

## 追查迫害法輪功國際組織（追查國際）

### World Organization to Investigate the Persecution of Falun Gong (WOIPFG)

To investigate the criminal conduct of all institutions, organizations, and individuals involved in the persecution of Falun Gong; to bring such investigation, no matter how long it takes, no matter how far and deep we have to search, to full closure; to exercise fundamental principles of humanity; and to restore and uphold justice in society

**Subject(s):** Gao Yi, Director of Hepatological Surgery Program, ZhuJiang Hospital of Southern Medical University

**Date:** February 23, 2023 (+86 18922345399)

### Summary

1. There are probably only 40 to 50 donations per year in our hospital. There might be over 100 donations at The First Affiliated Hospital, Sun Yat-sen University and probably nearly 100 donations at The Third Affiliated Hospital, Sun Yat-sen University.

2. Generally speaking, I have a Monday and a Friday clinic, on both mornings.

We have some patients who could make it in the second or third day while some patients can't make it even after waiting for three or six months.

4. It's now all citizens donating organs after death. All organ donations are after the sick person dies, such as brain death or something like that. They are not healthy people like those from judicial approach before. And there are also many children.

5. We are responsible for finding a suitable liver for him. And no matter where it is, anyway, it's better than anything else if he can go there and do it earlier.

### Translation

Doctor: Hi, hello.

Investigator: Hi, how are you? Is this Director Gao Yi of Hepatological Surgery Program at ZhuJiang Hospital of Southern Medical University?

Doctor: Speaking. Who's this?

Investigator: Hi, how are you? This call is from Beijing. I have a relative close to your ZhuJiang Hospital.

Doctor: Ah.

Investigator: He needs a liver transplant. So I was wondering if you could help. He's 45 years old, blood type O, and the assessment in all aspects...all assessments were done. Well, it should be ok to say to move forward with the transplant.

Doctor: Blood type O, right? Then the situation is like this.

Investigator: My relative had done the assessment at the Affiliated Hospital of Zhejiang University School of Medicine. The hospital has done the assessment. They examined the data... have done all the assessments.

### World Organization to Investigate the Persecution of Falun Gong (WOIPFG)

To investigate the criminal conduct of all institutions, organizations, and individuals involved in the persecution of Falun Gong; to bring such investigation, no matter how long it takes, no matter how far and deep we have to search, to full closure; to exercise fundamental principles of humanity; and to restore and uphold justice in society

---

Doctor: The key is like this. Organ donation is not cross-provincial now. In the past, it was possible to cross provinces. It's not cross-provincial now and all come from local, so the patients can go everywhere but the organ can't run away. Over here, there are probably only 40 to 50 donations per year in our hospital. There might be over 100 donations at The First Affiliated Hospital, Sun Yat-sen University and probably nearly 100 donations at The Third Affiliated Hospital, Sun Yat-sen University. In terms of the total number of donations, the First and the Third Affiliated Hospital, Sun Yat-sen University have more organ donations than us each year.

Investigator: Uh. I saw you've also done a lot.

Doctor: Right, we also did that. But in terms of the number of donations, the odds of those two hospitals are higher than ours. But the probability is not necessarily suitable. The point is, it has to be suitable.

Investigator: Of course, patients still want to do it earlier. Ah.

Doctor: Right, right. This is it, this is it.

Investigator: Ah. As you see....when could we come to your outpatient clinic for a checkup? How about waiting at your place?

Doctor: Sure. That'll work. Generally speaking, I have a Monday and a Friday clinic, on both ..... both mornings.

Investigator: Ah. As you see, you said...if he is suitable, how long could it be probably arranged at your place?

Doctor: Ah, it's hard to say. We have some patients who could make it in the second or third day while me patients can't make it even after waiting for three or six months. It depends.

Investigator: Right, right. As you see, generally speaking, how old is ....how old is the organ source?

Doctor: Ah, it's hard to say. Because now it's all citizens donating organs after death. All organ donations are after the sick person dies, such as brain death or something like that. They are not healthy people like those from judicial approach before. It's all gone now and it's all citizens donating organs after death. So it's hard to predict.

Investigator: This...

Doctor: And there are also many children.

Investigator: Ah. As for my relative, his family is in business, and the financial situation is very good. Can you see anything from judicial approach or something like that?

Doctor: Ah. No. It's definitely not available now through judicial approach.

Investigator: How about other, other approaches ...

Doctor: Let's do this way.

---

Investigator: That will work.

Doctor: I see, I got what you mean. Then let's do this way. Please have him come to my outpatient clinic on Monday. Then at the day of my clinic, I will check it out. I will also liaison with the other hospitals about organ donations and file a request for him. In this way, he can have sources from a few more places and doesn't have to run by himself. Then In this way, whenever there is an available and suitable one at any place, we can seize the chance and just do it as soon as possible.

Investigator: Uh. Ah.

Doctor: Does that work?

Investigator: Sounds great. Ah. That's it, Director Gao, so to speak, then I'll leave my relative to you. We won't go anywhere else and just wait over your place.

Doctor: Ah. You could. No problem. You can wait over here. Actually, I can contact two or three places....contact them at the same time for you...at the same time...at the same time. It's not a big problem, okay?

Investigator: As for my relative, he prepared one million yuan himself dedicated to find this... looking for organs. His family's financial situation is good, so he just wants to get it done earlier and find a better organ.

Doctor: I see. I got you. No worry. Because we have more contacts with each hospital, this... the key is, firstly, he must be young. Secondly, his condition allows him to wait now. And thirdly, it needs to find a suitable liver. So we... we are responsible for finding a suitable liver for him, and no matter where it is, anyway, it's better than anything else if he can go there and do it earlier, okay?

Investigator: Right, right.

Doctor: Uh.

Investigator: Ok then please.

Doctor: All right, let's do this way first, okay?

Investigator: I will have them come to you with the money. This matter is..., as you see, anyway, you know what kind of disease this patient is.

Doctor: I see, I see, I see. How about this way? You send me the name of the patient. So that I can know what's going on when he contacts me, okay?

Investigator: I'll send you his name and the disease... the brief... brief summary of the medical record, and send it to your mobile phone.

Doctor: Uh, no, you can just send his name, gender, and age, because I...I need to examine him carefully. For the detail...detailed medical record, just have him come to me and I will make the assessment, okay?

---

Investigator: Sounds great. As you see, can it be done in one month?

Doctor: I see. This...this...this is hard to say. Sometimes you think about one month, it may not work. Sometimes you think about one month, maybe two days is enough. It's not a sure thing because the matter of the disease, the matter of donation, is more complicated. This person...there are various factors. As long as the patient's physical condition is good and he can walk around, then we can focus on the donor. Ah, then he can have the... the advantage... okay?

Investigator: Anyway it is...

Doctor: All right. I can't chat with you anymore because I'm going to the clinic, and...I still have patients in the clinic. Okay, I can't chat with you anymore,

Investigator: Then please take care of it.

Doctor: Ah you're welcome. You're welcome. All right.

Investigator: All right then. Appreciate it.

Doctor: Um.
