追查迫害法輪功國際組織 (追查國際)

World Organization to Investigate the Persecution of Falun Gong (WOIPFG)

To investigate the criminal conduct of all institutions, organizations, and individuals involved in the persecution of Falun Gong; to bring such investigation, no matter how long it takes, no matter how far and deep we have to search, to full closure; to exercise fundamental principles of humanity; and to restore and uphold justice in society

China's Organ Transplant Organizations are the Executing Entities for the Communist Party's State Crime of Live Organ Harvesting

Since 1999, led by its then-leader Jiang Zemin, the Chinese Communist Party (CCP) criminal group has been manipulating China's entire state apparatus, including the Party, government, military, armed police, judicial system, and medical institutions, through the Political and Legal Affairs Commission and the "610" system, to commit nationwide mass extermination of Falun Dafa practitioners by means of live organ harvesting for transplantation. The CCP's live organ harvesting of Falun Gong practitioners is a crime against humanity and a crime of genocide initiated on the orders of Jiang Zemin.

Since the CCP's live organ harvesting of Falun Gong practitioners is a state genocidal crime conducted as a political campaign, organ transplant institutions in all provinces, central government-controlled municipalities, and autonomous regions of mainland China, including all military, armed police, and local hospitals (medical centers) are suspected to have participated in this crime, even including a considerable number of hospitals unqualified to perform organ transplants, such as small and medium-sized hospitals and specialized hospitals. Similar to how all Chinese hospitals were involved in forced abortions during the CCP's implementation of the "one-child policy", all transplant facilities in China today have participated in live organ harvesting.

In view of the broader context of the CCP's state crime of live organ harvesting, those in charge of organ transplant hospitals/centers and similar institutions in China are suspected of having been involved in the crime of live organ harvesting from groups such as Falun Gong practitioners.

Evidence Collection Methods

1. Direct and indirect comprehensive telephone investigation and on-site investigation of the people suspected of involvement in the live organ harvesting

The subjects of our investigations include government officials, police officers, doctors and other medical personnel.

Geographical Distribution of the Subjects of Investigation, and the Duration of Investigations:

The WOIPFG's subjects of investigation are people in different positions, who are located across the entire country of China. Our investigations have been ongoing for nearly two decades, and our investigation results have always been consistent. The evidence gathered by us verifies that live organ harvesting is a systematic arrangement by the CCP.

- 1) Subjects of investigation: Presidents, directors, doctors, nurses, and security guards of organ transplant hospitals.
- 2) Hospitals involved: A considerable amount of recorded evidence has been obtained from many provincial, military, armed police, and local organ transplant hospitals (centers) across China.
- 3) Time span: Our investigations on the live organ harvesting started in 1999, and they are ongoing to this day.

2. Data investigation

- 1) We have been collecting data from the hospitals' websites and press releases.

追查迫害法輪功國際組織 (追查國際)

World Organization to Investigate the Persecution of Falun Gong (WOIPFG)

To investigate the criminal conduct of all institutions, organizations, and individuals involved in the persecution of Falun Gong; to bring such investigation, no matter how long it takes, no matter how far and deep we have to search, to full closure; to exercise fundamental principles of humanity; and to restore and uphold justice in society

- 2) We have been searching for and analyzing medical papers on transplantation.
- 3) We have been using the website www.archive.org to view the hospitals' previously archived information.
- 4) We have been collecting reports from the official Chinese media outlets.
- 5) We have organized all the information obtained from our investigations to create a database of the hospitals.

All the facts have shown us that the CCP is by no means a rational or normal organization or political party; but instead, it is a supra-state criminal syndicate controlled by a group of criminals who have committed crimes against humanity. The CCP's logic of thinking and principles of action are anti-human, and the crimes it has committed are forms of evil that humanity had never seen previously.

WOIPFG's investigative report series contains nearly 70 investigation reports on the alleged organ harvesting of living Falun Gong Practitioners at major Chinese military and civilian hospitals and on their staff members suspected of participation in this crime. This volume contains five such investigation reports.

WOIPFG's Investigative Report on the Alleged Organ Harvesting of Living Falun Gong Practitioners at Shulan (Hangzhou) Hospital and Its Staff Members Suspected of Participation

Hospital: Shulan (Hangzhou) Hospital
Address: No. 848 Dongxin Road, Xiacheng District, Hangzhou City, Zhejiang Province
World Organization to Investigate the Persecution of Falun Gong (WOIPFG)

Preface

In order to confirm whether Shulan (Hangzhou) Hospital is conducting/involved in the live harvesting of human organs for transplantation for profit, World Organization to Investigate the Persecution of Falun

追查迫害法輪功國際組織 (追查國際)

World Organization to Investigate the Persecution of Falun Gong (WOIPFG)

To investigate the criminal conduct of all institutions, organizations, and individuals involved in the persecution of Falun Gong; to bring such investigation, no matter how long it takes, no matter how far and deep we have to search, to full closure; to exercise fundamental principles of humanity; and to restore and uphold justice in society

Gong (WOIPFG) conducted a telephone investigation and a data survey on Shulan (Hangzhou) Hospital, including the number of organ transplant operations, organ waiting time, organ sources, participants, patients and details of operations, etc. The survey showed that the waiting time for liver and kidney transplants at Shulan (Hangzhou) Hospital is extremely short, the number of transplants is huge, and the number of patients and operations is very high.

According to the data obtained from a special investigation conducted by WOIPFG, during the half-year period from December 12, 2017 to May 20, 2018 alone, Zheng Shusen's own surgical team at Shulan (Hangzhou) Hospital performed 545 cases of liver and kidney transplantation (306 cases of liver transplantation and 239 cases of kidney transplantation) and used 560 organs (including 15 discarded organs). The percentage of emergency transplants in terms of total organ transplant cases was 10% to 20%. The organ wait times were one to two weeks, with the shortest wait time being only one day. Also, there were cases of the hospital seeking patients for existing organs and organ surplus. There were more than 400,000 kidney sources, and the hospital guaranteed to provide its patients with young organ donors within one month.

It is worth noting that, according to the results of this special investigation, the hospital performed 545 cases of liver and kidney transplantation (306 cases of liver transplantation and 239 cases of kidney transplantation) during a half-year period, which included the off-seasons around the New Year's Day and the Chinese New Year. Therefore, there should have been at least 1,000 transplant cases performed during the entire year. Moreover, this is only the number of operations performed by Zheng Shusen's surgical team alone within half a year. Judging from the scale of Shulan Hospital, where there are 37 doctors (including 16 directors and deputy directors), there should be at least two surgical teams. So, according to conservative calculations, the volume should be no less than 2,000 cases of liver and kidney transplantation. (For details, please refer to the attached special investigation record.)

The investigation results from WOIPFG shows that Shulan (Hangzhou) Hospital has an extraordinarily short waiting time for liver and kidney transplants, a huge number of transplants, abundant organ supply, and unclear sources of organs. The timing of the development of organ transplantation coincides highly with the time of the Chinese Communist Party's persecution of Falun Gong. Zheng Shusen, the hospital's director, did not deny the use of organs from Falun Gong practitioners for transplantation during the investigation conducted by WOIPFG on the persecution of Falun Gong. Zheng Shusen's paper was retracted by the International Liver Transplant Society due to suspicions involvement of live organ harvesting, et al.¹ Furthermore, Zheng Shusen served as the former chairman of the Zhejiang Anti-Cult Association, a specialized organization for persecuting Falun Gong by the Chinese Communist Party (2007–2017). Zheng himself participated in brainwashing and transformation activities against Falun Gong practitioners under the name of the association, constituting actual persecution crimes.²

The investigation indicated that Shulan (Hangzhou) Hospital had a very short waiting time for liver and kidney transplants, a huge number of transplants, an adequate supply of organs, and an unknown source of organs, and was suspected of being involved in the live harvesting of human organs. Shulan Hospital is suspected of committing the crime against humanity of mass live organ harvesting of Falun Gong practitioners.

The Chinese Anti-Cult Association (CACA) was founded by the Chinese Communist Party (CCP) or Chinese government officials who have religious or scientific backgrounds. Following the direction of the CCP and with the help of the state-controlled media, the members of the CACA have been using their religious and scientific backgrounds and social identities to justify and further the persecution of Falun Gong. Their functions include providing explanations to people in China and abroad to justify the persecution,

追查迫害法輪功國際組織 (追查國際)

World Organization to Investigate the Persecution of Falun Gong (WOIPFG)

To investigate the criminal conduct of all institutions, organizations, and individuals involved in the persecution of Falun Gong; to bring such investigation, no matter how long it takes, no matter how far and deep we have to search, to full closure; to exercise fundamental principles of humanity; and to restore and uphold justice in society

providing suggestions to the Chinese government regarding the methods of persecution, providing theories to criticize Falun Gong's principles, and directly participating in the brainwashing and persecution of Falun Gong practitioners. After its establishment on November 13, 2000 in Beijing, the CACA quickly developed many branches in different provinces, cities, work units, and even schools. It has been motivating people from all social levels to join its movement of criticizing Falun Gong and brainwashing Falun Gong practitioners.

In view of the general background of the CCP's state crime of organ harvesting from living persons, and the large amount of relevant evidence from the hospital, Zheng Shusen is an important organizer of the CCP's large-scale live organ harvesting of Falun Gong practitioners and the executor of the systematic persecution of Falun Gong practitioners. Shulan Hospital is suspected of committing crimes against humanity of large-scale organ harvesting from Falun Gong practitioners.

Evidence includes:

1. The director of the hospital, Zheng Shusen, did not deny the use of organs from Falun Gong practitioners during the investigation phone calls, and that the time when he did a large number of organ transplants over a long period of time coincided with the persecution of Falun Gong by the CCP
2. Audio evidence indicated that multiple doctors at the Affiliated Hospital of Zhejiang University School of Medicine, where Zheng Shusen worked, were suspected of involvement in live organ harvesting.
3. Data from the special investigation report shows that Shulan Hospital has a huge number of transplanted organs, with ultra-short waiting times and unknown sources of organs.
4. Zheng Shusen's paper was retracted by the International Liver Transplant Society, due to being suspected involved in live organ harvesting³.
5. Zheng Shusen was the former chairman of the Zhejiang Anti-Cult Association (2007-2017), which was a dedicated organization for the persecution of Falun Gong by the Chinese Communist Party. Zheng himself was personally involved in the actual persecution of Falun Gong practitioners under the name of the Association, including brainwashing and conversion, and was responsible for writing a book in 2009 as the director of the editorial board to discredit Falun Gong⁴.
6. Zheng Shusen was the chairman of the China Organ Procurement Organization (OPO), and during his tenure, OPO members and individuals were suspected of live organ harvesting from Falun Gong practitioners.

Contents

I. About Shulan (Hangzhou) Hospital

II. Telephone Investigate

1. Zheng Shusen does not deny using organs of Falun Gong practitioners for transplantation
2. Unlawful operation, qualification not approved, transplantation already started (more than 50 liver(operations) done, qualification still (waiting for) being approved, but by default)
3. Short waiting time for organs, unknown source of organs (two weeks waiting most of the time, sometimes only one day, liver source mainly depends on the relationship of President Zheng Shusen)
4. Huge number of transplants, even during the epidemic did not stop (during the epidemic, transplantation did not stop for one day)

III. Huge number of transplants proved by official media reports

IV. Special investigation of transplant details from December 2017 to May 2018

1. Summary of the survey
2. Original records of the special investigation

V. List of responsible persons

1. Zheng Shusen
2. Ye Zaiyuan
3. Shou Zhangfei
4. Zheng Jie

I. Shulan (Hangzhou) Hospital Overview

Shulan (Hangzhou) Hospital is a tertiary private general hospital. On December 6, 2015, Shulan Hospital was officially opened for business in Hangzhou, with Zheng Shusen being its president (he was concurrently serving as the president of the First Affiliated Hospital, Zhejiang University).⁵ At the beginning of its establishment, Shulan Hospital was affiliated to Zhejiang University and named “Zhejiang University International Hospital”, intending to have the reputable century-old university endorsing Zheng’s own private enterprise. In 2018, the hospital was renamed “Shulan (Hangzhou) Hospital” and became a branch of the Shulan Health Group⁶, which was founded by Zheng Shusen and his wife Li Lanjuan.

After the Chinese Communist Party announced in 2015 that it would stop using organs from death row inmates, some local hospitals were once strapped for organ donors, while Zheng Shusen's Shulan private hospital, which focuses on organ transplants, opened quickly and has been flourishing for several years, being called "Second Zhejiang First (Affiliated Hospital)" and "the largest liver transplant hospital in China. From preparation to opening, it only took 2 years for Shulan Hospital. Academician Qian Xu, an internationally renowned Chinese scientist who is originally from Hangzhou, once said, "The development speed of Shulan Hospital is so amazing that it is rare in the world, not to mention in China. Obviously, this is directly related to the official Communist Party status of Mr. and Mrs. Zheng Shusen.

According to the reports on December 6, 2015, Zhejiang University International Hospital was officially inaugurated and opened for business. The entire hospital was constructed in accordance with the Joint Commission International (JCI) standards. The initial investment was 500 million yuan, which also made it the largest and most comprehensive hospital with the highest standard run by “social forces” in Zhejiang Province. At the time of its establishment, the hospital had 512 beds, more than 500 medical staff, 41 clinical departments and eight medical technology departments. It also had 13 operating rooms with a full range of world-class equipment, such as PET-CT, MRI, DSA and CT scanners, as well as the da Vinci Surgical Systems.⁷

Shulan Hospital is located on Dongxin Road, which is a prime area of Xiacheng District, Hangzhou, with a construction area of approximately 63,000 square meters. Its new 20-story building has almost become a landmark in Hangzhou. On April 25, 2017, the International Organ Transplant Center of Zhejiang University International Hospital was inaugurated. At the same time, an “Organ Transplant Academic Committee” was also established. The number of ward beds in the hospital was also increased from 512 to 1,000.⁸

According to the official website of Shulan Hospital, the total number of doctors in Shulan Hospital is 37, including 20 staff members in the Hepatobiliary and Pancreatic Surgery Department, including Zheng Shusen as an academician, 5 chief physicians, 7 associate chief physicians, 4 attending physicians and 3 residents. There are 17 staff members in the Nephrology Department, including 1 chief physician, 3 associate chief physicians, 7 attending physicians and 6 residents.⁹

II. Telephone investigation: short wait times, large volumes of organ transplants, unknown donor organ sources

1. Zheng Shusen didn't deny the use of Falun Gong practitioners' organs¹⁰

Subject(s) of Investigation: Zheng Shusen, President of Shulan (Hangzhou) Hospital

Date: November 3, 2018 (Phone number: +86-13805749805)

Summary: A liver transplant could be arranged within two weeks. Zheng Shusen did not answer the question of whether he was using the organs of Falun Gong practitioners or not, but he did not deny it, either.

追查迫害法輪功國際組織 (追查國際)

World Organization to Investigate the Persecution of Falun Gong (WOIPFG)

To investigate the criminal conduct of all institutions, organizations, and individuals involved in the persecution of Falun Gong; to bring such investigation, no matter how long it takes, no matter how far and deep we have to search, to full closure; to exercise fundamental principles of humanity; and to restore and uphold justice in society

(Recording 1. Download: [MP3](#); Transcript Download: [pdf 16](#))

2. Shulan Hospital conducted transplant operation unlawfully¹¹.

Zhejiang University International Hospital had already performed over 50 cases of liver transplants, while its organ transplant qualification was still being approved, but authorities had tacitly approved it.

Subject(s) of Investigation: Dr. Wu Weilin, Liver Transplant Department at Zhejiang University International Hospital

Date: July 28, 2016 (Phone number: +86+15958185259)

Summary: Zheng Shusen established his own hospital, called Shulan Hospital (aka. Zhejiang University International Hospital) in 2016. They had already performed more than 50 cases of liver transplantation at the time of the investigation. Zheng Shusen's main focus was on liver transplants. The hospital was waiting for the authorities' approval of its transplant qualification, but the authorities had already tacitly approved it. Over 100 beds (3 wards x 39 beds = 117 beds) were used for their hepatobiliary and pancreatic surgeries. They had about 100 inpatients for liver transplants. They did transplants almost every day.

