremony of the Department of Organ Transplantation, attended by President Sun Yinghao of the Second Military Medical University, Minister Cheng Chuanmiao of the Training Department, President Zhang Congxin of Changhai Hospital, Political Commissar Bao Erji and leaders of institutions. Director Zeng Li of the Department of Organ Transplantation presented a report. Until May 18, since the trial operation of the organ transplant department began on March 7, 48 kidney transplant operations had been carried out.<sup>44</sup> Zhu Youhua is a distinguished professor at the Organ Transplantation Center of Changhai Hospital affiliated to the Second Military Medical University. In the past 40 years, he has been mainly engaged in basic and clinical research in urology and kidney transplantation, especially the base and preservation solution development research of organ preservation.

#### **V. Telephone investigation: kidney transplantation every day to do one or two, liver sources available in a short waiting time of 10-15 days.**

Investigation Object: Zhu Youhua, professor of kidney transplantation at Changhai Hospital  
Investigation Time: January 29, 2016 (phone # +86-13901743189)

##### Summary:

1. There are very few organ donations now.
2. Transplantation is ongoing in the year of 2016. We are still doing it today.
3. It's not just our hospital, other hospitals are also doing a lot of it!
4. Q: If it's still being done, of course I'll go if they do a lot.  
A: There are many of it. Not just we do, the whole country is doing. If you want to do just come to have a look. Don't worry about other things.

(Recording 1. Download: [MP3](#) ; Transcript Download: [pdf 143](#))

Investigation Subject: Nursing Station<sup>45</sup>, Changhai Hospital Organ Transplantation Department

Investigation time: December 20, 2017 (phone # +86-2131162866)

##### Summary:

Kidney transplantation has been on going, and more than 300 cases have been done this year. Since the transplant center established in March 2016, kidney transplantation has been done 700 to 800 cases, and more than 300 cases in 10 months last year, and liver transplantation has also been done more than 100 cases this year.

(Recording 2. Download: [MP3](#); Transcript Download: [pdf 142](#))

Investigation Subject: Organ Transplantation ward<sup>46</sup>, Changhai Hospital in Shanghai

Investigation time: May 5, 2018 (phone# +86-2131162866)

Summary: Kidney transplantation has been done a lot, on average 1 to 2 cases per day; liver transplantation has also been done more than 100 cases this year.

### World Organization to Investigate the Persecution of Falun Gong (WOIPFG)

To investigate the criminal conduct of all institutions, organizations, and individuals involved in the persecution of Falun Gong; to bring such investigation, no matter how long it takes, no matter how far and deep we have to search, to full closure; to exercise fundamental principles of humanity; and to restore and uphold justice in society

#### Summary:

Last year, more than a hundred cases of liver transplants, and five or six hundred cases of kidney transplants. Today we are having two liver transplants, two kidney transplants; liver source available in 10-15 days of waiting; liver transplantation costs a million, kidney transplantation half a million; he will get you a donor. Where could you get in that price of 150,000? The liver and kidney donor will be available in ten days; they are doing it every day, and there are many of them. Well, what we do is not as much as what Renji Hospital does.

Investigation Subject: a liver transplant doctor at Changhai Hospital <sup>51</sup>

Investigation time: December 3, 2019 (+86-2131162866)

#### Summary:

Li Qigen went to work at the Second Affiliated Hospital of Nanchang University, it is recommended that you go there to do, they do it faster than us. If you want to register more, Shanghai area, such as Renji, Zhongshan, ours, Changzheng, or Beijing, Tianjin, Zheyi, Shulan Hospital, which are very famous hospitals in the country. At this time, due to the rectification, the national policy is now very tight, so the situation now is, everyone is the same, previous operations may be kind of non-compliance, something like that.

**Investigator:** My friend waited for less than two weeks at that time, got the donor in less than two weeks of waiting.

**Li Qigen:** Yes, the previously it was faster, it was indeed faster.

#### VI. Two kidney transplant specialists at the hospital committed suicide

Two kidney transplant specialists at the hospital committed suicide. In 2007, 44-year-old Li Baochun, director of the Department of Nephrology, chief surgeon, professor and doctoral supervisor, jumped to his death from a building at Changhai Hospital.<sup>53</sup> In 2014, 44-year-old Zhang Shilin, deputy director of the Department of Urology of Shanghai Cancer Hospital, jumped to his death.<sup>54</sup> After 2005, Zhang worked in the Department of Urology of Changhai Hospital for many years, and he was a colleague of Li Baochun. He performed kidney transplantation,<sup>55</sup> and did 17 surgeries per week.<sup>56</sup>

#### VII. List of responsible persons

##### HJJYDX1FY001 Zeng Li

Job Titles: Director of Organ Transplantation Center, Professor of Organ Transplantation Institute, national well-known kidney transplantation expert, Chief Physician, Professor, Medical Doctor, Ph. D. supervisor.

Personal Profile: Kidney transplantation (adults and children), living transplantation from relatives, multi-organ combined transplantation.<sup>57</sup>

##### HJJYDX1FY002 Zhu Youhua

Job Title: Currently serving as the Director of Shanghai Kidney Transplantation Quality Control Center, the Director of PLA Organ Transplantation Professional Committee.

Personal Profile: Has been performing the kidney transplantation for many years in two hospitals, Changzheng and Changhai of the Second Military Medical University. Graduated from the Department of Military Medicine of the Second Military Medical University in 1976 and has more than 40 years in kidney transplantation basic and clinical experiences. Served as the editorial board member of the “Journal of the Second Military Medical University” and the “Journal of Nephrology and Dialysis Kidney Transplantation”; executive editorial board of the “Journal of Organ Transplantation”, “Chinese Journal of Transplantation - Electronic Edition” and “Practical Organ Transplantation - Electronic Edition”; deputy editor-in-chief of the “Chinese Journal of Organ Transplantation”, deputy director of the Organ Transplantation Branch of Chinese Medical Association; an expert in consultation of health care committee of the Central Military Commission. Being the editor-in-chief for 5 monographs and published more than 100 papers. Mainly engaged in the basic and clinical research of urology and kidney transplantation, and his main research direction is organ preservation.<sup>58</sup>

##### HJJYDX1FY003 Zhang Lei

Job title: Associate Chief Physician, Associate Professor

Personal Profile: kidney transplantation (adult/child), living kidney transplantation.<sup>59</sup>

##### HJJYDX1FY004 Wang Linhui

Job title: Chief Physician and Professor of Urology.

