Male doctor: Oh, he now...he is not...he is not in the ward, he, you, you, what do you want him for?

Investigator: I am like this, I have a patient...

Male doctor: Ah, ah...

Investigator: I have a relative in Wuxi City. He has lung cancer, and his condition is serious now. We want to ask Director Chen to do lung transplant surgery for him.

Male doctor: Uh, well, I have to report this to him later, okay? And now you leave your phone number...

Male doctor: It depends. Some people can get it very quickly after being included in the list. For some, if his personal situation is special, it may take a longer time. Maybe two months or three months.

Investigator: Ah, not yet, ah, it's okay now, yes, the patient's family members...yes...that is, if you want to have a physical examination for the patient and it turned out that a surgery is possible, that is...

Female doctor: Yes.

Investigator: If the medical evaluation shows that surgery is possible, can it be done right away?

Female doctor: You have to wait, a matching has to be done, there has to be a matching donor, and the loving donor has to match the patient, so it's hard to say how long you have to wait.

Investigator: How long does the patient usually wait?

Female doctor: It varies, it's very fast for some, it takes three to five days after entering the list, and there are also people who waited for half a year. Well then, you just go to the clinic, okay?