(Recording 2 download: [MP3](#), please see [Addendum 52](#))

3. Very short waiting time, unknown organ source

It might take about two weeks to get a donor liver. Sometimes people could even do the operation on the second day of hospitalization. The liver procurement mainly depended on Zheng Shusen's connections.

Subject(s) of Investigation: Xie Qinfen, Organ Procurement Coordinator for Liver Transplantation at Zhejiang University International Hospital¹²

Date: February 28, 2017 (Phone number: ++86+13968153957)

Summary: "Generally speaking, it may take about two weeks (to get the liver). Sometimes it's very fast. Sometimes people can even do it on the second day. It depends on your situation. Critically ill patients can take priority." "We did over 120 cases last year (the year when the hospital was established)." "We would usually receive information on donor livers on the second day, (after we make an inquiry)." "Liver procurement mainly depends on President Zheng. He has established a reputation and has lots of connections on various aspects."

(Recording 3 download: [MP3](#), please see [Addendum 8](#))

"Our hospital is relatively fast, with the fastest tissue typing." "President Zheng does all (liver transplant) operations himself." ¹³

Subject(s) of Investigation: Ms. Ge, consultant at Shulan (Hangzhou) Hospital

Date: April 6, 2020 (Phone number: +86-13777816727)

Summary: "If it is fast, a suitable organ can be found within a week or ten days. If it is slow, it may take one month or two months." "Compared with other hospitals, our hospital is relatively fast, with the fastest tissue typing." The hospital's president Zheng Shusen only sees patients for half a day per week at the outpatient clinic on Wednesday mornings. "President Zheng does all (liver transplant) operations himself."

(Recording 4 download: [MP3](#), manuscript download: [pdf028](#))

4. Transplant volume was large, performed two to three operations every day. Never stopped for one day even during pandemic.

追查迫害法輪功國際組織 (追查國際)

World Organization to Investigate the Persecution of Falun Gong (WOIPFG)

To investigate the criminal conduct of all institutions, organizations, and individuals involved in the persecution of Falun Gong; to bring such investigation, no matter how long it takes, no matter how far and deep we have to search, to full closure; to exercise fundamental principles of humanity; and to restore and uphold justice in society

Subject(s) of Investigation: Liang Jianzhong, Liver Transplant Department at Zhejiang¹⁴ University International Hospital

Date: July 25, 2016 (Phone number: +86+13516703061)

Summary: “If it’s really urgent, we can certainly do the surgery immediately.” “Every day, we do 2-3 cases [of liver transplant surgeries]. We have both domestic and foreign patients.” “Liver transplantation is [our] preponderant discipline.” “The liver sources are relatively easy to find.”

(Recording 5 download: [MP3](#), please see [Addendum 51](#))

Shulan Hospital didn’t stop doing transplantation due to the pandemic¹⁵.

Subject(s) of Investigation: Doctor Zhu, Liver Transplant, Ningbo Medical Center Li Huili Hospital

Date: April 4, 2020 (Phone number: +86-57455836149)

Summary: “(Shulan) has been doing quite a lot. (Shulan) did not stop (doing organ transplants) due to the pandemic. No, Shulan has never stopped.”

(Recording 6 download: [MP3](#), manuscript download: [pdf027](#))

III. Official media reports proved huge number of transplantation

According to a mainland government official media report, from the afternoon of May 11 to noon on May 12, 2017, the eight operating rooms of Shulan (Hangzhou) Hospital were brightly lit, and eight large organ transplants were completed within 20 hours. One of the patients surnamed Wu waited only two days before he received a “donated” liver.¹⁶

According to the official website of the First Affiliated Hospital, Zhejiang University, as of July 10, 2015, Zheng Shusen had performed 1,741 cases of liver transplantation.¹⁷ According to a report published on *Qianjiang Evening News* on October 30, 2019, “Zheng Shusen, the president of Shulan Health, has completed more than 3,300 liver transplants so far.”¹⁸

According to the above two reports, from July 2015 to October 2019, a period of four years and three months, Zheng Shusen completed more than 1,559 liver transplant surgeries (more than 3,300 cases minus 1,741 cases), averaging more than 367 cases per year.

IV. One Special Investigation Revealed an Astonishing Number of Organ Transplant Cases

According to the data obtained from a WOIPFG special investigation, from December 12, 2017 to May 20, 2018, during a half-year period, Zheng Shusen’s own surgical team alone at Shulan (Hangzhou) Hospital performed 545 cases of organ transplantation (306 cases of liver transplantation and 239 cases of kidney transplantation) and used 560 organs (including 15 discarded organs). The percentage of emergency transplants in terms of total organ transplant cases was 10% to 20%. The organ wait times were one to two weeks, with the shortest wait time being only one day. Also, there were cases of the hospital seeking patients for existing organs and organ surplus. There were more than 400,000 kidney sources, and the hospital guaranteed to provide its patients with young organ donors within one month. There were seven cases of double transplantation on the same patients, and the recorded intervals between the first and second operations were only one to three days. In one liver transplant case, three donor livers were used within nine days. On February 10, 2018, four liver transplants and two kidney transplants were completed within one day.¹⁹

Therefore, there should have been at least 1,000 transplant cases performed during the entire year. Moreover, this is only the number of operations performed by Zheng Shusen’s surgical team alone within half a year. Judging from the scale of Shulan Hospital, where there are 37 doctors (including 16 directors and deputy

追查迫害法輪功國際組織 (追查國際)

World Organization to Investigate the Persecution of Falun Gong (WOIPFG)

directors), there should be at least two surgical teams. So, according to conservative calculations, the volume should be no less than 2,000 cases of liver and kidney transplantation. (For details, please refer to the attached special investigation record.)

The cases collected in this special investigation have relatively complete patient personal information, such as their names, genders, ages, home addresses and personal ID numbers. In order to protect their privacy, some of the information is not shown in our published report.

Investigation Summary

(1) Original records of special investigation I:

1. Investigation period:

December 12, 2017 to May 20, 2018

2. Total organ transplant volume:

A total of 546 cases, including 306 cases of liver transplant, 239 cases of kidney transplant and one case of heart transplant.

3. Number of organs consumed:

More than 560 (15 organs were discarded). In some cases, there is no information on wasted organs.

4. Emergency transplantation: 10 ~ 20%

According to the case descriptions, eight cases are clearly recorded as emergency transplants, and the other cases are unspecified. On March 23, 2018, some description was written: "10-20% of the organ transplant recipients at Shulan Hospital are in a critical condition or terminally ill, with many cases of acute organ failures and emergency transplantation." Therefore, calculated according to the percentages, there should be about 55 to 110 cases of emergency transplantation.

5. Organ wait times:

In most cases, the organ wait times were within two weeks. In two cases with the shortest wait times, it took only one day to find a matching organ. And in the case with the longest wait time, it took 23 days. There were two cases, in which the wait times were three days each. And in two other cases, the wait times were four days each. In one case, the wait time was eight days. In another case, the wait time was 11 days. And in a third case, it was 12 days. The wait times in other cases were not indicated.

6. Available organs sought transplant organ recipients

"Organs looking for recipients is a customary rule in Shulan Hospital's Nephrology Department."

Examples:

1) A "donor" kidney was delivered to the hospital at 7:30 p.m. on February 13, 2018, and its pathology was good. Doctor Shou Zhangfei then contacted the organ recipient, and the surgery was performed at 8 a.m. on February 14, 2018.

2) The second organ transplant operation scheduled on February 15, 2018 was cancelled due to the fact that no patient was willing to undergo a surgery on the Chinese New Year's Eve, and the donor liver was transferred to the First Affiliated Hospital, Zhejiang University.

7. Liver and kidney sources could be selected by age

On February 15, 2018, the kidney source prices at Shulan Hospital rose to more than 400,000 yuan each, and the hospital guaranteed to find young donor organs for patients within one month.

追查迫害法輪功國際組織 (追查國際)

World Organization to Investigate the Persecution of Falun Gong (WOIPFG)

To investigate the criminal conduct of all institutions, organizations, and individuals involved in the persecution of Falun Gong; to bring such investigation, no matter how long it takes, no matter how far and deep we have to search, to full closure; to exercise fundamental principles of humanity; and to restore and uphold justice in society

On December 13, 2017, the liver and kidney sources could be selected by age, and the patients had a one-to-one contact with doctors in the organ transplant group. This will be investigated further.

8. Double organ transplantation cases

There were seven cases indicated to be double transplantation cases. The interval between the first and second operations in one case was one day, and it was three days in another case. The other cases did not specify the exact intervals.

Example: On December 12, 2017, only one day had passed between the first and second transplantation operations for one patient.

The patient was a 43-year-old female surnamed Zhong, who's from Shaoxing County, Zhejiang Province. On December 11, 2017, she was admitted to Shulan Hospital at 6 p.m. due to acute liver failure. It was a drug-induced hepatic failure. The patient suffered from an abdominal pain two months ago, and she took Chinese herbal medicine for 22 days at the Chinese Medicine Clinic of Jinyuetang in Shaoxing one month ago. She had yellow urine for two weeks, suffered from fatigue and vomited for two weeks. Three days before her first surgery, she was diagnosed with acute liver failure at the First Affiliated Hospital, Zhejiang University. She had been hospitalized four times so far, and her liver functions would increase from time to time. At 11:30 p.m., the donor liver was frozen and its pathology was good, but it was deemed unsuitable for transplantation for unknown reasons (the donor liver was discarded). On the afternoon of December 12, another donor liver was selected, and the second transplantation operation was completed at 8 p.m.

9. A case of liver transplantation used three donor livers within nine days

From February 18 to March 1, 2018, Shulan Hospital performed a liver transplant with three donor livers within nine days, and the third liver transplantation operation was successful.

On February 18, 2018, at 11 a.m., one liver transplantation operation took place (this was the time when the organ recipient was sent to the hospital). The recipient was surnamed Dang, who had liver cancer, and the donor organ blood type matched his. The doctors responsible for the surgery were Zheng Shusen, Zhang Wu, Wang Shuo and Dong Danjie. The doctors responsible for the liver excision and repair were Lin Guoling and Gao Sheng. Yuan Lei received the liver, and Zhao Xian was responsible for the anesthetization. 55% of the donor liver had coagulative necrosis, so it was not transplanted (the donor liver was discarded).

At 4 p.m. on February 28, another donor liver was sent to the organ recipient Dang, with 35% mixed steatosis and 10% coagulative necrosis, and the organ was not transplanted (the donor liver was also discarded).

One liver transplant was performed at 10 p.m. on March 1 (this was the time when the organ recipient was sent to the hospital). The organ recipient Dang suffered from hepatitis B liver cancer and had just undergone a TaCE surgery. The donor organ's blood type matched his. The doctors responsible for the surgery were Zheng Shusen, Yang Zhe, Fan Ning and Wu Weiqiang. The doctors responsible for the liver repair were Lin Guoling and Chen Xuliang. Yuan Lei received the liver, and Huang was responsible for the anesthetization. The third donor liver was excellent, and the organ transplant was completed.

10. Four liver transplants and two kidney transplants were performed in one day

On February 10, 2018, four liver transplants and two kidney transplants were completed on the same day. The organ recipients were all male. One liver transplant patient had a blood type of A+, and the rest were all B+. The oldest patient for the liver transplantation was 62 years old, and the oldest for the kidney transplantation was 73 years old.

Investigation Period: December 5, 2017 - May 20, 2018

Investigation Subject: Zheng Shusen Surgery Team of Shulan (Hangzhou) Hospital

Total number of organs: 561 (Liver Kidney and heart, 15 disposed)

Total number of transplants: 546 (liver: 306, kidney: 239, heart: 1)

Emergency transplant: 10-20%, transplant recipient is critically or terminally ill, most of them are acute failures. Nine cases were recorded.

Investigator 's notes of operation information

(Dates: date of making notes)

Investigator's records of operation information

(date: dates of operation performed)

May 20, 2018

On May 20 at 3:30 p.m., a donor liver of type O arrived, recipient patient, Mao XX, 60 years old, male, O+, hepatitis B for 20 years, yellow stained skin and sclera, weakness and diminished appetite for more than 1 month, six times of artificial liver treatment in the First Hospital of Zhejiang University, liver function worsened on May 8, the patient was admitted to the hospital the same day, diagnosed with chronic and acute liver failure, 12 days later on May 20 at 8:30 p.m., an emergency liver transplant completed.

Number of donor organs: 1, number of transplanted organs: 1

Organ waiting time: 12 days

May 18, 2018

On May 18, at 11:30 a.m., a donor kidney and liver delivered, blood type AB.

Case 1: Recipient Liu XX, 50 years old, male, O+, 2 weeks with vague upper abdominal pain, liver cancer found for one week, carried marginal liver transplantation in the afternoon of May 17, un-succeeded, in critical condition. This time, the second transplant, with 30% mixed fatty degeneration of donor liver, completed at 4:30 p.m

Case 2, Xu XX, 51 years old, female, blood type AB.

Case 3, Chu XX, 43 years old, male, blood type AB+, a kidney emergency transplant is completed in the afternoon.

Number of organs: 3, number of organs be transplanted: 3

Number of organs for secondary transplant: 1, interval between two transplants: 1 day.

Organ waiting time: 1 day

May 17, 2018

(1) On May 17 at 1:30 p.m., two donor livers delivered, one with 50% macrofollicular lipodystrophy, recipient patient Liu XX, 50 years old, male, 30 years of hepatitis, blood type O+, 2 weeks of vague pain in the upper abdomen, 1 week of liver cancer discovery, from Jidong County, Heilongjiang Province. Zheng Shusen had the pathology report for liver cryopreservation changed to 35% (from 50%) macrofollicular lipodystrophy.

(2) Another donor liver with good pathology, patient Lou XX, 53 years old, female, O+, from Yuecheng District, Shaoxing, Zhejiang Province, chronic and acute liver failure, alcoholic liver and hepatitis B, more than 10 days ago after drinking oral taken acetaminophen tablets, ibuprofen capsules and other drugs have abdominal distension, poor appetite, fatigue, hepatic encephalopathy, artificial liver treatment for 3 times.

Number of organs: 2, number of transplants: 2

May 14, 2018

Two kidney transplants were performed from 9:00 a.m. to 1:30 p.m. on May 14.

(1) Recipient, Wang XX, 17-year-old, male, A+, with abnormal renal function for 7 years, on hemodialysis for 2 years.

(2) Zhu XX, 65 years old, male, A+, with elevated creatinine for 6 years, on hemodialysis for 6 years.

Number of organs: 2, number of transplant: 2

May 13, 2018

May 13, a pair of kidneys and a spleen were delivered, severe vascular arteriosclerosis, glomerulosclerosis, both discarded.

Number of organs: 3, number of transplant: 0, disposed: 3

May 8, 2018

(1) Shen XX, male, 56, A+, proteinuria for 15 years, 5 years of peritoneal dialysis, at stages 5 of chronic kidney disease. On 4:00pm of April 26, 2018, a pair of donor kidneys were delivered, pathology is 3 of the 4 glomeruli have glomerulosclerosis, 30% interstitial fibrosis, did not use it for transplant.

(2) One right donor kidney delivered at 5:30 p.m. on May 8, 2018, pathology is clear cell carcinoma, donor blood type A, hepatitis negative, left kidney with allogeneic transplant.

Doctors carried operation: Shou Zhang Fei, Zhu Min, Wang He Wei. Hot ischemia: 5 minutes, cold ischemia: 5 hours.

Number of organs: 3, number of transplants: 1, number of discarded organs: 2.

May 9, 2018

One liver transplant operation on May 9 at 2:30 a.m. Patient of bed 4D72 sent to (operating room) at 1:30 a.m., Song XX, 45 years old, male, blood type B, liver occupancy found for 4 months, cirrhosis of liver B, giant liver cancer, size 27X27 cm, height 172cm, weight 63kg, no surgical history. Blood type was compatible match.

Surgery: Zheng Shusen, Lin Guoling, Terry Xiao, Gao Sheng. Liver repair: Xie Qinfen, Wu Weilin.

Anesthesia: Kong. Airport receiving liver Yuan Lei.