Personal Profile: Member of Transplantation Group of Chinese Medical Association Urology Branch, Member of Specialist Committee of Organ Transplantation of Chinese Medical Association Shanghai Branch, Member and Secretary of Specialist Committee of Geriatric Medicine of Chinese Medical Association Shanghai Branch, Member of Transplantation Group of All Army Urology Specialty Committee, Member of Specialist Committee of Male

Winner of the Shulan Excellence Project - Organ Transplantation Young Talents Overseas Training Program.<sup>65</sup>

### **WOIPFG's Investigative Report on the Alleged Organ Harvesting of Living Falun Gong Practitioners at the First Hospital Affiliated to Army Medical University (formerly Southwest Hospital of the Third Military Medical University) and Its Staff Members Suspected of Participation**

Address: Gaotanyan, Shapingba District, Chongqing

#### **Preface**

The scale of liver transplant is large at the First Hospital Affiliated to Army Medical University (previous Southwest Hospital of the Third Military Medical University), and the team of liver transplant doctors is huge. Six liver transplants can be performed simultaneously in one day. The hospital has sufficient sources of donors, and a matching donor can be found within a few hours.

In a WOIPFG telephone investigation, Bai Shuzhong, then director of Health Division of the General Logistics Department of the People's Liberation Army of the CCP, directly admitted that during his tenure, Jiang Zemin personally ordered the live organ harvesting of Falun Gong practitioner. The hospital affiliated to the Military Medical University is the main hospital in the military system that carries out this order from Jiang Zemin.<sup>66</sup> Upon the macro backdrop of the CCP's crime of live organ harvesting, the First Hospital Affiliated to Army Medical University is one of the main hospitals that carried out the genocide of organ harvesting from Falun Gong practitioners.

#### **Hospital Profile**

It was officially named as the First Hospital Affiliated to the Third Military Medical University and Southwest Hospital in 1950, then was renamed as the First Hospital Affiliated to Army Medical University in 2017 and retained the name of the Third Military Medical University externally. This military hospital is now a large-scale comprehensive "tertiary level-A hospital" integrating medicine, teaching and research. The hospital covers an area of more than 300 mu, with a construction area of 360,000 square meters, more than 2,900 beds, and a total value of 2.7 billion yuan in equipment. Organ transplant (heart, liver, kidney, multi-organ combined) is one of the medical characteristics of this hospital.<sup>67</sup>

#### **I. One of the main hospitals for live organ harvesting in the military<sup>68</sup>**

In the phone investigation by WOIPFG, Bai Shuzhong, then director of Health division of General Logistics Department of PLA from 1998 to 2004, directly admitted that during his tenure Jiang Zemin personally ordered the live organ harvesting of Falun Gong practitioners and the hospitals affiliated to the Military Medical University were the main hospitals in the military system that carries out Jiang Zemin's order.<sup>69</sup> This hospital was involved in the crime of live organ harvesting of Falun Gong practitioners and was one of the mainstays of the Chinese Communist Party's military system of live organ harvesting. ## 追查迫害法輪功國際組織 ( 追查國際 )

### World Organization to Investigate the Persecution of Falun Gong (WOIPFG)

To investigate the criminal conduct of all institutions, organizations, and individuals involved in the persecution of Falun Gong; to bring such investigation, no matter how long it takes, no matter how far and deep we have to search, to full closure; to exercise fundamental principles of humanity; and to restore and uphold justice in society

“It was President Jiang at that time”, “There's an order, there's an order that says”, “Saying that carrying out these things is organ transplant”, he also said, “We have a few military medical universities on the control. A few military medical universities directly under our General Logistics Department were repeatedly requested because Jiang paid great attention to this issue at that time and attached great importance to this issue.”

## II. Profile of the Transplant Center

The hospital started clinical liver transplant in May 1999.<sup>70</sup> The hospital's Hepatological Surgery Program is one of the largest domestically and abroad. In 2000, it was named the People's Liberation Army Liver Transplant Center.<sup>71</sup> In 2001, it was established as the Key Laboratory of Liver Transplant of the Chinese People's Liberation Army.<sup>72</sup> In 2004, the institute joined forces with the world's largest organ transplant center, the Organ Transplantation Institute of the University of Pittsburgh Medical Center, to establish the International Collaborative Liver Transplantation Center.<sup>73</sup>

The hospital's Hepatological Surgery Program had grown to have 168 beds in 2004<sup>74</sup> and later increased to 200 beds.<sup>75</sup> Its nephrology program leads the Southwest in living donor kidney transplant technology. In 2010, it had 64 standard hospital beds and 22 dialysis beds.<sup>76</sup> The hospital's ophthalmology program established the first eye bank in the military that meets national standards and conducts a large number of corneal transplants.<sup>77</sup>

## III. The team of liver transplant doctors is huge, and the actual transplant volume is huge.

The hospital's Hepatological Surgery Program has now grown to have 200 beds, 10 professors, and 6 associate professors. Main personnel with intermediate titles and above have all been "doctoralized", integrating medicine, teaching and research as one of the country's largest hepatopancreatobiliary Surgery and liver transplant center in China.<sup>78</sup> The current capacity of the institute is sufficient to ensure that six liver transplants can be performed simultaneously within one day.<sup>79</sup>

## IV. Hepatological Surgery Program was approved as the PLA Key Laboratory of Liver Transplant and established as the top priority discipline of clinical medicine in the army.

Hepatological Surgery of Southwest Hospital was approved as the PLA Key Laboratory of Liver Transplant and established as the top priority discipline of clinical medicine in the army. It presented 25 special reports at international conferences, hosted six sessions of the "International Gastrointestinal Surgery Forum", hosted the "China-Australia Liver Transplant Forum" and the "China Organ Transplant Forum" once each, organized 32 courses on various types of continuing education and trained more than 2,000 professionals in hepatological surgery.<sup>80</sup>

## V. Donor sources are plentiful and a match can be found in a few hours

According to the report of Urumqi online, Sina Net and Journal of Chinese Nurse, Huang Jiefu, then Deputy Minister of the Ministry of Health of the PRC, demonstrated an autologous liver transplant at the First Affiliated Hospital of Xinjiang Medical University, using two living people as backup liver donors on the afternoon of September 28, 2005.

