

Investigation Recording 2023-014

Date: March 2, 2023 (phone number +86-15131104229)

Subject(s): Lu Baosai, Director of the Kidney Transplant Department, the Second Affiliated Hospital of Hebei Medical University

Date: March 2, 2023 (phone number +86-15131104229)

Summary:

1. One or two months is a bit short; we don't have so many kidney sources here.
2. We harvest organs in our hospital.
3. The state stipulates that donors should be under the age of 65. When we do it ourselves, the donors are generally under the age of 60. There are too few available under the age of 40, so we can't do it.

Translation

Lu Baosai: Hello!

Investigator: Hey, are you Director Lu Baosai of the Kidney Transplant Department of the Second Affiliated Hospital of Hebei Medical University, Director Lu?

Lu Baosai: Who is calling?

Investigator: I have a relative who lives in your area. I just wanted to come to your hospital for a kidney transplant operation, which is close to you...

Lu Baosai: Oh.

Investigator: Surgery is more convenient. I just want to ask, if the examination result shows suitable, how long can you arrange surgery?

Lu Baosai: Well, there are relatively fewer of them recently. It's hard to tell, our source of the kidney is not so sure.

Investigator: Um.

Lu Baosai: Sometimes more, sometimes less.

Investigator: He (patient) is blood type B, 45 years old...

Lu Baosai: What blood type?

Investigator: Type B blood.

Lu Baosai: You are? Oh...okay, then you can send me his (patient's) name.

Investigator: Okay, when is a good time for you so the patient comes directly to the outpatient clinic or ward so you can check him out, would you?

Lu Baosai: Have you already registered or not yet registered?

Investigator: Well, it's registered, so you can check it again...

Lu Baosai: Okay, then let him come to me directly.

追查迫害法轮功国际组织

World Organization to Investigate the Persecution of Falun Gong

To investigate the criminal conduct of all institutions, organizations, and individuals involved in the persecution of Falun Gong; to bring such investigation, no matter how long it takes, no matter how far and deep we have to search, to full closure; to exercise fundamental principles of humanity; and to restore and uphold justice in society

Investigator: Ah, can you tell in general...

Lu Baosai: Come to me directly.

Investigator: ...How about one or two months? Can you arrange surgery?

Lu Baosai: Well, no, **one or two months is a bit short, we don't have that many kidney sources here, ah.**

Investigator: Well, your organs are all... in terms of the organ harvesting, are the organs harvested within the hospital? Directly on the simultaneous transplantation? Or pick it up outside the hospital and bring it back?

Lu Baosai: We do it in the hospital.

Investigator: Ah, in the hospital, in this hospital, right?

Lu Baosai: Well, yes.

Investigator: As for the donors, under what age do you take them? These donors, what's their age?

Lu Baosai: Under 65 (years old).

Investigator: Ah, under 65 (years old), is that too old?

Lu Baosai: Yes, under 65 (years old).

Investigator: Generally speaking, it is better to be under 40 years old, ah.

Lu Baosai: Well, that, that is too few to have.

Investigator: Um.

Lu Baosai: Then, let's strictly follow the national regulations. The state stipulates that donors are under 65 (years old), and we basically follow that rule. Of course, the possibility of people between ages 60 and 65 is relatively small. Most of them are under 60 (years old), and when we do it ourselves, generally under 60 (years old), and there are too few available under 40 (years old), so we can't do it.

Investigator: Ah, okay.

Lu Baosai: Alright, let me know when you arrive.

Investigator: Thank you, um, okay.