Number of organs: 1, transplant volume: 1

May 6, 2018

(1) On May 6 at 6 pm, 1 donor liver was delivered, different from the previous situations, this time recipient was not determined, fibrous tissue hyperplasia in the confluent area, fibrous septum formed, not used (discarded).

Number of organs: 1, transplant volume: 0, discarded: 1

May 7, 2018

Two kidney transplants were performed on May 7 at 8:00 a.m. The donor and recipient patients were both A+, the donor liver was positive for hepatitis B antigen.

Number of organs: 3, transplant volume: 2, discarded: 1

One liver transplant performed at 11 pm on May 7. Recipient patient Huang XX, male, 43, blood type O+, hepatitis B for 19 years, yellow skin and eyes for half a month, confusion for 10 days, diagnosis of chronic and acute liver failure, ran artificial liver treatments for 4 times, aggravated encephalopathy, lung infection, pancreatitis,.

Number of organs: 1, transplant volume: 1

May 5, 2018

(1) One liver transplant at 12 pm on May 5. Recipient patient Chi XX, male, 59, blood type A+, hepatitis B for 20 years, when performing physical examination at the First Hospital of Wenzhou Medical University on April 17, found liver occupancy cirrhosis, admitted on April 24, Zheng Shusen diagnosed hepatocellular carcinoma with development of sonic foci, recommended to carry out transplant, performed T A C E

treatment on May 2. At 12 pm on May 5, Bood type A donor liver was delivered, emergency transplantation completed.

(2) One liver transplant at 4:00 pm on May 5, 15:00 sent bed 4B33 patient Jiang XX, 41 years old, male, 172cm, 81kg, hepatocellular carcinoma, portal vein cancer embolism, blood type matched. He was admitted to Shulan Hospital on April 12. Liver arrived at 16:00.

Surgery: Zheng Shusen, Xie Qinfen, Ding Songming, Chen Xu Liang. Liver repair: Zhang Wu, Yang Yu. Anesthesia: Huang. Receiving liver: Yang Yu.

Number of organs: 2, transplant volume: 2.

Organ waiting time: 11 days, 23 days.

May 4, 2018

Patient Sun XX, female, 61, B+, chest tightness and abdominal distension, yellow skin and urine for more than 2 months, diagnosed with hepatitis B cirrhosis and liver failure at the First Affiliated Hospital of Zhejiang University, show symptoms of peritonitis and hepatic encephalopathy after treatment, transferred to Shulan Hospital on April 30, diagnosed with end-stage liver disease, at 3 pm on May 4, a blood type B donor liver delivered, emergency liver transplantation was completed.

Number of organs: 1, transplant volume: 1

Organ waiting time: 23 days

May 3, 2018

Patient Lou XX, male, 38, height 170, weight 80kg, blood type AB, 15 years of hepatitis B, yellow skin and urine for 10 days, diagnosed chronic and acute liver failure at the First Affiliated Hospital of Zhejiang University, antiviral treatment was ineffective, transferred to Shulan Hospital on April 30, performed artificial liver treatments for 2 times, 3 days later, on May 3 at 10 pm, 1 donor liver delivered, 20:30pm sent patient of bed 5D09 to (operation room), TB322, PT 35.1 seconds, blood type matched. A liver transplant was performed at 21:30pm.

Surgery: Zheng Shusen, Lin Guoling, Wang Shuo, Gao Sheng. Liver repair: Yang Zhe, Xiao Min.

Anesthesia: Huang.

Number of organs: 1, transplant volume: 1

Organ waiting time: 4 days.

April 28, 2018

2 kidney transplants performed on April 28, blood type of recipient and donor are both AB+

Number of organs: 2, volume of transplants: 2

April 24, 2018

3 liver transplants performed on April 23, blood type 1 O⁺ and 2 B⁺, 2 kidney transplants both B+. 1 transplant nephrectomy, B+.

Number of organs: 5, transplant volume: 5.

April 23, 2018

The third transplant of this night, April 23, started at 23:00 and patient of 4B28 was delivered at 22:00 to (operation room), recipient Peng XX, male, 55 years old, cirrhosis of the liver with recurrent gastrointestinal bleeding and portal vein tethered wall thrombosis. Blood type matched.

Surgery: Zheng Shusen, Zhang Wu, Wu Weilin, Chen Xu Liang. Liver trimming: Xie Qinfen, Yang Yu.

Anesthesia: Kong. Liver trimming: Yang Yu

Number of organs: 3, transplant volume: 3

April 21, 2018

April 21, 16:30 one liver transplant this afternoon, 15:30 delivered patient of 2-4B26, Zhu XX, recurrent hepatocellular carcinoma after right hemicolectomy, obstructive jaundice TB521, cirrhosis, gastrointestinal bleeding, high creatinine renal insufficiency, weight 70 Kg, height 170cm, blood type matched. CRRT was required during operation, which was difficult.

Surgery: Zheng Shusen, Li Qiyong, Wu Weilin, Yang Yu. Liver trimming: Xie Qinfen, Wu Weiqiang.

Anesthesia: Huang.

Number of organs: 1, transplant volume: 1

April 15, 2018

One liver transplant on April 15 at 3:30 a.m. Patient 5d21 was delivered at 2:30 a.m. Xu XX, male 54 years old, 163 cm, 60 kg. hepatitis B cirrhosis decompensated stage, hepatocellular carcinoma, gastrointestinal bleeding, ascites, diabetes mellitus, currently compressed by three chambers and two capsular tubes, blood type matched. Liver arrived around 3:30.

Surgery: Zheng Shusen, Lin Guoling, Xiao Rui, Gao Sheng. Liver trimming: Yang zhe, Yang Yu.

Anesthesia: Kong.

Number of organs: 1, transplant volume: 1

April 7, 2018

2 emergency liver transplants and 1 kidney transplant were performed on April 7.

(1) The first donor liver arrived at the hospital at 10:00, blood type B. Patient Lu XX, B+, male, 38 years old, liver failure.

(2) The second transplant started at 16:00 and the patient of bed 4D60 was sent at 15:00, Lou XX, male, 44 years old, chronic and acute liver failure, hepatitis B, 165 cm, 72 kg, have ever had appendectomy, PT 66.6, TB 498. The liver arrived around 16:00.

Surgery: Zheng Shusen, Li Qiyong, Ding Songming, Chen Xu Liang. Liver trimming: Zhang Wu, Gao Sheng. Liver receiving: Yuan Lei. Anesthesia: Kong.

(3) Kidney transplant recipient patient Yan XX, B+, male, 41 years old, IgA, 3 years of kidney disease, 2 years of hemodialysis.

Number of organs: 3, transplant volume: 3

March 30, 2018

Tong XX, 55 years old, female, O+, 25 years of intra- and extra-hepatic bile duct stones, 1 year of cholestatic cirrhosis, stones recurrence, in fair condition, emergency liver transplantation was performed in Shulan Hospital at 5 pm on March 30, abdominal adhesions occurred, pus seen in bile ducts, patient had sudden ventricular fibrillation and cardiac arrest during surgery at 19:00, died at 19:30.

Number of organs: 1, transplant volume: 1

Organ waiting time: 15 days.

March 23, 2018

One kidney transplant was performed at 11 pm on March 23, donor blood type AB. Recipient Zhang XX, male, 54, AB+, found six months ago with elevated creatinine abdominal dialysis, came to Shulan half a month ago for transplant matching. Hypertension for 30 years, diagnosis of chronic kidney disease stage 5, hyperphosphatemia, nephrogenic anemia, restless legs syndrome.

One liver transplant in the early morning on March 23, recipient Xu XX, male 65 years old, A+, donor type A, yellow sclera of skin for 8 days, impaired consciousness for 1 day, emergency admission for transplantation, diagnosis of chronic and acute liver failure, hepatic encephalopathy, recipient had good

health in the past, gallbladder removed 20 years ago, no other disease except hepatitis B, admitted to hospital in a coma.

Number of organs: 2, transplant volume: 2

Organ waiting time: 15 days

March 22, 2018

One donor liver delivered at 3:00 pm on March 22, blood type AB, recipient patient Cao XX, AB+, male, 66 years old, abdominal distension and weakness for 2 months, liver occupancy found for 10 days, admitted for examination on March 14, admitted to hospital through medical insurance on Mar 22, surgery completed at 9:00 pm.

Surgery: Zheng Shusen, Yang Zhe.

Second liver transplant on March 22. One liver transplant this midnight 00:30, 23:30 delivery recipient, 5D35 Xu XX, male, 65 years old, blood type A, drug-related liver damage, basis of cirrhosis B, gallbladder removal 20 years ago. Blood type matched. PT56, TB450.

Surgery: Zheng Shusen, Li Qiyong, Wang Shuo, Gao Sheng. Liver trimming: Lin Guoliang, Zheng Luna. Anesthesia: Kong. Receiving liver: Yuan Lei. Liver expected to arrive at 00:30.

Number of organs: 2, transplant volume: 2

Organ waiting time: 8 days

March 21, 2018

Huang XX, male, 73 years old, blood type B+, found liver occupancy for 1 month, performed emergency liver transplant on March 21 at 11 pm, donor blood type B+, patient liver with hepatocellular carcinoma. Patient is currently in stable condition.

Number of organs: 1, transplant volume: 1

March 17, 2018

Li XX male, 70 years old, A+, yellowish urine for more than 20 days, yellowish eyes and skin with fatigued for 7 days. Coma for 3 days, diagnosed acute hepatic failure, hepatic encephalopathy, hepatitis B, emergency liver transplantation performed at 4 pm on March 17, postoperative small intestine perforation, ileal necrosis infectious shock, multi-organ failure. The family refused DSA treatment and was discharged.

Number of organs: 1, number of organs transplanted: 1.

March 17, 2018

(1) the Belgian transplant professor has been involved in Shulan surgery for a week, gave two open lectures on liver transplant.

(2) One liver transplantation this afternoon at 15:00. bed 5 receptor was sent to ICU at 14:00, Li XX, male, 70 years old, severe liver, hepatic coma, after coronary artery bridging. Severe situation, blood type matched. Pulmonary arterial hypertension.

Surgery: Zheng Shusen, Jan Lerut, Qinfen Xie, Ding Songming, Gao Sheng. Liver trimming: Lin Guoling, Yang Yu. Anesthesia: Kong. liver receiving: Yuan Lei.

Number of organs: 1, number of organs transplanted: 1

Feb 18, 2018 – Mar 1, 2018, three operations for same patient

The 1st time, one liver transplant at 11:00 pm, February 18, receptor Dang XX, hepatocellular carcinoma, blood type matched. Donor liver 55% coagulative necrosis, not transplanted (discarded).

Surgery: Zheng Shusen ,Zhang Wu, Shuo Wang , Dong Shanjie. Liver retrieval and trimming: Lin Guoling,Gao Sheng. Receiving liver: Yuan Lei. Anesthesia: Yang Zhe.

The 2nd time, February 28th at 4pm send receptor Dang XX, another donor liver, 35% mixed steatosis, 10% coagulative necrosis, not transplanted (discarded).

The 3rd time, one liver transplant today, March 1, at 10 pm, recipient Dang XX, male, hepatitis B hepatocellular carcinoma, post TaCE surgery, blood type matched. The third donor liver was good and the transplant was completed.

Surgery: Zheng Shusen, Yang Zhe, Fan Ning, Wu Weiqiang. Liver trimming: Guoliang Lin, Chen Xuliang. Airport pick up liver: Yuan Lei. Anesthesia: Huang.

February 25, 2018

2 liver transplants on February 25.

(1) First operation, donor delivery time around 5pm, donor liver A+. Recipient Chen XX, male, 55 years old, ICC, cirrhosis, post TACE. Blood type matched.

(2) Second operation, send donor (blood type) B+, deliever time was adjusted, changed to 7pm, one liver transplant at 7pm. Recipient: Li XX, female, 43 years old. Hepatocellular carcinoma and cirrhosis. Blood type matched.

Surgery: Zheng Shusen,Zhang Wu, Ding Songming, Chen Xuliang. Liver trimming:Yang Zhe, Dong Shanjie. liver receiving: Yuan Lei. Anesthesia: Kong.

Number of organs: 2, number of organs transplanted:2.

February 24, 2018

February 24, 2018, one liver transplant at 11:00pm, donor liver blood type A, recipient patient Yu XX, male, hepatitis B cirrhosis, blood type matched.

Surgery: Zheng Shusen, Yang Zhe, Dong Shanjie, Wu Weiqiang. Liver trimming: Lin Guoling, Yang Yu. Wenzhou liver pick up and deliever: Dong Shanjie. High speed railway liver pick up: Yuan Lei. Liver deliever vehicle: Zhe Jiang A8N913.

Number of organs: 1, number of organs transplanted:1.

February 15, 2018

First operation, one liver transplant at 6:30 am today, patient Zhu XX, male, hepatology, cirrhosis, liver function loss stage. Blood type matched.

Surgery: Zheng Shusen, Li Qiyong, Xiao Min , Gao Sheng. Liver trimming: Li, Wu Weiqiang. Liver receiving: Yuan Lei. Anesthesia: Xian Zhao.

The second operation is on New Year's Eve, because no patient was willing to do it on New Year's Eve, the donor liver was transferred to The First Affilicated Hospital of Zhejiang University School of Medicine.

Number of organs: 2, number of organs transplanted:1, transfer to other hospital: 1.

February 14 , 1 liver transplant operation, 2 kidney transplant operation, O+, donor kidney delivered at 7:30 pm on February 13, good pathology, Dr. Shou Zhang Fei contacted the patient, surgery performed at 8:00 am on February 14. Donor Liver sent to frozen section at 9:30 am on February 14, results show 10% hypoxic ischemic necrosis.

Number of organs: 3, number of organs transplanted:3.

Organ waiting time: donor organ waiting for recipient.

February 10, 2018

4 liver transplant operations, 2 kidney transplant operations, all male recipients, one liver transplant patient with blood type A+, the rest patients with blood type B+, the oldest patient is 62 years old for liver transplant, the oldest patient is 73 years old for kidney transplant operation.

Number of organs: 6, number of organs transplanted:6.

February 8, 2018

2 liver transplant operations, the first one blood type is B+. The second liver transplant operation will be performed in the midnight, and the expected delivery time for the recipient is around 9-10pm. Recipient: Yunmu Wang, cirrhosis, hepatic decompensation, blood type O, blood type matched.

Surgery: Zheng Shusen, Yang Zhe, Xiao Min, Chen Xuliang. Liver trimming: Lin Guoling, Gao Sheng. liver pick-up: Yuan Lei. Anesthesia: Huang. Liver transport vehicle Buick Zhejiang A8N913, arrived at 10:10 pm.

Number of organs: 2, number of organs transplanted:2.

February 7, 2018

February 7 night , 2 liver transplant operations. The second operation, receptor blood type O+, Zhang X, female, 27 years old. Yellowish eyes, skin and urine for 13 days, mental changes for 3 days, took Chinese herbal health care products for the past one month. On Feb 4, the First Affiliated Hospital of Zhejiang University School of Medicine diagnosed drug-induced acute liver failure, hepatic encephalopathy, waiting for liver source, on Feb 7 night, 9:15pm, performed the emergency liver transplant, no hepatitis.

Number of organs: 2, number of organs transplanted:2.

February 6, 2018

February 6 night at 9 pm received 1 donor liver, recipient Shen XX, 39 years old, male, blood type A+, liver cancer for 1 year, acute liver failure, uremic syndrome.

Performed 2 liver transplant operations on January 5 in Shulan Hospital, pathology of 2 donor livers are pretty good.

(1) One liver transplant this afternoon at 13:30 (delivery time of receptor), recipient: 0501 Hu XX, male, 39 years old, 14 days post liver transplantation. Recipient blood type O, blood type matched. Recipient acute rejection of the second transplant

Surgery: Zheng Shusen, Lin Guoling, Xiao Min, Yang Yu. Liver trimming: Li Qiyong, Yang Zhe.

Anesthesia: Xian Zhao.

(2) One liver transplantation from 5-6pm, liver estimated to be 1 hour late. Recipient: Zhou XX, male, 63 years old, cirrhosis, gallbladder stones, recipient blood type AB.

(2) The above is part of the transplant group information. Hu XX for. The pathology of the 2 donor liver is good, there has transplants operation tomorrow.

Number of organs: 2, number of organs transplanted:2.