Huang Jiefu contacted the Liver Medical Center of Southwest Hospital of the Third Military Medical University in Chongqing, and the First Affiliated Hospital of Sun Yat-sen University in Guangzhou respectively, and asked them to prepare a spare liver to come in case the autologous transplant fails. Journal of Chinese Nurse reported that within a few hours on the afternoon of the 28th, the Third Affiliated Hospital, Sun Yat-sen University, Guangzhou and Southwest Hospital in Chongqing found "the same blood type and

genetic locus" of the spare liver. "At 6:30 p.m. on the 29th, the matching liver was shipped from Chongqing." <sup>81</sup>

#### VI. The phone investigation showed a high volume of transplants at the hospital.

**Subject(s):** Huang Xiaobing, Associate Chief Physician, Xinqiao Hospital, the Third Army Medical University <sup>82</sup>

**Date:** October 17, 2019 (+86-13372618116)

**Summary:** Doctor: "Southwest Hospital does more, we do less. Zhejiang Medical University and Shulan Hospital have more liver source of brain-dead DCD. West China Hospital in Chengdu has also done a lot. Objectively speaking, West China has done more than us. West China Hospital and Southwest Hospital are about the same. They should be about the same, and the volume is about the same."

# **WOIPFG's Investigative Report on the Alleged Organ Harvesting of Living Falun Gong Practitioners at the General Hospital of the Central Theater Command of the People's Liberation Army (formerly the Wuhan General Hospital of the Guangzhou Military Command of PLA) and Its Staff Members Suspected of Participation**

Hospital: The General Hospital of Central Theater Command of PLA (formerly Wuhan General Hospital of Guangzhou Military Command of PLA)

Address: 627 Wuluo Road, Wuhan City, Hubei Province

## Preface

The General Hospital of the Central Theater Command of PLA is one of the largest hospitals engaged in kidney transplantation in Wuhan. The WOIPFG's telephone investigation revealed that the hospital had conducted a large number of kidney transplants, and the doctors admitted the use of organs from Falun Gong practitioners. The Second Affiliated Hospital of Hubei Medical University also swaps Falun Gong practitioners' donors with Wuhan General Hospital of Guangzhou Military Region. In view of the background of the CCP's national crime of live organ harvesting, the hospital is clearly suspected of participating in the crime of organ harvesting from groups of Falun Gong practitioners.

## Hospital Overview

The General Hospital of the Central Theater Command of PLA (formerly Wuhan General Hospital of the Guangzhou Military Region) is a large-scale comprehensive military hospital and a third level first class hospital, with 48 departments, 73 majors, and more than 2,000 beds<sup>105</sup>.

### **I. The Department of Urology is the kidney transplant center of Guangzhou Military Region**

The Department of Urology of the hospital is now the kidney transplant center of the Guangzhou Military Region, with 126 hospital beds. The official website of the hospital reported in the article "Introduction to Urology Surgery" on July 21, 2013 that the Department of Urology has so far completed more than 1,500 cases of kidney transplantation, 130 cases of liver transplantation, and 11 cases of combined liver-kidney transplantation<sup>106</sup>.

### **II. Strong Transplant Team at the Hospital**

There are at least 12 doctors in the Department of Urology of this hospital, entitled Level 3 military technology and awarded general-level benefit<sup>107</sup>.

### **III. Amount of Corneal Transplants**

From 1996 to 2004, 11 cases of penetrating keratoplasty were conducted in the hospital for patients with leucoma adhaerens. In comparison, 98 cases (101 eyes) including penetrating keratoplasty, lamellar keratoplasty, and combined lamellar keratoplasty and amniotic membrane transplantation were conducted in the hospital during January 2004 to December 2007<sup>108</sup>.

### **IV. One of the largest hospitals engaged in kidney transplantation in Wuhan City**

To investigate the criminal conduct of all institutions, organizations, and individuals involved in the persecution of Falun Gong; to bring such investigation, no matter how long it takes, no matter how far and deep we have to search, to full closure; to exercise fundamental principles of humanity; and to restore and uphold justice in society

In July 2006, Minghui.org reported an insider's disclosure that the hospital is mainly engaged in kidney transplantation: <sup>109</sup>

1. Tongji Hospital in Wuhan, Hubei Provincial People's Hospital, and Wuhan General Hospital of PLA (former name of this hospital) are the three largest hospitals in Wuhan engaged in organ transplantation, mainly engaged in kidney transplantation. The Chinese Communist Party's official media reported in 2011 that Tongji Hospital in Wuhan performed thousands of kidney transplants each year <sup>110</sup>.
2. The resources of organ donors are strictly confidential, but the superficial procedures for organ transplantation are relatively complete, making people not pay attention to its illegitimacy. The organ donor resources are shared among the three major hospitals. They claimed to the public that organ donors are mostly donated by family members.
3. After the exposition of the CCP's live organ harvesting of Falun Gong practitioners, the hospital leaders held a meeting with the doctors who were involved in the organ transplantation to convey the so-called "Instructions from Higher Leadership", saying that "Falun Gong is making trouble abroad again" and asking them to "seal their mouths tightly." Do not allow medical staff to disclose any information about organ transplants, in order to prevent overseas Falun Gong practitioners from investigating and collecting evidence on organ transplants through phone calls.

#### **V. Admitting the use of organs from Falun Gong practitioners, large number of kidney transplants.**

1. In 2006, Director Tang, who is in charge of kidney transplants at Wuhan General Hospital of Guangzhou Military Region, said (during one WOIPFG investigation), "If it (i.e. organ) is available from Falun Gong, then we use it."

Investigator: Is this the Director Tang of kidney transplantation at Wuhan General Hospital of Guangzhou Military Region?

Director Tang: Yes.

Investigator: Is it possible that you have the kidney sources of several prisoners like Falun Gong?

Director Tang: This has nothing to do with Falun Gong, what has it to do with Falun Gong? It doesn't matter it's Falun Gong or not!

Investigator: Didn't you use it in your hospital?

Director Tang: If it (i.e. organ) is available from Falun Gong, then we use it, right? <sup>111</sup>

(Recording 1 download [MP3](#) ; please see the complete recording transcript in [Addendum1](#))

The Second Affiliated Hospital of Hubei Medical University also swaps Falun Gong practitioners' donors with Wuhan General Hospital of Guangzhou Military Region. <sup>112</sup>

Investigator: Is this the Second Affiliated Hospital of Hubei Medical University?

Hospital Staff: Yes.

.....

Investigator : How is the kidney source of Falun Gong prisoners in your hospital?

Hospital Staff: It should be said, it should be okay, maybe you ask the General Hospital ..., the General Hospital of Guangzhou Military Region,

Investigator: Wait a second..., Guangzhou Military Region,

Hospital Staff: It's also called the Wuhan General Hospital. We share (kidney source) with each other.