January 2, 2018

One liver transplant operation and two kidney transplants operations were performed at Shulan Hospital on January 2, 2018, blood type B.

(1) Recipient Zhao XX, 59 years old, female. HLA A24(9) B13 B76(15) BW4. BW6. DR8 DR15 DR51.

(2) Recipient Jiang XX, 56 years old, female. A11 A31(19) B38(16) B61(40) BW4. BW6. DR11. DR52.

(3) Recipient Zhu X, 48 years old, male, giant polycystic liver 49X45X25cm, congenital polycystic kidney.

Number of organs: 3, number of organs transplanted:3.

January 1, 2018

1 liver transplant performed on January 1, 2018, blood type A.

Number of organs: 1, number of organs transplanted:1.

December 31, 2017

6 kidney transplants, 1 liver transplant, blood type B, O performed on December 31, 2017.

Number of organs: 7, number of organs transplanted:7.

December 29, 2017 (December summary)

As of 5 pm on the December 29th, 18 liver transplants and 29 kidney transplants had been performed in December 2017, excluding the 2 liver transplants and 2 kidney transplants completed in the early morning of December 1.

Number of organs: 49, number of transplants: 49

December 26, 2017

2 liver transplants were performed today with patient blood types AB and B. Left and right donor kidney delivered on 8:40 am, punctures intraoperative cryopathology performed, pathology results good, but no matched receptor found for transplantation until now.

Number of organs: 2, number of organs transplanted:2.

December 22, 2017

3 transplant operations scheduled for early morning, including one secondary transplant, interval is 5 days.

Number of organs: 3, transplants 3.

Interval between two transplants: 2

December 20, 2017

2 emergency kidney transplant operations were performed at night with donor type B in Shulan Hospital.

Number of organs: 2, number of organs transplanted:2.

December 12, 2017

Sun XX, 43 years old, female (ID number omitted), from Shaoxing County, Zhejiang Province (address and telephone number omitted). Acute liver failure, admitted to Shulan Hospital at 6 pm December 11 2017, 11:30 pm donor liver performed emergency frozen-section, pathology is good, (patient) was not fit for transplantation for unknown reason, another possible hepatitis B carriers donor liver was selected in December 12 afternoon, transplantation finished at 8 pm. She is drug-related liver failure, abdominal pain 2 months ago, 1 month ago taking Chinese medicine from Shaoxing Jingyuetang Chinese medicine clinic for 22 days, 2 weeks of yellowish urine, weakness, vomiting. She was diagnosed with acute liver failure. 3 days before surgery at The First Affiliated Hospital of College of Medicine, Zhejiang University. So far hospitalized for 4 times, liver function was elevated from time to time.

Number of organs: 2, number of organs transplanted:1.

Organ waiting time: 0 day, 1 day

Number of organs for secondary transplant: 1

Interval between secondary transplant: 1 day

December 10, 2017

The International Organ Transplant Center of Shulan Hospital was established in 2017, the former president of the International Liver Transplant Association, Jan Lerut (Belgium) was honorary director, hired by Zheng Shusen, participated in at least 7 cases of liver transplant operation. He was shocked by the large number of liver transplantation on the mainland, also wanted his daughter (surgeon) to join as an intern of Zhejiang Hospital.

December 1-5, 2017

(1) Gu X, 34-year-old, male, (ID number omitted), Jinxi County, Fuzhou City, Jiangxi province (address and phone number omitted) blood type A. On February 1, 2017, he was admitted to Shulan Hospital for emergency liver transplantation because liver cancer was found one month ago. The donor liver was sent to frozen section test four times and the pathology result was highly differentiated liver cancer, so the operation was cancelled. Another donor liver was frozen in the evening of February 4 with good result, and the transplantation was finished in the early morning of February 5.

Surgery: Zheng Shusen, Zhang Wu, Li Zhuang and Li Qiyong.

(2) Sun XX, blood type B.

Number of organs: 2, number of organs transplanted: 1.

Number of organs for secondary transplant: 1. Interval between two transplants: 3 days.

Transplant operations have been carried out since January 2016. Recently, there have been up to 7 kidney transplants and 2 liver transplants a day. Most operations are performed around 1 or 2 in the morning. Zheng Shusen performed liver transplants himself, and all donor livers underwent rapid freezing pathology.

December 2, 2017

In the early morning of Dec 2, 2 liver transplant operation were performed by Zheng Shusen.

Number of organs 2, Numbers of organs transplanted: 2

December 1, 2017

Shou Zhangfei performed 5 kidney transplant operations, diagnosis on 2 transplanted kidney acute rejection from transplant operation a few days ago.

(Note from on-site investigator on February 11, 2018)

Prof. Jan Lerut MD, PhD, FACS, Vice Chairman of the European Society of Transplantation Surgery, Professor of Liver Transplantation in Belgium, attends outpatient clinics at Shulan Hospital every Monday and Tuesday morning in March 2018. Patient can call 400-103-9999 to make an appointment or contact Hepatobiliary Surgery Department, Ms. Xie Qinfen.

IV. List of responsible persons

1. Zheng Shusen:

Zheng Shusen, academician of the Chinese Academy of Engineering, professor of surgery and doctoral supervisor at Zhejiang University, director of the Key Laboratory of Multi-Organ Transplantation Research of the Ministry of Health, vice president of the Chinese Medical Doctor Association, and chairman of the China Alliance of Organ Procurement Organizations (OPO).²⁰ Former president of the First Affiliated Hospital of Zhejiang University School of Medicine and current director of the Organ Transplantation Center of Zhejiang University First Hospital and the Organ Transplantation Center of Shulan

(Hangzhou) Hospital.

From 1997 to 2015, for 18 years, Zheng Shusen served as the Dean of the First Affiliated Hospital of Zhejiang University. During his term, the hospital became one of the largest organ transplant centers in China. In 2015, some local hospitals were temporarily short of organ supplies, due to the CCP's declare of banning death penalty organ transplants. However, Shulan Private Hospital, which Zheng Shusen's main organ transplant project, quickly opened. It expended rapidly and known as "The mini First Affiliated Hospital of Zhejiang University", "the country's largest liver transplant hospital". Even Academician Qian Xu, a well-known international Chinese scientist whose ancestry is from Hangzhou, said that the development speed of Shulan Hospital is so amazing, not to mention domestic, it is also rare worldwide.

追查迫害法輪功國際組織 (追查國際)

World Organization to Investigate the Persecution of Falun Gong (WOIPFG)

To investigate the criminal conduct of all institutions, organizations, and individuals involved in the persecution of Falun Gong; to bring such investigation, no matter how long it takes, no matter how far and deep we have to search, to full closure; to exercise fundamental principles of humanity; and to restore and uphold justice in society

From preparation to opening of Shulan Hospital, it only took 2 years. The rapid development of this private hospital is directly related to the official status of Zheng Shusen and his wife.

Zheng Shusen has more different identities and titles: Academician of the Chinese Academy of Engineering, Professor of Surgery at Zhejiang University, Doctoral Supervisor, Director of the Key Laboratory of Multi-Organ Transplantation Research of the Ministry of Health, Vice President of the Chinese Medical Doctor Association, China Organ Procurement Organization Alliance (OPO) Chairman²¹. Former Dean of School of Medicine at the First Affiliated Hospital of Zhejiang University, and now director of the Organ Transplant Center of the First Affiliated Hospital of Zhejiang University and Shulan (Hangzhou) Hospital.

In addition, Zheng Shusen is also the former chairman of Zhejiang Anti-Cult Association (2007-2017), an organization of the CCP to persecute solely Falun Gong. In the name of the association, Zheng himself actually participated in the brainwashing and transformation of Falun Gong practitioners²². In 2009, as the director of the editorial board, he was responsible for compiling books and slandering Falun Gong.²³ Zheng Shusen's long-term massive organ transplantation coincides with the time when the CCP persecuted Falun Gong. In addition, evidence reveals that members and individuals of OPO during Zheng Shusen's tenure as the chairman of the China Organ Procurement Organization Alliance (OPO) are also suspected of harvesting organs from Falun Gong practitioners. As of 2021, Zheng Shusen has completed about 3,500 liver transplant operations.²⁴

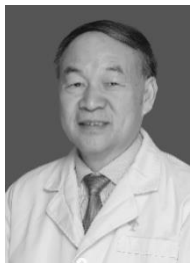

A large amount of evidence suggests that Zheng Shusen is a crucial organizer of the CCP's large-scale live organ harvesting of Falun Gong practitioners and an executor of the systematic persecution of Falun Gong practitioners. The hospital where Zheng Shusen works is an important base for suspected organ harvesting of Falun Gong practitioners. Zheng Shusen is suspected of committing crimes against humanity of harvesting organs from Falun Gong practitioners.

2. Li Lanjuan

Chinese infectious disease expert, member of the senior expert group of the National Health Commission, academician of the Chinese Academy of Engineering, professor, chief physician, and doctoral supervisor of the First Affiliated Hospital of Zhejiang University. The current director of the State Key Laboratory of Diagnosis and Treatment of Infectious Diseases. From March 1998 to March 2008, Li Lanjuan served as Director and Party Secretary of Zhejiang Provincial Department of Health. Official of Bureau-Director level.

3. Ye Zaiyuan

Head of gastrointestinal breast surgery and chief physician. Former Dean of Zhejiang Provincial People's Hospital, current Dean of Shulan (Hangzhou) Hospital, Counselor of Zhejiang Provincial Government, Head of Postdoctoral Workstation of Gastroenterology, Ministry of Human Resources and Social Security, Director of Zhejiang Gastroenterology Key Laboratory, Zhejiang Medical Association Vice president, executive director of the Chinese Hospital Association, executive director of the Chinese Medical Association Surgery Branch.

4. Shou Zhangfei

Chief Physician and Kidney Transplantation Expert. He performed more than 1,000 kidney transplant operations. Served as vice president of Shulan Hospital. He is currently a national member of the Organ Transplant Branch of the Chinese Medical Association, a member of the Standing Committee of the Organ Transplant Branch of the Chinese Medical Doctor Association, a deputy chairman of the Living Organ Transplant Professional Committee of the Organ Transplant Branch of the Chinese Medical Doctor Association, and a member of the Standing Committee of the Zhejiang Medical Doctor

Association.

5. Zheng Jie

Son of Zheng Shusen and Li Lanjuan. The actual controlling shareholder of Shulan Medical Group which has 78 companies under its name. Served as the legal representative, vice president and CEO of Shulan Hospital. The founder of Shulan Medical, the chairman of Hangzhou General Health Management Consulting Co., Ltd., the initiator of the OMAHA alliance, and the author of the recommending preface of "Subversion Medical".

6. List of personel

List of surgeons (14 people)

Zheng Shusen, Lin Guoling, Xiao Yan, Wang Shuo, Gao Sheng (Ding Songming, Chen Xuliang (sometimes liver repair), Li Qiyong (sometimes liver repair), Fan Ning, Dong Danjie, Zhuang Li; Shou Zhangfei, Zhu Min, Wang Hewei.

List of Liver repair/reception (sometimes surgery) (11 people)

Xie Qinfen, Wu Weilin, Zhang Wu, Yang Yu, Wu Wei, Qiang, Yang Zhe, Xiao Yan, Lin Guoling, Zheng Luna, Zhu Hengkai.

WOIPFG's Investigative Report on the Alleged Organ Harvesting of Living Falun Gong Practitioners at Affiliated Hospital of Qingdao University and Its Staff Members Suspected of Participation

Address: 16 Jiangsu Road, South District, Qingdao City

Foreword

The Affiliated Hospital of Qingdao University is one of the first hospitals in China to carry out kidney transplantation. In 2014, Zang Yunjin, the former deputy director of the Liver Transplantation Research Institute of the Beijing General Hospital of the Armed Police Force, was hired to take charge of the organ transplantation center of this hospital, and the number of liver and kidney transplants has since increased significantly. Telephone investigations in recent years have shown that the number of organ transplants in this hospital ranks the highest in Shandong Province; the waiting time is short, and the transplants can even be done right away; there are an excess of kidney donors, some of which are sent to hospitals in Shanghai. Donors are not from the Red Cross Society, and the hospital has its own channels for obtaining organs. In 2019, cases of organ harvesting from living Falun Gong practitioners were still occurring around Qingdao. In view of the background of the CCP's state crime of forced organ harvesting, the hospital is suspected of participating in the crime of organ harvesting from living Falun Gong practitioners and members of other groups.

I. Hospital Overview: The Affiliated Hospital of Qingdao University is a provincial comprehensive tertiary Level-A institution integrating medical treatment, teaching, scientific research and other functions. At present, there are 4,978 open beds in the Shinan Compound and Laoshan Compound of the hospital. The hospital currently has 1,298 senior professional and technical personnel, including 962 doctors, 1,842 masters, and more than 200 returnees from overseas. There is one external academician and 12 people who enjoy the special government allowance of the State Council.

追查迫害法輪功國際組織 (追查國際)

World Organization to Investigate the Persecution of Falun Gong (WOIPFG)

To investigate the criminal conduct of all institutions, organizations, and individuals involved in the persecution of Falun Gong; to bring such investigation, no matter how long it takes, no matter how far and deep we have to search, to full closure; to exercise fundamental principles of humanity; and to restore and uphold justice in society

On December 28, 2022, the official website of the hospital stated: The hospital has built a first-class organ transplant center in China, and has completed 36 difficult heart transplants, 1008 liver transplants, 1801 kidney transplants, and 16 lung transplants. Both the number and level comfortably rank first in the province.²⁵

II. After Zang Yunjin became the leader of the organ transplant center, the number of transplants increased rapidly in China

In 2013, in the context of the hospital building an organ transplant center, the Kidney Transplant Department was established as a separate department, and the number of transplant cases increased year by year.²⁶

In February 2014, the Affiliated Hospital of Qingdao University announced the establishment of an Organ Transplant Center. Zang Yunjin, former executive deputy director of the Liver Transplant Research Institute of the General Hospital of the Armed Police Force, came to the hospital to lead the work of the organ transplant center, establishing an "elite transplant team of 20 or 30 people", setting up four departments of liver transplantation, heart transplantation, kidney transplantation, and pancreas transplantation, and planning to complete 100 cases of organ transplantation within the year. Previously, the hospital performed 40 kidney transplants and 3-5 liver transplants every year, and it was not able to perform heart transplants.²⁷

After Zang Yunjin came to lead the Organ Transplant Center, the transplant volume of the Affiliated Hospital of Qingdao University quickly became a leader in the field of organ transplantation, especially liver transplantation in China.²⁸

III. The Affiliated Hospital of Qingdao University has obtained qualifications for six types of organ transplantation, and the organ transplant center has 189 open beds.

The Affiliated Hospital of Qingdao University is one of the earliest large-scale tertiary level A hospitals in China to carry out organ transplantation, and as early as 2000, it obtained national qualifications for liver and kidney transplantation. It is now one of the few hospitals in China that has the qualification to carry out six types of transplantation, including liver, kidney, pancreas, small intestine, heart and lung.²⁹

As of 2021, the number and quality of organ transplantation operations in the hospital had been among the top for six consecutive years in China, and ranked first in Shandong Province. As of October 2021, the Organ Transplantation Center of the Affiliated Hospital of Qingdao University has opened a total of 189 beds, has multiple sub-disciplines such as pediatric organ transplantation, liver transplantation, kidney transplantation, liver surgery, hepatology, transplant intensive care unit, transplant follow-up and transplant special examination, etc., and has become a first-class in China and No.1 in the province, large-scale comprehensive organ transplantation center integrating clinical, scientific research and teaching.³⁰ From the perspective of its bed usage, based on 189 transplants done a year, the turnover rate of beds is 100% (the average bed utilization rate of tertiary hospitals in China is as high as 103%³¹), and viewed from the hospital stay of organ transplantation of 30 days, it has the potential of more than 2300 cases (189×365×100%/30=2300) organ transplants per year. (Calculation method: number of beds times number of days a year times bed turnover rate / average length of hospital stay for transplantation = annual number of transplant completions)

IV. The organ transplant center set a record of completing 6 operations in 24 hours

In August 2014, the official website of the Affiliated Hospital of Qingdao University reported that "less than half a year after the establishment of the center, 30 cases of liver transplantation and 38 cases of kidney transplantation have been carried out, ranking first in the province in terms of total number of cases. The stage is as big as the heart." Zang Yunjin served as the director of the center and the director of the liver

追查迫害法輪功國際組織 (追查國際)

World Organization to Investigate the Persecution of Falun Gong (WOIPFG)

To investigate the criminal conduct of all institutions, organizations, and individuals involved in the persecution of Falun Gong; to bring such investigation, no matter how long it takes, no matter how far and deep we have to search, to full closure; to exercise fundamental principles of humanity; and to restore and uphold justice in society

transplantation department, Zhang Bin and Zhang Shun served as the deputy directors of the center and the liver transplantation department, and Fan Ning, Hu Weiyu, Hu Xiao, Guan Ge, and Wang Xin formed the liver transplantation team. Li Zhiqiang, Deputy Director of the Cardiac Surgery Department of Qianfoshan Hospital, was hired as the Director of the Kidney Transplant Department, and Dong Zhen was appointed as the Deputy Director of the Kidney Transplant Department.

The article also stated, "In order to support the kidney transplant department to achieve new breakthroughs, Sun Lijiang and Li Yanjiang of the Department of Urology often rushed to Huangdao to assist in the operation at night after finishing their work in their own places. They, along with Dong Zhen and Huang Tao, worked together to set the record of completing 6 surgeries in 24 hours!"³²

V. Telephone investigation

Highlights: The hospital has the highest transplant volume in Shandong Province. The patient may receive transplant surgery upon arrival. There are many kidney donors, some of which are sent to Shanghai hospitals. The donors are not from the Red Cross Society. Zang Yunjin is one of the experts who have done more than 2,000 cases in China.

Investigation target: Dr. Yue, Kidney Transplant Ward, Affiliated Hospital of Qingdao University School of Medicine³³

Investigation date: November 15, 2016 (+86- 53282919529)

Content highlights: Our kidney source is relatively sufficient and rich, which is our advantage. The general waiting time are two weeks, and 140 cases have been done so far.

Question: Are donated organs all donated through the Red Cross?

Answer: No, no, we have a dedicated donation agency and a dedicated coordinator.

(Download Recording 1 [MP3](#), please see [Addendum 27](#) for full transcript)

Investigation target: Dr. Wang, Department of Transplantation, Affiliated Hospital of Qingdao University School of Medicine³⁴

Investigation date: February 11, 2017 (+86-532 82919528)

Highlights: We have a lot of organs here, and more than 300 kidneys have been donated, but only 160 cases have been done, and some have been given to Shanghai hospitals.

(Download Recording 2 [MP3](#), please see [Addendum 28](#) for full transcript)

Investigation target: Liver transplant doctor in the intensive care unit of Shandong Qingdao University School of Medicine³⁵

Investigation date: September 8, 2017 (+86- 53282911137)

Highlights: Some people have waited for more than a month before they receive their transplants, but some come straight to have their transplants done upon arrival, and there are many such cases! You do not need to inquire about the liver source. If you are going to have this operation, you do not need to ask such questions! It is inconvenient to talk about the source of the liver.

(Recording 3. Download: [MP3](#); Transcript Download: [pdf 103](#))

Investigation target: Dr. Ju of Liver Transplantation, the People's Hospital of Liaocheng City³⁶

Investigation date: September 13, 2017 (+86-6358276210)

Dr. Ju: Renji Hospital in Shanghai is the one that does the most in the country, and it can do more than 500 cases a year! The Affiliated Hospital of Qingdao University has the highest number of transplants in Shandong Province.

(Recording 4. Download: [MP3](#); Transcript Download: [pdf 4](#))

追查迫害法輪功國際組織 (追查國際)

World Organization to Investigate the Persecution of Falun Gong (WOIPFG)

To investigate the criminal conduct of all institutions, organizations, and individuals involved in the persecution of Falun Gong; to bring such investigation, no matter how long it takes, no matter how far and deep we have to search, to full closure; to exercise fundamental principles of humanity; and to restore and uphold justice in society

Investigation target: Liver transplantation doctor at the Affiliated Hospital of Qingdao University School of Medicine

Investigation date: April 1, 2018 (+86-53282912108)

Highlights: Last year, more than 100 cases of liver transplantation were performed, and many have been done this year; Zang Yunjin is with our hospital, and he sits in the Hall of Fame on Monday morning; he is one of the experts who have performed more than 2,000 cases in the country.

Question: My friend wants to use a half liver from a living donor, can it be found? Is there anyone willing to donate one half of his liver?

Answer: Ah, what this specific question involves... and we can only ask Director Zang to explain it to you. Generally, who wants to do that to a stranger, right? ³⁷

(Recording 5. Download: [MP3](#); Transcript Download: [pdf 5](#))

Investigation target: Dr. Zhang Lin, Department of Anesthesiology, Affiliated Hospital of Qingdao University School of Medicine

Investigation date: June 26, 2018 (+86-186 6180 6583)

Highlights: There are more than 300 cases of kidney transplantation a year; hundreds of cases of liver transplantation are also performed, but it seems fewer than 300. ³⁸

(Recording 6. Download: [MP3](#); Transcript Download: [pdf 6](#))

Investigation target: Dr. Wang, a kidney transplant doctor from the Laoshan Campus of the Affiliated Hospital of Qingdao University ³⁹

Investigation date: August 26, 2019 (+86-532-82913223)

Highlights: We have a lot of patients, and more than 200 transplants were done a year.

(Recording 7. Download: [MP3](#); Translation Download: [pdf 085](#))

VI. According to the Minghui website, family members suspected that He Lifang, a Falun Gong practitioner in Qingdao, was tortured to death when his organs were removed.

According to a December 3, 2019 report on Minghui.com, on July 2, 2019, the "610 Office" in Qingdao City, Shandong Province, and the "610 Office" in Jimo City tortured 45-year-old Falun Gong practitioner He Lifang (male) to death. The family members suspected that He Lifang's organs were forcibly harvested. He Lifang's body had stitched incisions on his chest and incisions on his back. There were traces of pain on his face and his mouth was open.

Before He Lifang was tortured to death, he was sent to the Third People's Hospital of Chengyang (a township hospital in Xiazhuang), which shows the authorities didn't intend to save life, rather, they schemed to commit sins in a small hospital without drawing much attention. The international airport is less than ten minutes away by car, which is conducive to the rapid transport of organs after harvesting. ⁴⁰

VII. List of Responsible Persons

QDDX-FYY001 Dong Zhen

Job Title: Director of the Kidney Transplantation Department of the Organ Transplant Center, Associate Chief surgeon, Master Tutor.

Personal profile: Graduated from Shanghai Second Military Medical University, performed more than 400 cases of kidney transplantation, mastered the common surgical procedures of kidney transplantation and accumulated rich experience in post-kidney transplantation management. ⁴¹

QDDX-FYY002 Zang Yunjin

Job Title: Vice President of Qingdao University Hospital Group, Director of the Organ Transplant Center of the Affiliated Hospital of Qingdao University.

Personal profile: chief surgeon, professor, returned scholar from the United States, doctoral supervisor. Member of the International Liver Transplantation Society (ILTS), National Committee Member of the Organ Transplantation Committee of the Chinese Medical Association, Vice Chairman level member of the Organ Transplantation Committee of the People's Liberation Army, Standing Committee Member of the Beijing Organ Transplantation Committee, Editorial Board Member of the Chinese Journal of Transplantation, Chinese Medical Journal (English version) Special reviewer, editorial board member of Shandong Medicine, Armed Police Medicine, Journal of Organ Transplantation, Journal of Practical Organ Transplantation, etc., special expert of the Medical Expert Committee of Shandong Science and Technology Publishing House. Former Deputy Director of Liver Transplantation Research Institute of Armed Police General Hospital, Director of Liver Transplantation Department of Qianfoshan Hospital of Shandong University, Director of Shandong Branch of Oriental Organ Transplantation Center, Chief Surgeon of Transplant Department of Tianjin First Central Hospital, Professor of Tianjin Medical University. Completed more than 1,500 cases of liver transplantation, and participated in the completion of re-liver transplantation, combined liver-kidney transplantation, domino liver transplantation, liver transplantation for pregnant women in the second trimester and other special and difficult liver transplantation operations.⁴²

QDDX-FYY003 Guo Yuan

Job title: Chief Surgeon

Personal profile: Member of the Organ Transplantation Surgeon Branch of the Shandong Medical Association, and a doctor of medicine from Beijing University. Engaged in general surgery, hepatobiliary surgery for 15 years. He has studied at Kyoto University in Japan and UCLA University in the United States. He started liver transplant work in 2002 and completed more than 200 liver transplant operations.⁴³

QDDX-FYY004 Fanning

Job title: Associate Chief Surgeon, Director Assistant.

Personal profile: Graduated from the Second Military Medical University, doctorate in medicine. Engaged in hepatobiliary surgery for 14 years, participated in the completion of more than 700 liver transplant operations.⁴⁴

QDDX-FYY005 Rao Wei

Job title: Surgeon

Personal profile: Graduated from Nankai University School of Medicine, majoring in clinical medicine, and then worked in the Oriental Organ Transplant Center of Tianjin First Central Hospital. Specialized in liver transplantation internal medicine clinical work and follow-up after liver transplantation (8 years), preoperative evaluation of liver transplantation, diagnosis and treatment of complications after liver transplantation, and long-term follow-up after liver transplantation.⁴⁵

QDDX-FYY006 Wang Xin

WOIPFG's Investigative Report on the Alleged Organ Harvesting of Living Falun Gong Practitioners at the Third Hospital of Peking University and Its Staff Members Suspected of Participation

Address: 49 Huayuan North Road, Haidian District, Beijing

Foreword

In 2004, the Third Hospital of Peking University ranked first in Beijing in the number of kidney transplants. The Organ Transplant Center of Peking University to which it belongs has performed 4,000 liver and kidney transplants within a year. During WOIPFG telephone investigation, one hospital doctor said, "We have 11 medical teams for kidney transplantation, all of which can do it." In the context of the background of the CCP's state crime of living-donor organ harvesting, the hospital is suspected of participating in the crime of forced organ harvesting from living Falun Gong practitioners and members of other groups.

Hospital Overview

Founded in 1958, the Third Hospital of Peking University (abbreviated as "the Third Hospital") is a comprehensive tertiary level-A hospital managed by the National Health Commission that integrates

追查迫害法輪功國際組織 (追查國際)

World Organization to Investigate the Persecution of Falun Gong (WOIPFG)

To investigate the criminal conduct of all institutions, organizations, and individuals involved in the persecution of Falun Gong; to bring such investigation, no matter how long it takes, no matter how far and deep we have to search, to full closure; to exercise fundamental principles of humanity; and to restore and uphold justice in society

medical treatment, teaching, and scientific research. As of the end of 2018, there were 5,157 employees and an average of 1,891 open beds. The hospital has 36 clinical departments and 10 medical technology departments. It has 27 doctoral programs and 1 clinical postdoctoral mobile station. There are 57 on-the-job doctoral supervisors, 1 academician of the Chinese Academy of Sciences, and 1 academician of the Chinese Academy of Engineering.⁶⁷

I. The Organ Transplant Center of Peking University performed 4,000 cases of liver and kidney transplants within one year

As the predecessor of the Institute of Organ Transplantation of Peking University (hereinafter referred to as the Institute), the Organ Transplantation Center of Peking University (hereinafter referred to as the Center), was established in October 2001 under the personal guidance of Han Qide, Vice Chairman of the Standing Committee of the Eleventh National People's Congress. The Institute is jointly formed by 5 medical institutions affiliated to Peking University, including the First Hospital of Peking University, People's Hospital, and the Third Hospital, with the aim to integrating advantages and promoting the development of medical and scientific research including liver transplantation, kidney transplantation, pancreas transplantation, heart transplantation, corneal transplantation and bone marrow transplantation.⁶⁸ Zhu Jiye, Director of the Institute and Director of Hepatobiliary Surgery at Peking University People's Hospital, said in an interview with China Economic Weekly, "Our hospital has performed 4,000 liver and kidney transplants in one year".⁶⁹

In May 2000, the third Hospital officially started clinical liver transplantation. Fifteen cases were completed that year. Subsequently, kidney transplantation and combined pancreas-kidney transplantation were carried out one after another, and organ transplantation became a routine operation in the hospital. The results and quantity of liver transplantation in the transplant center are among the best in Beijing and even in the whole country.⁷⁰

In December 2005, the relocation of the new surgical building of the Third Hospital started. The new building has 470 beds.⁷¹ According to the hospital, the Liver Transplantation Center moved to the new surgical building, and the hospital provided more development space for liver transplantation.⁷²

II. The team of the Liver and Kidney Transplantation Center of the hospital is strong

There are 12 liver surgeons, including 2 professors, 4 associate professors, and 6 attending surgeons, of whom 5 have received doctoral degrees from abroad or domestically, and 4 have obtained master's degrees from abroad or domestically; 6 full-time anesthesiologists for organ transplantation, including 2 with senior professional titles.⁷³

The Department of Urology has two wards with 64 beds, 8 professors and chief surgeons (including 1 doctoral supervisor), 8 associate professors and deputy chief surgeons, and 5 attending surgeons. Under the department, there are multiple organ transplantation and other professional groups.⁷⁴

III. Ma Lulin leads the kidney transplant center, and the number of kidney transplants ranked first in Beijing in 2004

Since January 2001, Chief Surgeon Ma Lulin has served as Director of Urology Department of the hospital. In 2001, the hospital ranked third in Beijing for kidney transplantation, and entered the ranks of the large kidney transplantation centers in the China. In 2004, it became the first in Beijing.⁷⁵ Ma Lulin is

追查迫害法輪功國際組織 (追查國際)

World Organization to Investigate the Persecution of Falun Gong (WOIPFG)

To investigate the criminal conduct of all institutions, organizations, and individuals involved in the persecution of Falun Gong; to bring such investigation, no matter how long it takes, no matter how far and deep we have to search, to full closure; to exercise fundamental principles of humanity; and to restore and uphold justice in society

concurrently a member of the Standing Committee of the Urology Branch of the Chinese Medical Association, the leader of the Kidney Transplantation Team, and a member of the Organ Transplantation Branch of the Beijing Medical Association.

IV. Telephone investigation shows that there are 11 kidney transplant teams, all of which can do it.

Investigation target: Doctor of Kidney Transplant Office, the Third Hospital of Peking University⁷⁶

Investigation date: August 29, 2017 Tel: +86-1082267523

Highlights: We do more than 100 cases a year. We have 11 medical teams for kidney transplantation, all of which can do it.

(Recording 1. Download: [MP3](#); Transcript Download: [pdf 70](#))

Investigation target: Ma Lulin, Kidney Transplant, the Third Hospital of Peking University⁷⁷

Investigation date: October 29, 2019 Tel: +86-156119082820

Highlights:

Question: If the patient register at your place, is it possible to do it within half a month or within a month?

Answer: There is such possibility, but it is relatively small.

Question: The doctor said that blood type B might be easier for a match. I wonder if the match could be found in your hospital.

Answer: Well, come to my clinic next Monday morning! Next Monday morning.

(Recording 2. Download: [MP3](#); Translation Download: [pdf 140](#))

Investigation target: Doctor of Kidney Transplant Office, the Third Hospital of Peking University⁷⁸

Investigation date: February 24, 2020 (+86-1082267320)

Summary:

1. Tianjin No. 1 Center, it does the most!
2. Chaoyang does it, Chaoyang can do it too.
3. It's not that we don't accept patients now, but we can accept them after we have to screen them for pneumonia.
4. Patients will wait for several months before kidney transplants.
5. Hundreds of thousands yuan, maybe two hundred thousand yuan, probably the entire operation will cost that much.
6. The liver source fee...currently it's the Red Cross alone that provides the donor.
7. Question: I have to have more than 100,000 yuan ready for liver transplantation, right? And that includes hospitalization fees. Has the cost of the liver source to be paid to the Red Cross?
Answer: The fee for the Red Cross will be deducted from the hospitalization fees. The cost of liver source is additional, the cost of liver source is to be paid to the Red Cross, probably.
8. You can register to see Director Zheng Gaozhi tomorrow afternoon.