### World Organization to Investigate the Persecution of Falun Gong (WOIPFG)

To investigate the criminal conduct of all institutions, organizations, and individuals involved in the persecution of Falun Gong; to bring such investigation, no matter how long it takes, no matter how far and deep we have to search, to full closure; to exercise fundamental principles of humanity; and to restore and uphold justice in society

(Recording 2 download [MP3](#); please see the complete recording transcript in [Addendum2](#))

3. Information from recorded phone calls indicated a high volume of transplants at the hospital.

Nurse at the Nurses Station (+862750772398) of Kidney Transplantation Section 1, Wuhan General Hospital of Guangzhou Military Region: Nowadays, more kidney transplants are done. 10-12 cases are done every month. A lot, lot, definitely a lot! (Investigation time: 2017-11-05) <sup>113</sup>

(Recording 3 download [MP3](#), please see the complete recording transcript [pdf 3](#) attachment)

## VI. The Leads from Media

1. Wuhan General Hospital of Guangzhou Military Region conducts five to six cases of kidney transplants each night

According to a report by Minghui.org on August 29, 2006: A friend of reporter mentioned that she was hospitalized at the Wuhan General Hospital of Guangzhou Military Region in late March 2003. She witnessed that there were five to six organ transplants performed at the hospital at one night. A young woman in her 30's was with her husband, who had just undergone surgery. Another patient asked, "How much did you pay for your husband's kidney transplant?" She responded, "Over 60,000 yuan." She also said that the donor of the kidney was a young person, who was taller than her husband <sup>114</sup>.

2. Wuhan General Hospital of Guangzhou Military Region found kidney source in less than a month

According to a report by Minghui.org on January 6, 2007: Jing Mingye, an employee of Hubei Jingchu Seed Industry Co., Ltd., was diagnosed with uremia at the end of October 2006. The treatment effect in Jingzhou was not good, and the doctor said that he needed a kidney transplant. Later, under the advice of others, he was transferred to Wuhan General Hospital of Guangzhou Military Region (also known as Huazhong Hospital, General Hospital of Air Force) in early December. By the end of December, in less than a month, the hospital had asked family members to raise funds and be ready for a kidney transplant. The source of the kidney is still unclear. However, the ability to complete various inspections and tissue matching in such a short period of time indicates that the hospital has a large organ bank. In addition, this hospital has performed a large number of organ transplant operations in an unconventional manner in recent years. <sup>115</sup>

## VII. List of responsible persons

JFJZ001 Tang Ligong, male.

**Personal profile:** Chief Urologist, Wuhan General Hospital of Guangzhou Military Region. Served as the vice chairman of Wuhan Organ Transplant Society of Hubei Province and other academic positions.

Performed more than 1,000 kidney transplantation.

Specializing in kidney transplantation, liver transplantation, and combined liver and kidney transplantation. <sup>116</sup>

## 追查迫害法輪功國際組織 ( 追查國際 )

### World Organization to Investigate the Persecution of Falun Gong (WOIPFG)

To investigate the criminal conduct of all institutions, organizations, and individuals involved in the persecution of Falun Gong; to bring such investigation, no matter how long it takes, no matter how far and deep we have to search, to full closure; to exercise fundamental principles of humanity; and to restore and uphold justice in society

JFJZ002 Xie Sen, male.

**Personal profile:** Doctor of Medicine, Associated Chief Urologist, Wuhan General Hospital of Guangzhou Military Region.

Engaged in urology and organ transplantation for more than ten years, specializing in kidney transplant surgery. <sup>117</sup>

Engaged in the perioperative management of liver and kidney transplantation and the management of serious postoperative complications, and the study of kidney transplant pathology.

JFJZ003 Li Zhixiong, male.

**Personal profile:** Associate Chief Urologist, Wuhan General Hospital of Guangzhou Military Region.

Served as a member of the Organ Transplant Committee of Guangzhou Military Region.

Engaged in organ transplantation of liver and kidney for 15 years. <sup>118</sup>

Specializing in kidney transplantation and post-operative treatment.

JFJZ004 Pan Tiejun, male.

**Personal profile:** Chief Urologist, and Director of the Urology, Wuhan General Hospital of Guangzhou Military Region. Member of Wuhan Transplant Society.

In 1998, he studied at the Institute of Urology, Beijing Medical University for one year and received the title of Visiting Scholar in China.

In December 2003, as a member of the third phase of the National Urology Talent Project, he went to Miami University in the United States for training for one month. On December 30, 2003, he went to the Institute of Urology of Palermo University in Italy as a visiting scholar and studied for three months.

Specializing in kidney transplantation. <sup>119</sup>

JFJZ005 Rao Zuoxiang, male.

**Personal profile:** Chief Urologist, Wuhan General Hospital of Guangzhou Military Region

Graduated from Tongji Medical University in 1975.

Specializing in kidney transplantation<sup>120</sup>.

JFJZ006 Liu Youying, male.

**Personal profile:** Chief Urologist and Deputy Dean of Urology, Wuhan General Hospital of Guangzhou Military Region

Specializing in kidney transplantation. <sup>121</sup>

JFJZ007 Zhu Shuibo, male. Date of birth: June 9, 1962. <sup>122</sup>

**Personal profile:** Chief Cardiothoracic Surgeon and Director of the Cardiothoracic Surgery, Wuhan General Hospital of Guangzhou Military Region.

Graduated from the Department of Medicine of Hubei Medical College (now Wuhan University School of Medicine) in 1984, received a Master's degree in Cardiothoracic Surgery from Wuhan University School of Medicine in 1987, received a PhD in Cardiovascular Surgery from Tongji Medical College of Huazhong University of Science and Technology in 2003. In 1996, he spent one year at the Fu Wai Hospital in Beijing for advanced studies.<sup>123</sup>

Engaged in research on heart transplantation.<sup>124</sup>

JFJZ008 Yin Guilin, male. Date of birth: February 1952.<sup>125</sup>

**Personal profile:** Chief Cardiothoracic Surgeon, Wuhan General Hospital of Guangzhou Military Region

He graduated from the Department of Medicine of Zhejiang Medical University in 1976, received a master's degree from Hunan Medical University in 1995, and further studied at the Heart Center in Berlin, Germany in 2002.<sup>126</sup>

Performed the first heart transplant for end-stage Marfan's syndrome in China at the end of 2003.<sup>127</sup>

JFJZ009 Zhou Xiong, male.

**Personal profile:** Associate Chief Ophthalmologist and Deputy Director of the Ophthalmology, Wuhan General Hospital of Guangzhou Military Region.

Especially specializing in corneal transplantation and amniotic membrane transplantation for various ocular surface diseases.<sup>128</sup>

## WOIPFG's Investigative Report on the Alleged Organ Harvesting of Living Falun Gong Practitioners at the PLA Rocket Force General Hospital (Formerly the Second Artillery General Hospital of Chinese People's Liberation Army) and Its Staff Members Suspected of Participation

Address: 16 Xijiekouwai Street, Xicheng District, Beijing

Preface

The liver transplant center was officially established in July 2004 and began to grow rapidly. Published medical papers claimed that the transplant in the hospital had warm ischemia time of 0-5 min, which is suspected of harvesting organs from living people. Telephone investigations revealed that the hospital used Falun Gong practitioner donors. The first-hand evidence of the video showed that the PLA Rocket Force Hospital could find qigong practitioners as donors within a waiting time of less than two weeks.

## 追查迫害法輪功國際組織 ( 追查國際 )

### World Organization to Investigate the Persecution of Falun Gong (WOIPFG)

To investigate the criminal conduct of all institutions, organizations, and individuals involved in the persecution of Falun Gong; to bring such investigation, no matter how long it takes, no matter how far and deep we have to search, to full closure; to exercise fundamental principles of humanity; and to restore and uphold justice in society

#### Hospital Overview

The Second Artillery General Hospital of Chinese People's Liberation Army was established in September 1999. The hospital covers an area of 59 Mu (9.7 acres). There are 44 divisions with 1,080 beds. The hospital is now a clinical teaching hospital of the Second, Third and Fourth Military Medical Universities, and a joint training base for postgraduates from Beijing Normal University Medical Research Institute, Wuhan University Medical College and Liaoning Medical College. The hospital has 74 people with doctor degree or postdoctoral fellowship and 175 people with master's degree. It hires 3 academicians, and more than 200 well-known experts as visiting professors<sup>129</sup>.

#### I. Rapid development of the hospital's liver transplantation center

In July 2004, the liver transplant center was officially established, achieving the leapfrog development of the hospital in this field. Multiple medias such as CCTV, Beijing TV, Beijing Times etc. had reported successively<sup>130</sup>.

#### II. Published Medical paper claimed that the transplantation performed in the hospital had warm ischemia time of 0-5 min, which is suspected of harvesting organs from living people.

From 2004 to 2007, the hospital performed 103 cases of liver transplantation donor excision, all of donors were healthy young people. They used the rapid donor liver excision technique with a warm ischemia time of 0 to 5 min<sup>131</sup>. However, if these donors were already cadavers at the time of liver resection, how could be possible the warm ischemia time was less than 5 min?

#### III. Telephone Investigations indicated the Hospital used Falun Gong practitioners as Donors.

Investigation Subject: Lv Wei, Associate Chief Physician of Transplantation Department, the Second Artillery General Hospital

Investigation Date: November 1<sup>st</sup>, 2014, Phone #: 011-8618910883818

Summary:

Investigator: I've heard that many of these death row inmates were Falun Gong practitioners, their organs were harvested alive and used as donors, was there such a thing? Was there?

Lv Wei: That was a long time ago<sup>132</sup>.

(Recording 1. Download: [MP3](#) ; Transcript Download: [pdf 1](#))

Investigation Subject: Li Zhenkai, a hepatobiliary general surgeon at the Second Artillery General Hospital

Investigation Date: January 17, 2016 (Phone #: +86-13261914907)

Summary:

1. Quite a lot of cases were done last year.
2. Many hospitals are doing liver transplantation, but the one that does much better is Huaxi (hospital).
3. (liver sources) are all from President Zhou Dinghua, and then come here do the surgery. They have a special liver transplantation team.
4. The person in charge now is Professor Li Chaoyang, who is the Director.
5. The transplant center is managed by President Zhou Dinghua, but he is in charge of the administrative duties. The general operational work may still be managed by the Director Chaoyang.

(Recording 2. Download: [MP3](#) ; Transcript Download: [pdf 2](#))

### World Organization to Investigate the Persecution of Falun Gong (WOIPFG)

To investigate the criminal conduct of all institutions, organizations, and individuals involved in the persecution of Falun Gong; to bring such investigation, no matter how long it takes, no matter how far and deep we have to search, to full closure; to exercise fundamental principles of humanity; and to restore and uphold justice in society

#### **IV. Videotaped first-hand evidence shows that the PLA Rocket Force Hospital was able to find qigong practitioners as donors, waiting time is within two weeks.**

Yu Ming, a Falun Gong practitioner, was imprisoned in mainland China for 12 years for practicing Falun Gong. During that time, he had his blood drawn, blood tested, and bone marrow drawn for laboratory tests several times. He exposed the first-hand evidence of videos taken during these years<sup>133</sup>.

Video 1.

Doctor: We don't have anyone to get it for you, we can't do it.

Doctor: There's a dedicated team that specializes in outreach. This requires a team that specializes in outreach and integration, with different directors, who have first-hand information and can tell you once such a source is available, so you can come over.

Doctor: If you have connections with the armed police, it's easy to get it. Mainly armed police, Armed Police General Hospital, isn't that the court under the control of the Armed police!

Video 2.

Investigation Object: Li Chaoyang, liver transplant surgeon at the Rocket Force Hospital

Investigator: Are you Li Chaoyang?

Li Chaoyang: Yes, I am.

Investigator: They said you could find those who practice qigong. I heard that kind of (donors who) practice qigong is better.

Li Chaoyang: Yes, depending on his condition, if he can wait then we can select the good ones. Each time, after I give you the information, if you think that one's age is too old, you can wait for the next one. Select the best one.

.....

Li Chaoyang: Now the Armed Police (General Hospital) can do it. Among military hospitals in Beijing, the Armed Police (hospital) can do it now. Peking University international liver transplant is now under my charge. The Armed Police (hospital) has guaranteed the quality of its donor, and there is one available today. You are not a reporter, are you?

.....

Li Chaoyang: Usually for liver cancer, it can be done within two weeks. I usually schedule it in two or three weeks, one week if it's fast. I have already done two cases during the Chinese New Year holidays this year.

.....

Investigator: How many cases have you done?

Li Chaoyang: You are not a reporter, are you?

.....

Li Chaoyang: I have done 500 to 600 cases.

.....

Li Chaoyang: On February 11, there was one done here. The texture of this liver is very good. Look at this liver, this is the very best liver!

.....