(Recording 3 download: [MP3](#), manuscript download: [pdf008](#))

V. The hospital receives a large amount of state funds to engage in research related to organ transplantation

Two projects of National Natural Science Foundation of China (research on the correlation between benign prostatic hyperplasia and Caa gene polypeptide), one project of the "Eleventh Five-Year Plan" Science and Technology Support Program of the Ministry of Science and Technology, two scientific research funds funded by Peking University 985 (pig pancreas-kidney combined transplantation department — establishment of intestinal drainage animal model, monitoring of rejection after kidney transplantation), one project of National 973 Evidence-Based Medicine Fund (comparison of intestinal drainage and portal vein

drainage in pancreas-kidney transplantation), and two sub-projects of key clinical funding project of the Third Hospital of Peking University (pancreas-kidney combined transplantation, laparoscopic living donor kidney transplantation), with a total amount of more than 3 million yuan.⁷⁹

VI. List of Responsible Persons

BJDX-D3YY001 Zhang Tonglin

Job Title: Director of General Surgery, Chief Surgeon

Personal Profile: Graduated from Beijing Medical College in 1969, and received a master's degree in medicine (surgery specialty) from Beijing Medical College in 1982. Since 1995, he has served as chief surgeon and professor. He is currently the director of general surgery at the Third Hospital of Peking University, a doctoral supervisor, a member of the Chinese Surgical Society, and a member of the Beijing Branch. From December 1993 to March 1995, he went to Ochsner Foundation Hospital in New Orleans, USA to study organ transplantation. Since 2000, more than 200 cases of clinical orthotopic liver transplantation have been completed. Liver transplantation has become a routine operation for the treatment of end-stage liver disease in the Department of Surgery of the Third Hospital.⁸⁰

BJDX-D3YY002 Ma Lulin

Job Title: Master of Medicine, Professor, Doctoral Supervisor, Chief Surgeon, Director of Urology, the Third Hospital of Peking University

Personal Profile: Member of the Standing Committee of the Urology Branch of the Chinese Medical Association and leader of the Kidney Transplantation Team, member at Vice Chairman level of the Urology Branch of the Beijing Medical Association, member of the Urology Branch of the Chinese Medical Doctor Association, and member of the Organ Transplantation Branch of the Beijing Medical Association. From September 1979 to July 1984, he was at the Fourth Military Medical University and, upon graduation, received a bachelor's degree in medicine from the Medical Department.

September 1988 through July 1991 he was at Department of Urology, Graduate School of 301 Hospital, and received a master's degree in medicine. From July 1984 to August 1988, he was a resident surgeon in the Urology Department of Shijiazhuang Peace Hospital.

September 1991 through June 1995 he was Attending Surgeon, Department of Urology, General Hospital of Beijing Military Region. From July 1995 to January 2001, he was Associate Chief Surgeon of Department of Urology, Beijing Chaoyang Hospital. From January 2001 to now, he has been Chief Surgeon and Department Director of Department of Urology, the Third Hospital of Peking University.

He has been working on kidney transplantation for a long time, and has completed more than 1,200 cases of kidney transplantation. More than 20 cases of combined pancreas-duodenum-kidney transplantation have been performed.⁸¹

BJDX-D3YY003 Hou Xiaofei

Job Title: Associate Chief Surgeon of Organ Transplant Center, Chief Surgeon of Urology, currently serving as Secretary of the Party Branch of the Department, Youth member of the Committee of Beijing Medical Organ Transplantation, Chinese Medical Association.

追查迫害法輪功國際組織 (追查國際)

World Organization to Investigate the Persecution of Falun Gong (WOIPFG)

To investigate the criminal conduct of all institutions, organizations, and individuals involved in the persecution of Falun Gong; to bring such investigation, no matter how long it takes, no matter how far and deep we have to search, to full closure; to exercise fundamental principles of humanity; and to restore and uphold justice in society

Personal Profile: Associate Chief Surgeon Hou Xiaofei went to study at the transplantation center of the University of Minnesota, the earliest and largest hospital in the world for pancreas transplantation, and has mastered this advanced technology. In 2001, he successfully carried out the combined pancreas-kidney transplant operation and the hospital is currently one of the hospitals with the largest number of such operations in China. ⁸²

Graduated from Peking University School of Medicine. Able to complete allogeneic kidney transplantation, combined pancreas-kidney transplant, etc.⁸³

BJDX-D3YY004 Xiu Dianrong

Job Title: Chief Surgeon, Associate Professor, Doctor of Medicine, Postgraduate Tutor.

Personal profile: Member of the Organ Transplantation Professional Committee of the Beijing Medical Association. He once engaged in clinical and basic research in abdominal surgery at Jiji Medical University in Japan. He has performed nearly 100 cases of liver transplantation. He is fairly good at classic liver transplantation procedures and improved piggyback procedures.⁸⁴

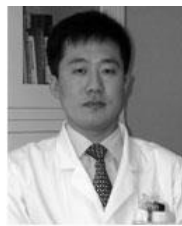

BJDX-D3YY005 Yuan Jiong

Job Title: Chief Surgeon of Organ Transplant Center.

Personal Profile: Graduated from Beijing Medical University. Professional focus: liver transplantation.⁸⁵

BJDX-D3YY006 Wang Changming

Job Title: Attending Surgeon of General Surgery

Personal Profile: In August 2002, he graduated from Peking University School of Medicine with a doctorate degree in medicine; from September 2002 to now, he has been working in the general surgery department of Peking University Third Hospital. From May 2000 to February 2001, he studied organ transplantation at St. Matteo Hospital, University of Bavia, Italy. Specialties: Liver Transplant. ⁸⁶

BJDX-D3YY007 Jiang Bin

Job Title: Associate Chief Surgeon of General Surgery

Personal Profile: In 1990, he got into the Department of Medicine of Beijing Medical University for a seven-year program, and graduated in 1997 with a master's degree. Since then, he has been working in the General Surgery Department of Peking University Third Hospital.

The Third Hospital of Peking University has completed more than 300 cases of liver transplantation since 2000. It is one of the four hospitals in Beijing approved by the Ministry of Health to perform liver transplantation, and as been involved in transplant work for 10 years, including donor acquisition, recipient surgery, perioperative management, postoperative follow-up, and management of complications of liver

transplantation.⁸⁷

BJDX-D3YY008 Yang Xiaoxia

Job Title: Liver Transplant Coordinator of General Surgery.

Personal Profile: From 1981 to 1984, she studied nursing at the attached health school of Beijing Medical College. From 1985 to 1988, she was a student in the library department of Beijing Radio and Television University. From 2000 to 2004, she was a student majoring in nursing in Peking University Health Science Center. After graduating in 1984, she worked in Peking University Third Hospital, working in the emergency room, pediatrics, operating room, surgery, animal laboratory, etc.

She is now Coordinator of the Organ Transplantation Center of Peking University Third Hospital.⁸⁸

BJDX-D3YY009 Song Shibing

Job Title: Chief Surgeon of General Surgery, Professor

Personal Profile: 1983.8-1989.7 he was a student at Medical Department of Beijing Medical University and received his bachelor's degree in medicine upon graduation; 1989.8-1991.8 he worked in surgery at the Third Hospital of Beijing Medical University; 1991.8-1994.7 he was a student at the Graduate School of Beijing Medical University and received his doctorate in clinical medicine at the end of the program; 1994.7-1999.9 he was an Attending Surgeon at the Department of Surgery of the Hospital; 1999.9-2004.9 he was an Associate Chief Surgeon at the Department of Surgery of the Third Hospital of Beijing Medical University. From June 2004 to now, he is the Chief Surgeon of the Department of Surgery of Peking University Third Hospital.

1997.11-1999.7 he studied at the Department of Physiology, University of Leeds and Department of Organ Transplantation, St. James University Hospital, and obtained a Master of Science (MSc). From 1997 to 1999, he studied liver transplantation at the University of Leeds in the United Kingdom, under the tutelage of Professor Peter Lodge, a famous British organ transplant expert, and conducted in-depth research on organ preservation and liver transplantation, and obtained a master's degree in Physiological Science Research from the University of Leeds. In recent years, he is mainly engaged in the clinical and scientific research of liver surgery, especially liver transplantation and liver resection. He has done more than 200 cases of donor liver extraction and more than 100 cases of liver transplantation.⁸⁹

BJDX-D3YY010 Yuan Chunhui

Job Title: Associate Chief Surgeon of General Surgery, Associate Professor. Good at liver transplantation.⁹⁰

BJDX-D3YY011 Ma Chaolai

Job Title: Associate Chief Surgeon of General Surgery

Personal Profile: From September 1992 to August 1999, he was a student at Beijing Medical University and obtained his master's degree in clinical medicine upon graduation. From August 1999 to August 2000, he worked at General Surgery Department, Third Hospital of Beijing Medical University. From August 2000 to August 2003, he worked and studied at Peking University Third Hospital, and received his Doctor of

Clinical Medicine. From August 2003 to now, he is with Peking University Third Hospital, as an attending surgeon. He is good at liver transplantation.⁹¹

BJDX-D3YY012 Wang Gang

Job Title: Associate Chief Surgeon of General Surgery. Good at liver transplantation.⁹²

BJDX-D3YY013 Sun Tao

Job Title: Associate Chief Surgeon of General Surgery

Personal Profile: From August 1999 to July 2004, he studied at Peking University School of Medicine and obtained a doctorate in medicine. Since August 2004, he has worked in the General Surgery Department of Peking University Third Hospital. Good at liver transplantation.⁹³

BJDX-D3YY014 Wang Dechen

Job Title: Associate Chief Surgeon of General Surgery

Personal Profile: Graduated from the Medical Department of Beijing Medical University (Peking University School of Medicine) in 1994, and has since worked in the General Surgery Department of the Third Hospital of Peking University, serving as a resident surgeon, attending surgeon and associate chief surgeon. Specializes in liver transplantation.⁹⁴

BJDX-D3YY015 Luo Kangping

Job Title: Associate Chief Surgeon of Urology. Specializes in kidney transplantation.⁹⁵

BJDX-D3YY016 Zhao Lei

Job Title: Associate Chief Surgeon of Urology

Personal Profile: Under the tutelage of Professor Guo Yinglu and Professor Chen Zhongxin, academicians of the Chinese Academy of Engineering and well-known urology experts, in 2003, he obtained a doctorate degree in medicine from Peking University Health Science Center. Able to independently complete kidney extraction and kidney transplantation.⁹⁶

BJDX-D3YY017 Wang Guoliang

Job Title: Associate Chief Surgeon of Urology

Personal Profile: In 2008, he studied laparoscopic technology at Cleveland Clinic Medical Center in the United States. In 2009, he participated in the general engineering class of the Urology Physician Training College and went to the University of Southern California (USC) to study urological tumors. In 2010, he went to Massachusetts General Hospital of Harvard University to study urological tumors. He has participated in exchanges and lectures at domestic

and international urology transplant conferences for many times. He has now independently performed hundreds of cases of kidney transplantation.⁹⁷

BJDX-D3YY018 Zhang Shudong

Job Title: Associate Chief Surgeon of Urology

Personal Profile: Graduated from Peking University School of Medicine, received a master's degree in medicine in 2004, and a doctor's degree in medicine in 2009. Under the tutelage of Professor Ma Lulin, a well-known urological expert, he worked as a resident surgeon, chief resident surgeon, attending surgeon, and associate chief surgeon in the Urology Department of Peking University Third Hospital after graduation, and engaged in urology clinical care, teaching and scientific research. In 2008, he went to Singapore Central Hospital and National University Hospital for further study at Urological Surgery; in 2009, he went to Hong Kong Prince of Wales Hospital for further study at Urological Surgery; in 2012, he was funded by the Postdoctoral Research Fund of the Austrian Ministry of Finance as a visiting scholar at Vienna University General Hospital; in 2012 he received the Dr. Cheng Yu-tung Scholarship from the Li Ka Shing Faculty of Medicine, University of Hong Kong as a "Clinical Fellow" ⁹⁸ at Queen Mary Hospital, Hong Kong. From January 2001 to July 2005, he participated in performing 615 cases of allogeneic kidney transplantation and donor extraction.⁹⁹

BJDX-D3YY019 Sun Lingbo

Job Title: Deputy Director of Cardiac Surgery, Doctor of Medicine, Master Supervisor, Associate Chief Surgeon

Personal Profile: Graduated from Beijing Medical University (now Peking University Health Science Center) in 1986, and worked in surgery at the Third Affiliated Hospital of Beijing Medical University (now Peking University Third Hospital) from 1986 to 1995. He returned to China in 2001. In February 2008, he was transferred from the Department of Cardiac Surgery of Beijing Anzhen Hospital to Peking University Third Hospital to become the Director of Cardiac Surgery. From 1995 to 2001, he studied in Japan and obtained a doctorate. Good at heart transplantation.¹⁰⁰

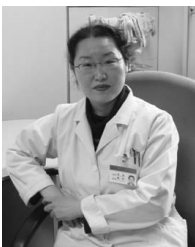

BJDX-D3YY020 Yan Tiansheng

Job Title: Chief Surgeon of Thoracic Surgery

Personal Profile: From 1990 to 1993, he was a doctoral student at the Chinese Academy of Medical Sciences and the School of Oncology, Peking Union Medical University. From 1985 to 1988, he was a master degree student at the Fourth Military Medical University of the People's Liberation Army. From 1978 to 1983, he was a undergraduate student of China Medical University. At present, he is committed to the clinical basis and application research of organ transplantation (lung transplantation, combined heart-lung transplantation, tracheal transplantation, thymus transplantation, etc.) based on minimally invasive surgery for lung cancer.¹⁰¹

BJDX-D3YY021 Hong Jing

Job Title: Chief Surgeon of Ophthalmology, Professor

Personal Profile: Since 1996, she has independently completed corneal transplantation. In 2002, she was appointed as the director of the Corneal Disease Center and the director of the Eye Bank of China Medical University. She has so far completed more than 800 cases of penetrating and lamellar keratoplasty and more than 100 cases of amniotic membrane

追查迫害法輪功國際組織 (追查國際)

World Organization to Investigate the Persecution of Falun Gong (WOIPFG)

transplantation. They include more than 100 cases of anterior segment reconstruction surgery on patients with severe acid-base burns and severe anterior segment infection; more than 50 cases of corneal transplantation combined with cataract and intraocular lens implantation; more than 50 cases of corneal transplantation combined with anti-glaucoma surgery; more than 30 cases of transplantation, amniotic membrane transplantation and culnoplasty; and more than 10 cases of corneal transplantation combined with vitrectomy. The hospital's operating tools rank first in the Northeast region.¹⁰²

BJDX-D3YY022 Xu Yonggen

Job Title: Associate Chief Surgeon of Ophthalmology, Associate Professor

Personal Profile: In 1990, he graduated from the Department of Clinical Medicine of Bethune Medical University (now the Bethune Medical School of Jilin University). In 2005, he received a doctorate degree in ophthalmology from Chungnam University, South Korea. He has done thousands of related operations, including various complex corneal transplant

operations.¹⁰³

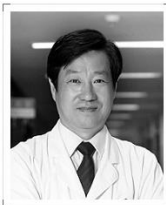

BJDX-D3YY023 Feng Yun

Job Title: Associate Chief Surgeon of Ophthalmology

Personal Profile: After graduation, she has worked in the Department of Ophthalmology, Peking University Third Hospital, and has served as a resident, chief resident, and attending surgeon. From September 2010 to 2011, she was a visiting scholar at the University of Reading, UK, majoring in corneal stem cell research and in vitro reconstruction of tissue engineered cornea. In 2011, she received a fellowship of ICO (international council of ophthalmology) and went to the University of Regensburg Eye Hospital in Germany to study the vitreoretinal specialty, and learned the latest corneal endothelial transplantation (DMEK). She is good at all kinds of corneal transplantation, corneal Endothelial transplantation, corneal limbal stem cell culture transplantation and corneal transplantation combined with vitrectomy, etc.¹⁰⁴

BJDX-D3YY024 Hao Yansheng

Job Title: Professor of Ophthalmology, Chief Surgeon.