#### V. Primary Responsible Persons

##### HJJZYY001 Lv, Wei

**Job Title:** Associate Chief Physician of Organ Transplantation Center, Doctor of Surgery

**Personal Profile:** Has been engaged in clinical work of hepatobiliary surgery and liver transplantation for more than 10 years. Used to be a visiting scholar at Cleveland Clinic Medical Center, USA. <sup>134</sup>

##### HJJZYY002 Li Chaoyang

**Job Title:** Head of Organ Transplantation Center of the Rocket Force General Hospital, Associate Chief Physician, Doctor of Surgery, Postdoctoral Fellow of Liver Transplantation, Visiting Professor of Liver Transplantation in many hospitals in China.

**Personal Profile:** Participated in the creation of the Liver Transplantation Division of Qianfoshan Hospital, Shandong Province in 2003. Went to work at the Liver Transplantation Institute of the General Hospital of the Armed Police in 2005, under the supervision of Shen Zhongyang, the President of Tianjin First Center. Participated in and performed more than 400 cases of liver transplantations. Helped many third level first class hospitals in 5 provinces in China to perform liver transplants of over hundred cases. <sup>135</sup>

##### HJJZYY003 Zhou, Dinghua

**Job Title:** Vice President of the Rocket Force General Hospital, Postdoctoral Fellow, Chief Physician, Doctoral Supervisor, Director of PLA Hepatobiliary and Gastrointestinal Disease Specialized Center.

**Personal Profile:** Standing Committee Member of the Army Organ Transplantation Specialized Committee, Consultation Expert of the Health Care Committee of the Central Military Commission. Presided over more than 160 cases of classical, backpack and living liver transplants since 2004. <sup>136</sup>

##### HJJZYY004 Zhao, Wei

**Job Title:** Associate Chief Physician of Organ Transplant Center, Clinical Master of Surgery from the Second Military Medical University.

**Personal Profile:** 15 years of clinical work in surgery. Working on liver transplantation. <sup>137</sup> Involved in more than 100 cases of liver transplantation, experienced in perioperative management of liver transplantation. <sup>138</sup>

**Job Title:** Chief Physician of Urology

**Personal Profile:** Performed dozens of allogeneic kidney transplants and inter-relative kidney transplants. <sup>144</sup>

#### HJJZYY011 Zhang, Xiaoyi

**Job Title:** Associate Chief Physician of Urology

**Personal Profile:** M.D. in urology from the Second Artillery General Hospital of the Chinese People's Liberation Army, Ph.D. graduated from the PLA General Hospital (301 Hospital), then went to Hong Kong for further training in da Vinci robotics technology. Working on kidney transplantation. <sup>145</sup>

#### HJJZYY012 Zeng, Xiangfu

**Job Title:** Professor of Urology, Chief Physician

**Personal Profile:** Has been engaged in urology for 37 years, worked in the urology department of the PLA General Hospital for 23 years, and served as the director of the urology department of the Armed Police General Hospital for 14 years. Started working on kidney transplantation in 1977, and has completed more than 800 kidney transplants, and helped many hospitals in China and in the military to carry out kidney transplants. <sup>146</sup>

#### HJJZYY013 Wei, Lin

**Job Title:** Associate Chief Physician of Ophthalmology

**Personal Profile:** Graduated from the Second Military Medical University in 2002. Has long been engaged in ophthalmology clinical work. Corneal transplantation combined surgery, etc. <sup>147</sup>

### WOIPFG's Investigative Report on the Alleged Organ Harvesting of Living Falun Gong Practitioners at Zhujiang Hospital of Southern Medical University and Its Staff Members Suspected of Participation

Address: Mid-253 Industrial Avenue, Guangzhou, Guangdong, China

#### Preface

## 追查迫害法輪功國際組織 ( 追查國際 )

### World Organization to Investigate the Persecution of Falun Gong (WOIPFG)

To investigate the criminal conduct of all institutions, organizations, and individuals involved in the persecution of Falun Gong; to bring such investigation, no matter how long it takes, no matter how far and deep we have to search, to full closure; to exercise fundamental principles of humanity; and to restore and uphold justice in society

Zhujiang Hospital of Southern Medical University (formerly known as the Second Affiliated Hospital of the First Military Medical University of the Chinese Communist Party (CCP)), was recognized as the first batch of the third-level first-class hospitals in the military in 1994.

It is one of the main hospitals where the CCP military live-harvested the organs of Falun Gong practitioners<sup>148</sup>. It is one of the major transplant centers in the country, with a strong kidney transplant team, a large number of transplantations, and a short waiting time for organs.

#### I. Hospital Overview

the First Military Medical University) was recognized by the CCP military in 1994 as the first batch of military third-level first-class hospitals. It was transferred to Guangdong Province in August 2004 along with the First Military Medical University as a whole unit. After years of development, Zhujiang Hospital has now become a comprehensive hospital integrating medical treatment, teaching and research. According to the official website of Zhujiang Hospital, the hospital has developed distinctive specialties in the field of organ transplantation (kidney, liver and pancreas transplantation), etc<sup>149</sup>. On May 23, 2007, it became one of the Ministry of Health of the CCP designated hospitals to carry out kidney transplantation<sup>150</sup>. The hospital was also ranked as Class A for kidney transplant, Class B for liver and heart transplant in Guangdong Province in 2004<sup>151</sup>.

#### II. Organ Transplantation Center of Zhujiang Hospital is one of the important transplantation centers in China.

According to the public data on the official website of Zhujiang Hospital of Southern Medical University, its Organ Transplantation Center was authorized for doctoral degree for organ transplantation earlier in China, which consists of three parts of Organ Transplantation, Blood Purification Center, and Transplantation and Immunity Research Institute (including Tissue Matching laboratory). The medical area covers 2300 square meters<sup>152</sup>. The transplant center's webpage also shows that the Organ Transplantation Center of Zhujiang Hospital "is one of the important transplantation centers in the country, with cadaveric renal transplants, kinship renal transplants, liver transplants, and pancreas-kidney combined transplants<sup>153</sup>."

#### III. The hospital has a strong team of kidney transplantation doctors, which shows that the actual number of transplantations in the hospital is huge.

According to the public data on the official website of Zhujiang Hospital, there are 37 staff members in the Organ Transplantation Center of Zhujiang Hospital, including 2 professors, 4 associate professors, 2 associate chief technicians, 4 lecturers, among them, there are 5 PhDs, 4 masters, 1 returnee from overseas, 2 doctoral supervisors, 2 master's supervisors<sup>154</sup>. Two of them, Lin Minzhuan and Li Jie, have performed thousands of transplants.

Lin Minzhuan, male, associate chief physician, professor, Doctor of Medicine, has personally experienced nearly 2600 cases of kidney transplants, 25 cases of liver transplants, and 3 cases of combined pancreas/kidney transplants<sup>155</sup>.

Lin Minzhuan is currently the vice chairman of the Organ Transplantation Branch of Guangzhou City Medical Association, the standing committee member of the Organ Transplantation Society of Guangdong Province Medical Association, a committee member of the Haizhu District of the Chinese People's Political

## 追查迫害法輪功國際組織 ( 追查國際 )

### World Organization to Investigate the Persecution of Falun Gong (WOIPFG)

To investigate the criminal conduct of all institutions, organizations, and individuals involved in the persecution of Falun Gong; to bring such investigation, no matter how long it takes, no matter how far and deep we have to search, to full closure; to exercise fundamental principles of humanity; and to restore and uphold justice in society

Consultative Conference (CPPCC), and a member of the Editorial Board of the “Chinese Journal of Medical Practice”. Graduated from the Institute of Organ Transplantation of Tongji Medical University with a doctorate degree in medicine. Has been the deputy director, associate professor, associate chief physician, and master's supervisor of the Organ Transplantation Department of Zhujiang Hospital of Southern Medical University since 1997; has been engaged in the clinical, teaching, and scientific research of blood purification and renal transplantation for more than 20 years. Personally experienced nearly 2600 cases of renal transplantation, 25 cases of liver transplantation, and 3 cases of combined pancreas/kidney transplantation<sup>156</sup>.

Li Jie is the director of urology and chief physician of Organ Transplantation Department, Taiping People's Hospital, Dongguan, Guangdong. He has been engaged in urology and organ transplantation for 20 years. Worked in Zhujiang Hospital, a third-level first-class teaching hospital in Guangzhou, for more than 10 years. Participated in more than 4,000 cases of kidney transplantation, and was the chief surgeon for more than 500 cases of kidney transplantation; participated in more than 50 cases of liver transplantation, and was the chief surgeon for 12 cases<sup>157</sup>.

#### **IV. the telephone investigation shows that the hospital has a large number of transplants, a large number of beds, and multiple kidney transplant teams.**

Investigation Subject: Zhou Song, Chief Nephrologist of Transplantation Department, Zhujiang Hospital, Southern Medical University<sup>158</sup>

Investigation time: November 8, 2019 (Phone #+86-20-62782501)

Summary of the Investigation:

1. (Compare with Southern Hospital) Our hospital is doing well, we have more beds here, more than 60. When the source of kidneys comes, it sometimes comes very hard (large number), for example, during the National holidays we have done a lot of cases! We've done a hundred or two hundred! That can be done, used to do more than 300 cases before, in one year.
- 2, Zhao Ming is our director, I am in the team of Director Guo Ying. We have a total of three teams.
- 3, we can only evaluate that it is a qualified kidney, and can not say that is the kidney of a Falun Gong patient. .... You come over and find out, OK? You can find someone at a higher level to understand. It's better to communicate face to face, we can talk about something face to face, not too much to say over the phone.

(Recording 1 download: [MP3](#), manuscript download: [pdf149](#))

#### **V. The hospital is the main hospital of the CCP military for the live organ harvesting of Falun Gong practitioners<sup>159</sup>.**

According to Bai Shuzong, Minister of Health of the General Logistics Department of the People's Liberation Army (PLA), this hospital should be the main hospital in which the CCP military actively harvests the organs of Falun Gong practitioners<sup>160</sup>.

Bai Shuzhong, who served as the Minister of Health of the PLA General Logistics Department from 1998 to 2004, directly admitted in a telephone investigation conducted by WOIPFG that during his tenure, that Jiang Zemin personally ordered the live organ harvesting of Falun Gong practitioners, and that the Hospital Affiliated to the University of Military Medical Sciences was the main hospital in the military system that carried out this order from Jiang Zemin<sup>161</sup>.

On September 30, 2014, the investigator in the name of Bo Xilai's project team, called CCP Major General Bai Shuzhong for evidence.

## 追查迫害法輪功國際組織 ( 追查國際 )

### World Organization to Investigate the Persecution of Falun Gong (WOIPFG)

To investigate the criminal conduct of all institutions, organizations, and individuals involved in the persecution of Falun Gong; to bring such investigation, no matter how long it takes, no matter how far and deep we have to search, to full closure; to exercise fundamental principles of humanity; and to restore and uphold justice in society

(Recording 2 download: [MP3](#), manuscript for details: [pdf16](#))

Bai Shuzhong: Served as the Minister of Health of the General Logistics Department of the CCP Army from 1998 to 2004, which was the peak period of the CCP's persecution of Falun Gong and the live organ harvesting of Falun Gong practitioners; the army was the main body of the live organ harvesting, and as the highest medical administrative leader of the army's health system, he should have been one of those who were the most aware of the situation at that time.

Investigator: "When you were the Minister of Health of the General Logistics Department, was the matter of harvesting the organs of detained Falun Gong practitioners for organ transplants a task laid out by Wang Ke, the then Minister of the General Logistics Department? Or was it a direct order from the Military Commission?"

Bai Shuzhong: "At that time it was President Jiang, ah, who had an instruction, that is to say, saying that carrying out these things, that is, organ transplants, I should say, that is, kidney transplants were carried out not only on the side of the military. "

Investigator: "We also got some information that said that at that time, the JCS was also responsible for holding a group of organ donors from Falun Gong detainees, wasn't it?"

Bai Shuzhong: "As far as I can remember, at that time, after President Jiang's instructions, everyone did a lot of work against Falun Gong. Because at that time Jiang paid attention to this issue, paid a lot of attention to this issue. "

The recording clearly shows that the use of Falun Gong practitioners' organs as transplant donors was a direct order from Jiang Zemin, and the military was not the only system that involved in organ transplants.

This evidence corroborates the large number of facts previously obtained by WOIPFG nation-wide from the military, armed police, localities, and judicial systems that are involved in the live organ harvesting of Falun Gong; explains the reasons for the nation's multi-system live organ harvesting of Falun Gong; and confirms our judgment according to the evidence obtained in the past.

## VI. List of Responsible Persons

### NFYD-ZJYY001 Zhao Ming

Job Title: Director of Organ Transplantation Center, Chief Physician, Professor. Director of Organ Transplantation Department, PhD, Doctorate supervisor. ◦

**Personal Profile:** Member of National Organ Transplantation Committee, Standing Committee of Guangdong Province Transplantation Committee, editorial board member of many journals. Long-term commitment to organ transplantation clinical diagnosis and treatment work, the end-stage renal failure diagnosis and treatment, the kidney (including relatives living kidney transplantation), pancreas, pancreas-kidney joint, liver, islet cell transplantation, etc.