Personal Profile: Graduated from the Medical Department of Xi'an Fourth Military Medical University in 1976, and received a master's degree in 1989. In 1989, he was promoted to the associate chief surgeon and associate professor of the Department of Ophthalmology. At the end of 1993, he was promoted to the chief surgeon of the Department of Ophthalmology. In 1995 he became a professor. In 2001 he became chief surgeon and professor at Peking University Ophthalmology Center. In 1988, he was on a short-term study tour at the University of California, San Francisco. From 1993 to 1994, he was a visiting scholar in the Department of Ophthalmology of the Chinese University of Hong Kong. He specializes in corneal transplant combined surgery, etc.¹⁰⁵

BJDX-D3YY025 Ma Zhizhong

Job Title: Professor of Ophthalmology.

Personal Profile: Graduated from the Medical Department of China Medical University in 1972, and graduated from the Military Medical Training College in 1983 with a master's degree. After graduation, he worked in the Department of Ophthalmology, PLA General Hospital. In 2001, he served as the executive deputy director of Peking University

Ophthalmology Center. He is skilled at corneal transplantation.¹⁰⁶

BJDX-D3YY026 Wanfeng

Job Title: Director of Cardiac Surgery, Peking University Third Hospital, Director of Department of Cardiovascular Surgery, Peking University, Chief Surgeon, Professor

Personal Profile: Graduated from Hunan (Xiangya) Medical College in 1983. Assigned to Fuwai Cardiovascular Hospital of Chinese Academy of Medical Sciences and worked there for 5 years and promoted to the level of attending surgeon. In 1988, he went abroad and lived in Europe and the United States for 8 years. He successively worked as a foreign clinician in the Cardiac Surgery Department of the Paris XII University School of Medicine (1988-1990), a visiting professor at the Cardiac Surgery Research Laboratory of the Yale University School of Medicine in the United States (1990-1991), clinical researcher of Heart and Lung Transplantation at University Hospital of Ontario, Canada (1993-1994), visiting professor and clinical researcher of Cardiac Surgery at St. Vincent Medical Center, USA (1991-1996).¹⁰⁷

WOIPFG's Investigative Report on the Alleged Organ Harvesting of Living Falun Gong Practitioners at Huashan Hospital Affiliated to Fudan University and Its Staff Members Suspected of Participation

Hospital Name: Huashan Hospital Affiliated to Fudan University (also referred to as "Huashan Hospital")

Hospital Address: No.12, Urumqi Central Road, Shanghai, P.R.C.

Preface

WOIPFG investigation shows that Huashan Hospital Affiliated to Fudan University has been involved in a large number of organ transplant operations. The wait time for obtaining organ source for transplant operations in this hospital is extremely short. There are cases where the organ source was available the same day as the patient requested for it. The investigation shows that there are abundant donors of organs available, with some on demand. There are evidences showing that transplant operations take place on a daily basis in this hospital. There are a large number of liver transplant operations ongoing. There are occasions where this hospital provides liver organ at the demand from other hospitals.

Against the backdrop of a state crime for organ harvesting by the Chinese Communist Party, Huashan Hospital Affiliated to Fudan University is believed to have been involved in harvesting organs **from** living Falun Gong practitioners.

I. Overview of the Organ Transplant Center in Huashan Hospital Affiliated to Fudan University

Huashan Hospital Affiliated to Fudan University, formerly known as General Hospital of China Red Cross, was established in 1907, with a good reputation within and outside of China¹⁰⁸. The Research Institute of Fudan University on Organ Transplant was founded in February 2002 and headed by academician Zheng Shusen, with academician Qiu Fazu among its senior consultants. The research is focused on clinical and basic research about large organ transplant¹⁰⁹. Ding Qiang, president of Huashan Hospital, specializes in kidney transplant operations¹¹⁰.

Wang Zhengxin, deputy director of the department of general surgery and director of Liver Transplant Center, has served as chief surgeon **in** more than 1,400 liver transplant operations and is among those

追查迫害法輪功國際組織 (追查國際)

World Organization to Investigate the Persecution of Falun Gong (WOIPFG)

To investigate the criminal conduct of all institutions, organizations, and individuals involved in the persecution of Falun Gong; to bring such investigation, no matter how long it takes, no matter how far and deep we have to search, to full closure; to exercise fundamental principles of humanity; and to restore and uphold justice in society

considered as most experienced experts on liver transplant operations in China. He has rich experience in the diagnosis and treatment of hepatobiliary diseases. He has treated thousands of patients with such disease. He has rich experience in the comprehensive treatment after a liver transplantation for liver cancer and in dealing with the complications after liver transplant operations. Since May 2014, additional personnel joined Huashan Hospital Affiliated to Fudan University. Thanks to the additional personnel, more than 800 liver transplant operations have been completed, in which about 120 liver transplant operations were performed for children. Currently, the average annual number of liver transplant operations completed stands between 180 and 230 cases¹¹¹.

II. The liver donor for transplant operation happened to be available on the day the patient was transferred to Huashan Hospital.

There was a case where a family desperately sought organ when the father in the family was hospitalized in No. 5 People's Hospital in Shanghai. It happened on April 24, 2016. Here is part of the conversation among the doctor and the family members.

- Doctor from No. 5 People's Hospital: "His father is in a critical situation due to hepatic failure. He must be hospitalized immediately otherwise he might lose his life. He must receive treatment right away and stay in the hospital. Don't bother to go home to bring personnel effects."
- The family member: "On April 28, 2016, thanks to some connections we have, we finally got the chance to transfer my father to Huashan Hospital after staying four days in No. 5 People's hospital. We were very lucky as we were informed by the doctor on that same day that there was a liver source suitable for my father¹¹²".

III. Phone investigation found the following: The possibility to choose the organ needed, same day operation upon demand, having sufficient organ sources, the number of liver transplant operations being large, liver source available at request, operations taking place on a daily basis.

Investigation Subject: A doctor on duty from the department of Liver Transplant, Huashan Hospital Affiliated to Fudan University

Date of investigation: June 25, 2018 (telephone number dialed: +86-2152887174)

Highlights:

- Investigator: Is it possible to find young and healthy donors ?
 - Doctor: As for such details, you would need to come over and have a conversation in person with our professor Wang Zhengxin from the Organ Transplant Team.
- (Recording 1. Download: [MP3](#); Transcript Download: [pdf 47](#))¹¹³

Investigation Subject: A nurse from Liver Transplant Ward of Huashan Hospital Affiliated to Fudan University

Date of investigation: November 30, 2019 (telephone number dialed : +86-2152887170)

Highlights:

- Nurse: We have had a liver transplant operation completed within three days after the patient admitted to the hospital. We also have had cases where patients waited for a month for operation.

(Recording 2. Download: [MP3](#); Translation Download: [pdf 165](#))¹¹⁴

Investigation Subject: A doctor who specializes in liver transplant in Huashan Hospital Affiliated to Fudan University¹¹⁵

Date of investigation: August 31, 2017 (telephone number dialed: +86-2152889999)

Highlights:

- Doctor: For liver transplant operation, for a patient with blood type A, you should be able to find an organ source suitable to you within one-month time. We perform more than a hundred liver transplant operations every year. For this year, so far, we have performed 80 to 90 operations.

Investigation Subject: A doctor from Doctor's Office in the department of Liver Transplant, Huashan Hospital Affiliated to Fudan University¹¹⁶.

Date of investigation: November 02, 2016 (telephone number dialed: +86-2152887174)

Highlights:

- Doctor: We have performed more than 100 liver transplant operations so far this year. We have just performed two operations today. We have rather sufficient organ supply here.

(Recording 4 download: [MP3](#); please see [Addendum 22](#))

Investigation Subject: A doctor on duty from the department of Liver Transplant, Huashan Hospital Affiliated to Fudan University¹¹⁷.

Date of investigation: March 07, 2017 (telephone number dialed: +86-2152887174)

Highlights :

- Doctor: For liver transplant operations, we have performed more than 100 last year. Some have been operated right after they were admitted to the hospital. We have not stopped doing it since the Chinese New Year. We have performed the operations on a daily basis. It is ongoing on a regular basis.

(Download Recording 5 [MP3](#), please see [Addendum 23](#))

Investigation Subject: A doctor from Liver Transplant Ward, The No.1 Affiliated Hospital to Guiyang Medical College¹¹⁸

Date of investigation: August 14, 2017 (telephone number dialed: +86-85186773015)

Highlights :

- Doctor: In the past, doctors from our hospital performed liver transplant operations on our own. Then, we stopped doing it for three years. We restarted this year. We completed the first operation this past Saturday with a liver received after we waited for more than a month. We invited the doctor from Huashan Hospital Affiliated to Fudan University to join us when we were sure that the liver was available. The doctor flew over here. The doctor that we invited is the one who has performed the liver transplant operations the most in Shanghai.

(Recording 6 download: [MP3](#); transcript download: [pdf 6](#))

Investigation Subject: Doctor Zheng for liver transplant operation from Huashan Hospital Affiliated to Fudan University¹¹⁹

Date of investigation: October 23, 2017 (telephone number dialed: +86-2152887174)

Highlights :

- Doctor: we have the capacity to perform 200 organ transplant operations annually, we have performed almost 200 operations this year. We will be performing more operations this year than last year. In principle, the liver organ source is confidential!...

(Recording 7 download: [MP3](#) ; transcript download: [pdf 7](#))

IV. List of responsible persons

SFDX-HS 001 Ding, Qiang

追查迫害法輪功國際組織 (追查國際)

World Organization to Investigate the Persecution of Falun Gong (WOIPFG)

To investigate the criminal conduct of all institutions, organizations, and individuals involved in the persecution of Falun Gong; to bring such investigation, no matter how long it takes, no matter how far and deep we have to search, to full closure; to exercise fundamental principles of humanity; and to restore and uphold justice in society

Title/Profession: President of Huashan Hospital, deputy director of the Institute of Research on Urology, Fudan University, and deputy director of the Institute of Research on Organ Transplant, Fudan University.

Resume: Graduated from the school of clinical medicine of Shanghai Medical University in 1995 with a doctorate degree, he was promoted to associate professor in 1996 and served as deputy director of Department of Urology at Huashan Hospital. Being promoted to professor in 1999, he became director of Department of Urology in 2002. He has served as the vice president of Huashan Hospital since December 2003, and the president of Huashan Hospital since May 2008. He has been "largely involved in kidney transplant operations"¹²⁰.

SFDX-HS 002 Qian, Jianmin

Title/Profession: Chief physician, professor, head of Department of Hepatobiliary Surgery, having a leading role in the field of liver transplant and liver surgery.

Resume: He organized and performed more than 150 liver transplant operations, of which 64 with living donors. He has treated patients who have various chronic end-stage liver cirrhosis, severe hepatitis or portal hypertension upper gastrointestinal bleeding with liver transplantation operations.¹²¹

SFDX-HS 003 Zhang, Hao

Title/Profession: Deputy chief physician, associate professor of Liver Disease Diagnosis and Treatment Center and Liver Transplantation Center.

Resume: From 1986 to 1991, he studied at the school of clinical medicine of Nanjing Medical University and obtained a bachelor's degree. After graduation, he was engaged in clinical work in general surgery. From 1994 to 1997, he studied in general surgery from Nanjing Medical University and received his master's degree. He received his doctorate degree in general surgery in 2000. Since 1995, has completed more than 100 cases of classic liver transplantation, piggyback liver transplantation, modified piggyback liver transplantation, and more than 20 cases of living donor liver broodstock partial liver transplantation.¹²²

SFDX-HS 004 Cai, Duan

Title/Profession: Chief physician in the Department of Hepatobiliary Surgery, professor

Resume: He is specialized in liver transplant operations.¹²³

SFDX-HS 005 Rui, Xiaohui

Title/Profession: Deputy chief physician in the Department of Hepatobiliary Surgery

Resume: Born in February 1969, he graduated from the School of Medicine, Shanghai Medical University in June 1993 and obtained his bachelor's degree in medicine. In July 1993, he joined the department of surgery in Huashan Hospital Affiliated to Shanghai Medical University. In 1995, he was admitted to the Department of Surgery, Huashan Hospital as an in-service clinical medicine graduate student. His tutor was Professor Cai Duan of Huashan Hospital. He became a doctorate candidate in 1997 and obtained his doctorate degree in medicine in June 2000. In 1998 he was promoted to attending surgeon and in 2003 he was promoted to deputy chief surgeon in the department of surgery. He is a member of the Shanghai Society of Integrative Chinese and Western Medicine of the Chinese Medical Association. Since 2003, he has participated in nearly 30 cases of clinical orthotopic liver transplantation and one case of clinical liver-kidney transplantation.¹²⁴

World Organization to Investigate the Persecution of Falun Gong (WOIPFG)

To investigate the criminal conduct of all institutions, organizations, and individuals involved in the persecution of Falun Gong; to bring such investigation, no matter how long it takes, no matter how far and deep we have to search, to full closure; to exercise fundamental principles of humanity; and to restore and uphold justice in society

SFDX-HS 006 Zhang, Qunhua

Title/Profession: Deputy director of Department of General Surgery, chief physician, professor.

Resume: He is specialized in liver transplant operations.¹²⁵

SFDX-HS 007 Qin, Lunxiu

Title/Profession: Assistant dean, director of general surgery and director of hepatobiliary surgery, professor and chief physician.

Resume: Chief scientist of the Program 973 (a.k.a. China's National Basic Research Program) and recipient of Special Government Allowances of the State Council of P.R.C. He is specialized in liver transplant operations and completed nearly 100 liver transplant operations.¹²⁶

SFDX-HS 008 Wang, Xiang

Title/Profession: Associate chief physician and associate professor of Urology

Resume: He was born in January 1968 and is a tutor for graduate student. Graduated from the English Medicine Class of Shandong Medical University in 1992, he received a doctorate degree from Fudan University, School of Medicine (formerly known as Shanghai Medical University) in 1999. From 2000 to 2001, he was a postdoctoral fellow, University of Montreal, Canada. He was a visiting scholar at Kotaki University in 2003. He is specialized in kidney transplantation.¹²⁷

SFDX-HS 009 Zhang, Ming

Title/Profession: Chief physician and associate professor of Nephrology

Resume: He is specialized at tissue typing before kidney transplant operation and treatment on the complications after the transplant operation.¹²⁸

SFDX-HS 010 Zhang, Yuanfang

Title/Profession: President of Huashan Hospital Affiliated to Fudan University, Director of Institute of Research on Urology, Fudan University; member of Organ Transplant Society of The Chinese Medical Association

Resume: Graduated from the school of medicine, Shanghai First Medical College (now known as Shanghai Medical College of Fudan University) in 1963, he was assigned as resident surgeon in Zhongshan Hospital Affiliated to Shanghai First Medical College in September 1963 and became attending surgeon since 1979. Since 1986, he served as the deputy chief physician of the department of urology, Zhongshan Hospital Affiliated to Shanghai Medical University. From 1988, he served as vice president of Zhongshan Hospital Affiliated to Shanghai Medical University. In 1989, he became qualified professor for surgery. He received his qualification as mentor for PhD students in 1990. In March 1995, he was transferred to Huashan Hospital affiliated to Fudan University in Shanghai as the hospital president. From February 1980 to April 1982, he studied in the fields of urology, hemodialysis and kidney transplantation at the Urology Hospital of the University of Belgrade, Yugoslavia. From October 1992 to August 1994, he studied urology and molecular biology in the Department of Urology, Long Island College Hospital, State University of New York. The focus area of his study is organ transplant.¹²⁹

SFDX-HS 011 Wang, Yiqing

Title/Profession: Director of Cardiothoracic Surgery, chief physician, professor

追查迫害法輪功國際組織 (追查國際)

World Organization to Investigate the Persecution of Falun Gong (WOIPFG)

To investigate the criminal conduct of all institutions, organizations, and individuals involved in the persecution of Falun Gong; to bring such investigation, no matter how long it takes, no matter how far and deep we have to search, to full closure; to exercise fundamental principles of humanity; and to restore and uphold justice in society

Resume: Graduated from the School of Medicine, Fudan University, (formerly known as Shanghai Medical University) in 1990, he worked in Shanghai Institute of Research on Cardiovascular Diseases as well the Department of Cardiovascular Surgery from Zhongshan Hospital Affiliated to Fudan University. He has rich clinical experience in cardiovascular surgery such as heart transplantation. He successfully performed several heart transplant operations.¹³⁰

SFDX-HS 012 Wang, Zhengxin

Profession titles: MD-PhD, deputy director of department of general surgery at Huashan Hospital Affiliated to Fudan University, director of Liver Transplant Center. At present, he is a member of the Organ Transplantation Branch of the Chinese Medical Doctor Association, a member of the Transplant Medicine Professional Committee of the Chinese Research Hospital Association, a member of the Basic Science Group of the Organ Transplantation Branch of the Chinese Medical Association, a member of the All-Army Pancreatics Group and the Surgery Group, a youth member of the Organ Transplantation Professional Committee of the Shanghai Branch of the Chinese Medical Association, a youth member of the Expert Committee of the Shanghai Liver Disease Center, and a member of the Asian Surgical Association. He also sits on the boards of editors of Chinese Journal of Hepatobiliary Surgery, Chinese Journal of Clinicians Electronic Edition, and Organ Transplantation.