162

### NFYD-ZJYY002 Gao Yi

Job Title: Director of Hepatobiliary Division II, Chief Physician, Professor Director of Institute of Regenerative Medicine (Department of Hepatology), Southern Medical University. He is the first expert of the National 863 Program for bio-artificial liver project.

## 追查迫害法輪功國際組織 ( 追查國際 )

### World Organization to Investigate the Persecution of Falun Gong (WOIPFG)

To investigate the criminal conduct of all institutions, organizations, and individuals involved in the persecution of Falun Gong; to bring such investigation, no matter how long it takes, no matter how far and deep we have to search, to full closure; to exercise fundamental principles of humanity; and to restore and uphold justice in society

staged liver diseases<sup>163</sup>. Specialized in liver transplantation and other difficult surgeries in hepatobiliary surgery.

**Personal Profile:** Since 2001, he has been carrying out liver transplantation with mature technology, short operation time, less bleeding, less postoperative complications, and precise long-term efficacy, and has completed the first Rh-negative rare blood type and "no-transfusion" liver transplantation in China. He has been practicing medicine for 29 years and received his PhD in Surgery in 1992. He has skillfully performed various difficult surgeries in hepatobiliary and pancreatic surgery; presided over liver transplantation surgeries. He has performed liver transplantation, autologous stem cell transplantation combined with artificial liver and liver transplantation for mid and late

#### NFYD-ZJYY003 Guo Ying

Job Title: Deputy Director of Organ Transplant Center, Chief Physician, Associate Professor

**Personal Profile:** Graduated from the Institute of Nephrology, Sun Yat-sen Medical University in 1992. She has been engaged in clinical organ transplantation diagnosis and treatment for 18 years. She has been engaged in clinical organ transplantation diagnosis and treatment for a long time, diagnosis and treatment of nephropathy and end-stage renal failure, blood purification treatment for patients with chronic renal failure, kidney transplantation, pancreas transplantation, and combined pancreas-kidney transplantation, preoperative and postoperative condition management.<sup>164</sup>

#### NFYD-ZJYY004 Li Min

Job Title: Associate Chief Physician, Associate Professor

**Personal Profile:** He has been engaged in the clinical and scientific research of organ transplantation for 18 years, and has been engaged in the blood purification treatment of patients with chronic kidney disease and renal failure, kidney transplantation and preoperative and postoperative disease management<sup>165</sup>.

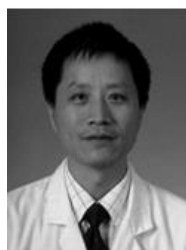

#### NFYD-ZJYY005 Yue Liangsheng

Job Title: Associate Chief Physician, Associate Professor, Organ Transplant Center

**Personal Profile:** a long time researcher in clinical end-stage renal failure diagnosis and treatment<sup>166</sup>.

#### NFYD-ZJYYY006 Fan Lippei

Job Title: Associate Chief Physician, Lecturer, Doctor of Medicine.

**Personal Profile:** has been engaged in the clinical work of blood purification therapy and kidney transplantation for 15 years. Good at preoperative and postoperative treatment of kidney transplant patients<sup>167</sup>.

## 追查迫害法輪功國際組織 ( 追查國際 )

### World Organization to Investigate the Persecution of Falun Gong (WOIPFG)

To investigate the criminal conduct of all institutions, organizations, and individuals involved in the persecution of Falun Gong; to bring such investigation, no matter how long it takes, no matter how far and deep we have to search, to full closure; to exercise fundamental principles of humanity; and to restore and uphold justice in society

#### NFYD-ZJYY007 Chen Hua

Job Title: Attending Physician, Organ Transplant Center

**Personal Profile:** has been engaged in the clinical work of surgery since 1991 and was awarded the Medium Level Title in 1997; has been trained in the provincial third-level first-class hospitals for many years and has rich practical experience in general surgery and orthopedics, and has been engaged in the clinical work of organ transplantation since 2002.

In 2002, he started to engage in organ transplantation clinical work, and went to a famous German transplantation center for short-term study and exchange. Engaged in the clinical work of organ transplantation so far, in blood purification and related techniques, kidney and liver transplantation preoperative diagnosis, evaluation, organ cutting and trimming, various difficulties of kidney transplantation and complication management<sup>168</sup>.

#### NFYD-ZJYY008 Liu Yongguang

Job Title: Associate Chief Physician of Organ Transplantation Center, Lecturer

**Personal Profile:** Specialized in post-transplantation patient maintenance treatment and common situation management<sup>169</sup>.

#### NFYD-ZJYYY009 Li Liuyang

Job Title: Chief Technician of Organ Transplantation Center. Member of Guangdong Organ Transplantation Branch of Chinese Medical Association, a member of Transplantation Immunology Committee of China Dialysis Transplantation Research Society, and a lifetime member of Chinese Society of Immunology.

**Personal Profile:** Graduated from Shanghai Medical University in July 1988 with a Bachelor's Degree in Medical Laboratory Science. Main research interests are organ/tissue transplantation HLA matching and transplantation immunology basic and clinical research, and has been engaged in immunosuppressive drug concentration monitoring and follow-up research for a long time; went to UCLA, USA in 1998, for further study on the new technology of HLA matching, and applied the cross-reactive groups (CREGs) matching strategy formulated by UNOS to renal transplantation donor matching; has been engaged in organ transplantation tissue matching and postoperative follow-up blood drug concentration monitoring for a long time. was the first to apply the cross-reactive group matching theory for donor selection in China, and has devoted himself to the research of tissue matching for PRA-positive sensitized patients, and has successfully performed kidney transplantation for more than 200 sensitized patients, with no hyper-acute rejection occurring for 12 years in a row<sup>170</sup>. Specialized in transplantation tissue matching of PRA-positive highly sensitized recipients, and has long been engaged in basic and clinical research on transplantation immunity and monitoring of serum/whole blood therapeutic drug concentration<sup>171</sup>.

#### NFYD-ZJYY010 Chen Jianrong

Job Title: Associate Chief Technician, Organ Transplant Center

**Personal Profile:** Dedicated to the research of tissue matching in highly sensitized recipients, transplantation immunity, tissue matching and immunosuppressant blood concentration monitoring<sup>172</sup>.

## 追查迫害法輪功國際組織 ( 追查國際 )