Resume: In 2007, he went to further his study at the Queen Mary Hospital in Hong Kong and received guidance from academician Dr. Fan Sheung Tat in areas such as liver transplantation from living donor and various types of regular liver cancer resection surgery. In 2010, he went to Kaohsiung Chang Gung Memorial Hospital in Taiwan to study pediatric living donor liver transplantation. As chief surgeon or first assistant surgeon, he performed more than 800 liver transplant operations. He successfully performed the first cases of the hospital for ones who received the second-time, third-time and fourth-time liver transplantations, the first case of liver transplantation for one who was under emergency for severe liver disease, combined liver and kidney transplantation and other complicated and difficult operations.¹³¹ He has served as chief surgeon in more than 1,400 liver transplant operations¹³².

WOIPFG's Investigative Report on the Alleged Organ Harvesting of Living Falun Gong Practitioners at Renmin Hospital of Wuhan University (also known as Hubei General Hospital) and Its Staff Members Suspected of Participation

Preface

Renmin Hospital of Wuhan University (also known as Hubei General Hospital) is one of the first local hospitals in China to carry out organ transplants. Its number of kidney transplants has ranked first in Hubei Province for many years. Since 2003, the hospital has successively carried out Hubei's first combined liver-kidney, combined heart-kidney, and combined heart-lung transplants. During the COVID-19 pandemic, the hospital performed the first lung transplant on COVID-19 patient and the first second lung transplant in Hubei Province. The hospital is as famous as Wuhan Tongji Hospital and Wuhan Army General Hospital, which are all major organ transplant hospitals in Hubei Province. In October 2017, Renmin Hospital of Wuhan University claimed that it had performed 300 kidney transplants that year. From 2005 to March 2015, the hospital has performed dozens of heart transplant surgeries. In 2015, the wait time for a heart transplant in the hospital was only two weeks. In 2018, four heart transplants were completed in seven days. The hospital has performed dozens of lung transplants and the first second lung transplant in Hubei Province with only one month wait time for the organ. Given the background of the CCP's state crime of live organ

追查迫害法輪功國際組織 (追查國際)

World Organization to Investigate the Persecution of Falun Gong (WOIPFG)

To investigate the criminal conduct of all institutions, organizations, and individuals involved in the persecution of Falun Gong; to bring such investigation, no matter how long it takes, no matter how far and deep we have to search, to full closure; to exercise fundamental principles of humanity; and to restore and uphold justice in society

harvesting, the hospital is suspected of participating in the crime of live organ harvesting from Falun Gong practitioners and other groups.

I. Hospital Overview

Renmin Hospital of Wuhan University covers an area of 130,000 square meters and has a construction area of 310,000 square meters. There are more than 2,000 employees, including more than 500 professionals with senior professional titles. The hospital has 59 clinical medical and technical departments and 1,447 beds.

The hospital's medical services cover mainland China, Hong Kong, Macau, and some other countries in Asia and South America. The hospital is also responsible for the health care tasks of Chinese leaders, foreign dignitaries, and overseas Chinese while they are in Hubei¹³³.

Address: 99 Zhangzhidong Road (formerly Ziyang Road), 238 Jiefang Road, Wuchang District, Wuhan, Hubei

II. The hospital can perform multi-organ transplants and claims to rank first in Hubei Province in terms of the number of kidney transplants.

Renmin Hospital of Wuhan University is one of the first hospitals in China to carry out organ transplants, and various organ transplant surgeries have been performed there¹³⁴. Kidney transplantation is a specialty of its Urology Department, with the number of transplants ranking first in Hubei Province. Since 2003, its hepatobiliary endoscopic surgery department has also successively carried out liver and combined liver-kidney transplants and heart transplants¹³⁵.

III. The hospital is one of the largest hospitals engaged in organ transplants in Wuhan.

In 2006, a witnesses stated that Wuhan Tongji Hospital, Hubei General Hospital, and Wuhan Army General Hospital were the largest hospitals in Wuhan engaged in organ transplants, mainly kidney transplants¹³⁶. In 2006, during a WOIPFG telephone investigation, both Wuhan Tongji Hospital and Wuhan Army General Hospital admitted to using organs from Falun Gong practitioners¹³⁷.

On November 1, 2020, at the launch ceremony of the "Relay for Life" hosted by the China Organ Transplantation Development Foundation and executed by the Party Committee of Renmin Hospital of Wuhan University, Huang Jiefu said that China had become the second largest country in the world in organ transplantation and was expected to become the world's largest country in organ transplantation in two to three years. Zhang Dingyu, Deputy Director of the Hubei Provincial Health Commission, said that Hubei is the birthplace of organ transplantation in China.

Wan Honghui, Party Secretary of the Renmin Hospital of Wuhan University, said that the hospital has made breakthroughs in organ transplantation, including performing Hubei's first combined liver-kidney transplant, combined heart-kidney transplant, combined heart-lung transplant, "mirror man" lung transplant, and other difficult surgeries." In particular, the hospital successfully completed the first lung transplant on a severely ill patient with COVID-19 in Hubei.¹³⁸

IV. Telephone investigations reveal large number of organ transplants.

Investigation Subject: A kidney transplant doctor at the Transplantation Department of Renmin Hospital of Wuhan University¹³⁹

Investigation Time: 2017-04-16 (+86-2788041919)

追查迫害法輪功國際組織 (追查國際)

World Organization to Investigate the Persecution of Falun Gong (WOIPFG)

Investigation Time: 2017-10-29 (+86-2786708757)

Investigation Summary: We have done nearly 200 kidney transplants this year. There were both young and old donors.¹⁴⁰

(Recording 2 Download [MP3](#). Complete transcript: [pdf 3](#))

Investigation Subject: Doctor's office at the Transplantation Department of Renmin Hospital of Wuhan University

Investigation Time: 2017-10-30 (+86-2786708757)

Investigation Summary: We have done less than 100 liver transplants this year. We mainly focus on kidney transplants and have performed over 300 cases this year.¹⁴¹

(Recording 3 Download [MP3](#). Complete transcript: [pdf 173](#))

V. The wait time for organ transplants in this hospital is short, and multiple transplant surgeries were performed simultaneously.

From 2005 to March 2015, Renmin Hospital of Wuhan University has carried out dozens of heart transplants¹⁴².

1. In March 2015, a patient with heart attack had a heart transplant after waiting two weeks¹⁴³.
2. In June 2015, four organ transplant surgeries, including one liver transplant, two kidney transplants, and one heart transplant, were performed simultaneously¹⁴⁴.
3. From May 31 to June 6, 2018, the hospital performed four heart transplants in seven days¹⁴⁵.

VI. The hospital performed the first second lung transplant in Hubei Province, and the wait time for the organ was one month.

As of September 3, 2022, the Thoracic Surgery Department of Renmin Hospital of Wuhan University (Hubei General Hospital) has successfully performed lung transplants on dozens of patients with chronic end-stage lung diseases since the lung transplant surgery was launched there in 2016¹⁴⁶.

On April 20, 2020, Chen Jingyu, Lin Huiqing, and other national experts in lung transplantation, together with the teams from the thoracic surgery, cardiac surgery, and anesthesiology departments of Renmin Hospital of Wuhan University, performed a double lung transplant on a patient with COVID-19. The donated organ was transported through the green channel for organ transportation, and the wait time for the organ was only one month¹⁴⁷.

On August 30, 2022, Geng Qing, leader of the lung transplant team and Director of the Thoracic Surgery Department of Renmin Hospital of Wuhan University (Hubei General Hospital), led Jiang Wenyang, Zhang Xinghua, Wang Wei, and others to form a lung transplant team. The team performed a second lung transplant on a patient from Liaoning Province, and the wait time for the organ was one month. This is also the first second lung transplant performed in Hubei¹⁴⁸.

VII. Main Responsible Persons:

追查迫害法輪功國際組織 (追查國際)

World Organization to Investigate the Persecution of Falun Gong (WOIPFG)

To investigate the criminal conduct of all institutions, organizations, and individuals involved in the persecution of Falun Gong; to bring such investigation, no matter how long it takes, no matter how far and deep we have to search, to full closure; to exercise fundamental principles of humanity; and to restore and uphold justice in society

WHDX-RMY001 Zhou Jiangqiao

Position and Title: Director of the Department of Organ Transplantation, chief surgeon, master student supervisor

Personal Profile: He is a member of the Organ Transplantation Branch of the Chinese Medical Association, a standing committee member of the Organ Transplantation Physicians Branch of the Chinese Medical Doctor Association, and a Deputy Director of the Organ Transplantation Branch of the Hubei Provincial Medical Association. He is an editorial board member of "Chinese Journal of Transplantation (Electronic Edition)", "Organ Transplantation", "Journal of Wuhan University (Medical Edition)" and other magazines. He has been engaged in organ transplantation for fifteen years and has so far completed nearly a thousand kidney transplants on uremia patients, with a success rate of above 90%. He specializes in kidney transplantation, diagnosis and treatment of patients with end-stage renal disease, maintaining long-term survival of the transplanted person/kidney, and individualized treatment after kidney transplantation¹⁴⁹.

WHDX-RMY002 Wang Zhiwei

Position and Title: Director of Cardiovascular Surgery Department. Head of heart transplantation¹⁵⁰.

WHDX-RMY003 Liu Xiuheng

Position and Title: Chief surgeon, professor of the Department of Urology, Director of the General Surgery Department, Director of the Department of Urology, Director of the No. 1 Department of Urology, national member of the Organ Transplantation Branch of the Chinese Medical Association, standing editorial board member or editorial board member of the Chinese Journal of Organ Transplantation and other magazines. He specializes in kidney transplant surgery¹⁵¹.

WHDX-RMY004 Zhan Bingyan

Position and Title: Chief surgeon, professor of the Department of Urology, member of the International Society of Organ Transplantation, member of the Organ Transplantation Branch of the Chinese Medical Association¹⁵²

WHDX-RMY005 Hu Yunfei

追查迫害法輪功國際組織 (追查國際)

World Organization to Investigate the Persecution of Falun Gong (WOIPFG)

To investigate the criminal conduct of all institutions, organizations, and individuals involved in the persecution of Falun Gong; to bring such investigation, no matter how long it takes, no matter how far and deep we have to search, to full closure; to exercise fundamental principles of humanity; and to restore and uphold justice in society

Position and Title: Chief surgeon, associate professor of the Department of Urology. He specializes in kidney transplant¹⁵³.

WHDX-RMY006 Zhu Hengcheng

Position and Title: Chief surgeon, associate professor of the Department of Urology, member of the Organ Transplantation Branch of Hubei Provincial Medical Association, member of the Organ Transplantation Branch of Wuhan Medical Association. From 2001 to 2003, he worked as a postdoctoral researcher at the Nephrology Center of Zhejiang University School of Medicine. He specializes in kidney transplantation¹⁵⁴.

WHDX-RMY007 Chen Zhiyuan

Position and Title: Associate chief surgeon of the Department of Urology

Personal Profile: He is familiar with all aspects of perioperative management of kidney transplantation¹⁵⁵.

WHDX-RMY008 Ge Minghuan

Position and Title: Associate chief surgeon of the Department of Urology, member of Wuhan Organ Transplantation Society

Personal Profile: He specializes in kidney transplant related treatments¹⁵⁶.

WHDX-RMY009 Ding Youming

Position and Title: Chief surgeon, professor, Director of Hepatobiliary Surgery Department

Personal Profile: He has been engaged in hepatobiliary and pancreatic surgery and clinical nutrition for 30 years. He studied laparoscopic techniques in France. He performed clinical liver transplants and combined liver-kidney transplants¹⁵⁷.

WHDX-RMY010 Yang Yanning

追查迫害法輪功國際組織 (追查國際)

World Organization to Investigate the Persecution of Falun Gong (WOIPFG)

To investigate the criminal conduct of all institutions, organizations, and individuals involved in the persecution of Falun Gong; to bring such investigation, no matter how long it takes, no matter how far and deep we have to search, to full closure; to exercise fundamental principles of humanity; and to restore and uphold justice in society

Position and Title: Chief surgeon of Ophthalmology, associate professor, Deputy Director of Department of Ophthalmology

Personal Profile: Doctor of Ophthalmology, clinical hospital of University of Duisburg-Essen, Germany. Postdoctoral fellow at Shiley Eye Center, University of California, San Diego, USA. She specializes in various corneal transplants¹⁵⁸.

WHDX-RMY011 Yuan Jing

Position and Title: Postdoctoral fellow, associate chief surgeon of the Ophthalmology Center

She specializes in corneal transplant surgery¹⁵⁹.

WHDX-RMY012 Ai Ming

Position and Title: Chief surgeon of Ophthalmology, associate professor, Deputy Director of Ophthalmology Center, Director of Ophthalmology Department III

Personal Profile: He was a visiting scholar at the University of Southern California Eye Hospital. He specializes in corneal transplants¹⁶⁰.

WHDX-RMY013 Geng Qing

Date of birth: May 1972

Position and Title: Director of Thoracic Surgery Department, professor, chief surgeon of Renmin Hospital of Wuhan University

Personal Profile:

1999.07-2002.10 Attending surgeon of Thoracic Surgery, Peking University Shenzhen Hospital;

2002.10-2005.11 Associate chief surgeon, Thoracic Surgery, Peking University Shenzhen Hospital;

2005.11-2009.10 Chief surgeon, Thoracic Surgery, Peking University Shenzhen Hospital;

2008.03-2008.09 Visiting scholar at the University of Washington, USA;

2008.09-2009.09 Postdoctoral fellow at LOYOLA University Medical Center, USA;

2009.10-present Chief surgeon of Thoracic Surgery, Renmin Hospital of Wuhan University.

Scientific Research Results: In 2020, *Mechanism of Ischemia-reperfusion Injury in Lung Transplantation and Key Clinical Technology Innovations* won the first prize of Hubei Province Science and Technology Progress Award (first author)¹⁶¹.

追查迫害法輪功國際組織 (追查國際)

World Organization to Investigate the Persecution of Falun Gong (WOIPFG)

To investigate the criminal conduct of all institutions, organizations, and individuals involved in the persecution of Falun Gong; to bring such investigation, no matter how long it takes, no matter how far and deep we have to search, to full closure; to exercise fundamental principles of humanity; and to restore and uphold justice in society

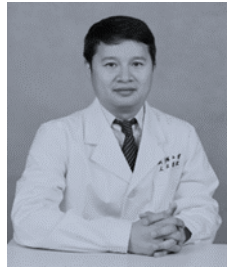

He is the leader of the lung transplant team¹⁶².

WHDX-RMY014 Jiang Wenyang

Position and Title: Associate chief surgeon of Thoracic Surgery Department of Renmin Hospital of Wuhan University. He specializes in lung transplantation¹⁶³.

WHDX-RMY015 Zhang Xinghua

Position and Title: Associate chief surgeon of Thoracic Surgery Department of Renmin Hospital of Wuhan University¹⁶⁴. He is a member of the lung transplant team¹⁶⁵.

WHDX-RMY016 Wang Wei

Position and Title: Attending surgeon of Thoracic Surgery Department of Renmin Hospital of Wuhan University, member of the International Society of Heart and Lung Transplantation (ISHLT)¹⁶⁶

He is a member of the lung transplant team¹⁶⁷.
